HERITAGE AUCTIONS

Dear Bidder,

For more than a quarter of a century, Heritage and the Long Beach Coin Expo have combined talents and resources to present the Official Signature auctions – a long history of cooperation and success. At last count, we are getting close to our 50th Long Beach U.S. Coins Signature auction in all. Quite an achievement!

The June 2017 Expo follows our April/May Central States Numismatic Society event that saw Heritage realize nearly \$23 million from U.S. Coins alone, including a record \$517,000 for a beautiful PR65 Cameo 1866 Liberty double eagle. Currency auctions added more than \$10 million to Heritage's Central States total, and our World & Ancient Coins auction at the Chicago Cultural Center brought another \$6.3 million for a grand total of nearly \$40 million from the combined Chicago events. We are happy to report that the numismatic marketplace is alive and well.

We fully expect the current Long Beach Signature auction to continue this positive trend. Three floor sessions include a high-value Premier Session on Thursday evening with a 6:00 p.m. (Pacific Time) start. As always, our Long Beach highlights include multiple series and collector specialties.

Gold is among the most active market segments, and the current auction has gold galore.

- A Kellogg & Humbert gold ingot tips the scale at a hefty 107.76 ounces. This is a massive and highly attractive ingot from the historic (and ongoing) *S.S. Central America* salvage effort.
- A high-end, Choice Uncirculated 1907 Wire Rim ten dollar gold piece represents Augustus Saint-Gaudens intended design. Graded MS64+ PCGS Secure with CAC endorsement, this is a smooth near-Gem example.
- Other important gold lots include a 1921 double eagle in MS62 PCGS – a major series rarity at that grade – plus a tremendous run of Carson City double eagles from multiple consignors.

We have handled several important consignments of U.S. patterns in recent events, and Long Beach is no exception. Many rare patterns are included, including some lots that are, we believe, pedigreed to the historic Farouk holdings and other fine collections. Highlights are numerous, such as:

- An 1871 Indian Princess quarter dollar struck in silver, Judd-1093, PR64 PCGS with CAC, with starless field and the date in exergue – William Barber's posthumous redesign after Longacre's death.
- A pair of silver dollar patterns struck in aluminum: 1885 Snowden dollar, Judd-1749, certified PR65 PCGS with experimental edge lettering, low R.7, and an 1875 Commercial Trade dollar, Judd-1425, graded PR66 Cameo PCGS, one of only two known examples struck in the off-metal aluminum.
- A rare 1874 half eagle struck in copper, Ex: Bass, Judd-1371, certified PR64 Red and Brown, one of only two or three examples known and R.8 on the rarity scale.

U.S. Colonials include several rare issues:

- A Gem Mint State 1652 Pine Tree shilling, Noe-7 – we believe the finest of 11 known examples – struck on a Large Planchet, No Pellets at Trunk, graded MS65 PCGS with CAC endorsement. This is a quintessential Colonial coin (Ex: Clapp, Wurtzbach, Clarke, Boyd, and Ford-Manley), plated in Wurtzbach.
- A 1787 Hercules Head Connecticut copper, Miller 7-I, W-2830, R.6, certified MS62 Brown NGC. Our cataloger (Mark Borckardt) states: "there is no question that this example is far finer than any others that are known to us."
- The finest-known Ryder 4-D 1788 Massachusetts cent certified MS65 Brown NGC, sharply struck with the Arrows in Left Talon. Finer than the Partrick MS64 Brown coin, which was exceptional in its own right.

Silver type is seemingly immune to most market fluctuations, especially among the early issues and key dates and Mints. Be sure to check out these lots:

- An attractive and rare 1794 Flowing Hair half dollar, O-107 (T-5), a scarce die pairing in a Choice collector grade of Fine 15 PCGS.
- A 1797 Draped Bust dime, JR-2, 13 Stars obverse, one of perhaps just three Mint State pieces known, certified MS62 PCGS.
- An 1852 Seated quarter in the remarkable grade of MS66 PCGS, a satiny and richly toned example, with just one piece finer in the combined population reports.
- An 1889-CC Morgan dollar in the high grade of MS64 NGC – a great rarity in near-Gem condition.

THE FARIS COLLECTION

We have a Featured Collection that deserves special mention here, led by some extremely “sporty” quarter eagles. This compact consignment of six gold coins appears in the Premier Session, including an impressive 1808 quarter eagle certified XF45 PCGS, an essential one-year type. It is an important collector-grade coin for quarter eagle specialists. Also needed for type, a 1796 No Stars on Obverse quarter eagle grades AU50 PCGS with nice luster remaining. A very scarce 1833 quarter eagle certified AU58 PCGS has excellent color and reflective fields – one of fewer than 80 examples of the issue believed extant.

Bidding is simple, before the auction and instantaneous during the sale, wherever you are in the world. Prior to the auction, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® (our proprietary, award-winning online platform). If you are attending Long Beach in person we encourage you to stop by our booth on the bourse, view the lots on-site, and enjoy participating “live” from the auction floor.

We wish you success with your bids!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

MyRECOMMENDATIONS

Online Suggestion Tool

THE LAST PIECE OF THE PUZZLE? HERITAGE HAS IT.

Our new online tool, MyRecommendations looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available—even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with MyRecommendations visit Heritage's US Coin pages now at HA.com/Coin.

SESSION ONE

COLONIALS

- 3001** 1652 Oak Tree Shilling, IN at Bottom — Damaged — PCGS Genuine. Fine Details. Noe-13, W-520, Salmon 10-G, R.6. 68.9 gn. A silver-gray example with golden-brown high points and faint iridescence across the smoothly worn fields. A mostly round flan with intact legends. The surfaces are somewhat wavy and exhibit uneven wear, with the GLA in ENGLAND missing. A crease crosses the obverse through the top of the tree trunk from the rocker press. Most of the tree is bold, and the date and denomination are readable. Listed on page 41 of the 2018 *Guide Book*.
- 3002** 1652 Oak Tree Shilling, IN at Bottom — Damage — Genuine PCGS. VF Details. Noe-7, W-480, Salmon 5-D, R.5. 68.5 grains. Late die state with a large die break right of the date and denomination. A pleasing light gray example with hints of gold and pale blue toning, the planchet wavy as struck on the rocker press. A few small dents are evident on the obverse, along with a large horizontal area that lacks detail. The obverse legend is partially off the flan while the reverse legend is complete. Listed on page 41 of the 2018 *Guide Book*.
- 3003** 1652 Pine Tree Shilling, Large Planchet — Damage — PCGS Genuine. Fine Details. Noe-2, W-700, Salmon 2-C, R.5. 62.9 grains. Both sides of this Pine Tree shilling exhibit pastel gold and navy toning with well-hidden scratches and surface roughness. An acceptable example for a type collector or colonial enthusiast. Listed on page 41 of the 2018 *Guide Book*.

1652 Pine Tree Shilling, VF30
Large Planchet, No Pellets
Straight Tree, Noe-2

- 3004** 1652 Pine Tree Shilling, Large Planchet, No Pellets at Trunk — Cracked Planchet — VF30 NGC. Noe-2, W-700, Salmon 2-C, R.5. 70.5 gn. No Pellets at Trunk. The Straight Tree variety, which has straight, parallel branches that extend in 45 degree angles. The present midgrade example has a narrow, radial flan crack at 1:30. The surfaces are uncommonly devoid of abrasions. Customary for the series, the edges were trimmed at the Boston Mint to bring the weight within standard, causing the obverse to appear somewhat off center toward 6 o'clock. Listed on page 41 of the 2018 *Guide Book*. NGC ID# 5JDU, PCGS# 45370 Base PCGS# 23
- 3005** (1694) London Elephant Token, Thick Planchet, AU50 PCGS. Hodder 2-B, W-12040, R.2. Housed in a green-label PCGS holder is a lovely thick planchet Elephant token with smooth olive and chestnut-brown surfaces that show only insignificant marks on each side. A splendid representative of this unusual British issue that is closely related to the Carolina and New England pieces. Listed on page 48 of the 2018 *Guide Book*. NGC ID# 2U3A, PCGS# 55
- 3006** 1723 Rosa Americana Twopence AU55 PCGS. M. 3.5-E.5, W-1334, R.4. Glimpses of golden luster remain at the margins, while blue overtones enrich the walnut-brown surfaces. High point wear on the cheek and crown verify the Choice About Uncirculated grade. Only a few minor marks exist on the smooth surfaces, while traces of granularity and old build-up within some of the letters confirm the natural, appealing patina. Population: 25 in 55, 38 finer (4/17). NGC ID# 2ASZ, PCGS# 128

- 3007** 1723 Rosa Americana Twopence AU55 PCGS. M. 3.8-E.16, W-1334, R.4. Housed in a green-label PCGS holder, this Choice AU Rosa Americana twopence has splashes of light olive toning on its mahogany surfaces with bold details and excellent eye appeal. Hints of faded orange luster appear at the upper reverse. Listed on page 45 of the 2018 *Guide Book*. NGC ID# 2ASZ, PCGS# 128
- 3008** 1723 Hibernia Halfpenny MS65 Brown PCGS. CAC. M. 4.76-Gd.2, W-13570, R.5. A rare variety. The coin is sharply struck and shows hints of reddish luster beneath satiny chocolate-brown patina. The luminous surfaces are devoid of abrasions or other distractions. Eye appeal is excellent. Listed on page 47 of the 2018 *Guide Book*. NGC ID# 2ATD, PCGS# 180
- 3009** 1773 Virginia Halfpenny, Period MS64 Brown PCGS. N. 27-J, W-1585, R.2. Although this satiny near-Gem is designated as a Brown example, traces of original orange mint luster are evident in the protected areas on both sides. This variety is ideal for the colonial type collector. Listed on page 47 of the 2018 *Guide Book*. NGC ID# 2ATK, PCGS# 240
- 3010** 1773 Virginia Halfpenny, Period MS64 Red and Brown PCGS. N. 22-S, W-1550, R.5. A late die state with a thin die crack below the bust. This is a scarce Virginia halfpenny variety for the advanced collector, exhibiting considerable orange mint color and light olive toning, with a minor corrosion spot on the reverse. Listed on page 47 of the 2018 *Guide Book*. NGC ID# 2ATK, PCGS# 241
- 3011** 1773 Virginia Halfpenny, Period MS64 Red and Brown PCGS. N. 27-J, W-1585, R.2. A plentiful Virginia halfpence, the reverse of the Newman 27-J features a repunched A in VIRGINIA. That single feature is diagnostic for attribution. Delicate bluish-olive patina accompanies substantial original orange mint color on this Choice Mint State example. Listed on page 47 of the 2018 *Guide Book*. NGC ID# 2ATK, PCGS# 241
- 3012** 1773 Virginia Halfpenny, Period MS64 Red PCGS. N. 26-Y, W-1680, R.2. Eight harpstrings. The outer areas of this well-struck Virginia halfpenny are cherry-red, while the inner portions are deeper in hue, almost gunmetal. Aside from light field chatter, each side is void of major flaws. Listed on page 47 of the 2018 *Guide Book*. Population: 37 in 64 Red, 1 finer (4/17). NGC ID# 2ATK, PCGS# 242
- 3013** 1773 Virginia Halfpenny, No Period MS64 Red and Brown PCGS. CAC. N. 6-X, W-1610, R.3. Obverse 6 has a small cross-shaped die defect over the eyebrow, and a faulty serif to the second G in GEORGIVS. This Choice Mint State specimen olive toning and considerable orange mint color. A lovely example of a scarce die combination. Listed on page 47 of the 2018 *Guide Book*. NGC ID# 2ATL, PCGS# 244
- 3014** 1787 Connecticut Copper, Muttonhead, VF25 PCGS. M. 1.2-C, W-2720, R.3. The distinctive type with a large Mailed Bust facing right. An intermediate-to-late die state with partially lapped legends. The tan-brown surfaces are smooth save for flat areas on the knees, belly, and right chest of the seated Liberty. Listed on page 63 of the 2018 *Guide Book*. NGC ID# 2B2M, PCGS# 343
- 3015** 1787 Connecticut Copper, Small Head Right, ETLIB INDE, VF30 PCGS. M. 1.1-A, W-2700, R.3. A glossy and well-centered medium brown example. Sharper than the suggested by the third-party grade, since this scarce *Guide Book* variety always has a somewhat soft strike at the centers. Listed on page 63 of the 2018 *Guide Book*. NGC ID# AVKV, PCGS# 346

**1786 New Jersey Copper, VF20
No Coulter, Maris 12-G**

- 3016** 1786 New Jersey Copper, No Coulter VF20 PCGS. M. 12-G, W-4790, R.4. Although more than 140 varieties of New Jersey coppers are known today, a nearly complete *Guide Book* set is a more reasonable goal, with 23 of the 26 types being obtainable. One of those types is this 1786 variety with the date below the plow beam, and without the coulter (a small blade that cuts the ground in advance of the plowshare). This pleasing piece has smooth surfaces with intermingled maroon and chestnut patina. Listed on page 71 of the 2018 *Guide Book*. NGC ID# AUKY, PCGS# 494

- 3017** 1788 New Jersey Copper, Running Fox VF25 PCGS. Maris 75-bb, W-5520, R.4. This is an example of the popular Running Fox variety with the fox located at the lower left reverse, before the legend. A prominent wedge-shaped die break at the lower left obverse identifies the variety. Another die break may be seen at the upper left obverse. This piece has choice olive-brown surfaces that are virtually mark-free. Listed on page 73 of the 2018 *Guide Book*. NGC ID# AUKF, PCGS# 524

- 3018** 1785 Nova Constellatio Copper, Pointed Rays, Large Date AU53 PCGS. Crosby 4-D, W-1910, High R.4. An attractive chestnut-brown example with pleasing surfaces despite a few trivial obverse scratches. Both sides exhibit traces of satiny cartwheel luster. Listed on page 56 of the 2018 *Guide Book*. NGC ID# 2AZ3, PCGS# 813

- 3019** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, AU55 NGC. N. 13-X, W-6855, R.2. Struck from clashed dies with the usual vertical die crack at 6 o'clock on the reverse. The surfaces are chocolate-brown and largely problem-free but with areas of planchet roughness in the margins (as made). All of the legends are readable and the coin is well-detailed. NGC ID# AX5E, PCGS# 883

- 3020** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS62 Brown NGC. N. 13-X, W-6855, R.2. Prominent clash marks appear on the obverse and a vertical die crack extends up from the reverse rim at 6 o'clock on this pleasing Mint State piece. Traces of mint red appear on the olive-brown surfaces of this exceptional example that shows none of the usual planchet defects seen on many of these. Listed on page 89 of the 2018 *Guide Book*. NGC ID# AX5E, PCGS# 883

**1787 Fugio Cent, MS63 Brown
STATES UNITED, 4 Cinquefoils, Pointed Rays
Newman 11-X, Bank of New York Example**

- 3021** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS63 Brown PCGS. Newman 11-X, R.4. A typical Bank of New York hoard example with glossy chocolate brown surfaces and splashes of original orange luster. A few splashes of darker steel toning are visible. Certain aspects of the design details are weakly struck as usual. Especially weak are some of the rings at the upper reverse. Very heavy clash marks are visible in the right and left obverse fields, particularly near the date. Listed on page 90 of the 2018 *Guide Book*.

Ex: Long Beach Signature (Heritage, 2/2005), lot 5064; Michael Casper Collection, Part Three / Palm Beach Signature (Heritage, 3/2006), lot 59. NGC ID# AX5E, PCGS# 883

- 3022** 1787 Fugio Cent, New Haven Restrike, Copper, MS65 Red and Brown PCGS. N. 104-FE, W-17560. Newman 104-FE. A boldly struck and pleasing Gem with attractive tan centers and luminous orange color about the borders. Struck from lightly rusted dies. Listed on page 90 of the 2018 *Guide Book*. NGC ID# 2B8S, PCGS# 917

**1794 Talbot, Allum & Lee / Howard Mule
W-8720, MS64 Brown**

- 3023** 1794 Talbot, Allum & Lee / John Howard Mule MS64 Brown PCGS. Breen-1049, W-8720, R.4. The Talbot, Allum & Lee obverse of the W-8580 variety is paired to a reverse showing a left-facing portrait of John Howard, a fellow of the Royal Society (F.R.S.). This muling is known both with and without a lettered edge. The former variant, here offered, is the most often seen. This Choice example displays medium auburn patina with hints of copper-red peaking through in the peripheries. The Howard side is well-struck, although the Talbot central figure is poorly defined, as usual. This piece is the sole finest certified at PCGS (4/17). NGC ID# BT4H, PCGS# 976

- 3024** 1783 Georgivs Triumpho Token AU50 PCGS. Baker-7, W-10100, Musante GW-54, R.3. Smooth olive and chestnut-brown surfaces exhibit delicate sky-blue toning at the peripheries. There is some debate regarding the identity of the portrait, although the PCGS label seems to solve the issue by calling this the "Washington Triumpho" piece. Listed on page 81 of the 2018 *Guide Book*. NGC ID# 2B6K, PCGS# 664

HALF CENTS

1793 C-3 Half Cent, VG Details Well-Defined Motifs

3025 1793 C-3, B-3, R.3 — Cleaning — PCGS Genuine. VG Details. This first-year half cent type coin has fairly strong design definition for the VG grade level, although cleaning on the obverse produces significant unnaturally bright copper-red surface with some deep brown color remaining in the fields. The reverse is a more traditional chocolate-brown color with minor granularity. All lettering is clear. Our EAC grade AG3.

3026 1794 High Relief Head, C-9, B-9, R.2 — Environmental Damage — PCGS Genuine. XF Details. Manley Die State 3. The coin is well-detailed and shows little wear. The reverse is deep chocolate-brown in color with scattered pitting along the right-hand margin that denies a numeric grade; a small spot is also seen at the U in UNITED. The obverse is the same color and largely smooth. However, a peculiar area of granularity stretches along a sharp line from the tip of the cap to the rim above the TY in LIBERTY, and spills over the upper-left edge of the planchet. Possibly an odd planchet flaw, although we encourage bidders to examine the coin in person and make a determination as to what they believe caused this oddity. There is also an old mark on Liberty's temple. Our EAC grade Fine 15.

3027 1797 1 Above 1, C-1, B-1, R.2, VF30 NGC. Manley Die State 1.0, or perhaps earlier as there is no evidence of the die crack from the rim to the end of the pole. A wonderful example with splendid surfaces and lovely medium brown color on both sides. This piece is the very definition of the phrase "Choice for the grade." Our EAC grade Fine 15. NGC ID# 2228, PCGS# 35101 Base PCGS# 1042

3028 1804 Plain 4, No Stems, C-13, B-10, R.1, MS62 Brown NGC. Manley Die State 2.0 without obverse dentils. This well struck Draped Bust type coin has rich gunmetal-blue and mahogany-brown toning. A loupe indicates a tick on the central curl and small spots above the bust tip and beneath the 1 in the date. Our EAC grade AU55. NGC ID# 222F, PCGS# 35176 Base PCGS# 1063

3029 1853 C-1, B-1, R.1, MS65 Brown PCGS. CAC. This lovely Gem exhibits bold design motifs and satin luster on its pleasing dark chocolate-brown surfaces. Our EAC grade MS60. NGC ID# 26YX, PCGS# 35327 Base PCGS# 1227

3030 1854 C-1, B-1, R.1, MS66 Brown NGC. CAC. A semiprooflike walnut-brown and apple-green example. Marks are absent, and the strike is full aside except on the dentils. A high-grade survivor from this later and low-mintage date. Our EAC grade MS62. NGC ID# 26YY, PCGS# 35330 Base PCGS# 1230

3031 1855 C-1, B-1, R.1, MS64 Red PCGS. CAC. The wreath and portrait are sharp, but the dentils and stars exhibit the usual strike weakness. Original copper-red luster offers a frosty texture and has a few scattered flecks as normal. Only a limited number of Red coins are CAC-approved. Our EAC grade MS64. CAC: 17 in 64 Red, 4 finer (4/17). NGC ID# 26YZ, PCGS# 35335 Base PCGS# 1235

LARGE CENTS

3032 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3, AG3 PCGS. The S-11c attribution is likely correct, although this may be an S-11b — a holder tab obscures the portion of the rim that differentiates these two varieties. Clash marks are visible in the field at Liberty's throat. On the obverse, LIBERTY and the date are readable, and the portrait is boldly outlined. The rims fade into the fields. The reverse is mostly smooth save for the faint outline of the wreath and ONE CENT. Both sides are chocolate-brown and fairly smooth, showing only minor granularity in portions of the fields and a few old, faint scratches beneath a loupe. Our EAC grade Fair 2. NGC ID# 223J, PCGS# 35477 Base PCGS# 1350

3033 1794 Head of 1793, S-20b, B-4b, High R.4 — Damage — PCGS Genuine. VG8. The golden-olive surfaces have slight roughness, especially on the reverse, with a few minor rim bruises. A glass reveals some old tooling in the obverse fields that account for the PCGS description. This is an important example of the 1793 Head style for type collectors and variety specialists. Our EAC grade AG3.

1794 Large Cent, VF35 S-22, The 'Mounds' Reverse

3034 1794 Head of 1794, S-22, B-6, R.1, VF35 PCGS. Characterized by the mounds on the reverse above ONE, eight berries on the left branch, and the sharp downward turn of the sixth lock. The mounds are noticeable on the upper reverse. The surfaces are generally quite deep in hue with lighter, tan-colored accents over the devices. Moderate wear with a few small abrasions scattered about, including an old scratch on the cap. Our EAC grade Fine 15. Ex: November Signature (Heritage, 11/2003), lot 5058. NGC ID# 223P, PCGS# 35531 Base PCGS# 901374

1801 S-223 Cent, XF40 1/000 Mint Blunder

3035 1801 1/000, S-223, B-17, R.1, XF40 PCGS. Breen Die State V. A diagnostic rim break at RT has formed a cud that covers parts of RT and just stops short of Y in LIBERTY. The deep, chocolate-brown surfaces show a few light marks and some microporosity on the portrait with a small void in the upper hair strands. The motifs are sharply defined on both sides of this popular 1/000 variety. Our EAC grade VF25. NGC ID# 224D, PCGS# 36278 Base PCGS# 1464

3036 1804 S-266, B-1, R.2, VF20 — Environmental Damage — PCGS Genuine. VF Details. Breen Die State IV. Cuds above RTY and MERI confirm the late die state. The sole dies for this widely pursued key date. A deep-brown example with evenly granular surfaces, although sharply detailed and altogether more appealing than many impaired examples with a comparable net grade. The reverse legends are complete and Liberty's hair strands well-defined. Our EAC grade Fine 15.

3037 1819 Small Date, N-9, R.1, MS63 Brown PCGS. CAC. The R in AMERICA is dramatically repunched. The coin is well-struck throughout the stars and central devices, showing luminous satin fields and rich chocolate-brown patina with highlights of violet and burgundy in the fields. Our EAC grade AU55. Population (all Small Date varieties): 36 in 63 (1 in 63+) Brown, 24 finer. CAC: 7 in 63, 12 finer (4/17). NGC ID# 2254, PCGS# 36652 Base PCGS# 1606

**1819 Cent, MS64 Red and Brown
Small Date, N-9**

3038 1819 Small Date, N-9, R.1, MS64 Red and Brown PCGS. CAC. A large die chip between LI in LIBERTY attributes the N-9 die marriage. There is arguably more copper-orange color than bronze-gold and steel-blue, all of which blend seamlessly across each side with luminous luster. The peripheral elements, namely the dentils, are indistinct but the eye appeal is tremendous. Our EAC grade MS62. Population (all varieties): 13 in 64 Red and Brown, 0 finer. CAC: 12 in 64, 3 finer (4/17). PCGS# 36653 Base PCGS# 1607

3039 1820 Large Date, N-13, R.1, MS65 Red and Brown NGC. Medium brown fields and high points are accompanied by numerous indications of mint red near the letters, date, and stars. Smooth aside from faint field grazes near star 2 and a subtle spot beneath the O in OF. The popular Randall Hoard variety identified by a triple-punched L in LIBERTY. Certified in a former generation holder. Our EAC grade MS60. NGC ID# 2256, PCGS# 36674 Base PCGS# 1616

3040 1825 N-3, R.3, MS61 Brown PCGS. A trace of the late state die crack is visible at the bust point over the serif of the 1. Imperfectly centered with a wide right border and narrow left border. Mottled gold appears on the dark brown surfaces of this pleasing cent. Both sides have insignificant marks. Our EAC grade AU55. NGC ID# 225F, PCGS# 36790 Base PCGS# 1642

3041 1827 N-6, R.3 — Tooled — PCGS Genuine. Unc Details. A later die state of N-6, with light die cracks encircling the stars and intersecting with the date. This is a smooth and attractive example except for an attempt to remove some tiny carbon spots above the head at the hairline, where shallow pinscratches are visible at two small areas of underlying red. We note a few tiny carbons that remain elsewhere on the coin, but no other problems to mention. Our EAC grade AU50.

3042 1831 Large Letters, N-7, R.1, MS64 Brown PCGS. The coin is well-struck at the centers but slightly soft along the left-hand peripheral stars. This Choice N-7 example offers satiny burgundy-brown and olive-gold coloration with no major abrasions. Housed in a first generation holder. Our EAC grade AU55. Population (all Large Letters varieties): 25 in 64 Brown (2 in 64+), 10 finer (4/17). NGC ID# 225M, PCGS# 36976 Base PCGS# 1678

3043 1839 Petite Head of 1840, N-8, R.1, MS63 Brown PCGS. This Select Mint State piece has highly lustrous olive-brown surfaces with splashes of orange mint color on each side. A few minor marks, especially on the obverse, limit the grade. Our EAC grade AU50. NGC ID# 2265, PCGS# 37265 Base PCGS# 1817

3044 1839 Petite Head of 1840, N-8, R.1, MS64 Brown PCGS. This fully lustrous near-Gem exhibits smooth and attractive chestnut-brown surfaces with hints of maroon overtones. Both sides have insignificant, scattered marks. Close inspection reveals faint traces of mint red in the protected areas of the reverse. Our EAC grade AU55. NGC ID# 2265, PCGS# 37265 Base PCGS# 1817

**1839 Cent, MS64 Brown
N-8, Head of 1840**

3045 1839 Petite Head of 1840, N-8, R.1, MS64 Brown PCGS. High-grade examples of this issue are scarce. The current near-Gem displays glossy chocolate-brown patina and sharp design elements. Subtle steel-blue accents are revealed when rotated beneath a light. We find no mentionable surface imperfections. Our EAC grade AU55. Population: 21 in 64 Brown, 7 finer (4/17). NGC ID# 2265, PCGS# 37265 Base PCGS# 1817

**1839 Booby Head Cent, MS64 Red and Brown
N-14, Lustrous and Sharp**

3046 1839 Booby Head, N-14, R.3, MS64 Red and Brown PCGS. Patchy areas of orange luster visit the reddish-brown surfaces of this Choice Booby Head cent. Lacking an outer berry under TED of UNITED and without a line beneath CENT, the N-14 is the sole Booby Head with a center dot on the reverse between ONE and CENT. A glossy and appealing example with high rims and a sharp strike, the present near-Gem is struck from a late die state with a bold die crack along the tops of STATES OF A, with minor microgranularity visible on both sides with a lens. Our EAC grade MS62. PCGS# 37256 Base PCGS# 1752

3047 1852 N-3, R.1, MS65 Red and Brown PCGS. CAC. Grellman Die State c. The reverse is rotated about 45° counterclockwise, with a fine die crack from the edge between T and E of UNITED. A smooth and sharply struck example, although we note a few of the obverse stars are slightly rounded and the obverse dentils are weak. Attractive orange mint luster glows beneath blue overtones. CAC endorsed for overall surface quality and eye appeal. Our EAC grade MS62. NGC ID# 226J, PCGS# 147236 Base PCGS# 1899

3048 1852 N-3, R.1, MS66 Red and Brown NGC. Ex: Highland Collection. Grellman Die State c, with a reverse die crack through the T of UNITED to the wreath, but with no evidence that the crack continues through the tops of CENT. This impressive piece exhibits nearly full, mellow orange mint color with delicate blue overtones. the reverse is rotated 45 degrees counterclockwise. Our EAC grade MS63. Census: 0 in 66 Red and Brown, 0 finer (5/17). NGC ID# 226J, PCGS# 147236 Base PCGS# 1899

- 3049 1852 N-17, R.1, MS66 Brown PCGS. CAC.** Die State c, with the line under the 1 faded. The coin is sharp on the devices and stars despite metal flowlines in the fields from the late die state. Luminous burgundy-brown surfaces show silvery-blue undertones when tilted beneath a light. Our EAC grade MS62. Population (all varieties included): 53 in 66 (5 in 66+) Brown, 2 finer. CAC: 23 in 66, 2 finer (4/17). NGC ID# 226J, PCGS# 147272 Base PCGS# 1898

**1853 N-25 Cent, MS65 Red
Frosty Type Coin**

- 3050 1853 N-25, R.1, MS65 Red PCGS.** Die State b, as usual for attractive Mint State coins. This Gem Red example displays sharp central devices and border dentils but is soft on numerous stars. A small mark on Liberty's neck is the only discernible abrasion, although scattered light flecks are seen on each side. Our EAC grade MS64. Population (all varieties included): 76 in 65 (1 in 65+) Red, 17 finer (4/17). NGC ID# 226K, PCGS# 403925 Base PCGS# 1903

- 3051 1855 Slanted 55, Knob Ear, N-9, R.1, MS65 Brown NGC. CAC.** The Slanted 55 and hair curl pointing to the middle of the 8 attribute the variety. A glossy chocolate-brown and steel-blue Gem, each side exhibits strong central detail. Minor softness on the stars is unimportant and does not diminish the phenomenal visual appeal. Our EAC grade MS60. NGC ID# 226M, PCGS# 403958 Base PCGS# 1913

- 3052 1855 Slanted 55, N-10, R.1, MS64 Red and Brown PCGS. CAC.** Stars 1 through 5 are a trifle flat while the remaining stars are fully detailed on this attractive Choice Mint State 1855 cent. Frosty orange luster on each side enjoys delicate bluish-brown accents on this boldly defined cent. Our EAC grade MS63. NGC ID# 226M, PCGS# 406175 Base PCGS# 1911

FLYING EAGLE CENTS

**1857 Flying Eagle Cent, MS65
Luminous Bronze-Gold Example**

- 3053 1857 MS65 PCGS.** The feathers and wreath elements all show pinpoint detail, and the luminous bronze-gold surfaces are wonderfully preserved with only a couple of ticks above ONE. Speckled carbon appears mainly on the obverse. Certified in a first generation holder with just 18 finer submissions reported at PCGS (4/17). NGC ID# 2276, PCGS# 2016

**1857 Flying Eagle Cent, MS65
Vibrant Mint Luster**

- 3054 1857 MS65 PCGS. CAC.** Vibrant luster is the hallmark of this 1857 Flying Eagle cent, from an issue that can be difficult to find with that elusive quality. The surfaces are almond-tan in the center with glimpses of orange-gold near the rims. There are no mentionable signs of contact, save for a rim nick at 3 o'clock on the obverse. The strike is sharp throughout. PCGS has seen 18 finer submissions (5/17). NGC ID# 2276, PCGS# 2016

- 3055 1857 Obverse of 1856, Snow-2, FS-401b, MS64 PCGS. CAC.** The Type of 1856 obverse was likely prepared in 1856 with the hub of that year but left undated until needed in 1857. The pick-up point is the O in OF, which is wider and almost rectangular compared to coins struck from dies made in 1857. This Choice example is sharply rendered and devoid of significant abrasions. Wisps of chestnut toning grace luminous orange-gold luster. PCGS# 410434 Base PCGS# 2016

- 3056 1858 Large Letters PCGS. CAC.** Light tan patination clings to this Select Flying Eagle cent. Strong feather detail is apparent throughout the eagle. Devoid of significant marks or spots. Housed in a first generation holder. NGC ID# 2277, PCGS# 2019

**1858 Flying Eagle Cent, MS65
Large Letters, First Generation Holder**

- 3057 1858 Large Letters MS65 PCGS.** High Leaves Reverse. Closed E in ONE. Brilliant luster and bronze-gold color define this splendid Gem Flying Eagle cent. A touch of strike softness occurs at the upper obverse, but the wreath elements are uniformly strong. Encapsulated in a first generation holder. There are 36 finer submissions at PCGS (4/17). NGC ID# 2277, PCGS# 2019

- 3058 1858 Small Letters MS64 PCGS. CAC.** Struck later in the year from a reworked obverse, the Small Letters variant is most easily distinguished the separation between the letters AM. This is a notably bright, tan-yellow example with strong mint luster. A few small abrasions are scattered over each side. NGC ID# 2279, PCGS# 2020

**1858 Flying Eagle Cent, MS65
Small Letters, Clean for the Grade**

- 3059 1858 Small Letters MS65 PCGS.** Low Leaves Reverse. Close E in ONE. The first generation holder designates this 1858 Flying Eagle cent as the Large Letters variety (PCGS #2019), but it is actually a Small Letters coin with AM separated (PCGS #2020). This lustrous, tan-gold representative shows die cracks around the obverse, and a rim cud around the lower reverse. Razor-sharp and clean for the grade. PCGS reports 15 finer submissions (4/17). NGC ID# 2279, PCGS# 2020

INDIAN CENTS

- 3060 1859 MS64+ PCGS. CAC.** Sweeping luster, a sharp strike, and a virtual absence of carbon attest to the quality of this first-year near-Gem. Unimportant contact is all that precludes an even finer grade. NGC ID# 227E, PCGS# 2052
- 3061 1859 MS65 PCGS.** A nicely struck and coruscating Gem of this popular single-year type. The light olive-green toning is attractive, and both contact and carbon are of little account. Housed in an old green label holder. NGC ID# 227E, PCGS# 2052

**1860 Indian Cent, MS65
Pointed Bust, FS-401**

- 3062 1860 Pointed Bust, FS-401, MS65 PCGS.** Attractive copper-gold color covers this Gem Indian cent. The design elements are well-impressed, including all four diamonds, LIBERTY, and most of the feather tips. A few light reverse marks may well preclude a finer grade. Population: 42 in 65 (3 in 65+), 14 finer (4/17). NGC ID# 227F, PCGS# 37393 Base PCGS# 2056
- 3063 1863 MS65+ PCGS. CAC.** Outstanding bronze-gold color, gleaming mint luster, and exceptionally clean surfaces for the Gem assessment are the undeniable hallmarks of this MS65+, CAC-approved, Civil War-era cent. Additionally, four full diamonds are apparent on the ribbon, and the feather tips are bold. NGC ID# 229D, PCGS# 2067
- 3064 1864 Copper-Nickel MS65 NGC. CAC.** Four full diamonds are visible on the obverse, with nearly complete feather details on this Gem copper-nickel cent. Both sides have satiny golden-tan luster and no evidence of spots or bothersome surface marks. CAC: 52 in 65, 12 finer (4/17). NGC ID# 227K, PCGS# 2070
- 3065 1864 L On Ribbon MS65 Red and Brown PCGS. CAC.** Well-struck diamonds and feather tips affirm the above-average strike on this first year bronze issue. Both sides show considerable orange-gold luster. Population: 95 in 65 (1 in 65+) Red and Brown, 9 finer. CAC: 35 in 65, 4 finer (4/17). NGC ID# 227M, PCGS# 2080

- 3066 1864-L L On Ribbon, Repunched Date, Snow-3, FS-2302, MS65 Red and Brown NGC.** The 1 and 8 in the date are sharply repunched on this lovely Gem. Slight doubling is also noted inside the lower loop of the 6. This piece is sharply struck with orange mint color and light olive patina in a woodgrain pattern. NGC has only certified 23 finer Red and Brown examples for all varieties (5/17). NGC ID# 227M, PCGS# 37412 Base PCGS# 2080

- 3067 1868 MS65 Red and Brown PCGS.** Sharp detail and satiny luster adorn this Gem Red and Brown example, which shows more red than brown color. Both sides exhibit a warm copper-orange hue with subtle olive overtones in the open areas. There are no distractions. PCGS reports 25 finer Red and Brown 1868 Indian cents (5/17). NGC ID# 227S, PCGS# 2092

- 3068 1868 MS66 Red and Brown PCGS. CAC.** Conditionally rare as one of the finest Red and Brown coins certified and one of only four pieces in this grade with a CAC green label. The coin is sharp and satiny with nearly full red color. We observe no abrasions or distracting specks. Population: 25 in 66 (13 in 66+) Red and Brown, 0 finer. CAC: 4 in 66, 0 finer (4/17). NGC ID# 227S, PCGS# 2092

- 3069 1869 MS65 Red and Brown PCGS.** Rick Snow explains that while the 1869 is much scarcer overall than the Indian Head cents of 1866 to 1868, examples are more available in Mint State than their earlier counterparts. In this grade, however, they are very scarce and rarely offered finer. This lustrous Gem is well-struck with attractive copper-orange and golden-brown color. PCGS shows merely eight Red and Brown examples graded higher (4/17). NGC ID# 227T, PCGS# 2095

**1870 Cent, MS65 Red
Snow-16, Repunched Date**

- 3070 1870 MS65 Red PCGS. Snow-16, Repunched Date, Doubled Die Reverse.** The 18 in the date are repunched, and the N in ONE and E in CENT show die doubling on their left uprights. This variety is known for a heavy die crack at the lower-left reverse, although said crack is just beginning on this strike. The coin shows sharp detail and frosty copper-orange luster with a few small specks behind Liberty's head. Population: 39 in 65 (3 in 65+) Red, 7 finer (4/17). NGC ID# 227U, PCGS# 2099

- 3071 1871 MS64 Red and Brown NGC.** The 1871 is a scarcer date, especially with original mint luster present. This piece shows approximately 40% of the mint red on each side. The strike is strong throughout, the only grade detractors are numerous small specks of carbon. NGC ID# 227V, PCGS# 2101

- 3072 1871 MS64 Red and Brown PCGS.** Whispers of medium ten visit the orange-gold surfaces of this near-Gem Indian cent. Fewer marks are present than might be expected for the grade designation. NGC ID# 227V, PCGS# 2101

- 3073 1873 Open 3 MS65 Red and Brown PCGS. CAC.** The more available of the two date variants from this year, this Gem shows generous portions of remaining mint red, nicely balanced from side to side. The strike details are strong throughout and there are no mentionable problems. Population: 80 in 65 Red and Brown, 7 finer. CAC: 15 in 65, 3 finer (4/17). NGC ID# 227Y, PCGS# 2107

- 3074 1873 Closed 3 MS65 Red and Brown PCGS. CAC.** Close 3 coinage of all denominations was produced early in the year, prior to Archibald L. Snowden noticing that the 3 more resembled an 8, resulting in the use of a different-style 3. The obverse of this piece is almost all red, while more mellowing is seen across the reverse. Sharply defined throughout. Population: 43 in 65 (2 in 65+) Red and Brown, 4 finer. CAC: 11 in 65, 1 finer (4/17). NGC ID# 227X, PCGS# 2110

**1873 Doubled LIBERTY Cent, XF40
Snow-1 Variety**

- 3075 1873 Doubled LIBERTY, Snow-1, FS-101, XF40 PCGS.** The doubled LIBERTY 1873 cent is one of the great absolute as well as condition rarities in the Indian cent series. All the letters of LIBERTY are notably doubled. The surfaces are even chocolate-brown, and there are the expected number of small abrasions scattered about, only one larger one is noted behind the mouth of the Indian. NGC ID# 227X, PCGS# 37504 Base PCGS# 2115

- 3076 1874 MS66 Red and Brown PCGS. CAC. Snow-8.** The surfaces are almost completely full Red on each side. The reverse is just a bit mellowed. This is an interesting variety that shows a die chip on the neck and off-center clash marks from another die just below the ear. NGC ID# 227Z, PCGS# 2119

- 3077 1877 — Environmental Damage — PCGS Genuine. VF Details.** This key is always needed by collectors in whatever grade it is found. This particular coin shows “pickled” surfaces that may be a result of corrosion. Nevertheless, it is a genuine 1877 cent and rare as such with only 852,500 pieces struck.

- 3078 1879 MS65 Red PCGS.** This attractive Gem exhibits brilliant orange mint luster with scattered carbon specks that are consistent with the grade. Sharply struck from a late die state obverse and perfect reverse. Population: 58 in 65 (2 in 65+) Red, 23 finer (4/17). NGC ID# 2286, PCGS# 2135

**1882 Indian Cent, MS66 Red
Conditionally Scarce**

- 3079 1882 MS66 Red PCGS.** The 1882 Indian Head cent becomes conditionally rare at the Premium Gem level with Red surfaces despite a substantial mintage of 38.5 million coins. This cent features light amber-gold color and vibrant luster that swirls over clean surfaces. Well-stuck with a trace of incompleteness over the feather tips and ribbon. Population: 25 in 66 (1 in 66+) Red, 2 finer (11/16). NGC ID# 2289, PCGS# 2144

- 3080 1887 MS65 Red PCGS.** Considering its large mintage of 45.2 million coins, the 1887 is, remarkably, very scarce in Gem condition with original Red color. Bold diamonds, feather tips, and wreath elements characterize the strong strike. A delightful amber-gold Indian Head cent. Population: 64 in 65 Red, 25 finer (4/17). NGC ID# 228F, PCGS# 2159

- 3081 1887 MS65 Red PCGS.** Blazing color emanates from both sides of this lustrous Gem. This example exhibits an attractive strike. A number of tiny carbon spots are visible on both sides and a strikethrough appears near 3 o'clock on the obverse. Population: 64 in 65 Red, 25 finer (4/17). NGC ID# 228F, PCGS# 2159

- 3082 1888/7 Snow-1, FS-301, Good 6 PCGS.** This popular *Guide Book* variety has proven to be quite scarce in all grades. The current example displays even wear and smooth chocolate-brown surfaces. The diagnostic rim cud over the E in UNITED is worn away, although the foot of the 7 is plainly visible at the base of the final 8. Population: 11 in 6, 30 finer (4/17). NGC ID# 228G, PCGS# 37543 Base PCGS# 2169

- 3083 1896 MS66 Red PCGS.** 30th Anniversary Green Label Holder. This glowing Premium Gem Red example is conditionally rare, and finer pieces a prohibitively so. The strike is sharp, and each side displays frosty copper-red luster without significant evidence of carbon. Two microscopic grazes on Liberty's cheek are all that limit the grade. Population: 26 in 66 (4 in 66+) Red, 2 finer (4/17). NGC ID# 228R, PCGS# 2195

- 3084 1899 MS66 Red PCGS.** Coppery-gold coloration and swirling, frosty luster are sure to please collectors looking for a high-grade 19th century type coin. The ribbon diamonds and feathers are needle-sharp, and minimal carbon is present in the right reverse field. Top-notch visual appeal. PCGS has seen 28 finer submissions (5/17). NGC ID# 228U, PCGS# 2204

- 3085 1899 MS66 Red PCGS.** Deeply set luster blankets frosty, coppery-gold surfaces. Every element of the design is sharply brought-up, and each side is devoid of outwardly distracting abrasions. A coin that would do justice to the finest specialized collection.
Ex: Central States Signature (Heritage, 5/2003), lot 5187; New York Signature (Heritage, 7/2014), lot 5168; Central States Signature (Heritage, 5/2007), lot 1127. NGC ID# 228U, PCGS# 2204

- 3086 1899 MS66 Red PCGS.** Eye-catching magenta and copper-orange colors intermingle across each side, while accents of mint-green heighten the appeal even further. The strike is nearly full and the fields beautifully preserved. A singular tick occurs on the N in CENT. Rarely seen finer. PCGS has certified only 28 finer Red examples (5/17). NGC ID# 228U, PCGS# 2204

- 3087 1899 MS66 Red PCGS.** This lovely Premium Gem exhibits frosty mint luster on its fiery Red surfaces with excellent design definition. PCGS has certified only 28 finer examples (5/17). NGC ID# 228U, PCGS# 2204

- 3088 1902 MS66 Red PCGS. CAC.** This fiery orange Premium Gem exhibits a nearly full strike with bold diamonds and complete shield definition. A lovely example with pristine surfaces, this piece is ideal for an advanced Registry set. Population: 61 in 66 (6 in 66+) Red, 10 finer. CAC: 10 in 66, 1 finer (4/17). NGC ID# 228X, PCGS# 2213

- 3089 1904 MS66 Red PCGS.** Incredibly frosty, original mint luster generates stellar eye appeal on this Premium Gem Red 1904 Indian cent. The strike is sharp, and the only mentionable surface characteristics are a tiny tick above the 9 in the date and a lone speck on Liberty's cheek. The fiery-orange obverse is more vivid than the orange-gold reverse. Population: 73 in 66 (7 in 66+) Red, 7 finer (4/17). NGC ID# 228Z, PCGS# 2219

- 3090 1906 MS66 Red PCGS.** A bold strike and fiery mint luster are the keys to this pinkish-orange Premium Gem 1906 Indian cent. Fully brilliant examples of any date are elusive and extremely popular with collectors, especially if they exhibit full details as seen here. Population: 37 in 66 (2 in 66+) Red, 3 finer (4/17). NGC ID# 2293, PCGS# 2225

**1908 Cent, MS66+ Red
Snow-6, Repunched Date**

3091 1908 MS66+ Red PCGS. CAC. Snow-6. Snow-6 shows bold repunching inside the lower loop of the 8 in the date, as well as below the flag of the 1. The 1908 Indian cent is scarce so well-preserved, and finer pieces are almost uncollectible. This Plus-designated Premium Gem is boldly struck, illuminated in frosty copper-red luster with unabraded surfaces. A couple microscopic specks are noted for accuracy, being virtually invisible to the unaided eye. Population: 93 in 66 (12 in 66+) Red, 2 finer. CAC: 17 in 66, 0 finer (4/17). NGC ID# 2295, PCGS# 2231

3092 1908-S MS65 Red and Brown PCGS. A melange of gold and tan color covers this Gem cent. The devices are well-struck and there are no significant marks to report. PCGS has seen only 14 submissions finer (4/17). NGC ID# 2296, PCGS# 2233

3093 1908-S MS65 Red and Brown PCGS. Bright yellow-red mint luster characterizes this Gem semikey Indian cent, the first branch mint production for cents. As always, the feather tips on the headdress are softly struck, but there are no singularly mentionable abrasions. NGC ID# 2296, PCGS# 2233

3094 1908-S MS64 Red PCGS. Orange-gold luster and well-struck devices, especially the diamonds and LIBERTY, highlight this Indian cent. This coin possesses great overall eye appeal. NGC ID# 2296, PCGS# 2234

3095 1908-S MS64 Red PCGS. This semikey Indian cent features orange-gold luster and well-struck design elements. Nice overall eye appeal for the grade. NGC ID# 2296, PCGS# 2234

3096 1909 MS66+ Red PCGS. CAC. Final year and often located well-preserved. This example has bright orange-red mint luster and no problems. Excellent for type purposes. NGC ID# 2297, PCGS# 2237

3097 1909-S MS64 Red and Brown NGC. Fire-orange and bronze-gold color show a slight woodgrain pattern across the obverse. The diamonds are bold, though the headdress is a bit soft on the feather tips. A couple of tiny ticks pose little distraction. This is an appealing, final-year, branch-mint semikey from a low mintage of 309,000 coins. NGC ID# 2298, PCGS# 2239

**1909-S Indian Cent, MS64 Red
High-End for the Grade**

3098 1909-S MS64 Red PCGS. CAC. The final-year key branch mint issue is elusive with a CAC endorsement in Red condition. This near-Gem has frosty copper-gold luster and no carbon spotting. There is also a lack of abrasions, forcing the viewer to examine the coin with a 10x loupe in a search for grade-limiting imperfections. Eye appeal excels for the Choice level. NGC ID# 2298, PCGS# 2240

PROOF INDIAN CENTS

**1860 Cent, PR65
A Rarity in Gem Condition**

3099 1860 PR65 PCGS. The reported mintage for the 1860 Indian Head cent proof stands at 1,000 specimens. However, the Mint introduced a proofing fee of 13 cents that year, and many sets went unsold. Each side of this bronze and amber-gold Gem is beautifully preserved without mentionable contact. Fully impressed, as expected. Housed in a first generation holder. Population: 40 in 65, 15 finer (4/17). NGC ID# 229A, PCGS# 2253

**1860 Indian Head Cent, PR65
1,000 Proofs Struck, Fewer Distributed**

3100 1860 PR65 PCGS. A hint of proof reflectivity is evident in the fields, creating appreciable contrast against the boldly struck relief elements. Grade-limiting contact marks are exceedingly difficult to locate. It is likely that the total distribution was far smaller than the 1,000 proofs reportedly minted. Encapsulated in a first generation holder. Population: 40 in 65, 15 finer (4/17). NGC ID# 229A, PCGS# 2253

**1861 Cent, Reflective PR65
In a First-Generation Holder**

3101 1861 PR65 PCGS. The proof 1861 Indian cent is surprisingly scarce in Gem condition. Cameos are prohibitively rare for most collectors in any grade, making high-end non-Cameos such as the present coin highly sought-after. This piece displays a full strike and unmarked tan-gold surfaces with modest reflectivity in the fields. Housed in a "rattler" holder. Population: 25 in 65 (1 in 65+), 3 finer (4/17). NGC ID# 229B, PCGS# 2256

3102 1862 PR65 PCGS. The mirrored fields display lilac, honey, and pumpkin-gold toning. Crisply struck, and carbon is no more than incidental. A low mintage Civil War proof date. Encased in a first-generation holder. NGC ID# 229C, PCGS# 2259

- 3103 1863 PR65 PCGS.** An intricately impressed caramel-gold Gem. A lens reveals minor contact on the portrait. A very scarce Civil War proof date. Although the *Guide Book* suggests a mintage of 800 to 1,000 pieces, many sets were likely melted as unsold. Population: 25 in 65 (1 in 65+), 8 finer (4/17). NGC ID# 229D, PCGS# 2262
- 3104 1864 Copper-Nickel PR65 PCGS.** A well struck and unabraded specimen. The obverse is butter-gold with hints of peach, while the reverse is principally sea-green. This low mintage proof Gem is certified in a first-generation holder. NGC ID# 229E, PCGS# 2265
- 3105 1864 Copper-Nickel PR65 PCGS.** Pastel lime-green and apricot-gold shades drape this fully struck and flashy Gem. We note a few pinpoint flecks and a small spot southeast of the 4 in the date. Housed in a first generation holder. NGC ID# 229E, PCGS# 2265
- 3106 1868 PR64 Red NGC.** Rotated Reverse. Occasional mint-green accents visit the luminous patina that has settled over the otherwise lemon-gold surfaces. Well-defined with few hairlines, though minor carbon appears in the lower feathers of the headdress and to the right of the date. Housed in a prior generation holder. Census: 7 in 64 Red, 8 finer (4/17).
Ex: *Long Beach Signature (Heritage, 5/2008)*, lot 2370. NGC ID# 229L, PCGS# 2293
- 3107 1881 PR66 Red and Brown PCGS. CAC.** Hints of light tan mix with reddish-orange luster, more so on the reverse of this Premium Gem. The design elements are sharply struck, including all feather tips and diamonds. This is a gorgeous coin, well deserving of CAC endorsement. Population: 35 in 66 (1 in 66+) Red and Brown, 11 finer. CAC: 19 in 66, 2 finer (4/17). NGC ID# 22A2, PCGS# 2331
- 3108 1881 PR66 Red and Brown PCGS. CAC.** The 1881 is a popular proof type coin from this decade. This particular coin shows considerable remaining mint red, whose presence is even more evident when the coin is angled and the proof mirrors flash through the mellowed red, making the original mint luster brightly evident. NGC ID# 22A2, PCGS# 2331

**1881 Indian Cent, PR67 Red
Tied for Finest Certified**

- 3109 1881 PR67 Red NGC.** The obverse is golden-yellow with a dash of cherry around the date, the reverse is a lovely sunset-orange, both well within the confines of the Red designation. The strike is crisp, even on the feather tips, and carbon is totally absent. Among the finest at either service. Census: 2 in 67 Red, 0 finer (4/17).
Ex: *FUN Signature (Heritage, 1/2012)*, lot 1166. NGC ID# 2868, PCGS# 2332
- 3110 1883 PR66 Red and Brown PCGS. CAC.** A fully struck, glimmering proof with no distracting carbon spots. The surfaces show a lovely blend of violet, copper-pink, and greenish hues, delivering excellent visual appeal for the Red and Brown color designation. Population: 44 in 66 (1 in 66+) Red and Brown, 5 finer. CAC: 11 in 66, 1 finer (4/17). NGC ID# 22A4, PCGS# 2337
- 3111 1885 PR66 Brown PCGS.** Each side displays vivid blue-brown iridescence, made even more bright by the mirrored fields. An affordable proof date from the 1880s. Population: 87 in 66 (4 in 66+) Brown, 35 finer (4/17). NGC ID# 22A6, PCGS# 2342
- 3112 1886 Type One PR66 Red and Brown NGC.** The lowest headdress feather points between the IC in AMERICA on the Type One obverse. This Premium Gem proof displays rich auburn toning atop copper-orange fields, giving it a uniform Red and Brown look. The strike is sharp and there are no distractions. Census: 28 in 66 (2 in 66 ★) Red and Brown, 2 finer (4/17). NGC ID# 22A7, PCGS# 2346
- 3113 1900 PR66 Red and Brown PCGS.** The obverse of this Premium Gem proof displays reddish-orange color that cedes to soft bluish-brown on the reverse, and a razor-sharp strike features a bold LIBERTY, diamonds, and feather tips. A spot of verdigris appears on the upper right serif of the first T in STATES. Population: 27 in 66 (2 in 66+) Red and Brown, 6 finer (4/17). NGC ID# 22AN, PCGS# 2388
- 3114 1902 PR66 Red PCGS. CAC.** The strike is as bold as the eye appeal is strong throughout this impeccable Premium Gem proof cent with CAC approval. Rich pumpkin-gold color reveals complementary accents of magenta and mint-green. Population: 31 in 66 (1 in 66+) Red, 9 finer. CAC: 10 in 66, 2 finer (4/17). NGC ID# 22AR, PCGS# 2395
- 3115 1903 PR66+ Red and Brown PCGS.** A stunning Red and Brown brilliant proof with vibrant shades of ruby-red, flame-orange, and peach-gold with lime-green accents embellishing the deep-mirrored fields and pinpoint-sharp devices. Only four pieces exceed this example in technical grade at PCGS, and perhaps none is finer in terms of eye appeal. Population: 3 in 66+ Red and Brown, 4 finer (4/17). NGC ID# 22AS, PCGS# 2397
- 3116 1905 PR66 Red and Brown PCGS.** Elements of magenta and lime-green perfectly complement deep fire-orange tones. The fields are reflective and beautifully preserved without signs of contact. As expected, strike definition is complete. From a mintage of 2,152 proofs. Population: 34 in 66 (1 in 66+) Red and Brown, 4 finer (4/17). NGC ID# 22AU, PCGS# 2403
- 3117 1907 PR66 Red and Brown PCGS.** Soft golden-tan luster on the devices mingles with the moderate tan fields to yield mild contrast. Razor-sharp design details includes all four diamonds and the feather tips. A great looking coin in all respects. Population: 23 in 66 Red and Brown, 4 finer (4/17). NGC ID# 22AW, PCGS# 2409

**1908 Cent, PR65 Red Cameo
Eye-Catching Contrast**

- 3118 1908 PR65 Red Cameo PCGS.** This stunning Gem Cameo proof exhibits fully brilliant and fiery orange surfaces with bold design motifs and impressive contrast between the mirrored fields and moderately frosted devices. The Mint produced 1,620 Indian Head cent proofs in 1908. Population: 5 in 65 Red Cameo, 6 finer (4/17). NGC ID# 22AX, PCGS# 82413

**1909 Indian Head Cent, PR65+ Red Cameo
Eye-Catching Final-Year Proof**

- 3119 1909 PR65+ Red Cameo NGC.** James B. Longacre's Indian Head cent design was employed for the final time in 1909, when 2,175 proofs and more than 14 million circulation strikes were produced. This outstanding Gem with Cameo contrast has fire-orange surfaces and hints of rose. The fields are deeply reflective, and eye appeal is unparalleled. Census: 3 in 65 Cameo (1 in 65+), 1 finer (4/17). NGC ID# 22AY, PCGS# 82416
-

LINCOLN

**1907 Victor D. Brenner Lincoln Plaque
Green Marble Backing With Bronze Stand
Model for Lincoln Cent**

- 3120 1907 Victor D. Brenner Lincoln Plaque. Cunningham-24-060Bz.** Bronze, 180 mm x 240 mm x 8 mm. Brenner's 1907 plaque was the model for the 1909 Lincoln cent. The plaque presents a half-length portrait of a bearded President Lincoln facing right. The plaque is backed by dark green marble interspersed with lighter olive-green streaks. The marble measures 215 mm x 275 mm x 10 mm. The back of the marble features a bronze stand. Lincoln's coat has been lightly textured by hand, likely as issued. The marble has a small chip on the upper left front corner.
-

LINCOLN CENTS

**1909 VDB Lincoln Cent, MS67+ Red
Superb Registry Set Quality**

- 3121 1909 VDB MS67+ Red PCGS.** Here offered is one of two dozen MS67 Red PCGS coins with the coveted Plus designation. Only one finer coin is reported at that service (5/17). The strike is sharp, and the frosty surfaces showcase radiant peach-gold luster with orange highlights. There are no obvious imperfections. An outstanding Registry Set acquisition. NGC ID# 22AZ, PCGS# 2425
-

**1909 VDB Lincoln Cent, MS66 Red
FS-1101, Doubled Die Obverse**

- 3122 1909 VDB Doubled Die Obverse, FS-1101, MS66 Red PCGS. CAC.** The date and LIBERTY show the die doubling the most clearly. This variety is rare in MS66 Red and nearly unknown finer. The current coin yields vibrant, frosty luster that is copper-gold throughout except for a crescent of violet along the upper-right obverse border. The strike is sharp and there are no major abrasions. Population: 17 in 66 (3 in 66+) Red, 1 finer (4/17). NGC ID# 4JR9, PCGS# 37633 Base PCGS# 82425
-
- 3123 1909-S VDB AU58 PCGS.** The 1909-S VDB continues to excite collectors as the famous Lincoln cent key. This near-Mint example shows essentially full detail and satiny chestnut-brown surfaces with hints of copper-orange luster near the rims. Toned luster remains in the fields and is seen when rotated beneath a light. NGC ID# BYKW, PCGS# 2426
- 3124 1909-S VDB MS63 Brown PCGS.** Lustrous golden-tan color glows beneath intermittent umber-brown accents on this appealing Select Uncirculated example. The low mintage of 484,000 pieces combines with huge collector demand for this first-year San Francisco Lincoln cent with the designer's initials sharply impressed on the reverse. NGC ID# BYKW, PCGS# 2426
- 3125 1909-S VDB MS64 Brown PCGS.** A boldly struck and contact-free example of the famous low mintage rarity. Glimmers of orange-red linger in design recesses, though the high points and open fields display lavender tints. A small area of deeper color is noted above the first 9 in the date. NGC ID# BYKW, PCGS# 2426
- 3126 1909-S VDB MS65 Brown PCGS.** Traces of gold luster peeks out from the recessed areas, especially on the reverse of this well-impressed VDB cent. A tiny spot is located near the 0 in the date and the O on ONE.. Population: 72 in 65 Brown, 10 finer (4/17). NGC ID# BYKW, PCGS# 2426
-

- 3127 1909-S/S S Over Horizontal S, FS-1502, MS65 Red NGC.** The old pre-hologram holder omits any reference to a blundered mintmark, but the coin is clearly a late die state of the popular *Guide Book* variety. A lustrous and unabraded Gem with pleasing wheat-gold and apricot color. NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434
- 3128 1909-S/S S Over Horizontal S, FS-1502, MS66 Red PCGS.** The original red surfaces of this delightful Premium Gem are brightly lustrous and virtually devoid of contact. Sharply detailed and nearly unimprovable. Population: 88 in 66 (11 in 66+) Red, 1 finer (4/17). NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434
- 3129 1910 MS67 Red PCGS.** Lovely sun-gold, coppery-orange, and pale olive hues adorn the thoroughly lustrous surfaces of this magnificent Superb Gem Red example. The strike is full, and a loupe reveals only the most trivial of ticks on Lincoln's jacket. None are numerically finer at either service. Population: 38 in 67 (4 in 67+) Red, 0 finer (4/17). NGC ID# 22B5, PCGS# 2437
- 3130 1910 MS67 Red NGC.** This glimmering Superb Gem is conditionally scarce and tied for the finest certified. The strike is sharp, and the fields especially are pristine. Luminous original copper-orange luster engulfs each side. Housed in a prior generation holder. Census: 14 in 67 Red, 0 finer (5/17). NGC ID# 22B5, PCGS# 2437

**1910 Lincoln Cent, MS67 Red
Fresh, Glowing Surfaces**

- 3131 1910 MS67 Red PCGS. CAC.** The frosty surfaces of this Superb Gem 1910 Lincoln cent seem to glow with undisturbed, die-fresh luster. The design elements are razor-sharp and there are no obvious signs of carbon. Among the finest certified, this CAC-endorsed 1910 boasts unsurpassed Registry Set potential. Population: 38 in 67 (4 in 67+) Red, 0 finer. CAC: 8 in 67, 0 finer (4/17). NGC ID# 22B5, PCGS# 2437
- 3132 1911-D MS66 Red PCGS.** The 1911-D is the first Lincoln cent issue struck at the Denver Mint. This delightful Premium Gem displays sharply detailed design elements and impeccably preserved original red surfaces, with vibrant mint luster throughout. Population: 62 in 66 (6 in 66+) Red, 1 finer (4/17). NGC ID# 22B8, PCGS# 2446
- 3133 1911-S MS65 Red PCGS. CAC.** This lustrous, satiny Gem Red 1911-S cent displays a sharp strike everywhere except on the O in ONE, the usual weak spot. No evidence of die erosion is seen, and neither are detracting carbon spots. Finer examples are rare. Population: 63 in 65 (1 in 65+) Red, 14 finer. CAC: 3 in 65, 2 finer (4/17). NGC ID# 22B9, PCGS# 2449
- 3134 1912-S MS65 Red PCGS.** A much better date, the 1912-S is seldom seen in Gem condition. Well-struck except on the LU in PLURIBUS and the O in ONE. Pumpkin-gold overall with scattered tiny spots and an area of gray patina on the left reverse. Certified in a first generation holder. NGC ID# 22BC, PCGS# 2458
- 3135 1912-S MS65 Red PCGS.** This satiny Gem exhibits sharp design motifs and brilliant orange mint color with excellent eye appeal. Population: 84 in 65 (9 in 65+) Red, 5 finer (4/17). NGC ID# 22BC, PCGS# 2458

- 3136 1913 MS66 Red PCGS.** Razor-sharp definition is evident on all design elements of this spectacular Premium Gem, and the original red surfaces are impeccably preserved, with vibrant mint luster throughout. Population: 82 in 66 (3 in 66+) Red, 10 finer (4/17). NGC ID# 22BD, PCGS# 2461
- 3137 1913 MS66+ Red PCGS. CAC.** 30th Anniversary Green Label Holder. An unabraded orange-red and sea-green representative. Glimpses of lilac are noted near the PL in PLURIBUS. Very rare any finer. Population: 82 in 66 (3 in 66+) Red, 10 finer. CAC: 16 in 66, 1 finer (4/17). NGC ID# 22BD, PCGS# 2461

**1914 Cent, MS66 Red
Satiny, CAC-Endorsed Example**

- 3138 1914 MS66 Red PCGS. CAC.** Orange-gold color adorns both sides of this gorgeous Premium Gem, each of which exhibits sharply struck design features, including Lincoln's hair and bow tie and the grains and lines in the wheat stalks. A few trivial marks do not detract from the coin's overall eye appeal. PCGS has seen 81 submissions in this level of preservation and a mere five pieces finer (5/17). This is a wonderful opportunity for the Lincoln cent specialist. NGC ID# 22BG, PCGS# 2470
- 3139 1914-S MS64 Red PCGS.** A well struck near-Gem with good luster and relatively clean surfaces. The rose-gold color is not far from full Red. NGC ID# 22BJ, PCGS# 2476
- 3140 1915-D MS66 Red PCGS.** A delightful coin for the specialist who demands original color and surfaces. Full Red appears on both sides with no noticeable fading, and only a few carbon flecks are scattered across both sides, particularly at O in ONE and above the date. The fields and raised devices are excellent, with a only tiny ticks found under scrutiny including a short mark hidden in Lincoln's hairline. A prize for the Lincoln cent collector and a coin that is currently tied behind one numerically finer coin at PCGS. Population: 35 in 66 (2 in 66+) Red, 1 finer (4/17). NGC ID# 22BL, PCGS# 2482
- 3141 1915-D MS66 Red PCGS.** Orange-gold luster exudes from the virtually flawless surfaces of this Premium Gem Lincoln cent. The design elements are sharply impressed throughout. Population: 35 in 66 (2 in 66+) Red, 1 finer (4/17). NGC ID# 22BL, PCGS# 2482
- 3142 1915-S MS64 Red and Brown PCGS. CAC.** The original red surfaces of this impressive Choice Lincoln cent have mellowed to light brown in some areas, but the design elements are sharply detailed and the well-preserved surfaces retain much of their original mint luster. PCGS has graded 34 numerically finer examples (4/17). NGC ID# 22BM, PCGS# 2484

**1915-S Cent, MS65 Red
Razor-Sharp Semikey**

3143 1915-S MS65 Red PCGS. With a relatively low mintage of 4.8 million coins, the semikey 1915-S attains condition rarity status in MS65 Red, where PCGS has seen a meager 35 submissions (three in MS65+ Red) and only six pieces finer (5/17). Chestnut-gold patina includes accents of fire-orange and lavender, but the razor-sharp strike is arguably this Gem's most impressive attribute. Small ticks leave the eye appeal unaffected. NGC ID# 22BM, PCGS# 2485

3144 1916 MS67 Red PCGS. This impressive Superb Gem is tied for the finest Red example certified at PCGS or NGC. Both sides have brilliant orange mint luster with surfaces that are free of carbon spots and marks. A wonderful piece for the Registry collector. Population: 70 in 67 (11 in 67+) Red, 0 finer (4/17). NGC ID# 22BN, PCGS# 2488

**1917 FS-101 Cent, AU55
Doubled Die Obverse**

3145 1917 Doubled Die Obverse, FS-101, AU55 PCGS. The 1917 FS-101 Lincoln cent variety exhibits clear doubling on the date and motto. This Choice About Uncirculated example shows it mostly on the 9, 7, and D WE TRUST. Chocolate-brown color dominates smooth surfaces with areas of steel-blue over the minimally worn high points. Lincoln's hair, the wheat sheaves, and O in ONE display bold detail. Population: 8 in 55, 17 finer (4/17). NGC ID# 22BS, PCGS# 37673 Base PCGS# 92495

**1918-D Cent, Scarce MS65 Red
Housed in a First Generation Holder**

3146 1918-D MS65 Red PCGS. A lustrous, golden-amber early branch mint cent, essentially void of abrasions and showing only a couple of minute flecks of carbon. The reverse periphery shows evidence of die erosion, but the strike is strong on Lincoln's face and shoulder, the O in ONE, and the AM in AMERICA, unusual for this issue. Housed in an first generation PCGS holder. Population: 36 in 65 (3 in 65+) Red, 8 finer (4/17). NGC ID# 22BW, PCGS# 2509

3147 1920-S MS65 Red and Brown PCGS. Original copper-red luster shines through overtones of olive-brown and violet on this Gem Red and Brown 1920-S cent. Die erosion appears in the fields, but the devices are still well-defined. Eye appeal is excellent. Population: 37 in 65 (1 in 65+) Red and Brown, 1 finer (4/17). NGC ID# 2547, PCGS# 2529

3148 1921 MS66+ Red PCGS. The original red surfaces of this spectacular Plus-graded Premium Gem are impeccably preserved, with vibrant mint luster on both sides. The design elements are sharply detailed throughout and eye appeal is terrific. Population: 82 in 66 (8 in 66+) Red, 14 finer (4/17). NGC ID# 22C6, PCGS# 2533

3149 1921-S MS65+ Brown PCGS. CAC. This CAC-approved, high-end Gem 1921-S cent is the sole finest Brown coin at PCGS. The satiny surfaces are void of mentionable abrasions and show well-defined motifs. Each side displays olive-green and gold-tinted coloration. Population: 18 in 65 (1 in 65+) Brown, 0 finer. CAC: 5 in 65, 0 finer (4/17). NGC ID# 22C7, PCGS# 2534

3150 1922-D MS65 Red PCGS. A nicely detailed and fully brilliant Red Gem with a shadowy mintmark that is typical of this issue. The 1922-dated cents were struck only in Denver. PCGS has certified a mere 14 finer Red examples of this issue (5/17). NGC ID# 22C8, PCGS# 2539

**1922 No D Cent, AU53
Strong Reverse, FS-401**

3151 1922 No D, Strong Reverse, FS-401, AU53 PCGS. Die Pair 2. This is the most sought-after die pair for the 1922 No D cents, with a Strong Reverse, a bold date, and absolutely no trace of a mintmark. Obverse details are generally soft, as the Denver mint prolonged die usage and engaged in extensive lapping. The reverse, however, features crisp definition with minimal evidence of circulation. A smooth, chocolate-brown representative. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**1922 No D Cent, Choice AU
Strong Reverse, FS-401**

3152 1922 No D, Strong Reverse, FS-401, AU55 PCGS. Die Pair 2. All diagnostics of the famous variety are present, such as a sharp second 2 in the date, strong definition on TRUST, and bold details on the wheat ears. This chocolate-brown cent has minimal wear and pleasing surfaces. Most FS-401 cents are well worn. At PCGS, the mean grade is VF25. The present example is ideal for the advanced collection. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

- 3153 1924 MS66 Red PCGS.** Frosty tangerine-orange surfaces offer radiant cartwheel luster on this Premium Gem Red example, while the design elements are sharp and there are no distracting carbon spots. Finer 1924 Lincoln cents are rare. Population: 83 in 66 (7 in 66+) Red, 11 finer (4/17). NGC ID# 22CC, PCGS# 2551
- 3154 1926-S MS64 Red and Brown PCGS.** Glimmers of copper-orange grace the rims, while the interiors show a mix of blue and brown. A largely smooth near-Gem representative of this long-underrated but increasingly popular S-mint issue. PCGS has seen 17 finer Red and Brown coins (5/17).
Ex: Long Beach Signature (Heritage, 9/2012), lot 3557. NGC ID# 22CL, PCGS# 2574
- 3155 1926-S MS64 Red and Brown PCGS. CAC.** Rich olive-green and burgundy toning appears on each side of this Choice Red and Brown coin, although significant copper-red luster penetrates in the fields. The strike is bold despite the usual die fatigue, and a few tiny flecks are largely invisible to the unaided eye. PCGS reports 17 finer Red and Brown representatives (5/17). NGC ID# 22CL, PCGS# 2574
- 3156 1928 MS67 Red PCGS. CAC.** A brilliant, well-struck, and beautifully preserved example, this Superb Gem displays tremendous eye appeal. The coin exhibits great color on both sides and only a few minor contact marks appear. No carbon spotting is seen. Population: 73 in 67 (10 in 67+) Red, 0 finer. CAC: 16 in 67, 0 finer (4/17).
Ex: Long Beach Signature (Heritage, 2/2013), lot 3193. NGC ID# 22CR, PCGS# 2587

**1929 Cent, MS67+ Red
None Known Finer**

- 3157 1929 MS67+ Red PCGS. CAC.** A conditionally scarce Superb Gem, tied for the finest known. This CAC-approved, Plus-graded 1929 Lincoln cent offers carbon-free surfaces and vibrant copper-orange mint luster with no abrasions. Some die wear is visible beneath a loupe, helping to generate the lustrous appeal. Population: 68 in 67 (7 in 67+) Red, 0 finer. CAC: 18 in 67, 0 finer (4/17). NGC ID# 22CU, PCGS# 2596
- 3158 1929-D MS66 Red PCGS.** A spectacular Premium Gem Lincoln cent, with impeccably preserved original red surfaces that radiate vibrant mint luster throughout. The design elements are sharply detailed and eye appeal is outstanding. Population: 33 in 66 (1 in 66+) Red, 0 finer (4/17). NGC ID# 22CV, PCGS# 2599
- 3159 1933-D MS67 Red PCGS.** Among the finest 1933-D Lincoln cents certified, this Superb Gem Red coin offers a bold strike with lovely cherry-red, olive-gold, and copper-orange hues throughout. There are no distracting abrasions or spots. Population: 34 in 67 (1 in 67+) Red, 0 finer (4/17). NGC ID# 22D8, PCGS# 2632
- 3160 1936 Doubled Die Obverse, FS-102, MS65 Red PCGS.** Doubling on the date and LIBERTY attributes the popular *Cherry-pickers'* variety. The orange-red surfaces are unabraded and teem with luster. Small areas of cobalt-blue are noted on the reverse margin at 3 o'clock, 4:30, and 6:30. PCGS# 37753 Base PCGS# 2650
- 3161 1937-S MS67+ Red PCGS. CAC.** The 1937-S cent is plentiful in MS67 Red, but only two dozen such coins are Plus-graded at PCGS. No finer representatives are reported by either leading service (5/17). This CAC-approved Registry coin offers frosty copper-orange luster and a bold strike. No abrasions or spots are seen. CAC: 54 in 67, 0 finer (4/17). NGC ID# 86CM, PCGS# 2665

- 3162 1938-S MS67+ Red PCGS. CAC.** The 1938-S cent is common in MS67 Red but unknown numerically finer. For Registry Set collectors, this Plus-graded Superb Gem — one of only 11 such coins at PCGS (5/17) — is a must-have item. The strike is full, and the carbon-free surfaces showcase flaming copper-orange luster and frosty texture. NGC ID# 22DN, PCGS# 2674
- 3163 1939-S MS67+ Red PCGS. CAC.** Neither PCGS or NGC have certified an MS68 Red example of the 1939-S Lincoln cent. This CAC-endorsed Superb Gem is one of the 39 Plus-graded MS67s that are the finest at PCGS (5/17). The carbon-free surfaces deliver luminous copper-orange luster and exceptional preservation. The strike is slightly soft on the O in ONE but sharp elsewhere. NGC ID# 22DS, PCGS# 2683
- 3164 1941 Doubled Die Obverse, FS-101, MS65 Red PCGS.** Lincoln and the central reverse field are apple-green. Orange-red dominates the peripheries. A lustrous and well struck Gem that lacks mentionable marks or carbon. The pick-up point for FS-101 is strong die doubling on the B in LIBERTY. The crossbar of the 4 in the date also shows dramatic doubling, as also seen on FS-102. NGC ID# 22DW, PCGS# 37780 Base PCGS# 92695
- 3165 1943-S MS67+ PCGS.** Beautiful ice-blue toning cools the silvery surfaces of this high-end Superb Gem, showing also a few tiny golden highlights. The strike is full and the preservation is outstanding. Finer examples of this steel cent issue are scarce. NGC ID# 22E8, PCGS# 2717
- 3166 1943-S MS68 PCGS.** This satiny 1943-S steel cent is brightly lustrous with unblemished silver surfaces and a sharp strike. We observe no distractions even under a 10x lens. The '43-S is seldom offered this fine and is unknown finer. Population: 62 in 68, 0 finer (4/17). NGC ID# 22E8, PCGS# 2717

**1944-D/S Cent, MS65 Red
FS-511, Guide Book Variety**

- 3167 1944-D/S FS-511 MS65 Red PCGS.** This is the rarer and more desirable of the two 1944-D/S varieties. The top of an underlying S is apparent above the primary D. Examples are very scarce in MS65 Red and rarely encountered in higher grades. Vibrant luster blends with fiery copper-orange color. Accents of blue and lilac appear sporadically. Well-struck with a few scattered flecks. Population: 49 in 65 (1 in 65+) Red, 13 finer (4/17). NGC ID# 2734, PCGS# 37834 Base PCGS# 2728
- 3168 1945-S MS67+ Red PCGS. CAC.** This Plus-graded Superb Gem is among the finest specimens seen at either of the leading grading services. The design elements are sharply rendered and the original red surfaces are virtually pristine. PCGS has graded no coins in numerically finer grades (4/17). NGC ID# 856Y, PCGS# 2740
- 3169 1949 MS67 Red PCGS.** Blazing, flame-orange surfaces display considerable mint frost and remarkably few imperfections of any kind, while full details accompany the smooth fields. A couple of tiny luster grazes on the lower reverse do not detract from the exceptional eye appeal of this Registry-quality Superb Gem. Population: 45 in 67 Red, 0 finer (4/17). NGC ID# 22EV, PCGS# 2770
- 3170 1950-S MS67+ Red PCGS. CAC.** The preservation of this amazing MS67+ Red Lincoln cent is practically flawless, with blazing fire-orange surfaces nearly devoid of marks. A bold strike and scintillating luster round out the appeal of this Registry-grade coin. Among the finest at PCGS. NGC ID# 22F2, PCGS# 2785

- 3171 1951 MS67 Red NGC.** This brilliant Superb Gem has fiery orange mint luster and bold design definition with excellent eye appeal. None are certified finer at NGC or PCGS. Census: 31 in 67 Red, 0 finer (5/17). NGC ID# 22F3, PCGS# 2788
- 3172 1953-S MS67+ Red PCGS. CAC.** This remarkable Registry Set blazer is tied with 11 other Plus-designated MS67 coins as the finest certified at PCGS (5/17), and ranks nearly half a grade point finer than the example in the current highest-rated Registry Set. Frosty, vibrant luster displays warm coppery-red hues on each side, while the strike is sharp and the surfaces are largely devoid of flaws. NGC ID# 22FB, PCGS# 2812

**1954-D Lincoln Cent, MS67+ Red
Tied for the Finest Certified**

- 3173 1954-D MS67+ Red PCGS.** An impressive Superb Gem, this 1954-D Lincoln cent is tied for the finest that PCGS or NGC have certified. Although the two grading services have examined more than 500 pieces in MS67 Red, only 11 of those have earned the Plus (+) designation (5/17). This frosty Mint State piece has fiery orange luster, lighter at the centers and richer near the borders. NGC ID# 22FD, PCGS# 2818

- 3174 1955 Doubled Die Obverse, FS-101, AU55 PCGS.** This dramatic doubled die is highly sought-after in all grades. Here offered is a lovely chestnut-brown example with a hint of high-point friction that denies it a Mint State grade. The surfaces are original, and the eye appeal is superb under a loupe. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3175 1955 Doubled Die Obverse, FS-101, AU58 NGC. CAC.** The 1955 Doubled Die Obverse Lincoln cent is one of the most sought-after *Guide Book* varieties in the U.S. series. This attractive near-Mint specimen shows just a trace of wear and the lightly abraded medium-brown surfaces show a few hints of original red. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3176 1955 Doubled Die Obverse, FS-101, MS62 Brown PCGS.** Glossy chocolate-brown surfaces offer satiny luster and minimal abrasions on this Mint State 1955 doubled die cent. The strike is bold, and eye appeal is excellent for the grade. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Cent, MS64 Brown
Doubled Die Obverse**

- 3177 1955 Doubled Die Obverse, FS-101, MS64 Brown PCGS. CAC.** The die doubling is plain to the unaided eye, and the luminous surfaces show rich burgundy-brown toning with hints of copper-red in the protected regions. The strike is excellent for the issue. Finer 1955 doubled die cents are scarce, regardless of grading service opinion on their color. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3178 1960 Small Date MS67 Red PCGS.** A conditional rarity, this Superb Gem Red example is among the finest 1960 Small Date Lincoln cents certified. The strike is full, and the frosty orange-gold surfaces display luminous eye appeal, almost devoid of carbon spotting. A Registry-grade rarity. Population: 21 in 67 Red, 0 finer (4/17). NGC ID# 22FV, PCGS# 2863

- 3179 1961 MS67 Red PCGS.** PCGS and NGC combined report only 32 1961 cents in MS67 Red or MS67+ Red, with none finer (5/17). This PCGS coin offers fiery copper-orange luster and frosty surfaces with superb eye appeal. Hints of rose-red and gold appear when tilted beneath a light. Population: 24 in 67 (1 in 67+) Red, 0 finer (4/17). NGC ID# 22LN, PCGS# 2872

- 3180 1971 Doubled Die Obverse, FS-101, MS65+ Red PCGS.** LIBERTY, IN GOD WE TRUST, and the date show obvious die doubling on this conditionally scarce *Guide Book* variety. This high-end Gem Red coin displays satiny luster and bold design definition with faint die striations in the fields. The obverse is struck minutely off-center toward 10 o'clock, with a very thin rim along the side. Population: 30 in 65 (1 in 65+) Red, 10 finer (4/17). NGC ID# 22GP, PCGS# 38009 Base PCGS# 92941

**1992-D Close AM Cent, MS62 Red
FS-901, Rare in Red Condition**

- 3181 1992-D Close AM, FS-901, MS62 Red NGC.** The AM in AMERICA touch at their bases. This *Guide Book* variety is rare in all grades, particularly in the Red category. Here offered is a low-end Mint State Red example, with original copper-red satin luster and relatively few abrasions. Gem-quality examples of this variety are prohibitively rare. This piece will appeal to budget-conscious collectors assembling Registry Sets or private collections. NGC ID# 22JK, PCGS# 391429 Base PCGS# 83101

PROOF LINCOLN CENTS

- 3182 1909 PR65 Red and Brown PCGS.** Broad rims and rich matte luster give this Gem the traditional matte proof appearance. Splashes of burgundy and violet toning in the centers cede to coppery-orange at the borders. We observe no distracting marks or other blemishes. NGC ID# 22KS, PCGS# 3304

- 3183 1910 PR65 Red and Brown PCGS. CAC.** The obverse is mostly bluish-brown with traces of red mint color, and the reverse is much the opposite with nearly full mint red and hints of brown patina. Finer Red and Brown proofs are scarce. Population: 74 in 65 (2 in 65+) Red and Brown, 40 finer. CAC: 23 in 65, 15 finer (4/17). NGC ID# 22KT, PCGS# 3307

- 3184 1911 PR64 Brown PCGS.** A pleasing near-Gem matte proof with broad rims and finely textured surfaces. Both sides display uniform chestnut-brown toning with no obvious distractions. Suitable as a date or type representative with the matte proof finish. NGC ID# 22KU, PCGS# 3309

- 3185 1913 PR66 Red NGC.** A lovely Premium Gem with brilliant orange luster and the fine-grained surface that is characteristic of the early 20th century proof Lincolns. This piece has excellent design definition with a few trivial carbon flecks. Ex: *FUN Signature* (Heritage, 1,2012), lot 4423. NGC ID# 22KW, PCGS# 3317

3186 1914 PR66 Red and Brown PCGS. The original red surfaces of this spectacular Premium Gem have mellowed to light brown in some areas, but the design elements are sharply detailed throughout and the well-preserved surfaces radiate vibrant mint luster on both sides. Overall eye appeal is terrific. Population: 41 in 66 (1 in 66+) Red and Brown, 6 finer (4/17). NGC ID# 22KX, PCGS# 3319

3187 1915 PR65 Brown PCGS. CAC. Earthy colors adorn the razor-sharp matte surfaces of this Gem proof Lincoln cent. Copper-red shades glow beneath blue and umber-brown overtones. The pinpoint strike reveals no imperfections to mention, while the eye appeal is extraordinary. Rightfully CAC endorsed for quality. Housed in a previous generation green label holder. Population: 26 in 65 Brown, 31 finer. CAC: 7 in 65, 15 finer (4/17). NGC ID# 22KY, PCGS# 3321

3188 1936 Type Two — Brilliant Finish PR65 Red PCGS. Rich fire-orange mirrors showcase wisps of lavender color, giving this Gem Red Type Two proof vivid eye appeal. The strike is sharp, and there are no distracting carbon spots. Finer examples are elusive. NGC ID# 22L3, PCGS# 3335

1936 Lincoln Cent, PR66 Red Scintillating Type Two, Brilliant Finish

3189 1936 Type Two — Brilliant Finish PR66 Red PCGS. A stunning, glassy-mirrored Brilliant Finish proof with alternating areas of vibrant cherry-red and pumpkin-orange color on both sides. The obverse is essentially faultless and spot-free, while the reverse is nearly its equal with only a few isolated, inconspicuous flecks that require a strong lens to view. The strike is razor-sharp and the eye appeal is extraordinary. Population: 58 in 66 (4 in 66+) Red, 2 finer (4/17). NGC ID# 22L3, PCGS# 3335

3190 1942 PR66 Red Cameo PCGS. CAC. A spectacular Premium Gem from the last year of the Mint's pre-World War II proof coinage offerings, this coin offers razor-sharp definition on all design elements and the deeply mirrored fields contrast boldly with the frosty devices. Population: 19 in 66 (1 in 66+) Cameo, 4 finer. CAC: 12 in 66, 0 finer (4/17). NGC ID# 22L9, PCGS# 83353

3191 1955 PR69 Red Cameo NGC. A conditionally rare Cameo proof and among the finest certified. The strike is full, and the copper-orange surfaces yield appreciable field-device contrast with no discernible imperfections. An essential Registry Set acquisition. Census: 9 in 69 Red Cameo, 0 finer (5/17). NGC ID# 22LF, PCGS# 83374

1977-S Lincoln Cent, PR70 Red Deep Cameo A Flawless Beauty

3192 1977-S PR70 Red Deep Cameo PCGS. A perfect proof Lincoln cent, this PR70 Deep Cameo example has deeply mirrored orange fields, and frosty and highly lustrous light orange devices. The strike is absolutely full, with Lincoln's features visible on his statue at the center of the Lincoln Memorial on the reverse. Population: 19 in 70 Deep Cameo (4/17). NGC ID# 22M9, PCGS# 93452

TWO CENT PIECES

3193 1864 Small Motto, FS-401, MS65 Brown NGC. After the key-date 1872, the 1864 Small Motto two cent piece is the only true stopper in the series. This piece is sharp and satiny. Burgundy, amber, brown, and olive hues encompass each side. The reverse die is shattered, showing a network of thin cracks throughout the margins. NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

3194 1865 Plain 5 MS66 Red and Brown NGC. Golden-orange luster dominates this two cent piece, especially on the obverse. Sharply struck design elements and well-cared for surfaces round out the pleasing eye appeal. Unlikely to be found any finer, as the two major services combined have seen only three grading higher. PCGS# 38248 Base PCGS# 3583

3195 1866 MS65 Red PCGS. Gem Red two cent pieces, except for the 1864 Large Motto and 1865, are seldom seen as one advances through the later issues in the series. This specimen of the 1866 is one of 45 submissions in Gem Red at PCGS (three of which are Plus-graded), and only 13 are finer, all in MS66 Red (5/17). The surfaces are problem-free as expected, displaying even medium red color and exuberant eye appeal.

Ex: Summer FUN Signature (Heritage, 7/2012), lot 3258; ANA Signature (Heritage, 8/2015), lot 3306. NGC ID# 274R, PCGS# 3590

1869 Two Cent, MS66 Red and Brown Among the Finest Certified

3196 1869 MS66 Red and Brown PCGS. CAC. Soft tan patina is somewhat more prevalent on the reverse of this lovely Premium Gem. Well-struck devices further highlight the coin's eye appeal. A minute spot is noted on the right upright of N in CENTS. Elusive in this level of preservation. Neither service reports a numerically finer example in Red and Brown. Population: 15 in 66 Red and Brown, 0 finer. CAC: 5 in 66, 0 finer (4/17). NGC ID# 22ND, PCGS# 3604

3197 1871 MS65 Red and Brown PCGS. CAC. Tan patina is more noticeable on the reverse of this Gem two cent piece. Well-struck devices and the lack of mentionable marks or spots affirm the CAC endorsement. Population: 50 in 65 (1 in 65+) Red and Brown, 3 finer. CAC: 29 in 65, 1 finer (4/17). NGC ID# 22NF, PCGS# 3610

3198 1872 XF45 PCGS. With a mintage of just 65,000 pieces, the 1872 is the key to the two cent series. This collectible Choice XF example displays uniform chocolate-brown color and generally problem-free surfaces. The coin has several planchet irregularities around the obverse shield and is weakly struck on portions of the reverse wreath, but these characteristics blend into the light wear that defines the grade. NGC ID# 22NG, PCGS# 3612

PROOF TWO CENT PIECES

1867 Two Cent, PR67 Red and Brown Single Finest Certified

3199 1867 PR67 Red and Brown NGC. Aside from the full impression and broad, squared-off rims, diagnostics for the 1867 two cent proof include the date closer to the ball than the border, and the left base of the 1 over the center of a dentil. The estimated mintage is 625+ specimens, and this is the single finest Red and Brown survivor among them. Daubs of cherry-red accent amber-gold color. Essentially void of contact. Census: 1 in 67 Red and Brown, 0 finer (4/17). NGC ID# 274W, PCGS# 3634

3200 1873 Closed 3 — Cleaning — PCGS Genuine. AU Details. Reddish-orange patina covers both sides of this two cent piece. The design elements are well-impressed and there are no significant marks. The cleaning does not appear all that bad.

3201 1873 Closed 3 PR63 Brown PCGS. A nice Select Brown Closed 3 proof with chestnut-brown toning and muted fields. The strike is sharp, and we find no singular imperfections of note. Population: 26 in 63 Brown, 75 finer (4/17). NGC ID# 2753, PCGS# 3651

THREE CENT SILVER

1851 Silver Three Cent, MS67 Among the Finest Certified

3202 1851 MS67 PCGS. CAC. Seemingly undisturbed, frosty luster glows on each side of this Superb Gem silver three cent, showing hints of gold and lilac toning around the margins. The central high points exhibit some strike weakness, not unusual for the issue. The 1851 is one of the most plentiful three cent silver issues in the series, ideal for type representation. Population: 20 in 67 (1 in 67+), 0 finer. CAC: 7 in 67, 0 finer (4/17). NGC ID# 22YX, PCGS# 3664

3203 1851-O MS64 PCGS. Soft lavender-gray patina imbued with hints of red on the reverse shows on this near-Gem. The devices are relatively well-struck for the design type. NGC ID# 22YY, PCGS# 3665

3204 1851-O MS64 Prooflike NGC. The New Orleans Mint coined 720,000 of these pieces, the only production of this denomination at any branch mint. Both sides of this brilliant near-Gem have mirrored fields with slight cameo contrast. Some central weakness is noted on each side, eliminating any possibility that this piece was intended to be a special proof strike. Population: 2 in 64 (1 in 64+) Prooflike, only 2 finer (5/17).

Ex: Central States Signature (Heritage, 5/2007), lot 1357; Long Beach Signature (Heritage, 9/2010), lot 3420. NGC ID# 22YY, PCGS# 3665

1853 Three Cent Silver, MS66+ Fully Struck Devices

3205 1853 MS66+ PCGS. CAC. Type One silver three cent pieces are fairly plentiful in high grade, although the 1853 is the scarcest of the Philadelphia issues in MS66 and finer. This high-end, CAC-approved example offers surprisingly full detail, frosty silver luster, and unabraded surfaces. Eye appeal abounds. Population: 78 in 66 (7 in 66+), 12 finer. CAC: 28 in 66, 9 finer (4/17). NGC ID# 22Z2, PCGS# 3667

3206 1854 MS65 NGC. The 1854 silver three cent is scarce in MS65 and rare finer. This satiny Gem offers impressively sharp strike definition from unlapped dies. A few tiny russet flecks appear throughout otherwise delicate champagne toning. Census: 29 in 65, 7 finer (5/17). NGC ID# 22Z3, PCGS# 3670

3207 1859 MS66 PCGS. Soft multi-colored toning on the obverse is confined mostly to the borders while the reverse takes on darker hues throughout. Well-defined and devoid of significant marks. Highly elusive in this grade level. Population: 22 in 66 (1 in 66+), 6 finer (4/17). NGC ID# 22Z8, PCGS# 3677

1863 Three Cent Silver, MS64 Gold CAC, Marvelous Toning

3208 1863 MS64 PCGS. Gold CAC. Three cent silver output dipped to its lowest point since the start of the series in 1863, the year after specie payments were suspended. Only 21,000 coins were struck. This MS64 representative showcases central violet-gray patina that anchors shades of blue, green, and golden-orange around the rims. Technical preservation is inarguably finer than the Choice assessment. Population: 22 in 64, 43 finer. Gold CAC: 3 in 64, 24 finer (4/17). NGC ID# 22ZD, PCGS# 3682

PROOF THREE CENT SILVER

- 3209 1861 PR65 PCGS. CAC.** Reddish-orange and grayish-sea green obverse toning cedes to grayish-mauve on the reverse. This well-struck piece shows a couple of trivial marks on the denomination. Population: 23 in 65 (1 in 65+), 12 finer. CAC: 7 in 65, 8 finer (4/17). NGC ID# 27C8, PCGS# 3710
- 3210 1867 PR65 Cameo NGC.** A handsome vignette of clear-gold with blue and amber accents surrounds the frosted silver centers of this boldly contrasted Cameo proof. The mirrored fields are glassy and unaffected by a few delicate die polish lines, while the strike is essentially full on all of the raised devices. A stunning proof worthy of any fine three cent silver collection. Census: 11 in 65 Cameo, 15 finer (4/17). NGC ID# 27CD, PCGS# 83717

1871 Three Cent Silver, PR66 Cameo Lightly Toned and Contrasted

- 3211 1871 PR66 Cameo PCGS.** The existence of only a single Deep Cameo proof 1871 silver three cent at PCGS makes this Premium Gem Cameo example all the more important. Conditionally rare, this piece offers glimmering fields and attractive gold and sea-green toning. Slight strike weakness is noted on the central shield. Population: 18 in 66 Cameo, 2 finer (4/17). NGC ID# 27CG, PCGS# 83722

1872 Three Cent Silver, PR66 Cameo Hint of Light Golden Color

- 3212 1872 PR66 Cameo NGC.** Sharply struck with glassy mirrored fields and mildly frosted devices that together create an attractive degree of cameo contrast on both sides. This exceptionally well-preserved piece is free of marks, except for a few tiny planchet flaws on each side. Faint die striations (as struck) are noted on the reverse. A conditionally scarce offering at the current grade level. Census: 3 in 66 Cameo, 3 finer (4/17).
Ex: Long Beach Signature (Heritage, 9/2007), lot 472; Long Beach Signature (Heritage, 9/2008), lot 570. NGC ID# 27CH, PCGS# 83723

1873 Silver Three Cent, PR65+ Deep Cameo Few Deep Cameos Known

- 3213 1873 PR65+ Deep Cameo PCGS. CAC.** This proof-only final-year date is rarely seen as a Deep Cameo, with PCGS having so-designated only nine coins in all grades. This high-end Gem is fully struck and well-contrasted with a hint of light golden toning. Produced with fairly fresh dies that show no significant lapping. Population: 4 in 65 (1 in 65+) Deep Cameo, 2 finer. CAC: 2 in 65, 1 finer (4/17). NGC ID# 27CJ, PCGS# 93724

THREE CENT NICKELS

- 3214 1865 MS66 PCGS. CAC.** A mintage of 11.3 million coins belies the rarity of the 1865 three cent nickel in Premium Gem condition or finer. This brilliant MS66 offering boasts a strong strike with minor softness on the denomination and bold clashing in the fields. Population: 51 in 66 (3 in 66+), 3 finer. CAC: 17 in 66, 2 finer (4/17). NGC ID# 22NJ, PCGS# 3731
- 3215 1865 MS66+ NGC. CAC. Ex: Highland Collection.** This brilliant, CAC-approved Premium Gem three cent nickel is heavily clashed on each side, but there is little in the way of post-Mint contact. Coruscating luster and a crisp impression are readily appreciable. Census: 24 in 66 (3 in 66+), 3 finer. CAC: 17 in 66, 2 finer (5/17). NGC ID# 22NJ, PCGS# 3731
- 3216 1866 MS66 PCGS.** Coruscating mint luster gleams from both sides of this frosted and vibrant Premium Gem three cent nickel. Scarce so fine, the coin is sharply struck despite multiply clashed dies. A pale ivory-gold sheen adds eye appeal to the cracked and clashed surfaces that suggest a near-terminal die state. Population: 38 in 66 (3 in 66+), 3 finer (4/17). NGC ID# 22NK, PCGS# 3732
- 3217 1867 MS66 NGC.** Virtually Condition Census, this Premium Gem 1867 three cent nickel displays shimmering, frosty luster on top of beautifully preserved, almost untuned surfaces. Struck from heavily clashed dies with moderate weakness on the central reverse Roman numerals. Census: 9 in 66, 3 finer (5/17). NGC ID# 26K7, PCGS# 3733
- 3218 1870 MS66 PCGS.** A splendid butter-gold Premium Gem. Abrasions are essentially absent, and the coruscating surfaces also appear devoid of carbon. One mint-made lintmark below the jaw. Population: 36 in 66 (3 in 66+), 0 finer (4/17). NGC ID# 22NM, PCGS# 3736
- 3219 1872 MS66 PCGS.** A boldly struck, satiny Premium Gem with ice-blue and champagne hues across each side. Minor clash marks are visible in the fields when studied beneath a loupe. The 1872 three cent nickel is rare this fine. Population: 16 in 66, 1 finer (4/17). NGC ID# 2757, PCGS# 3738
- 3220 1883 MS62 PCGS.** The 1883 nickel three cent is scarce in all Mint State grades, coming from a small mintage of 4,000 pieces. This MS62 coin displays satiny silver-gray luster and minimally abraded surfaces. The strike is sharp. Population: 16 in 62, 30 finer (4/17). NGC ID# 2765, PCGS# 3751

PROOF THREE CENT NICKELS

1866 Three Cent Nickel, PR67 Cameo Tied for Finest Certified

3221 1866 PR67 Cameo NGC. Frosty luster glistens on the sharp relief details of this Superb Gem Cameo proof, while the fields exhibit deep reflectivity. The coin is essentially brilliant and shows almost no mint-made planchet depressions as are often seen on this type in proof format. This 1866 three cent nickel proof is among the finest Cameos certified. Census: 3 in 67 Cameo (1 in 67 ★), 0 finer (5/17). NGC ID# 275L, PCGS# 83762

3222 1867 PR66 Cameo PCGS. CAC. Traces of warm golden toning accent the softly frosted motifs and deeply mirrored fields of this Premium Gem Cameo 1867 three cent nickel. Faint roller marks (mint-made) across the central reverse have not been fully struck out of the planchet. Population: 43 in 66 (5 in 66+) Cameo, 4 finer. CAC: 27 in 66, 3 finer (4/17). NGC ID# 275M, PCGS# 83763

3223 1869 PR66 Cameo PCGS. CAC. Sharp and well-contrasted, this Premium Gem Cameo proof displays excellent eye appeal. A light golden hue graces each side, and there are no distracting marks. Finer Cameos are rare. Population: 21 in 66 (1 in 66+) Cameo, 7 finer. CAC: 16 in 66, 4 finer (4/17). NGC ID# 275P, PCGS# 83765

3224 1872 PR66+ Cameo PCGS. Proof three cent nickel production amounted to 950+ specimens in 1872. Examples of this caliber are notably rare and virtually unimprovable. Brilliant, boldly contrasted surfaces exhibit thickly frosted motifs surrounded by watery fields. Population: 21 in 66 (1 in 66+) Cameo, 1 finer (4/17). NGC ID# 26JT, PCGS# 83768

3225 1881 PR67 Cameo NGC. CAC. This high-end proof Cameo boasts a full strike, although die lapping has reduced the bridge of Liberty's nose to the polished field. A hint of light golden toning warms each side with no distracting marks. Finer Cameos are rare. Census: 34 in 67 Cameo (4 in 67 ★), 11 finer. CAC: 33 in 67, 3 finer (5/17). NGC ID# 2763, PCGS# 83777

3226 1885 PR67+ PCGS. CAC. This high-end Superb Gem proof has been well cared for, evidenced by impeccably preserved surfaces. Razor-sharp devices include LIBERTY, the beads, and the lines in the denomination. Population: 41 in 67 (2 in 67+), 1 finer. CAC: 23 in 67, 0 finer (4/17). NGC ID# 2767, PCGS# 3781

3227 1886 PR67 PCGS. CAC. Soft nickel-gold patina runs over the immaculately preserved surfaces of this Superb Gem proof. Razor-sharp devices round out the coin's gorgeous eye appeal, affirmed by CAC. NGC ID# 2768, PCGS# 3782

3228 1886 PR67 PCGS. CAC. The superbly preserved, crisply impressed surfaces are lightly toned in golden-gray shades. The CAC sticker affirms the pleasing eye appeal. Population: 73 in 67 (4 in 67+), 3 finer. CAC: 23 in 67, 1 finer (4/17). NGC ID# 2768, PCGS# 3782

3229 1886 PR67+ PCGS. CAC. This gorgeous high-end Superb Gem proof exhibits razor-sharp design elements and immaculately preserved surfaces, affirming the CAC endorsement. Soft olive color adheres to both sides. Population: 73 in 67 (4 in 67+), 3 finer. CAC: 23 in 67, 1 finer (4/17). NGC ID# 2768, PCGS# 3782

1886 Three Cent Nickel, PR66 Deep Cameo The Finest Known With This Level of Contrast

3230 1886 PR66 Deep Cameo PCGS Secure. Ex: TDP Collection. Struck toward the end of the series, three cent nickels had largely become a novelty by 1886. No business strikes were produced this year, the mintage for the year limited to 4,290 proofs. This is the finest known with Deep / Ultra Cameo surfaces. Each side shows just the slightest hint of rose colored toning, and the field-device contrast is profound. Population: 1 in 66 Deep Cameo, 0 finer (4/17). NGC ID# 52WG, PCGS# 93782

3231 1887/6 Weak Overdate PR66 PCGS. FS-302. The design elements of this spectacular Premium Gem are well-detailed, with some design detail missing in the wreath, due to lapping. The well-preserved surfaces show hazily reflective fields with subtle highlights of pale gold toning. The remnants of an undertype 6 are visible beneath the last primary digit in the date. Population: 1 in 66, 0 finer (4/17). NGC ID# 276A, PCGS# 3784

3232 1887/6 FS-302 PR66+ PCGS. CAC. This Strong Overdate variety has a bold 6 visible below the left side of the 7, with the 1 and both 8s also showing doubling. A lovely proof, and one of the few overdated proof coins in the American series, this piece exhibits delicate champagne toning on its reflective light gray surfaces. Population: 77 in 66 (3 in 66+), 5 finer. CAC: 21 in 66, 5 finer (4/17). PCGS# 416356 Base PCGS# 3784

3233 1888 PR67 Cameo PCGS. An outstanding Superb Gem Cameo proof, this lovely nickel three-cent piece is a borderline Deep Cameo example with light gold toning on its brilliant surfaces, showing excellent field-to-device contrast. Population: 19 in 67 (1 in 67+) Cameo, 0 finer (4/17). NGC ID# 276B, PCGS# 83785

1888 Nickel Three Cent, PR66+ Starkly Contrasted Deep Cameo

3234 1888 PR66+ Deep Cameo PCGS. CAC. PCGS has seen only seven Deep Cameo proof 1888 three cent nickels in all grades. This high-end Premium Gem offers fully struck design elements with thick mint frost. The fields are deeply mirrored, producing dramatic cameo contrast. A hint of light champagne toning warms each side. Population: 2 in 66 (1 in 66+) Deep Cameo, 3 finer. CAC: 3 in 66, 2 finer (4/17). NGC ID# 276B, PCGS# 93785

3235 1889 PR67 PCGS. CAC. The fields are faintly reflective, although this champagne-tinged Superb Gem proof has an overall satiny appearance. The strike is without imperfection, and the preservation is nearly flawless. Finer proofs are rarely seen. Population: 63 in 67, 2 finer. CAC: 27 in 67, 1 finer (4/17). NGC ID# 22NW, PCGS# 3786

3236 1889 PR67 Cameo PCGS. CAC. A brilliant and beautiful Superb Gem. The portrait and wreath exhibit noticeable white-on-black contrast, and the seamless surfaces are sharply struck. Population: 26 in 67 (4 in 67+) Cameo, 1 finer. CAC: 18 in 67, 1 finer (4/17). NGC ID# 22NW, PCGS# 83786

SHIELD NICKELS

3237 1866 Rays MS65 PCGS. Light silver-gray and chestnut-gold toning embraces this lustrous and unmarked Gem. The strike shows softness on the ball of the shield and the uppermost stars, but most design elements are bold. A short-lived design subtype. NGC ID# 22NX, PCGS# 3790

3238 1866 Rays MS65 PCGS. The year 1866 saw the creation of the five cent to replace the lower denominations of fractional currency then in circulation. This evenly struck Gem features lustrous, stone-white surfaces with outstanding preservation. Numerous die cracks are seen on both sides.

Ex: Kimo Collection (Heritage, 7/2014), lot 3153, which realized \$1,645. NGC ID# 22NX, PCGS# 3790

1866 Rays Shield Nickel, MS66 Among the Finest at Both Services, CAC

3239 1866 Rays MS66 PCGS Secure. CAC. This 1866 Rays nickel ranks among the finest survivors from the first issue in the Shield nickel series. Each side is totally brilliant with a thick overlay of frosty luster. The obverse shows light cracks near the motto and the lower-left rim. The leaves show full veins, the shield is strongly detailed, and the reverse stars display bold radials and centers. Virtually unmarked. Population: 55 in 66 (4 in 66+), 0 finer. CAC: 8 in 66, 0 finer (4/17). NGC ID# 22NX, PCGS# 3790

3240 1870 MS65+ PCGS. Myriad die polishing lines are evident on both sides of this splendid Gem, with a die crack through the tops of UNITED STA that forms a small triangular break at the upper right side of the D in UNITED. This lovely piece has brilliant luster beneath delicate gold toning. Population: 48 in 65 (5 in 65+), 37 finer (4/17). NGC ID# 22P4, PCGS# 3797

1871 Shield Nickel, MS66 Among the Finest Known

3241 1871 MS66 PCGS. CAC. This better-date example is boldly struck and essentially distraction-free, with radiant nickel-gray surfaces. The mintage for 1871 was only 561,000 pieces. This piece is one of the highest graded at either service, with none finer. A superb choice for a type or date set. Population: 13 in 66 (2 in 66+), 0 finer. CAC: 8 in 66, 0 finer (4/17).

Ex: Long Beach Signature (Heritage, 6/2006), lot 581. NGC ID# 22P5, PCGS# 3798

3242 1873 Open 3 MS65+ PCGS. A sharply struck Open 3 coin with softly frosted silver-gray luster and no distracting abrasions. Some wispy peripheral die cracks appear on each side as usual. Finer Open 3 1873 Shield nickels are rarely offered. Population: 57 in 65 (6 in 65+), 12 finer (4/17). NGC ID# 22P8, PCGS# 3800

3243 1873 Open 3 MS65 PCGS. CAC. This lustrous Gem displays nickel-gray color and sharply struck design elements. There are no mentionable marks or spots, only some cracks, including one through the date. Population: 57 in 65 (6 in 65+), 12 finer. CAC: 16 in 65, 8 finer (4/17). NGC ID# 22P8, PCGS# 3800

1875 Shield Nickel, MS66 Unseen in Higher Grades

3244 1875 MS66 PCGS Secure. While its 2 million coin-mintage suggests otherwise, the 1875 Shield nickel is actually very rare in Premium Gem condition and unseen in higher grades. This Registry-quality offering presents magnificent gold and powder-blue patina with considerable brilliance remaining. The obverse is a touch soft, but the reverse is razor-sharp with a single tick on the denomination. Population: 14 in 66 (3 in 66+), 0 finer (4/17). NGC ID# 22PA, PCGS# 3804

1875 Shield Nickel, MS66+ Important Registry Opportunity

3245 1875 MS66+ PCGS. CAC. A boldly struck and delicately preserved representative, this Plus-graded Premium Gem 1875 Shield nickel also ranks among the three finest certified at PCGS, if only by the margin of the Plus designation. Frosty surfaces yield tinges of light golden toning around the margins, while both sides display the usual array of heavy peripheral die cracks. Population: 14 in 66 (3 in 66+), 0 finer. CAC: 4 in 66, 0 finer (4/17). NGC ID# 22PA, PCGS# 3804

PROOF SHIELD NICKELS

3246 1867 No Rays PR65 PCGS. Golden-tan color runs over both sides of this Gem, each of which exhibits sharply struck design elements. A few minute marks do not disturb. Population: 35 in 65, 13 finer (4/17). NGC ID# 4T4L, PCGS# 3821

**1867 Shield Nickel, PR66 Cameo
First-Year No Rays Proof**

- 3247 1867 No Rays PR66 Cameo PCGS.** Eye-catching cameo contrast characterizes the obverse, while the reverse is only modestly contrasted. Both sides are essentially brilliant and unmarked with stellar eye appeal. The 1867 No Rays proof is rarely offered in Premium Gem Cameo, and finer Cameos are prohibitively rare. Population: 19 in 66 (1 in 66+) Cameo, 1 finer (4/17). NGC ID# 5EB6, PCGS# 83821

**1867 No Rays Shield Nickel, PR66+ Cameo
Conditionally Rare, Starkly Contrasted**

- 3248 1867 No Rays PR66+ Cameo NGC.** The No Rays issue is the more plentiful of the two proof varieties of 1867, ideal for date representation. This high-end Premium Gem Cameo displays full design elements and deeply reflective fields with a hint of light golden toning. Finer Cameos are prohibitively rare. Census: 13 in 66 Cameo (1 in 66+, 3 in 66 ★), 2 finer (5/17). NGC ID# 5EB6, PCGS# 83821

- 3249 1872 PR66 Cameo PCGS. CAC.** This spectacular Premium Gem proof exhibits sharply detailed design elements throughout. Few proofs of this issue show Cameo surfaces, but the deeply mirrored fields of this specimen contrast boldly with the frosty devices. Population: 33 in 66 (3 in 66+) Cameo, 5 finer. CAC: 18 in 66, 0 finer (4/17). NGC ID# AMU4, PCGS# 83826

- 3250 1873 Closed 3 PR66+ PCGS. CAC.** The Closed 3 logotype, as always on proofs, indicates that this piece was struck early in the year, likely during the first two months of 1873. This lovely Premium Gem exhibits brilliant, untuned surfaces with deeply mirrored fields and a hint of contrast. Population: 34 in 66 (4 in 66+), 5 finer. CAC: 12 in 66, 3 finer (4/17). NGC ID# 5KX3, PCGS# 3827

- 3251 1878 PR65 PCGS. CAC.** A proof-only variety, and this example has the usual satiny appearance rather than mirrored. The strike is bold as expected on proof examples, and the surfaces are lustrous light gray. Hints of champagne toning add to the eye appeal. NGC ID# 276V, PCGS# 3832

- 3252 1878 PR66 PCGS. CAC.** The 1878 Shield nickel was struck only in proof format. This Premium Gem is modestly reflective and sharply defined, with essentially brilliant surfaces. PCGS reports 20 finer non-Cameos (5/17). NGC ID# 276V, PCGS# 3832

- 3253 1881 PR67 PCGS.** This Superb Gem proof shows delicate ice-blue toning over frosty devices and reflective fields. No cameo contrast is present, although the visual appeal lacks nothing. None are finer at PCGS. Population: 29 in 67 (2 in 67+), 0 finer (4/17). NGC ID# 5L6U, PCGS# 3836

LIBERTY NICKELS

1883 No Cents Liberty Nickel, Vibrant MS67+

- 3254 1883 No Cents MS67+ NGC. CAC.** This gleaming No Cents Liberty nickel showcases dazzling, mint-fresh luster. The issue in general is readily available, but coins this fine are scarce, and none are known finer. The obverse is weak along the lower-left border dentils and stars, and the reverse is incomplete on the corn ear to the left of the wreath bow, as usual. Both sides show faint peripheral die cracks. Census: 69 in 67 (1 in 67+, 4 in 67★), 0 finer. CAC: 15 in 67, 0 finer (4/17). NGC ID# 2772, PCGS# 3841

- 3255 1885 AU55 PCGS.** The 1885 is the runaway key date in the Liberty nickel series with a low mintage of 1.4 million coins. Stars 1 through 7 are incomplete, but Liberty's hair strands show crisp delineation. The left ear of corn is typically indistinct. Marks are scattered over the steel-gray surfaces of this cornerstone representative. NGC ID# 2773, PCGS# 3846

- 3256 1886 MS62 PCGS.** The 1886 is the second most sought-after issue in the Liberty nickel series, trailing only the 1885. This Mint State representative displays satiny luster and light olive-gold toning. The lower-left portion of the wreath and several obverse stars exhibit the usual strike weakness. NGC ID# 277U, PCGS# 3847

**1886 Liberty Nickel, MS65
Lower-Mintage Key Date**

- 3257 1886 MS65 PCGS.** The 1886 Liberty nickel claims a small mintage of 3.3 million pieces and few high-quality examples were saved by contemporary collectors. This attractive Gem is sharply detailed in most areas but with a touch of softness on the lower wreath. The well-preserved, lustrous surfaces are visited by shades of golden-tan and lavender-gray toning. Population: 47 in 65 (2 in 65+), 9 finer (4/17). NGC ID# 277U, PCGS# 3847

- 3258 1887 MS66 PCGS.** Premium Gem examples of the 1887 Liberty nickel are seldom seen, and finer coins are rare and out of reach for most collectors. This Registry Set-worthy coin displays vibrant, satiny luster and well-defined motifs. Various pastels of gold, mint-green, and rose encompass each side. Population: 43 in 66 (3 in 66+), 3 finer (4/17). NGC ID# 22PL, PCGS# 3848

- 3259 1891 MS66+ PCGS.** Challenging in high Uncirculated grades, the 1891 is a notable condition rarity in the Liberty nickel series. Glimpses of peach and blue toning flash across the lustrous, frosted surfaces of this high-end Premium Gem coin, depending on the angle to the light. The strike is uniformly sharp except at the usual trouble spot, the left ear of corn. Remarkably few examples are finer despite the mintage that approaches 17 million pieces. Population: 6 in 66+, 2 finer (4/17). NGC ID# 2776, PCGS# 3852

3260 1895 MS66 PCGS. This is a totally brilliant, needle-sharp Premium Gem from a mintage approaching 10 million coins. Two ticks within the hair and on the tip of the bust probably prevent an even higher grade. A single 1895 nickel is reported finer at both services combined. Population: 33 in 66 (3 in 66+), 1 finer (4/17). NGC ID# 277A, PCGS# 3856

3261 1898 MS66 PCGS. A high-end example of an issue that is popular among type collectors. This Premium Gem 1898 Liberty nickel displays satiny, champagne-tinted luster. The corn ear to the left of the wreath bow is slightly soft, and a single small tick is seen on Liberty's neck. Population: 41 in 66 (3 in 66+), 2 finer (4/17). NGC ID# 22PP, PCGS# 3859

3262 1899 MS66+ PCGS. Aside from some slight, inevitable incompleteness at the lower-left wreath, this high-end Premium Gem nickel is particularly well-struck. Liberty's hair strands and the star centers are sharp for the issue. Pleasing golden-gray patina displays ice-blue and rose highlights while cartwheel mint luster rolls across the finely grained surfaces. Marks are essentially nonexistent. Population: 8 in 66+, 6 finer (4/17). NGC ID# 22PR, PCGS# 3860

3263 1901 MS66+ PCGS. CAC. This Plus-graded Premium Gem exhibits well-detailed design elements, with a touch of the usual softness on the stars and lower wreath. The impeccably preserved surfaces are lustrous and lightly toned. Population: 85 in 66 (14 in 66+), 5 finer. CAC: 38 in 66, 3 finer (4/17). NGC ID# 277C, PCGS# 3862

3264 1905 MS66+ PCGS. CAC. Satiny luster shows subtle multicolor hues amid otherwise light golden toning on each side of this high-end Premium Gem. The corn ear to the left of the wreath bow is well-defined, but several obverse stars are incomplete. PCGS reports four finer coins (5/17). NGC ID# 277G, PCGS# 3866

3265 1908 MS66 PCGS. Setting aside the always-soft left ear of corn, this 1908 Liberty nickel features crisp definition on the stars, curls, and most of the wreath. The surfaces are wholly brilliant, awash is vibrant, swirling luster. Registry builders should take note of this top-quality offering. Population: 34 in 66 (8 in 66+), 0 finer (4/17). NGC ID# 24FR, PCGS# 3869

3266 1912-D MS66 PCGS. The 1912-D is the more plentiful of the two mintmarked issues in this series, although Premium Gems are conditionally scarce. This piece is among the finest at PCGS. The strike is above average, and each side offers delicate light golden toning. Population: 49 in 66 (4 in 66+), 0 finer (4/17). NGC ID# 277P, PCGS# 3874

PROOF LIBERTY NICKELS

3267 1883 No Cents PR67 Cameo PCGS. Most Superb Gem No Cents 1883 Liberty nickels are certified Cameos or non-Cameos, with Deep Cameo pieces extremely rare in this grade. No coins are numerically finer than PR67 with any degree of contrast. This top-grade Cameo displays exceptionally clean, deeply reflective fields with frosty design elements. Light golden border toning emerges on each side. A loupe reveals strike softness on the corn ear to the left of the wreath bow, as usual. Population: 26 in 67 Cameo, 0 finer (4/17). NGC ID# 22PU, PCGS# 83878

3268 1883 With Cents PR66 Cameo PCGS. CAC. A sharp, well-contrasted proof example of the third nickel type of 1883. This Premium Gem Cameo displays deeply reflective fields with a hint of light champagne color. Finer examples are rarely offered. Population: 47 in 66 (3 in 66+) Cameo, 5 finer. CAC: 21 in 66, 2 finer (4/17). NGC ID# 277S, PCGS# 83881

3269 1885 PR67 PCGS. CAC. Delicate ice-blue and champagne hues blend across each side of this Superb Gem 1885 proof nickel. The strike is sharp, and the obverse exhibits subtle cameo contrast. The 1885 proof enjoys heightened appeal due to the key date status of the business strike issue of this year. Population: 20 in 67 (3 in 67+), 2 finer. CAC: 15 in 67, 1 finer (4/17). NGC ID# 277T, PCGS# 3883

3270 1886 PR66 PCGS. CAC. This sharp, champagne-toned Premium Gem proof displays exceptional preservation with no direct evidence of surface contact. Modest field-device contrast on each side is nearly worthy of a Cameo designation. PCGS has seen 31 finer non-Cameos (4/17). NGC ID# 277U, PCGS# 3884

1886 Liberty Nickel, PR67 Nicely Toned Registry Grade Example

3271 1886 PR67 PCGS. CAC. This spectacular Superb Gem exhibits sharply detailed design elements in most areas, but a touch of the usual softness shows on the lower left wreath on the reverse. The surfaces are impeccably preserved, with deeply reflective fields under attractive shades of greenish-gold toning. Population: 32 in 67 (2 in 67+), 0 finer. CAC: 23 in 67, 0 finer (4/17). NGC ID# 277U, PCGS# 3884

3272 1890 PR66 Cameo PCGS. CAC. An impressive example, this Premium Gem Cameo proof has exquisite field-to-device contrast with brilliant nickel-gray surfaces. The deeply mirrored fields frame highly lustrous devices. Population: 22 in 66 (4 in 66+) Cameo, 1 finer. CAC: 8 in 66, 1 finer (4/17). NGC ID# 277Y, PCGS# 83888

3273 1892 PR66 Cameo PCGS. CAC. This fully struck Premium Gem Cameo proof has attractive light gray surfaces with full design details. The contrast borders on a Deep Cameo designation. Population: 52 in 66 (15 in 66+) Cameo, 7 finer. CAC: 17 in 66, 6 finer (4/17). Ex: *Long Beach Signature (Heritage, 2/2012), lot 3265*. NGC ID# 5EJP, PCGS# 83890

3274 1896 PR66 Cameo NGC. CAC. Nicely mirrored on both sides with a pinpoint-sharp strike across lightly frosted raised devices, this technically superior proof nickel gleams with surface quality seldom exceeded at either service. Only a half dozen finer Cameo proofs are reported by both services combined. NGC Census: 10 in 66 Cameo, 3 finer. CAC: 7 in 66, 0 finer (4/17). NGC ID# 2786, PCGS# 83894

3275 1897 PR67 Cameo PCGS. Sparse glints of golden toning add visual interest to the lilac-silver surfaces of this Superb Gem Cameo proof. A full strike covers the frosted raised motifs, which contrast nicely with the mirrored fields on both obverse and reverse. A splendidly preserved proof, ideal for series and type collectors alike. Population: 20 in 67 (5 in 67+) Cameo, 3 finer (4/17). NGC ID# 2787, PCGS# 83895

**1897 Liberty Nickel, PR67 Cameo
Lightly Toned**

- 3276 1897 PR67 Cameo PCGS. CAC.** The obverse boasts a distinctive swath of golden-tan toning, but the reverse is less intensely imbued with perceptible matching patina. Both sides show notable contrast between frosted devices and jet-black reflective fields amid excellent preservation — one small tick showing on Liberty's jaw notwithstanding. Quite attractive for the grade. Population: 20 in 67 (5 in 67+) Cameo, 3 finer. CAC: 17 in 67, 3 finer (4/17). NGC ID# 2787, PCGS# 83895

**1898 Five Cent, PR67
The Single Finest Non-Cameo at CAC**

- 3277 1898 PR67 PCGS. CAC.** This ice-blue and champagne-toned Superb Gem proof is tied for the finest at PCGS and is the sole finest non-Cameo endorsed by CAC. The strike is sharp, and the obverse exhibits a hint of field-device contrast. No distracting marks are visible. Population: 3 in 67, 0 finer. CAC: 1 in 67, 0 finer (4/17). NGC ID# 2788, PCGS# 3896
- 3278 1903 PR67 PCGS.** This coin features a full strike and virtually flawless preservation. The obverse has glasslike mirroring in the fields with pastel rainbow toning that forms concentric circles around the perimeter. The reverse is satiny with light golden color. Population: 25 in 67 (1 in 67+), 1 finer (4/17). NGC ID# 27MY, PCGS# 3901

1904 Nickel, Delicately Toned PR67

- 3279 1904 PR67 PCGS. CAC.** Ice-blue and champagne hues decorate pristine mirrors on this sharp Superb Gem proof. The obverse is modestly contrasted. No finer non-Cameos are reported by PCGS or NGC, and this piece is tied with one other as the finest at CAC. A truly impressive proof type coin. Population: 5 in 67, 0 finer. CAC: 2 in 67, 0 finer (4/17). NGC ID# 278E, PCGS# 3902

- 3280 1905 PR67 PCGS.** Glimmering mirrored fields complement satiny, razor-sharp design elements on this Superb Gem 1905 proof. Ice-blue toning accents the interiors, ceding to lemon-gold at the borders. Few finer coins are known. Population: 17 in 67 (1 in 67+), 1 finer (4/17). NGC ID# 278F, PCGS# 3903

- 3281 1905 PR67 PCGS. CAC.** Superb Gem proof 1905 Liberty nickels are rare, and pieces grading finer than this PR67 coin are prohibitively so. The current coin shows full detail and deep mirroring with ice-blue and champagne toning overall. The reverse is appreciably contrasted. Population: 19 in 67 (1 in 67+), 1 finer. CAC: 12 in 67, 1 finer (4/17). NGC ID# 278F, PCGS# 3903

- 3282 1906 PR67 PCGS. CAC.** Delicate ice-blue and faint champagne hues accent the mirrored fields of this Superb Gem proof 1906 Liberty nickel. The strike is full, and the obverse exhibits modest field-motif contrast. Population: 16 in 67 (1 in 67+), 0 finer. CAC: 8 in 67, 0 finer (4/17). NGC ID# 278G, PCGS# 3904

- 3283 1907 PR67 PCGS. CAC.** This CAC-approved Superb Gem is closer to a Cameo designation than most 1907 proof nickels, showing mirrored fields and smooth, satiny motifs. A blend of champagne and ice-blue toning adds color to each side. None are finer at either service. Population: 27 in 67 (11 in 67+), 0 finer. CAC: 8 in 67, 0 finer (4/17). NGC ID# 278H, PCGS# 3905

- 3284 1907 PR67 PCGS. CAC.** This CAC-approved Superb Gem is among the finest non-Cameo proof 1907 nickels known. The strike is full, and each side displays lovely ice-blue, lavender, and champagne hues in delicate pastel shadings. There is subtle contrast on the obverse. Population: 31 in 67 (14 in 67+), 0 finer. CAC: 9 in 67, 0 finer (4/17). NGC ID# 278H, PCGS# 3905

- 3285 1907 PR67 PCGS. CAC.** No non-Cameo proof 1907 nickels are finer than this CAC-approved Superb Gem. It is fully struck and shows modest cameo contrast through a blush of champagne and powder-blue toning. A thin threadlike strike-through is discernible in the right obverse field near star 12. An unusually high number of coins are reported at PCGS in PR67 and PR67+, suggesting that the population may be inflated by resubmissions. Population: 31 in 67 (14 in 67+), 0 finer. CAC: 9 in 67, 0 finer (4/17). NGC ID# 278H, PCGS# 3905

- 3286 1908 PR67 PCGS.** A top-grade coin at PCGS, this Superb Gem 1908 proof Liberty nickel displays delicate champagne toning over the obverse with pastel rainbow hues across the reverse. The strike is bold, and there are no marks. Subtle contrast is discernible on the obverse. Population: 27 in 67 (4 in 67+), 0 finer (4/17). NGC ID# 278J, PCGS# 3906

- 3287 1909 PR67 PCGS.** Reflective fields offer a satiny texture at certain angles beneath a lovely blend of lavender and powder-blue toning. The corn ear to the left of the wreath bow is slightly weak, although the design elements are sharp elsewhere. Population: 48 in 67, 3 finer (4/17). NGC ID# 278K, PCGS# 3907

- 3288 1909 PR67 PCGS. CAC.** This intricately struck, delicately toned Superb Gem proof offers lovely lavender-blue and champagne hues. Both sides showcase modest field-device contrast, as this coin must have just missed a Cameo designation. Population: 48 in 67, 3 finer. CAC: 20 in 67, 1 finer (4/17). NGC ID# 278K, PCGS# 3907

- 3289 1909 PR67 Cameo PCGS. CAC.** Iridescent lime-green, rose-red, and butter-gold toning endows the upper obverse. A razor-sharp Superb Gem with pristine surfaces and luminous motifs. Population: 32 in 67 (3 in 67+) Cameo, 2 finer. CAC: 28 in 67, 2 finer (4/17). NGC ID# 278K, PCGS# 83907

BUFFALO NICKELS

1916 Nickel, Fine Details Doubled Die Obverse, FS-101

- 3290 1916 Doubled Die Obverse, FS-101 — Environmental Damage — PCGS Genuine. Fine Details.** This famous Doubled Die Obverse nickel is highly sought-after in any grade, with or without surface issues. This Fine Details example shows signs of having potentially been in a fire, with areas of deep violet color throughout. Doubling on the date remains readily apparent. A collectible example of this challenging *Cherrypickers'* and *Guide Book* variety.

- 3291 1918-D MS64 NGC.** This near-Gem example is well struck except for the hair above the braid and the bison's shoulder. The lower left reverse has a minor lamination, as made. Delicate champagne toning shows hints of iridescence. In a prior generation holder.
Ex: *FUN Signature* (Heritage, 1/2008), lot 751. NGC ID# 22RH, PCGS# 3938

1919-D Nickel, Colorful MS64+ Excellent Quality for the Grade

- 3292 1919-D MS64+ PCGS.** The population of 1919-D nickels drops markedly from MS64 to MS65. This Plus-designated Choice Uncirculated example straddles the line between those two grades and enjoys marvelous aesthetic quality. Blue, gold, and lavender shadings drape each side with satiny luster underneath. Detail is lacking somewhat on the bison's head and tail but is good elsewhere. The obverse exhibits numerous spindly cracks. Struck from slightly rotated dies. NGC ID# 22RM, PCGS# 3942
- 3293 1919-S MS64 PCGS.** Lustrous nickel-gray surfaces display well-impressed devices except for the hair on the bison's head. A couple of minute obverse spots are mentioned for complete accuracy. NGC ID# 22RN, PCGS# 3943

1920-S Nickel, MS64 Light Golden Toning

- 3294 1920-S MS64 PCGS. CAC.** The 1920-S ranks among the scarcest issues in Uncirculated grades, and most such pieces are indifferently struck from overused dies. The present unblemished near-Gem shows moderate incompleteness at the centers but the legends and the bison's extremities are well defined. The lustrous surfaces display wheat-gold and olive-green toning. PCGS reports 25 numerically finer examples (4/17). NGC ID# 22RS, PCGS# 3946
- 3295 1925 MS65 PCGS. CAC.** The 1925 is a plentiful date through MS66. The appeal of this CAC-endorsed Gem is its outstanding quality within the grade. Iridescence appears throughout the olive-gold patina, but we observe no mentionable abrasions on either side. The strike is above average for the issue. NGC ID# 22S2, PCGS# 3954

1925-D Nickel, MS65 High-End for the Grade

- 3296 1925-D MS65 PCGS.** This Gem 1925-D is incredibly frosty and well-preserved, producing the visual appeal often associated with an even higher grade. The champagne-tinted surfaces have a few tiny russet flecks that are seen under a loupe. The strike is bold despite moderate die erosion in the fields. NGC ID# 22S3, PCGS# 3955
- 3297 1925-S MS64 PCGS.** The 1925-S is another of the well-known strike rarities from the 1920s, apparently created by broad set distances between the dies. Softness is a given, and any strength of strike is relative to what is usually encountered. This piece shows an above-average strike, but of course it cannot be compared to a 1925-P. The mint luster is softly frosted and just the slightest layer of rose and lilac patina is seen over each side. NGC ID# 22S4, PCGS# 3956
- 3298 1926 MS67 PCGS.** Superb Gem examples of the 1926 are important condition rarities, three grade points finer than the typical coin seen at the certification services. Softly frosted luster illuminates pristine surfaces lightly toned in powder-blue and golden patina. A bold, eye-appealing representative. Population: 45 in 67 (1 in 67+), 0 finer (4/17). NGC ID# 22S5, PCGS# 3957
- 3299 1926-S AU50 NGC.** The 1926-S boasts the lowest mintage of the series at 970,000 pieces and is appropriately popular in all grades. This About Uncirculated coin displays bold detail and original pewter-gray color with problem-free surfaces. NGC ID# 22S7, PCGS# 3959

3300 1929 MS66+ PCGS. This well-preserved, frosty 1929 Buffalo nickel yields warm golden toning. The central high points are softly struck as usual. Plus-graded Premium Gems are seldom offered, and PCGS has seen only 10 finer coins (5/17). The NGC population is even smaller. NGC ID# 22SE, PCGS# 3966

3301 1929-S MS66+ PCGS. Lovely pastel rainbow hues around the borders complement golden interiors on this high-end Premium Gem 1929-S nickel. The strike is soft on the central high points as usual, but no distracting abrasions are seen. PCGS reports nine finer representatives (5/17). NGC ID# 22SG, PCGS# 3968

1930 Buffalo Nickel, MS67 Radiant Mint Luster, Sharply Struck

3302 1930 MS67 PCGS. CAC. The 1930 is one of the best-produced of all Buffalo nickels. The mint luster is consistently bright and frosted. The only warning for collectors is not all coins are well struck — but this one is. Just the slightest hint of rose and lilac patina can be seen over each side, highlighted, as one would expect, by radiant mint luster. Population: 37 in 67 (1 in 67+), 0 finer. CAC: 7 in 67, 0 finer (4/17). NGC ID# 22SH, PCGS# 3969

3303 1936-D 3 1/2 Legs, FS-901, VF20 PCGS. CAC. The bison's right front leg is partially effaced by die lapping, although not as severely as is seen on the 1937-D Three-Legged variety. This midgrade circulated 1936-D coin displays pleasing battleship-gray patina and grade-consistent detail. NGC ID# 22ST, PCGS# 38471 Base PCGS# 93978

3304 1937-D Three-Legged, FS-901, MS62 PCGS. This Uncirculated Three-Legged nickel, a collector-favorite *Guide Book* variety, is richly toned in golden-brown patina. Die erosion is evident on each side, but the sharp strike is largely unaffected. The reverse shows scattered ticks, while the obverse is comparatively clean. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1937-D Three-Legged Nickel, MS63 FS-901, Famed *Guide Book* Variety

3305 1937-D Three-Legged, FS-901, MS63 PCGS. The line of raised dots from the bison's stomach to the mound confirm the authenticity of the 1937-D Three-Legged nickel, one of the most famous, and forged, varieties in 20th century American numismatics. This Select offering shows alternating tan-gold and powder-blue hues over well-struck and nicely preserved surfaces. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKELS

3306 1913 Type Two PR65 PCGS. This flawlessly struck Type Two matte proof offers luminous matte luster and warm golden toning with hints of silver and lavender throughout. Elusive in finer grades, the 1913 Type Two proof is collectible and affordable at the Gem level. NGC ID# 278S, PCGS# 3990

3307 1915 PR66 PCGS. CAC. A pleasing matte proof with full strike definition and wonderfully smooth, untouched fields and devices. Light cream-gray obverse coloration turns to a deeper shade of wheat-gray mingled with pastel golden accents over the reverse. NGC ID# 278U, PCGS# 3992

3308 1936 Type Two — Brilliant Finish PR65 PCGS. A reflective, fully struck Gem Brilliant proof that appears untuned to the naked eye but shows delicate hints of gold and lavender beneath a glass. From a mintage of only 4,420 pieces, which includes the satin finish variety. NGC ID# 278Y, PCGS# 3995

1936 Nickel, PR67 Brilliant Finish

3309 1936 Type Two — Brilliant Finish PR67 PCGS. This sharp Type Two proof showcases deeply mirrored surfaces under a subtle hint of light champagne toning. The Brilliant Finish proof nickel of 1936 is occasionally available in PR67 but is rare finer. PCGS has seen only eight higher-grade representatives (5/17), making coins in the current grade highly sought-after. NGC ID# 278Y, PCGS# 3995

JEFFERSON NICKELS

3310 1943/2-P Doubled Die Obverse, FS-101, MS67 PCGS. As with other World War II overdate issues, the 1943/2-P was created when working hubs of different dates were used to make a working die. This is a thoroughly lustrous Superb Gem that has mark-free surfaces and a hint of gold toning. The high points of Jefferson's portrait show minor flan chatter, as struck. Population: 1 in 67, 0 finer (4/17). NGC ID# 8GHB, PCGS# 38499 Base PCGS# 4019

1943/2-P Nickel, MS66 Full Steps Popular Overdate *Guide Book* Variety

3311 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS. Minor die doubling on the obverse is from the dual-date hubbing of this obverse die, which struck one of the most important varieties in the Jefferson nickel series. This Premium Gem Full Steps coin has few superiors. Satiny luster is well-preserved and the strike is sharp. Golden toning appears on each side. Population: 45 in 66 (5 in 66+) Full Steps, 7 finer (4/17). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

**1943/2-P Nickel, MS66 Full Steps
Doubled Die Obverse, FS-101**

- 3312 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS. CAC.** The base and diagonal downstroke of an underdigit 2 is apparent within the 3 in the date. Last of the wartime hubbed overdates, the 1943/2-P is also a minor doubled die obverse variety. LIBERTY and the date are minutely doubled. Brilliant and well-struck with booming luster and exemplary preservation. Population: 43 in 66 (5 in 66+) Full Steps, 7 finer. CAC: 9 in 66, 0 finer (4/17). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

- 3313 1943-D MS68 PCGS.** Beautiful pastel hues of blue-green, lilac, and gold cover this nearly flawless MS68 nickel. Satin luster issues from the underlying, virtually mark-free surfaces. Strong design definition falls just shy of a Full Steps designation. Registry specialists will appreciate that this is the sole finest example at PCGS, and they should bid accordingly (5/17). NGC ID# 22TS, PCGS# 4020

- 3314 1943-S MS67+ PCGS.** A spectacular Plus-graded Superb Gem, with razor-sharp definition on all design elements and impeccably preserved surfaces that radiate vibrant mint luster, with hints of vivid lime-green and pale lavender toning. PCGS has graded no numerically finer examples (4/17). NGC ID# 22TT, PCGS# 4021

**1943-S Nickel, MS67+ Full Steps
Only One Coin Finer at PCGS**

- 3315 1943-S MS67+ Full Steps PCGS.** Only a single Full Steps coin is finer at PCGS (4/17). This remarkably high-end, sharply struck, and beautifully preserved 1943-S silver-alloy nickel is the epitome of the ideal Registry coin. Faint die polishing lines in the fields generate reflectivity on each side. A light champagne hue decorates the surfaces entirely. Population: 14 in 67+ Full Steps, 1 finer (4/17). NGC ID# 22TT, PCGS# 84021

**1943-S Nickel, MS67+ Full Steps
Delightful Luster and Pastel Toning**

- 3316 1943-S MS67+ Full Steps PCGS.** There are only 14 Plus-graded 1943-S nickels in this grade at PCGS, with a single MS68 Full Steps example finer (5/17). This Registry-grade condition rarity displays original frosty luster and delicate champagne, mint-green, and amber toning. Sharpness appears throughout the relief elements and there are no distractions. NGC ID# 22TT, PCGS# 84021

- 3317 1946 MS66 Full Steps PCGS.** This Premium Gem 1946 nickel is among the finest Full Steps coins certified. The strike is bold and the luster is satiny. A hint of light golden toning accents the well-preserved surfaces. An essential Registry Set acquisition. Population: 35 in 66 Full Steps, 0 finer (4/17). NGC ID# 22U2, PCGS# 84028

- 3318 1948 MS66 Full Steps PCGS.** Lustrous shades of tangerine-orange and lilac alternate across both sides of this exceptional Full Steps 1948 nickel. The strike is uncommonly bold for this postwar issue, which does not exist in a numerically finer grade at PCGS. A Registry Set contender of the highest order. Population: 20 in 66 (1 in 66+) Full Steps, 0 finer (4/17). NGC ID# 22U8, PCGS# 84034

- 3319 1957 MS66 Full Steps PCGS.** Translucent shades of pale-blue and peach-gold add eye appeal to the Premium Gem surfaces of this well-struck 1957 nickel. More than 38 million pieces were produced, but precious few attain the MS66 grade with Full Steps. No coins are numerically finer at either service. Population: 28 in 66 (1 in 66+) Full Steps, 0 finer (4/17). NGC ID# 22V2, PCGS# 84061

PROOF JEFFERSON NICKELS

**1939 Reverse of 1938 Nickel, PR68
Gorgeous Light Toning, None Certified Finer**

- 3320 1939 Reverse of 1938 PR68 NGC.** While the vast majority of 1939 proofs are the Reverse of 1938 variant (with "wavy steps" on Monticello), the distinction is for practical purposes moot at the conditional rarity of this Superb Gem proof. Only about two dozen PR68 coins of both varieties combined exist, of which only two are the Reverse of 1940. The rest are the Reverse of 1938 such as this example. Glimmering mirrored surfaces surround the lightly frosted devices with iridescent toning in the fields. Glimpses of steel-blue, lilac, rose, and wheat-gold shades embellish surfaces that are virtually free of marks. A microscopic dimple hidden near the back of Jefferson's collar serves as a useful pedigree marker. Census (Reverse of 1938): 10 in 68 (2 in 68 ★), 0 finer (5/17). NGC ID# 279X, PCGS# 4176

3321 1939 Reverse of 1940, FS-901, PR67 PCGS. The Reverse of 1940 is elusive in this condition, showing sharp, straight steps on Monticello. The present Superb Gem yields deeply mirrored fields and bold strike definition with a blush of light golden toning. Population: 78 in 67 (7 in 67+), 1 finer (4/17). NGC ID# 2TR4, PCGS# 38534 Base PCGS# 94176

3322 1939 Reverse of 1940, FS-901, PR67 PCGS. CAC. The Bowers reference reports that the "vast majority" of 1939 proofs are the Reverse of 1938 type with wavy and indistinct steps on Monticello. The present Superb Gem proof is clearly the less-seen Reverse of 1940 with six razor-sharp steps. A thin veil of champagne-gold toning adds visual allure to the glittering and glassy-smooth mirrored surfaces of this splendid example. Population: 77 in 67 (7 in 67+), 1 finer. CAC: 18 in 67, 1 finer (4/17). NGC ID# 2TR4, PCGS# 38534 Base PCGS# 94176

1940 Nickel, PR67+ Reverse of 1938

3323 1940 Reverse of 1938, FS-901, PR67+ PCGS. CAC. This is an elusive variety in high grade. Monticello shows the mushy, wavy steps of the 1938 hub type, although the strike is fully rendered. The fields are mirrored and each side exhibits delicate champagne toning. A Condition Census example. Population: 72 in 67 (5 in 67+), 2 finer. CAC: 15 in 67, 1 finer (4/17). NGC ID# 279Y, PCGS# 38540 Base PCGS# 94177

3324 1941 PR67+ PCGS. CAC. A conditionally scarce, Registry-grade proof 1941 nickel, surpassed by only four higher-grade coins at PCGS (5/17). This CAC-endorsed Superb Gem displays full detail and lovely pastel toning with deeply mirrored fields. NGC ID# 27A2, PCGS# 4178

1950 Nickel, PR67 Deep Cameo Among the Finest at PCGS

3325 1950 PR67 Deep Cameo PCGS. Only two dozen Deep Cameo proof 1950 nickels are reported at PCGS, and this Superb Gem is among the finest (5/17). The design elements are sharp and frosty, and the field-motif contrast is excellent. Warm golden toning adds character to each side. Population: 11 in 67 (1 in 67+) Deep Cameo, 0 finer (4/17). NGC ID# 27A5, PCGS# 94182

3326 1956 PR68 Deep Cameo PCGS. Outstanding field-to-device contrast is evident on this important Premium Gem Deep Cameo proof. Both sides are untoned with brilliant silver-gray surfaces and full design details as expected. A Registry Set contender of considerable merit. Population: 12 in 68 (2 in 68+) Deep Cameo, 1 finer (4/17). NGC ID# 22YG, PCGS# 94188

3327 1958 PR69 Cameo PCGS. Cameo contrast is rarely encountered on the proof Jefferson nickels from this era. This piece has light gray surfaces and wisps of delicate gold toning with outstanding eye appeal. Population: 3 in 69 Cameo, 0 finer (4/17). NGC ID# 56NY, PCGS# 84190

1971 Jefferson Nickel, PR69 Deep Cameo Rare No S Variant, None Certified Finer

3328 1971 No S PR69 Deep Cameo PCGS. FS-501. An unknown, but certainly small, number of proof Jefferson nickels were struck from a die that inadvertently left off the S mintmark in 1971. The elusive No S coins are rarely seen with deeply contrasted surfaces and none have been certified above the PR69 level with the Deep Cameo designation at either of the leading grading services (4/17). This magnificent PR69 specimen is fully struck and impeccably preserved, with deeply reflective fields that contrast profoundly with the richly frosted devices. NGC ID# 22YN, PCGS# 94204

EARLY HALF DIMES

1795 V-5, LM-8 Half Dime, VF25 Deep Gunmetal-Blue Patina

3329 1795 V-5, LM-8, R.3, VF25 NGC. The absence of berries under the wings and star 9 away from the Y confirm the V-5, LM-8 attribution. The entirety of this VF25 Flowing Hair half dime is toned in deep gunmetal-blue patina. Liberty's portrait is well-detailed, and the peripheral elements are bold on each side. Adjustment marks occur in a northwest to southeast fashion across the reverse. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1795 V-5 Half Dime, AU Details

3330 1795 V-5, LM-8, R.3 — Planchet Flaw — PCGS Genuine. AU Details. The variety lacks an inner or outer berry near the U, and the star is distant from the Y. Light silver centers and olive patina around the edges provide color to this pleasing 1795 half dime. Design definition remains pinpoint-sharp. Deep linear adjustment marks cross each side, apparently accounting for the Details grade.

1795 Half Dime, VF25
V-4, LM-10, Pleasing for the Grade

- 3331 1795 V-4, LM-10, R.3, VF25 PCGS. CAC.** Digit 1 touches the curl, star 1 joins the tip of curl 2, and there is one outer berry between TY and star 9. Pleasing medium gray patination embraces both sides, leaving the well-defined devices just a shade or two lighter than the fields. A planchet lamination is visible in the left obverse quadrant. NGC ID# 22ZV, PCGS# 38594 Base PCGS# 4251

1796 V-1, LM-1 Half Dime, AU Details
LIKERTY Guide Book Variety

- 3332 1796 LIKERTY, V-1, LM-1, R.3 — Obverse Planchet Flaw — NGC Details. AU.** This is a bright example of the famous LIKERTY Guide Book variety, showing openings at the upper and lower loops of the B. The leaf tip far from the F in OF is another helpful attribution marker. A planchet flaw just below Liberty's middle curls explains the Details grade, but the portrait detail is exceptionally strong. A bold die break passes through ST to the eagle's wing.
- 3333 1805 V-1, LM-1, R.4, VG10 PCGS.** Always in demand as the only known 1805 die pair, the LM-1 is scarce and desirable even in this lower-grade condition. Amber-gold and steel-blue toning join gunmetal-gray shades at the borders on the obverse, while the reverse is more comprehensively toned in deep cobalt-blue and slate-gray hues. Only slight merging of the design elements is visible, mostly on the reverse. NGC ID# 232A, PCGS# 38611 Base PCGS# 4272

BUST HALF DIMES

- 3334 1832 V-1, LM-3, R.1, MS64 PCGS.** Star 12 is repunched and the M in AMERICA is defective, but perhaps the most distinctive characteristic is the high second S in STATES. Blended jade-green and lilac toning encompasses both sides. This sharply struck and satiny Choice half dime is well preserved aside from a couple of tiny ticks on the cheek. NGC ID# 232E, PCGS# 38665 Base PCGS# 4279
- 3335 1833 V-4, LM-3.3, R.2, MS65+ NGC.** This luminous high-end Gem is razor-sharp on the obverse but slightly weak along the left edge of the reverse shield. Luster is frosty and unabraded. Each side displays a blend of olive-green, gold, russet, and amber toning. Census (all varieties included): 42 in 65 (2 in 65+, 1 in 65 ★), 41 finer (5/17). NGC ID# 232F, PCGS# 38690 Base PCGS# 4280

- 3336 1835 Small Date, Small 5C, V-7, LM-10, R.1, MS64 PCGS.** The coin is sharply struck with mottled olive-gold and russet toning. We find no mentionable distractions on the surfaces. Finer 1835 half dimes are elusive, regardless of variety. Population (both Small Date, Small 5C varieties): 27 in 64, 26 finer (4/17). NGC ID# 232H, PCGS# 38719 Base PCGS# 4285

- 3337 1836 Small 5C, V-6, LM-5, R.2, MS64+ PCGS. CAC.** The UN in UNITED and several obverse stars are recut on this variety. This high-end near-Gem displays champagne interiors surrounded by amber, violet, blue, sea-green, and rose-gold peripheral toning. The strike is sharp, and we find no distracting abrasions. Population (all Small 5C varieties included): 20 in 64 (2 in 64+), 19 finer. CAC: 9 in 64, 10 finer (4/17). NGC ID# 232J, PCGS# 38728 Base PCGS# 4288

SEATED HALF DIMES

- 3338 1837 No Stars, Large Date (Curl Top 1) MS65 NGC.** The first issue in the Seated half dime series, one of only two without obverse stars, can be found with a Large Date and Small Date. Both are collectible in high grades. This incredible Gem half dime is covered in rich, antique patina on both sides with blushes of golden color. Softly frosted and well-defined on the head and wreath. NGC ID# 232M, PCGS# 4311

- 3339 1838-O No Stars XF40 PCGS. CAC.** The 1838-O No Stars Seated half dime is a famous and sought-after low-mintage issue with a production of only 70,000 pieces. Survivors are scarce in all grades. This CAC-approved coin is well-detailed and displays original olive-gray toning and problem-free surfaces. Population: 13 in 40, 30 finer. CAC: 3 in 40, 8 finer (4/17). NGC ID# 232N, PCGS# 4314

- 3340 1842-O Repunched Date, FS-301, MS63 PCGS.** The 8 in the date is repunched within the upper loop. A hint of straw-gold toning accents satiny and unmarked surfaces. The dies were apparently out of linear alignment, since the lower obverse and upper reverse are well-struck, while the upper obverse and lower reverse show incompleteness. NGC ID# 385A, PCGS# 145428 Base PCGS# 4331

- 3341 1844 MS66 PCGS. CAC.** Greenish and mauve patination is slightly deeper on the reverse of this Premium Gem. This well-struck half dime has been well cared for. Population: 25 in 66 (2 in 66+), 11 finer. CAC: 11 in 66, 14 finer (4/17). NGC ID# 2335, PCGS# 4333

- 3342 1845/1845 V-5, FS-302, MS65 NGC.** *Cherrypickers'* states that FS-302 "is in high demand by Liberty Seated specialists." The date is nicely repunched northwest. A well struck and prooflike Gem with light honey-gold toning that gradually deepens toward the rims. FS-302 Census: 5 in 65, 1 finer (4/17). NGC ID# 2337, PCGS# 38736 Base PCGS# 4335

- 3343 1853 Arrows MS66+ PCGS.** With a mintage in excess of 13 million coins, the 1853 With Arrows half dime is usually readily available, but not at the Premium Gem grade level. This sharply struck example displays satiny mint luster beneath light golden toning overall. Close examination reveals light clash marks on both sides of this beautifully preserved With Arrows type representative. Population: 56 in 66 (9 in 66+), 11 finer (4/17). NGC ID# 233Y, PCGS# 4356

**1859 Half Dime, MS67+
Beautifully Toned, Practically Flawless**

3344 1859 MS67+ PCGS. The Mint struck 340,000 half dimes in 1859 from a new obverse hub designed by Anthony Paquet. A number of examples survive in MS66 and even MS67. Few, however, can match the visual quality of this colorfully toned Superb Gem, showing variegated blue, green, golden-orange, and magenta toning from the centers out. The reverse is decidedly lighter in hue, but no less lustrous. Fully struck and practically pristine. Population: 34 in 67 (22 in 67+), 5 finer (4/17). NGC ID# 233W, PCGS# 4371

3345 1863 MS65+ NGC. V-1, Flynn RPD-001. The 18 in the date is repunched south. Light tan-gold toning accompanies this lustrous and unabraded Civil War Gem. The strike is bold, and the eye appeal is undeniable. Census: 22 in 65 (1 in 65+), 38 finer (4/17). NGC ID# 234C, PCGS# 4382

**1868-S Seated Half Dime, MS65+
Conditionally Rare**

3346 1868-S MS65+ PCGS. CAC. The 1868-S half dime is a better date, especially at the upper grade levels. Areas of rich toning are present on this lustrous Gem example, primarily at portions of the outer edges, including shades of dark russet, olive-gold, and flecks of amber-orange. Pronounced clash marks are noted upon further examination, though the strike is well-executed and the preservation is pleasing. Population: 10 in 65 (1 in 65+), 4 finer. CAC: 4 in 65, 1 finer (4/17). NGC ID# 234P, PCGS# 4393

PROOF SEATED HALF DIMES

1857 Half Dime, Toned PR66

3347 1857 PR66 NGC. A splendid Premium Gem from the, this piece exhibits light gold, blue, and iridescent toning on both sides that subdues the mirrored fields and lustrous devices. Slight field-to-device contrast is evident, although the toning prevents a Cameo designation. Census: 8 in 66, 1 finer (5/17). NGC ID# 3X58, PCGS# 4436

3348 1868 PR65 Cameo PCGS. CAC. Despite the moderate patina, the devices are sufficiently frosted to bring this well-mirrored coin into the Cameo camp. The 1868 half dime is another low-mintage circulation strike, if not so notorious as the 1864 and 1867. Proofs numbered 600 and circulation strikes 88,000. A few tiny luster grazes are in accord with the grade. Population: 7 in 65 Cameo, 13 finer. CAC: 3 in 65, 12 finer (4/17). NGC ID# 2365, PCGS# 84451

EARLY DIMES

3349 1798/97 13 Stars Reverse, JR-2, R.6 — Gouged — PCGS Genuine. The PCGS number ending in .95 and the notation on the holder denotes several deep scratches on the reverse as the reason that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VG specimen that has several deep scratches and other assorted abrasions. However, the border legends are clear, and the central devices are boldly outlined. Deep gunmetal-gray toning blankets each side. JR-2 is a rare die variety in any state of preservation.

**1798 Small 8 Dime, VG10
Rare JR-3 Die Pair**

3350 1798 Small 8, JR-3, R.5, VG10 PCGS. This is a rare die pair with a small, left-leaning 8 in the date. Zack, Scuderi, and Sherrill write "at least 30 examples known, about six of which are in MS." The date and other legends are readable, while Liberty and the eagle retain distinct outlines. This is a well-circulated and problem-free example that should appeal to advanced specialists. NGC ID# 236E, PCGS# 38752 Base PCGS# 4467

3351 1798 Large 8, JR-4, R.3, VG8 PCGS. The Large 8 variety is elusive in all grades. This well-circulated example displays partial detail on the central devices and border legends that are strong aside from the left-hand quadrants where they blend into the rims from an uneven strike. Each side is pleasing gunmetal-gray in color with relatively smooth surfaces. NGC ID# 236E, PCGS# 38753 Base PCGS# 4466

**1807 Dime, AU55, JR-1
Excellent Design Definition**

3352 1807 JR-1, R.2, AU55 NGC. The sole known dies. Dusky gunmetal-gray toning predominates though the borders exhibit darker green and charcoal shades. An unmarked and exceptionally sharp example of this final Draped Bust date. The right obverse field displays clash marks, usual for JR-1. Moderately granular on the left reverse periphery. Ex: *Long Beach Signature* (Heritage, 9/2012), lot 3769. NGC ID# 236T, PCGS# 38770 Base PCGS# 4480

BUST DIMES

1827 Dime, Near-Gem JR-6, Multicolor Toning

- 3353** 1827 Pointed Top 1, JR-6, R.2, MS64 NGC. The second T in STATES is lightly repunched. Aquamarine borders encompass orange-gold centers. A satiny and mark-free near-Gem, well struck aside from the claws and vertical shield stripes. At least five sets of clashmarks (as made) are present above the eagle's head. NGC ID# 2375, PCGS# 38816 Base PCGS# 4504

- 3354** 1830 Small 10C, JR-2, R.1, MS62 ★ NGC. Incredibly vivid rainbow border toning surrounds both sides of this Mint State, Star-designated JR-2 dime, while the interiors exhibit pleasing powder-blue and champagne toning. The strike is sharp on the peripheral stars but incomplete on the eagle's head and Liberty's central hair curls. No major abrasions are seen. NGC ID# 4FA5, PCGS# 38846 Base PCGS# 4517

1832 Dime, Toned MS64 JR-7, Seldom Seen So Fine

- 3355** 1832 JR-7, R.3, MS64 PCGS. This die pair (Obverse 3, Reverse E) was actually used in 1833, rather than 1832. Luster is subdued but distinct beneath a blanket of mixed green, crimson, violet, and gold patina. Razor-sharp definition is apparent on the stars, talons, and arrowheads. Population (all varieties): 37 in 64, 22 finer (4/17). PCGS# 38861 Base PCGS# 4521

1832 JR-7 Dime, Needle-Sharp MS64

- 3356** 1832 JR-7, R.3, MS64 PCGS. Variety JR-7 shows star 8 high over the cap and the second T in STATES directly over the I in PLURIBUS. From a mintage of 522,500 coins, this Choice Capped Bust dime displays subtle olive, gunmetal, and lilac-gray patina. The relief elements exhibit needle-sharp detail, particularly on the stars, feathers, and leaves. Population (all varieties): 37 in 64, 22 finer (4/17). PCGS# 38861 Base PCGS# 4521

1835 Capped Bust Dime, MS64 Popular JR-1 Variety

- 3357** 1835 JR-1, R.1, MS64 PCGS. CAC. The JR-1 is among the more accessible die pairs for the date, and a number of high-end examples have survived, making it popular with type collectors. Rich toning lends this warmly lustrous near-Gem particularly strong eye appeal. Gold-orange, reddish-tan, and sage shadings are separated into outer rings and an inner core on the obverse, but the reverse has a more dappled appearance. Population: 79 in 64 (3 in 64+), 21 finer (4/17). NGC ID# 237E, PCGS# 38879 Base PCGS# 4527

- 3358** 1835 JR-9, R.2, MS62 NGC. Olive-gold and tan toning grace the margins of this sharply struck dime, although the centers of the coin are largely brilliant. A fancy 8 and a boldly recut 3 in the date help confirm the JR-9 obverse, while the second T in STATES is lower than the surrounding letters to key the reverse. A solid Mint State example with a few faint lines and small ticks that exist near the profile, but without any distracting marks.
Ex: Houston Signature (Heritage, 12/2013), lot 4525. PCGS# 38887 Base PCGS# 4527

1835 JR-9 Dime, MS64+ Appealing Capped Bust Type Coin

- 3359** 1835 JR-9, R.2, MS64+ PCGS. The 1835 Capped Bust dime is a plentiful issue through MS64, ideal for type purposes. This JR-9 example offers frosty original luster and soft green-gray and russet toning. There are no major abrasions, and the only strike weakness that is seen appears on the eagle's head, which is slight. Population (all varieties included): 79 in 64 (3 in 64+), 21 finer (4/17). PCGS# 38887 Base PCGS# 4527

**1836 Capped Bust Dime, MS64
Popular JR-2 Variety**

- 3360 1836 JR-2, R.2, MS64 PCGS.** A large mintage of nearly 1.2 million Capped Bust dimes was struck in 1836, with three die varieties known for the date. This coin represents the JR-2 variety, easily identified by the unusual bisecting die crack on the obverse. The Mint began using steam-powered coin presses in 1836 and some researchers believe this die crack suggests the JR-2 was struck on the steam press, while the other varieties of 1836 were produced on the old screw press. This sharply detailed Choice example offers lightly marked, lustrous surfaces, with highlights of magenta and pale gold toning. Population: 25 in 64 (2 in 64+), 15 finer (4/17). NGC ID# 237G, PCGS# 38889 Base PCGS# 4528

SEATED DIMES

**1837 Seated Liberty Dime, MS64
No Stars, Small Date**

- 3361 1837 No Stars, Small Date, F-104, R.3, MS64 PCGS.** Unlike the 1837 No Stars half dime, the Small and Large Date logotypes for the dime are easily distinguished by their size alone. In addition, the Small Date 3 has a curved top and the Large Date 3 is flat across the top. This well-struck near-Gem displays light caramel-gold toning over frostlike silver-gray surfaces. Smooth surfaces show minor contact near the O in OF and a subtle reverse spot at 3 o'clock, plus a small deep toning area near Liberty's left elbow. Die clashing near the E in DIME and slight counterclockwise rotation of the reverse help confirm the Fortin variety. Population (all Small Date varieties): 18 in 64, 13 finer (1/17). PCGS# 537642 Base PCGS# 4562

- 3362 1852 MS65 NGC.** The 1852 is an available date through MS64, but Gems are scarce. This piece displays a sharp strike and satiny mint luster. Olive-gold toning embraces each side, warming to peach-gold as it nears the centers. Census: 10 in 65, 7 finer (5/17). NGC ID# 238N, PCGS# 4597

- 3363 1853 Arrows MS65 PCGS.** Mottled grayish-blue toning covers the lustrous surfaces of this Gem dime. The devices are sharply struck and the surfaces impeccably preserved. NGC ID# 2398, PCGS# 4603

- 3364 1853 Arrows MS66 PCGS.** A razor-sharp strike complements frosty original luster on this Premium Gem Arrows type coin. Champagne toning graces each side, and a loupe fails to reveal any noteworthy imperfections. This date is scarce as fine as MS66 and is rarely encountered better. Population: 42 in 66 (3 in 66+), 20 finer (4/17). NGC ID# 2398, PCGS# 4603

- 3365 1861-S F-101, R.5, AU58 PCGS.** The 1861-S dime is scarce in all grades and genuinely rare in AU and Mint State. This nearly Uncirculated example offers partial luster and mostly brilliant surfaces. The strike is bold and wear is light. The 1861-S dime is arguably underappreciated in this condition. Population: 2 in 58, 8 finer (4/17). PCGS# 538184 Base PCGS# 4634

**1873-CC Arrows Dime, VF20
Attractive Example of This Key Issue**

- 3366 1873-CC Arrows VF20 PCGS Secure.** The Mint Act of February 12, 1873 mandated an increase in the weight of silver coins to stimulate their circulation in commerce. Arrows were added to the left and right of the date to signify the change in weight, creating a popular two-year subtype. The 1873-CC is frequently overshadowed by its unique No Arrows counterpart, though it remains one of the undisputed key dates in the Seated Liberty dime series. From a reported mintage of only 18,791 coins, CoinFacts estimates 125 pieces survive. Unlike many 1873-CC dimes, this example has not been cleaned. The surfaces are original and the only "problems" are a couple of grade-consistent marks in the center of the reverse. NGC ID# 23BH, PCGS# 4666

**1873-S Seated Liberty Dime, MS64
Short-Lived Arrows Design Type**

- 3367 1873-S Arrows, Small Thin S, Repunched Date, F-101, R.4, MS64 PCGS.** The 1873-S Seated Liberty dime boasts a small mintage of 455,000 pieces, and few examples were saved for numismatic purposes. This attractive Choice example exhibits well-detailed design elements and lightly marked, lustrous surfaces, under delicate shades of golden-brown and lavender-gray toning. Population: 20 in 64 (2 in 64+), 3 finer (4/17). PCGS# 538327 Base PCGS# 4667

- 3368 1875 MS66 PCGS.** Deep cobalt-blue, lavender, and gold patination visit the lustrous surfaces of this Premium Gem. A beautiful, well-struck and nicely cared-for specimen. A challenging coin in this grade level. Population: 33 in 66 (3 in 66+), 6 finer (4/17). NGC ID# 23AC, PCGS# 4672

- 3369 1886-S F-101, R.4, MS64 PCGS.** The 1886-S Seated Liberty dime is a better date from a mintage of 206,524 pieces. This attractive Choice example exhibits sharply detailed design elements and well-preserved surfaces, with hints of golden-tan, violet, and amber toning. Population: 12 in 64 (1 in 64+), 23 finer (4/17). NGC ID# 23B4, PCGS# 538720 Base PCGS# 4697

- 3370 1890-S Large S, F-116, R.3, MS65 PCGS.** Only a hint of light golden color accents this otherwise brilliant and semiprooflike Gem 1890-S Seated Liberty dime. A loupe reveals only delicate obverse field contact. Population: 12 in 65, 1 finer (4/17). PCGS# 538875 Base PCGS# 4705

PROOF SEATED DIMES

- 3371 1859 PR65 PCGS. CAC.** Final year in proof format for the Stars type. The mintage for proofs was recorded at 800 pieces, but many (hundreds) were melted as unsold at year's end. Each side displays rich blue and reddish-golden toning, yet the bright underlying mirrors in the fields make this unmistakable as a proof striking. The careful observer will also note the mint frost on the devices. Just a few tiny contact marks prevent an even higher grade. Population: 29 in 65, 16 finer. CAC: 10 in 65, 6 finer (4/17). NGC ID# 23CD, PCGS# 4748

1866 Dime, Toned PR66 Cameo High-End and Starkly Contrasted

- 3372 1866 PR66 Cameo PCGS. F-102, R.3.** This high-end Cameo proof displays sharp design elements and glimmering reflectivity in the fields. Light golden interiors cede to deeper orange-gold and aquamarine border toning. Cameos are scarce in all grades but are genuinely rare at the Premium Gem level. Population: 7 in 66 (1 in 66+) Cameo, 1 finer (4/17). NGC ID# 23CP, PCGS# 84759
- 3373 1868 Misplaced Date PR66 Cameo NGC. F-105, High R.4.** The bases of two errant 1s appear in the rock above the primary 18. This Premium Gem Cameo proof displays a good strike and deep reflectivity in the fields. Old-time multicolor toning on each side produces outstanding visual appeal. Census: 7 in 66 Cameo (2 in 66 ★), 0 finer (5/17). NGC ID# 23CS, PCGS# 84761
- 3374 1870 PR66 Cameo NGC. F-101, R.3.** Proof examples are very rare in this quality despite a sizeable mintage of 1,000 pieces. Rich shades of cobalt-blue, gold, and violet patina fails to inhibit the bold Cameo contrast. Each side exhibits bold design detail and impeccable preservation. Census: 5 in 66 Cameo (1 in 66+), 3 finer (5/17). NGC ID# 59UM, PCGS# 84763

1874 Arrows Dime, Toned PR65

- 3375 1874 Arrows, F-101, R.3, PR65 PCGS. CAC.** This Gem proof 1874 Arrows dime is conditionally rare and naturally toned in lavender, blue, green, and golden hues. Liberty's head shows trivial softness, but the strike is otherwise bold. We observe no mentionable contact marks beneath a loupe. Population: 22 in 65, 12 finer. CAC: 5 in 65, 4 finer (4/17). NGC ID# 23DJ, PCGS# 539034 Base PCGS# 4770
- 3376 1886 PR66 Cameo PCGS.** Strong field-motif contrast is apparent over both sides of this Premium Gem. Sharply struck design elements further contribute to the coin's pleasing eye appeal. Population: 9 in 66 Cameo, 4 finer (4/17). NGC ID# 23DB, PCGS# 84783

BARBER DIMES

- 3377 1893 MS66 PCGS. CAC.** This brilliant, unabraded Premium Gem displays a razor-sharp strike and semiprooflike fields on the obverse. The 1893 Barber dime is scarce in this grade rare any finer. Population: 53 in 66 (27 in 66+), 4 finer. CAC: 15 in 66, 5 finer (4/17). NGC ID# 23DN, PCGS# 4800
- 3378 1896 MS65 PCGS. CAC.** Razor-sharp detail and frosty, untuned luster give this Gem 1896 dime excellent visual appeal. The date is scarce in Mint State and rare at the MS65 or finer levels. This CAC-endorsed coin has above-average aesthetics. Population: 19 in 65, 21 finer. CAC: 7 in 65, 7 finer (4/17). NGC ID# 23DY, PCGS# 4809
- 3379 1897 MS67 NGC.** Availability of 1897 Barber dimes begins a gradual decline in succeeding Gem grades with barely more than a dozen Superb Gems known. This beautifully preserved piece exhibits rich blue and lavender accents beneath overall golden-gray toning with satiny mint luster shining through. The strike is sharp, and the eye appeal is immense. NGC and PCGS combined have certified 14 examples in this grade and none numerically finer (5/17). NGC ID# 23E3, PCGS# 4812
- 3380 1898-O MS64 PCGS.** The 1898-O is a better date in Uncirculated condition and rare above MS64. This near-Gem offers satiny luster with original sea-green, lavender, and champagne-gray toning. Slight strike weakness occurs on the hair curls below LIBERTY and on the wreath leaves to the left of the bow. Population: 17 in 64, 15 finer (4/17). NGC ID# 23E7, PCGS# 4816

1900 Dime, MS66+ Iridescent Pastel Toning

- 3381 1900 MS66+ PCGS. CAC.** A collectible date in the series with a mintage of 17.6 million coins, the 1900 is available all the way through MS65. The population of Premium Gems declines considerably, and higher-graded coins are extremely rare. This CAC-endorsed MS66+ example offers the ideal mix of conditional rarity and eye appeal for the budget-minded specialist. The toning consists of iridescent glints of pastel pink, blue, green and delicate yellow. The reverse patina is especially well-balanced, showing rich aquamarine rims blending with rose-gray centers. Clean surfaces feature shimmering mint frost and well-struck devices. Population: 17 in 66 (4 in 66+), 6 finer. CAC: 11 in 66, 8 finer (4/17). NGC ID# 23EC, PCGS# 4821

PROOF BARBER DIMES

1893 Barber Dime, Superb Gem Cameo Proof High-End Example, Few Are Finer

3382 1893 PR67+ Cameo NGC. CAC. The obverse of this exceptional Superb Gem Cameo proof exhibits a scintillating silver sheen under delicate champagne toning at the center, within a peripheral frame of lovely gold and iridescent toning. The reverse is fully toned in flame-orange with stunning iridescent accents at the borders. Sharply struck and essentially without flaws, this is the sole Plus-graded PR67 Cameo at NGC and it carries the important CAC endorsement, too. Census: 14 in 67 Cameo (1 in 67+, 3 in 67★), 7 finer. CAC: 11 in 67, 0 finer (5/17). NGC ID# 23G4, PCGS# 84877

3383 1895 PR66 PCGS. CAC. Deep orange-gold and green toning visit the impeccably preserved surfaces of this Premium Gem proof Barber dime. The design features are sharply struck throughout. Population: 38 in 66, 12 finer. CAC: 11 in 66, 11 finer (4/17). NGC ID# 23G8, PCGS# 4879

1897 Dime, Lightly Toned PR67+ Conditionally Elusive

3384 1897 PR67+ NGC. Glimmering fields and frosty devices make up most of the visual characteristics of this high-end Superb Gem proof, cast in pastel toning on each side. The obverse has subtle contrast. The 1897 proof dime is rare this fine and exceedingly so finer. Census: 17 in 67 (1 in 67+, 2 in 67★), 4 finer (4/17). NGC ID# 23GA, PCGS# 4881

1899 Barber Dime, PR67+ Strong Registry Set Candidate

3385 1899 PR67+ PCGS. CAC. Lavender, peach-gold, and cerulean-blue shades adorn the smooth and fully struck surfaces of this high-end Superb Gem proof dime. A thin coat of mint frost on the central devices offers subtle contrast with the mirrored fields beneath the multicolor toning. CAC-endorsed and Plus-graded, this 1899 trails only a single piece at PCGS for the top numeric grade from that service. Population: 21 in 67 (3 in 67+), 1 finer. CAC: 12 in 67, 1 finer (4/17). NGC ID# 23GC, PCGS# 4883

3386 1902 PR64 PCGS. CAC. Perhaps the most amazing feature of this Choice proof Barber dime is the presence of cameo contrast, highly unusual for a post-1902 issue. However, the lovely blue, violet, and gold toning on each side prevents a cameo designation. NGC ID# 23GF, PCGS# 4886

3387 1912 PR66 Cameo PCGS. This outstanding 1912 proof displays a full strike and deep, watery fields. Vivid ocean-blue and pale lavender hues encompass much of each side, although appreciable cameo contrast emerges from the untuned regions. Population: 9 in 66 Cameo, 5 finer (4/17). NGC ID# 23GT, PCGS# 84896

MERCURY DIMES

3388 1919-D MS63 Full Bands PCGS. This Select 1919-D Mercury dime is fully struck at the centers but is a trifle weak at the outer edge of the border legends. Dusky golden toning blankets each side, masking scattered light abrasions that define the grade. The 1919-D is a better date with Full Bands. NGC ID# 23H9, PCGS# 4925

3389 1920 MS66 Full Bands PCGS. CAC. This particularly frosty, well-preserved 1920 Mercury dime displays champagne-gray luster with forest-green, russet, and olive-red toning at the borders. Significant die erosion is seen in the fields. PCGS reports 34 finer representatives (5/17). NGC ID# 23HB, PCGS# 4929

3390 1920 MS67 Full Bands PCGS. CAC. The central devices are sharp on this Superb Gem Full Bands example, although the definition softens considerably at the borders where the obverse legends fade into the rim from die wear. Hints of mint-green and lavender accent the golden surfaces. None are finer at PCGS. Population: 34 in 67 Full Bands, 0 finer. CAC: 9 in 67, 0 finer (4/17). NGC ID# 23HB, PCGS# 4929

1924-S Dime, MS64 Full bands Sharp Strike Throughout

3391 1924-S MS64 Full Bands PCGS. Gem 1924-S Mercury dimes are scarce with or without Full Bands. This collectible near-Gem offers sharp central detail that expands to most peripheral legends as well. The lustrous surfaces show warm champagne toning and have no distracting abrasions. PCGS reports 22 numerically finer representatives (5/17). NGC ID# 23HL, PCGS# 4947

1926 Mercury Dime, MS67 Full Bands Registry Grade Specimen

3392 1926 MS67 Full Bands PCGS. The impeccably preserved surfaces of this spectacular Superb Gem are blanketed in subtle shades of violet-blue and jade-gold toning, with vibrant mint luster on both sides. The design elements are sharply detailed throughout, with Full Bands definition on the fascies. Population: 27 in 67 (1 in 67+) Full Bands, 0 finer (4/17). NGC ID# 23HR, PCGS# 4955

**1926 Dime, MS67+ Full Bands
The Finest Certified**

- 3393 1926 MS67+ Full Bands PCGS.** Even if only by the margin of the Plus designation, this Full Bands 1926 Mercury dime is the single finest example certified. Non-Plus-graded coins in this condition are themselves rare, but the present piece is uniquely significant. The strike is sharp, and each side exhibits satiny mint luster with dusky tan-gold toning. Population: 27 in 67 (1 in 67+) Full Bands, 0 finer (4/17). NGC ID# 23HR, PCGS# 4955

- 3394 1928 MS67 ★ NGC. CAC.** This is arguably the finer of the only two non-Full Bands Superb Gems known, showing vivid multicolor border toning around silvery interiors. The strike is sharp with almost fully defined horizontal fasces bands. No abrasions are seen, and eye appeal abounds. Census: 1 in 67 (1 in 67 ★), 0 finer. CAC: 2 in 67, 0 finer (4/17). NGC ID# 23HX, PCGS# 4966

**1928-S Mercury Dime, MS66
Scarce Example With Full Bands**

- 3395 1928-S MS66 Full Bands PCGS. CAC.** A spectacular Premium Gem with sharply detailed design elements, including fully split and rounded bands on the fasces. The well-preserved lustrous surfaces show hints of pale gold and ice-blue toning. Overall eye appeal is outstanding. Population: 39 in 66 (1 in 66+) Full Bands, 10 finer. CAC: 10 in 66, 3 finer (4/17). NGC ID# 23HZ, PCGS# 4971

- 3396 1940-S MS67+ Full Bands PCGS. CAC.** A luminous, satiny Superb Gem with champagne-tinted interiors and russet, olive, and teal borders. There are no discernible abrasions. A die crack bisects the obverse from 6 to 12 o'clock. PCGS reports seven finer Full Bands representatives (5/17). NGC ID# 23JW, PCGS# 5027

- 3397 1943 MS67+ Full Bands PCGS. CAC.** The dies clashed and were subsequently refinished, removing most of the clash marks and imparting microscopic striations that appear on the otherwise smooth and frostlike surfaces of this Superb Gem wartime dime. Among the legions of Mercury dime collectors, the MS68 grade is the ultimate goal for the issue. Fewer than a dozen such coins exist, placing a premium on those Full Bands examples that garner both the PCGS Plus designation and CAC endorsement, such as the present brilliant and sharp coin. Population: 29 in 67+ Full Bands, 7 finer. CAC: 63 in 67, 0 finer (4/17). NGC ID# 23K9, PCGS# 5045

- 3398 1943 MS67+ Full Bands PCGS. CAC.** An intricately struck, brilliant Registry coin with vibrant satin luster and no abrasions. The 1943 dime is available in MS67 but rare in MS68, where PCGS has certified just seven examples (5/17). This Plus-graded coin is important to the budget-conscious collector. NGC ID# 23K9, PCGS# 5045

- 3399 1944 MS67 Full Bands PCGS.** A staggering mintage of 231 million pieces yields precious few Superb Gems for collectors. This original and frosted MS67 coin is vibrantly lustrous and razor-sharp on both sides from rim to rim. The brilliant silver surfaces display sparse blue and amber-gold toning accents to reinforce its natural appeal. PCGS reports just four coins in a numerically finer grade. Population: 117 in 67 (7 in 67+) Full Bands, 4 finer (4/17). NGC ID# 23KB, PCGS# 5051

- 3400 1944 MS67+ Full Bands PCGS. CAC.** This boldly detailed Superb Gem exhibits delicate peripheral gold toning on otherwise brilliant silver surfaces with a reflective obverse. PCGS has only certified four finer examples (4/17). CAC: 31 in 67, 0 finer (4/17). NGC ID# 23KB, PCGS# 5051

PROOF MERCURY DIMES

1936 Dime, Lovely Rim-Toned PR67

- 3401 1936 PR67 PCGS. CAC.** Spectacular eye appeal is the hallmark of this pristine Superb Gem proof 1936 dime, showing concentric violet, moss, orange, and indigo patina near the rims on each side, with a brilliant central obverse and a sun-gold interior on the reverse. Finer 1936 proofs are extremely rare. Population: 56 in 67, 1 finer (12/14). CAC shows 24 in this grade with none finer. NGC ID# 27DG, PCGS# 5071

- 3402 1937 PR67+ PCGS. CAC.** Few Superb Gem proof 1937 dimes have received Plus designations at PCGS. This CAC-approved example is fully struck and deeply reflective with light golden toning. PCGS has seen only 34 finer submissions (5/17). NGC ID# 27DH, PCGS# 5072

- 3403 1938 PR68 PCGS.** Alternating shades of blue, green, and gold drape the surfaces of this amazing PR68 dime. Marks are unseen, and the eye appeal is extraordinary. The Mint sold 8,728 proofs in 1938, making this one of the most elusive dates in the set. Population: 17 in 68 (1 in 68+), 0 finer (4/17). NGC ID# 27DJ, PCGS# 5073

- 3404 1939 PR66 Cameo NGC.** Proof Mercury dimes are known for being rare with cameo contrast. This Premium Gem example displays brilliant surfaces and well-contrasted, sharply struck devices. The depth of mirroring in the fields is exceptional. Census: 15 in 66 Cameo, 23 finer (5/17). NGC ID# 27DK, PCGS# 85074

ROOSEVELT DIMES

- 3405 1955 MS67 Full Bands PCGS.** A brilliant and frosted example with finely textured surfaces that capture and radiate vibrant silver luster. This is a dazzling Registry Set candidate — a conditionally rare Superb Gem, with no numerically finer pieces listed by either service. Population: 15 in 67 (1 in 67+) Full Bands, 0 finer (4/17). NGC ID# 23LE, PCGS# 85109

**1962 Dime, Delicately Toned MS67+
The Sole Finest Non-Full Bands Coin Known**

- 3406 1962 MS67+ PCGS.** This is the single finest non-Full Bands 1962 Roosevelt dime known, even if only by the margin of the Plus designation (4/17). The strike is sharp and the preservation is exceptional. Die polishing lines are still seen in the fields amid frosty, unabraded luster. Delicate turquoise, yellow-gold, and peach toning accents both sides. Population: 47 in 67 (1 in 67+), 0 finer (4/17). NGC ID# 23LW, PCGS# 5124

TWENTY CENT PIECES

- 3407 1875 MS64 PCGS. BF-1, R.1.** The right side of the 1 in the date is right of the shield point. The 1875 is sought-after as the first issue in the short-lived series with a small mintage of 38,500 coins. A window of brilliance occurs near stars 3 and 4, but the rest of this well-struck, Choice Uncirculated double dime shows light, lavender-gold patina. Population: 68 in 64 (3 in 64+), 31 finer (4/17). NGC ID# 23R5, PCGS# 5296
- 3408 1875-CC AU50 PCGS. BF-2, R.1.** A diagonal () die gouge to the left of star 2, the first C nearly touching the feather, and the second C centered between the arrow and the leaf attribute this variety. Grayish-lavender toning adheres to this well-defined twenty cent piece. No significant marks are noted. NGC ID# 23R6, PCGS# 5297
- 3409 1875-CC MS65 PCGS. BF-2, R.1.** Given the great rarity of the 1876-CC, the 1875-CC is requisite for the Carson City type collector. The present splendid Gem is draped in apple-green and dove-gray toning. Well struck and uncommonly preserved. Housed in a first-generation holder. NGC ID# 23R6, PCGS# 5297

PROOF TWENTY CENT PIECE

- 3410 1875 PR60 PCGS.** A collectible base-grade proof 1875 twenty cent piece, suitable to the budget-conscious enthusiast seeking a type or date representative. This coin is fully struck and reflective with light champagne color. Scattered hairlines determine the grade. Ex: *New York Signature* (Heritage, 10/2016), lot 4001. NGC ID# 27GZ, PCGS# 5303

BUST QUARTERS

- 3411 1818 B-8, R.3 — Questionable Color — PCGS Genuine. Unc Details.** Tompkins Die Stage 2/3. This middle die state features extensive clashing that was later lapped. Variety B-8 is relatively available, but not so with Uncirculated sharpness. This high-grade example is richly toned in ice-blue, violet, and gold hues, although PCGS questions the originality of the patina.
- 3412 1820 Large 0, B-2, R.2, XF40 PCGS Secure.** This lightly worn and evenly struck B-2 quarter displays old-time olive-gray, russet, gold, and pine-green toning over both sides with lighter tan-gray color on the worn high points. Eye appeal is substantial and the coin is problem-free. NGC ID# 23RL, PCGS# 38961 Base PCGS# 5329

- 3413 1832 B-1, R.1, MS61 PCGS.** Tompkins Die Stage 2/2. Apple-green, ruby-red, and golden-brown hues embrace this well-struck and semiprooflike Bust type coin. Minor marks are confined to the left obverse field. The usual die state with rust near the arrowheads and a die crack along the lower right obverse. NGC ID# 23RX, PCGS# 38987 Base PCGS# 5351

- 3414 1833 B-1, R.2, MS61 NGC.** The popular B-1 variety is easily recognized by the period after C on the reverse. This attractive Mint State specimen is softly struck on the lower obverse and the mint luster is subdued by shades of sea-green and lavender-gray toning. Housed in a prior generation holder. NGC ID# 23RY, PCGS# 38989 Base PCGS# 5352

1834 B-1 Quarter, MS63 O Over F in OE, FS-901

- 3415 1834 O Over F in OE, B-1, FS-901, R.1, MS63 PCGS.** Tompkins Die Stage 1/2. This popular and collectible *Guide Book* variety features star 1 far from the bust and lacks a period after C in the denomination. The obverse is in an early state, and the first A in AMERICA is filled. This lightly toned Select quarter retains much original brilliance and good strike detail. Struck from severely rotated dies, as usual. Population (all varieties): 27 in 63, 53 finer (4/17). NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

- 3416 1836 B-2, R.2, AU55 NGC. CAC.** Tompkins Die State 7/4. Several lengthy die cracks on both sides allow prompt attribution. A pleasing stone-gray quarter with freckles of deeper gunmetal-blue toning near the rims. Minimally marked, and the strike is crisp except for minor rounding on stars 6 and 7. The Choice surfaces retain traces of mint luster. Census (all 1836 varieties): 13 in 55, 45 finer. CAC: 4 in 55, 11 finer (4/17). Ex: *Long Beach Signature* (Heritage, 9/2015), lot 3537. NGC ID# 23S3, PCGS# 39006 Base PCGS# 5355

SEATED QUARTERS

- 3417 1840-O No Drapery MS62 PCGS. Briggs 2-B, Flynn RPD-002.** The 0 in the date is repunched south. This MS62 No Drapery quarter has ivory-gray surfaces with specks of gunmetal coloring near the borders. Softly lustrous and fairly sharp for an early O-mint product. Population: 8 in 62, 8 finer (4/17). NGC ID# 23SG, PCGS# 5393
- 3418 1843-O Small O VF25 PCGS. Briggs 1-B.** The usual Small O mintmark. The 1843-O quarter dollar is scarce in all grades and particularly sought-after in the middle circulated range where a number of collectors assemble date and mintmark sets. This battleship-gray example displays even wear and problem-free surfaces with outstanding visual merit. NGC ID# 23SS, PCGS# 5405
- 3419 1853 Arrows and Rays MS62 PCGS.** A lovely cream-gray example of this single-year Seated subtype. The sharply struck and satiny surfaces are slightly subdued, but show only minor indications of contact. NGC ID# 23U4, PCGS# 5426

**1855 Arrows Quarter, MS64+
Original Toning and Satiny Mint Luster**

3420 1855 Arrows MS64+ PCGS. CAC. Satiny mint luster illuminates sharp design elements and fairly well-preserved surfaces on this high-end near-Gem 1855 Arrows quarter type coin. The obverse displays blended olive-gold, greenish-gray, and lavender toning, while the reverse is slightly deeper orange-gold in the center. A small tick above the eagle's head and a thin scratch on Liberty's cheek are the only mentionable abrasions. Population: 19 in 64 (1 in 64+), 11 finer. CAC: 7 in 64, 4 finer (4/17). NGC ID# 23U8, PCGS# 5435

3421 1857 MS65 NGC. Delicate gold toning adorns this lustrous and beautifully preserved Gem. It boasts a good strike, although faint mint-caused roller marks are present on the seated Liberty. A worthy representative of the No Motto subtype.
Ex: Indiana Collection (Heritage, 5/2000), lot 7286; James Mossman Collection (Heritage, 1/2009), lot 2329; New York Signature (Heritage, 10/2016), lot 4016. NGC ID# 23TE, PCGS# 5442

**1858 Quarter Dollar, MS65
Frosty No Motto Type Coin**

3422 1858 MS65 NGC. CAC. Briggs 2-B. One of several high-mintage No Motto quarter issues, the 1858 is a frequent choice for type collectors, though at the Gem level even this "common" issue becomes a rarity. The present MS65 piece is well-defined, with strong luster that shines through gold-orange and silver-blue patina that is thicker on the obverse. Census: 28 in 65 (1 in 65+), 19 finer (5/17).
Ex: Baltimore Signature (Heritage, 3/2009), lot 1034. NGC ID# 23TH, PCGS# 5445

3423 1858-S VF30 PCGS. Briggs 1-A. The 1858-S Seated quarter is a scarce issue in all grades and almost unknown in Mint State. This collector-grade example shows above-average VF detail and smooth problem-free surfaces. Deep olive-green and golden-gray toning attests to the originality of each side. Population: 10 in 30, 40 finer (4/17). NGC ID# 23TK, PCGS# 5447

3424 1859 MS64 NGC. CAC. Type One Obverse and Reverse. This sharply struck, frosty near-Gem displays richly blended orange-gold, lavender, and cobalt-blue toning on each side, with any minor abrasions well-hidden beneath. Finer 1859 quarter dollars are rare. Census: 20 in 64, 9 finer. CAC: 12 in 64, 0 finer (5/17). NGC ID# 23TL, PCGS# 5448

**1860-O Quarter Dollar, MS64
Elusive in Mint State**

3425 1860-O MS64 PCGS. Briggs 1-A. Uncirculated examples of the 1860-O Seated quarter are scarce in all grades, and those grading finer than MS64 are extremely rare. This near-Gem offers sharp central detail but is weak on the peripheral stars. Frosty luster resides beneath light golden toning. Population: 10 in 64, 3 finer (4/17). NGC ID# 23TR, PCGS# 5452

3426 1866 Motto VF30 NGC. Briggs 1-A. Briggs has called this "a rare coin in any grade." A single die pair was used to strike 16,800 coins, and it was damaged early on in the production, causing central flatness (as seen here). Original lavender-gray patina covers the entirety of this first-year Motto quarter. Good detail remains. NGC ID# 23UB, PCGS# 5468

3427 1873 Arrows MS63 PCGS. Briggs-Unlisted. Although one of the more plentiful With Motto, With Arrows quarter dollar issues, the 1873 Arrows is nonetheless elusive in high-end Mint State. This collectible Select example displays original satin luster beneath deep olive-gray and gold toning. Several obverse stars are weakly struck. The variety is unlisted in the Briggs reference. The obverse die is the same one used for proof coinage (Briggs Obverse 5), but the reverse is unknown. Population: 25 in 63, 59 finer (4/17). NGC ID# BZMG, PCGS# 5491

3428 1873 Arrows MS64 PCGS. Well-struck and satiny, with dusky olive-gray toning over lustrous fields. There are no singularly mentionable abrasions. The 1873 Arrows quarter is scarce this fine and rare at the Gem level. Population: 42 in 64, 18 finer (4/17). NGC ID# BZMG, PCGS# 5491

**1874-S Arrows Quarter, MS66
Outstanding, High-End Type Coin**

3429 1874-S Arrows MS66 PCGS. Briggs 1-A. Forest-green and tobacco-brown toning accompanies the borders, while the fields and motifs are principally brilliant. A crisply struck, frosty, and thoroughly lustrous Premium Gem that boasts superior eye appeal. PCGS reports just five numerically finer examples. Population: 36 in 66 (2 in 66+), 5 finer (4/17). NGC ID# 23VY, PCGS# 5495

3430 1877/77-CC Briggs 2-B, FS-301, MS64 PCGS. Areas of prooflike reflectivity surround the frosted central devices of this Choice Uncirculated quarter, with attractive swaths of amber-gold toning at the margins. Bright mint luster gleams from the silver surfaces. A scarce die pair for this readily available Carson City issue, struck from heavily rusted dies. Both 7s in the date show wide repunching at their bases. NGC ID# 23V6, PCGS# 395941 Base PCGS# 5505

- 3431 1888-S MS64 NGC.** The strike is nearly full on the stars, Liberty's head, and the eagle's feathers and fletchings. Frosty luster emanates from beneath the lavender-gold patina that covers this original S-mint quarter. The 1888-S is the most collectible date from this decade, famous for its run of low-mintage Philadelphia issues. Census: 36 in 64, 18 finer (4/17). NGC ID# 23VN, PCGS# 5521

PROOF SEATED QUARTERS

- 3432 1865 PR63 PCGS. Briggs 3-B,** the proof dies. This Select 1865 proof quarter comes from a small mintage of 500 pieces. The design elements are fully detailed and the rims are squared. Splashes of aquamarine and lavender-gray border toning surround primarily brilliant interiors. Population: 50 in 63, 51 finer (4/17). NGC ID# 23WT, PCGS# 5561
- 3433 1872 PR64+ Cameo PCGS. Briggs 3-C.** Cameo proof 1872 Seated quarters are scarce in any numeric grade. This high-end near-Gem offers full detail and appreciable field-device contrast. There is a hint of light golden rim toning but most of the coin is brilliant. Population: 20 in 64 (4 in 64+) Cameo, 20 finer (4/17). NGC ID# 23X5, PCGS# 85571
- 3434 1874 Arrows PR64 PCGS. Briggs 5-D.** The final year of the short-lived Arrows, Motto type, first adopted in 1873 when the Mint converted to the metric system. This well-struck and unmarked Choice proof has pearl-white centers and a blush of peach-red toning near the rims. NGC ID# 23XS, PCGS# 5575
- 3435 1876 PR65 NGC. CAC. Briggs 9-J.** Type Two Reverse. Housed in a previous generation NGC holder with the hologram still intact, this attractive Gem is one of 1,150 proofs struck in the nation's Centennial year. Pale-gold toning graces the glassy-mirrored fields and well-frosted devices provide significant contrast. Gunmetal-blue accents occupy the margins of this sharply struck and CAC-endorsed example. Struck from lightly rusted dies. Census: 33 in 65, 21 finer. CAC: 5 in 65, 9 finer (4/17). NGC ID# 3TWJ, PCGS# 5577

BARBER QUARTERS

1892 Quarter, MS67
Magnificent Multicolor Toning

- 3436 1892 MS67 PCGS.** Type One Reverse. Splendid forest-green, dove-gray, and lavender toning encompasses this lustrous and unabraded high-grade Barber type coin. The strike is bold except for blending on the eagle's claws and fletchings. The 1892 was set aside in quantity as the first issue of a new design, but few survivors approach the pristine quality of the present Superb Gem. Population: 34 in 67 (5 in 67+), 3 finer (4/17). NGC ID# 23XT, PCGS# 5601
- 3437 1901-S Fair 2 PCGS.** Smoothly worn with the outer elements merging into the rims on both sides. Still, the coin displays a visible mintmark and discernible central motifs. Essentially problem-free for the grade and a perfectly acceptable representative of the key to the series. NGC ID# 23YR, PCGS# 5630
- 3438 1902-O MS64 PCGS.** Blushes of almond-gold patina are scattered over the brilliant, powdery-blue obverse, clinging mainly to the borders on the other side. Moderately well-struck overall, but exceptionally bold on the right shield corner and fletchings. A pedigree-identifying tick occurs on Liberty's nose. Population: 21 in 64 (3 in 64+), 23 finer (4/17). NGC ID# 23YT, PCGS# 5632

- 3439 1908 MS66 PCGS.** Occasional splashes of brown and bluish-green patina grace the obverse of this lustrous Premium Gem Barber. The design elements are well-struck save for the usual weakness on the claw and adjacent arrow feathers. Some light marks are noted near Liberty's lips and on the reverse shield. Population: 24 in 66 (1 in 66+), 2 finer (4/17). NGC ID# 23ZC, PCGS# 5649

- 3440 1910-D MS65 PCGS.** A rare Gem showing frosty luster and a hint of delicate champagne toning. The eagle's right (facing) talons and the clutched fletchings exhibit the only mentionable strike weakness. Finer 1910-D Barber quarters are exceedingly elusive. Population: 20 in 65, 13 finer (4/17). NGC ID# 23ZM, PCGS# 5658

- 3441 1912 MS66+ PCGS. CAC.** Rare in MS66 and prohibitively so any finer, the 1912 Barber quarter is an important condition rarity for the Registry Set collector. This Plus-graded, CAC-approved Premium Gem displays frosty, unblemished mint luster and bold design elements. The slightest trace of blue and champagne toning tints the otherwise silvery surfaces. Population: 32 in 66 (3 in 66+), 2 finer. CAC: 10 in 66, 3 finer (4/17). NGC ID# 23ZS, PCGS# 5662

- 3442 1914-D MS66 PCGS. CAC.** Frosty luster illuminates exceptional preservation on this CAC-approved Premium Gem. The eagle's right (facing) talons and the fletchings show strike softness, but the remainder of each side is sharply defined. Some amber-gold toning appears at the upper obverse and lower reverse borders, with olive-green dappled near the upper reverse. The 1914-D is conditionally rare this fine. Population: 10 in 66 (1 in 66+), 3 finer. CAC: 6 in 66, 4 finer (4/17). NGC ID# 23ZY, PCGS# 5668

- 3443 1916-D MS66 PCGS.** Glistening original mint luster generates profound eye appeal on this Premium Gem 1916-D Barber quarter, despite a few tiny ticks that appear under a loupe. The eagle's right (facing) talons and the fletchings show the only mentionable strike weakness. Both sides have speckled orange-gold toning across the interiors with deeper olive-green at the borders. PCGS has seen 17 finer representatives (5/17). NGC ID# 2426, PCGS# 5674

PROOF BARBER QUARTERS

1892 Quarter, PR67+ Cameo
Well-Contrasted, First-Year Issue

- 3444 1892 PR67+ Cameo PCGS. CAC.** Type Two Reverse. Light amber-gold and cinnamon patina rings the rims of this first-year Barber quarter proof, while the interiors remain largely untuned and deeply contrasted, seemingly on the verge of a Deep Cameo designation. Few examples exceed this Superb Gem proof, either numerically or aesthetically. Population: 13 in 67 (1 in 67+) Cameo, 4 finer. CAC: 6 in 67, 1 finer (4/17). NGC ID# CEF4, PCGS# 85678
- 3445 1904 PR66 Cameo NGC.** Both sides of this Premium Gem Cameo are completely untuned and have been cared for well. The strike is nearly full, save for hints of minor softness in the upper right shield corner and immediately adjacent feathers. From a mintage of 670 pieces. Census: 6 in 66 Cameo (1 in 66+, 1 in 66 ★), 6 finer (4/17).
Ex: ANA Signature (Heritage, 3/2008), lot 553. NGC ID# 242K, PCGS# 85690

- 3446 1908 PR66 PCGS.** This glimmering Premium Gem proof type coin displays sharp obverse detail but with a touch of softness on the reverse eagle's right (facing) talons. The obverse is brilliant save for a crescent of russet toning in the right-hand margin, while the reverse displays various lavender and champagne hues. Population: 23 in 66 (1 in 66+), 25 finer (4/17). NGC ID# 242P, PCGS# 5694

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarters, VG8 Nice Collector-Grade Coin

- 3447 1916 VG8 PCGS.** Pleasing steel-gray surfaces show slightly deeper hues in some of the recesses. This well-circulated 1916 Standing Liberty quarter has quite strong detail for the VG level, including a readable date that is weak only at the tops of the numerals. Many collectors of the series will never find a VG example of the first-year key with this much eye appeal and four readable date numerals. If a high-grade 1916 is out of the budget, this piece will more than do as an alternative. NGC ID# 43XR, PCGS# 5704

- 3448 1917 Type One MS66+ Full Head PCGS.** This champagne-tinted Full Head type coin is frosty and well-struck, with deeper olive-gold border toning around the reverse. The preservation is outstanding, with a 10x loupe revealing only a few tiny ticks. Finer Type One Standing Liberty quarters will be out of reach for budget-conscious collectors. NGC ID# 242Z, PCGS# 5707

- 3449 1917-D Type One MS66+ Full Head PCGS. CAC.** Glistening, frosty luster adorns the beautifully preserved surfaces of this high-end example, while the design elements showcase bold definition. Champagne-tinted surfaces exhibit bits of russet toning near the rims. Eye appeal is outstanding. PCGS reports 28 finer Full Head coins (5/17). NGC ID# 2432, PCGS# 5709

- 3450 1917-S Type One MS65 Full Head PCGS.** This is a sharp, nearly brilliant Gem Full Head example of the Type One San Francisco issue. There are no major abrasions, and the devices are well brought up. The obverse die shows fine rust throughout, save for in areas of the fields and the recesses of Liberty's gown where die lapping has occurred. NGC ID# 2433, PCGS# 5711

1917-S Type One Quarter, MS66 Full Head Original Mint Luster

- 3451 1917-S Type One MS66 Full Head PCGS.** Branch mint type collectors prize this Standing Liberty quarter issue for its short-lived Type One design. This impressive Premium Gem exhibits sharply detailed design elements, with a full complement of shield rivets and Full Head definition. The well-preserved, lustrous surfaces are blanketed in shades of golden-brown and lavender-gray toning. PCGS has graded 16 numerically finer examples (5/17). NGC ID# 2433, PCGS# 5711

- 3452 1918-D MS65 PCGS.** Attractive luster radiates from the well-preserved surfaces of this gorgeous Gem. Well-struck for the issue. Population: 64 in 65 (2 in 65+), 28 finer (4/17). NGC ID# 2438, PCGS# 5722

- 3453 1918-D MS64 Full Head PCGS.** There are no major abrasions on this toned, satiny near-Gem, and each side displays amber-gold interiors surrounded by gunmetal-gray border toning. The shield rivets, head, date, stars, and eagle's feathers are full struck — an unusual find for the 1918-D. NGC ID# 3TWU, PCGS# 5723

1918-D Quarter, MS65 Full Head Elusive in This Grade

- 3454 1918-D MS65 Full Head PCGS.** The 1918-D is a better date in Gem or finer Full Head. This MS65 coin offers complete definition of Liberty's hairline and temple but is characteristically weak on the shield rivets and the leading edge of the eagle's left (facing) wing. The date numerals are bold. Olive-gold and russet toning appears in irregular patterns across each side. Population: 59 in 65 (2 in 65+) Full Head, 33 finer (4/17). NGC ID# 3TWU, PCGS# 5723

- 3455 1918-S MS65 PCGS. CAC.** Whispers of reddish-gold make occasional appearances on the lustrous surfaces of this Gem. The chain mail and the vertical stripes of the inner shield are sharply defined. This is a great eye-appealing coin. Population: 75 in 65 (1 in 65+), 25 finer. CAC: 14 in 65, 11 finer (4/17). NGC ID# 2439, PCGS# 5724

- 3456 1919 MS66 PCGS.** A bold date and shield rivets mirror the sharpness of the eagle's breast and wing feathers, although Liberty's head is a trifle soft at the temple. Champagne toning overall cedes to russet, forest-green, and violet border hues. The 1919 is seldom offered finer. NGC ID# 243B, PCGS# 5728

- 3457 1919 MS66+ PCGS.** Blushes of golden-brown, blue, and purple toning visit the obverse of this high-end Premium Gem. Though the head is not quite fully struck, the chain mail, inner shield, and rivets are sharp. A nice looking, well-preserved coin. NGC ID# 243B, PCGS# 5728

- 3458 1919 MS66 Full Head PCGS.** A sharp head and shield are the hallmarks of this Premium Gem 1919 quarter, while the date is predictably flat but clear. Satiny luster illuminates minimally marked champagne surfaces with areas of deep russet toning in the recesses. Finer Full Head coins are elusive. NGC ID# 243B, PCGS# 5729

1920 Quarter, Luminous MS67
Deservedly Among the Finest Certified

3459 1920 MS67 PCGS. 30th Anniversary Green Label Holder. Although PCGS and NGC combined report 41 grading events of non-Full Head 1920 quarters at the MS67 numeric level, none have achieved a finer grade. This frosty example displays exemplary surface quality and rich, largely untuned luster. The shield rivets are sharp, and there are none of the typical small abrasions along Liberty's forward leg. The 1 in the date and Liberty's temple are weak, as usual for this issue. Population: 17 in 67 (3 in 67+), 0 finer (4/17). NGC ID# 243E, PCGS# 5734

3460 1920 MS65 Full Head PCGS. This Gem Full Head 1920 Standing Liberty quarter is sharp on the shield rivets and Liberty's temple, as well as the eagle's feathers. The date is flat but clear. Glistening mint luster offers a hint of light champagne toning. NGC ID# 243E, PCGS# 5735

1920-D Quarter, MS64 Full Head
Defined Shield Rivets

3461 1920-D MS64 Full Head PCGS. Liberty's head is full and all shield rivets are visible on this near-Gem example. The date is weak at the top but clearly readable. Light champagne toning blankets each side. The 1920-D is a challenging issue with Full Head definition, regardless of grade. Population: 44 in 64 (3 in 64+) Full Head, 50 finer (4/17). NGC ID# 243F, PCGS# 5737

3462 1920-S MS64+ PCGS. CAC. A bold date and champagne-toned satiny luster are the hallmarks of this high-end near-Gem, which shows occasional flecks of reddish-russet toning at the borders. Liberty's head and the shield rivets are expectedly soft. NGC ID# 243G, PCGS# 5738

3463 1920-S MS65 PCGS. The chainmail and shield lines are notably bold, though rivets 2 to 4 are typically incomplete. Liberty's head lacks the definition necessary for a Full Head designation. This Gem 1920-S quarter shows accents of blue and gold over largely brilliant surfaces. Die polish lines appear in the reverse fields. Population: 52 in 65, 23 finer (4/17). NGC ID# 243G, PCGS# 5738

3464 1920-S MS65 PCGS. A hint of champagne toning graces satiny luster on this Gem 1920-S quarter dollar. The strike is typical of the issue, showing weakness on the top of the date numerals, Liberty's head, the shield rivets, and the eagle's feathers. However, it gains appeal from the scarcity of the issue in such fine preservation. Population: 52 in 65, 23 finer (4/17). NGC ID# 243G, PCGS# 5738

3465 1921 MS64 PCGS. This frosty Choice 1921 quarter dollar displays bold shield rivets, as usual, with minor weakness at Liberty's temple. A loupe fails to reveal a single mentionable abrasion on the obverse, but a thin, arcing scratch on the reverse through the eagle's left (facing) wingtip prevents a Gem designation from PCGS. This piece is entirely untuned. NGC ID# 243H, PCGS# 5740

1921 Quarter Dollar, MS65
Lightly Toned and Appealing

3466 1921 MS65 PCGS. The shield rivets and the eagle's feathers are sharp, and the date is better defined than usual. However, weakness at Liberty's temple prevents a Full Head designation. This Gem 1921 Standing Liberty quarter offers satiny luster and light golden toning with no major abrasions. PCGS has seen 32 finer non-Full Head representatives (5/17). NGC ID# 243H, PCGS# 5740

3467 1923-S — Improperly Cleaned — NGC Details. AU. This briefly circulated and satiny semikey quarter has retuned in aquamarine and lavender shades. Close inspection reveals a few hair-thin obverse marks, while the reverse appears unblemished.

1923-S Quarter, MS63
Frosty Semikey

3468 1923-S MS63 PCGS. San Francisco Mint personnel accomplished a mintage of 1.3 million Standing Liberty quarters in 1923. That relatively small production explains the enduring popularity of the 1923-S as a series semikey. This brilliant Select quarter is strongly struck with softness limited to Liberty's head. Frosty luster throughout and clean for the grade. Encapsulated in a green label holder. NGC ID# 243K, PCGS# 5744

3469 1924 MS67 NGC. Essentially brilliant with amazing luster and exquisitely preserved surfaces. This piece, struck the year before the Recessed Date design entered production, has strong detail everywhere except the head. Census: 17 in 67 (1 in 67+), 4 finer (5/17).
Ex: ANA Signature (Heritage, 8/2007), lot 755; FUN Signature (Heritage, 1/2008), lot 1280. NGC ID# 3TWY, PCGS# 5746

3470 1924-D MS64 Full Head PCGS. The date is weakly impressed on this Choice Full Head 1924-D quarter, but that is the only design element lacking mentionable definition. Liberty's head, the shield rivets, and the eagle's feathers are intricately detailed. This light golden collector coin offers pleasing satin luster and has no major abrasions. NGC ID# 243M, PCGS# 5749

- 3471 1924-S MS64 NGC.** Ex: Richmond Collection. A trace of violet toning near the rims, particularly on the reverse, enhances this mostly untoned Choice Mint State example. Liberty's head and a couple of rivets are softly defined, as typically seen. Careful inspection reveals only a couple of inconsequential marks on the reverse. Ex: *Richmond Collection, Part II (David Lawrence, 11/2004)*, lot 1364; *Dallas Signature (Heritage, 10/2009)*, lot 594. NGC ID# 243N, PCGS# 5750
- 3472 1926 MS65 Full Head PCGS.** Particularly frosty, undeniably original mint luster gives this Gem Full Head 1926 quarter exceptional eye appeal. Small daubs of sky-blue, lavender, and mint-green toning accents otherwise champagne-tinted surfaces. Liberty's head, the shield rivets, and the eagle's feathers are well-struck. NGC ID# 243R, PCGS# 5755
- 3473 1926-S MS64 PCGS.** This satiny near-Gem was struck from mildly lapped dies with mint-made striations still evident in the fields. Liberty's head and several shield rivets share the usual strike softness with the eagle's breast feathers. Generally untuned interiors cede to russet and blue border toning. NGC ID# 4462, PCGS# 5758
- 3474 1927 MS66 Full Head PCGS.** Available in lower grades, the 1927 Standing Liberty quarter becomes conditionally scarce in MS66 Full Head and is rare any finer. This example is lustrous and shows a delicate champagne glow. Liberty's head detail is just complete, and the shield rivets also show above-average definition. Population: 68 in 66 (8 in 66+) Full Head, 7 finer (4/17). NGC ID# 243U, PCGS# 5761
- 3475 1927-D MS65 Full Head PCGS.** A few daubs of russet toning appear on each side of this otherwise frost-white Gem 1927-D quarter dollar. Liberty's head is well-defined, but the shield rivets and toes are weak as usual. The 1927-D is a better date in high-grade Full Head. PCGS has seen only 20 pieces finer than the present (4/17). NGC ID# 243V, PCGS# 5763
- 3476 1928 MS66 Full Head PCGS.** Ex: Walser. Soft russet patination covers the lustrous surfaces of this Premium Gem quarter. This particular coin is significant in that most of the design elements in addition to the head of Liberty are well-struck. Liberty's chain mail and the vertical stripes of the inner shield, for example, are virtually full, and all but a couple of rivets are bold. Even the eagle's torso displays some feather detail. Population: 59 in 66 (5 in 66+) Full Head, 9 finer (4/17). NGC ID# 243X, PCGS# 5767
- 3477 1928-S MS67 PCGS.** This is a satiny coin with champagne toning that shows tiny bits of russet on the reverse. A loupe fails to reveal a single notable abrasion. The 1928-S quarter dollar is rare this well-preserved and unknown finer in the non-Full Head category. Population: 14 in 67 (1 in 67+), 0 finer (4/17). NGC ID# 243Z, PCGS# 5770
- 3478 1928-S MS66 Full Head PCGS. CAC.** Large S. The 1928-S Standing Liberty quarter is scarce in MS67 Full Head, heightening demand for MS66 Full Head coins. This CAC-approved example offers brilliant, frosty luster with no toning or obtrusive abrasions. Liberty's head is crisply detailed, although the shield rivets are incomplete. NGC ID# 243Z, PCGS# 5771
- 3479 1930 MS67 Full Head PCGS.** An available type-coin issue overall, the 1930 quarter dollar is conditionally scarce in MS67 Full Head and nearly unknown finer. This piece displays pristine surfaces, frosty luster, and delicate iridescent toning. The shield rivets, head, and eagle's feathers all exhibit strong definition. Population: 46 in 67 (2 in 67+) Full Head, 1 finer (4/17). NGC ID# 2445, PCGS# 5779
- 3481 1934 Light Motto MS67 NGC.** Pastel patina comprises mixed powder-blue, gold, and lilac elements that contribute to the outstanding, original eye appeal of this Superb Gem. Radiant luster and pristine surfaces further the visual and technical allure. A must-have Registry coin that ranks among the finest examples at both services. Census: 4 in 67, 0 finer (4/17). NGC ID# 244A, PCGS# 5794
- 3482 1935-D MS67 PCGS.** A sharp, frosty Registry coin, this Superb Gem 1935-D Washington quarter is among the finest certified and is conditionally rare as such. Lovely light golden toning warms the vibrant cartwheel luster. No surface imperfections are noted. Population: 25 in 67 (1 in 67+), 0 finer (4/17). NGC ID# 244E, PCGS# 5798
- 3483 1936 Doubled Die Obverse, FS-101, MS64 PCGS.** The obverse legends are boldly die doubled. PCGS has attributed only 27 examples of this variety in all grades. The current near-Gem displays frosty champagne-tinted luster and well-defined design elements. A small mark on Washington's forehead is all that prevents a Gem designation. Population: 6 in 64 (1 in 64+), 3 finer (4/17). NGC ID# 244G, PCGS# 146091 Base PCGS# 5800
- 3484 1938 MS67+ PCGS. CAC.** Tied for the finest at PCGS and surpassed by a single coin at NGC (4/17). This CAC-approved 1938 Washington quarter displays a sharp strike and rich, satiny mint luster. Dusky champagne toning on each side shows deeper olive-gold color around portions of the rims. Population: 83 in 67 (10 in 67+), 0 finer. CAC: 28 in 67, 0 finer (4/17). NGC ID# 244N, PCGS# 5806
- 3485 1947-S MS67+ PCGS. CAC.** Plus-graded MS67 examples of this conditionally challenging Washington quarter issue are scarce, and PCGS has seen only three finer representatives (5/17). The current coin is frosty and sharp with no distractions. Both sides have champagne-tinted interiors with vivid multicolor border toning — the border toning is much more prominent on the obverse than on the reverse. NGC ID# 245K, PCGS# 5835
- 3486 1948-S MS67+ PCGS. CAC.** A brilliant example with bright silver luster, this 1948-S shows signs of fresh die preparation and displays a notably sharp strike. Superb Gem examples of the 1948-S are scarce but available, yet those pieces with the PCGS Plus designation and CAC make up only a small percentage of the total. It is an elite group, since PCGS has graded just a single coin in a finer grade. Population: 118 in 67 (17 in 67+), 1 finer. CAC: 43 in 67, 1 finer (4/17). NGC ID# 245N, PCGS# 5838
- 3487 1950-S/D FS-601 MS66 PCGS.** A thoroughly lustrous and essentially immaculate example of this *Guide Book* overmintmarked variety. Faint lime and gold toning denies absolute brilliance. Encapsulated in a green label holder. Population: 58 in 66 (10 in 66+), 6 finer (4/17). NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

WASHINGTON QUARTERS

- 3480 1932-D MS64+ PCGS.** Lustrous, nearly Gem-quality surfaces offer warm olive-gold toning with hints of deeper russet at the borders. The strike is bold, and we observe no distracting abrasions. Finer 1932-D Washington quarters are elusive. NGC ID# 2448, PCGS# 5791

**1951-D Quarter, MS67+
Delicately Toned
None Finer at NGC**

- 3488 1951-D MS67+ NGC. CAC.** This Plus-graded Superb Gem 1951-D quarter dollar is among the finest at NGC, and only a single coin is graded higher at PCGS (5/17). The strike is bold, and satiny luster illuminates lovely mint-green, pale lavender, and yellow-gold hues that appear in pastel shades across each side. No major abrasions are observed. NGC has Plus-graded only three coins in this grade, including this piece and two other Star-designated examples. CAC: 22 in 67, 0 finer (4/17). NGC ID# 245X, PCGS# 5847

**1952 Quarter, MS67+
Among the Finest at PCGS**

- 3489 1952 MS67+ PCGS. CAC.** Areas of brilliance appear among the mottled shades of cherry-red, cobalt-blue, forest-green, and golden-orange that paint much of this spectacular Superb Gem. Fully struck and among the finest coins at PCGS. Population: 113 in 67 (8 in 67+), 0 finer. CAC: 44 in 67, 0 finer (4/17). NGC ID# 245Z, PCGS# 5849
- 3490 1953-D MS67 PCGS. CAC.** This CAC-approved Superb Gem is among the finest 1953-D quarters known. The strike is sharp, and the satiny surfaces are devoid of any noticeable imperfections. Iridescence accentuates a blush of olive-gold toning on each side. Population: 36 in 67 (3 in 67+), 0 finer. CAC: 11 in 67, 0 finer (4/17). NGC ID# 2465, PCGS# 5853

**1959 Quarter Dollar, MS67
Scarcer Type B Reverse**

- 3491 1959 Type B Reverse, FS-901, MS67 NGC.** The Type B Reverse is scarcer than the Type A. Among its many diagnostics, the Type B Reverse shows stronger wreath leaves than the Type A. As a date, the 1959 Washington quarter is scarce in MS67 and unknown numerically finer. The current coin offers brilliant satin luster, sharp motifs, and nearly flawless preservation. Census: 71 in 67 (1 in 67 ★), 0 finer (4/17). NGC ID# 246H, PCGS# 146068 Base PCGS# 5866

**1961 Quarter, Frost MS67
Few Known This Fine, None Finer**

- 3492 1961 Type B Reverse, FS-901, MS67 NGC.** The scarcer Type B Reverse, showing sharp definition of the wreath leaves. As a 1961 Washington quarter, this Superb Gem ranks among the finest known and is conditionally scarce as such. The strike is sharp, and the frosty, brilliant surfaces show no obtrusive abrasions. Census: 38 in 67 (3 in 67 ★), 0 finer (4/17). PCGS# 146069 Base PCGS# 5870

**1964 Washington Quarter, MS67+ ★
Only One Finer Certified**

- 3493 1964 MS67+ ★ NGC.** A magnificent Plus-graded Superb Gem with the coveted Star designation, this remarkable Washington quarter represents the last year of silver coinage for the series. The design elements are sharply detailed throughout and the impeccably preserved surfaces radiate vibrant mint luster. The obverse is blanketed in shades of sea-green and violet toning while the reverse remains essentially brilliant. Census: 57 in 67 (4 in 67+, 5 in 67★, 1 in 67+★), 1 finer (5/17). NGC ID# 246U, PCGS# 5876

- 3494 1989-D MS67 PCGS.** Unquestionably an important condition rarity at the Superb Gem level, this sharply struck 1989-D displays exceptionally crisp definition set on attractive, semireflective surfaces. Virtually free of any imperfections, a faint whisper of golden-gray patina embraces the needle-sharp raised devices. Population: 10 in 67, 0 finer (4/17). NGC ID# 283A, PCGS# 5927
- 3495 1992-P MS67 PCGS.** The merest hint of gold patina floats across the right obverse field, but this Superb Gem Philadelphia issue is essentially untuned and resoundingly well-struck. Neither service reports a numerically finer example. Seemingly struck from fresh dies, with reflective, Registry-quality surfaces supporting the sharply struck motifs. Population: 16 in 67 (1 in 67+), 0 finer (4/17). NGC ID# 248G, PCGS# 5932
- 3496 1992-P MS67 PCGS.** A pristine Superb Gem destined for a competitive Registry holding. Lustrous and well struck with a brilliant reverse and faint gray obverse freckles. Population: 16 in 67 (1 in 67+), 0 finer (4/17). NGC ID# 248G, PCGS# 5932

PROOF WASHINGTON QUARTERS

- 3497 1937 PR67+ PCGS.** This Superb Gem proof showcases a full strike and glimmering fields. Dusky champagne toning has noticeable iridescence in the fields. PCGS reports only three finer examples (4/17). NGC ID# 27HP, PCGS# 5976
- 3498 1937 PR67+ PCGS. CAC.** PCGS reports only 13 Plus-graded PR67 proofs, with three PR68 coins finer (5/17). This CAC-endorsed coin displays a full strike and glimmering fields. The central obverse and entire reverse exhibit delicate ice-blue toning, while the obverse border has russet, olive, and lavender hues. NGC ID# 27HP, PCGS# 5976
- 3499 1937 PR67+ PCGS. CAC.** This CAC-endorsed, Plus-graded Superb Gem proof approaches an even finer grade with gleaming mirrored surfaces beneath luminous iridescence and tangerine accents at the borders. Only three numerically finer proofs are reported by PCGS. Population: 13 in 67+, 3 finer. CAC: 60 in 67, 1 finer (4/17). NGC ID# 27HP, PCGS# 5976
- 3500 1937 PR67+ PCGS. CAC.** This Plus-graded Superb Gem exhibits sharply detailed design elements throughout, with impeccably preserved surfaces and deeply reflective fields. Hints of attractive lime-green toning are evident at the peripheries. PCGS has graded three numerically finer examples (4/17). NGC ID# 27HP, PCGS# 5976
- 3501 1942 PR67+ PCGS. CAC.** The colorful toning that envelops this Superb Gem proof captures and holds the attention of the viewer. Shades include blue, green, gold, violet, and rose. Magnification fails to reveal any consequential contact marks. An exceptional proof example, nicely mirrored and technically surpassed by just 12 submissions at PCGS (4/17).
Ex: ANA Signature (Heritage, 8/2016), lot 3915. NGC ID# 27HV, PCGS# 5981
- 3502 1942 PR68 NGC.** A conditionally rare example, among the finer-known proof 1942 Washington quarters. The strike is bold, and the fields are highly reflective. Most of each side displays dusky cream-gold toning, but the upper and lower obverse rims exhibit a tinge of deep amber and crimson. Census: 22 in 68 (3 in 68★), 1 finer (5/17). NGC ID# 27HV, PCGS# 5981
- 3503 1950 PR67 Cameo PCGS.** Stunning white-on-black contrast shows over both sides of this Superb Gem, each of which exhibits well-struck design features. This is an impeccably preserved coin. Population: 25 in 67 Cameo, 8 finer (4/17). NGC ID# 27VA, PCGS# 85982

End of Session One

COLONIALS

1652 Oak Tree Shilling, AU Details
IN at Bottom, Noe-5

- 3504** 1652 Oak Tree Shilling, IN at Bottom — Damage — PCGS Genuine. AU Details. Noe-5, W-470, Salmon 3-D, R.2. 68.8 gn. An attractive silver-gray and sea-green representative. The legends are close to complete, with only the tops of IN MA and EW ENGLAN off the flan. The obverse border is slightly granular, and a few peripheral letters are lightly impressed, though the tree is richly detailed. A narrow horizontal mark is noted to the right of the center of the tree, and accounts for the strictly assessed designation by PCGS. Listed on page 41 of the 2018 *Guide Book*.

1652 Pine Tree Shilling, MS65
One of Only 11 Examples of Noe-7 Known
Probably the Finest

3505 1652 Pine Tree Shilling, Large Planchet, No Pellets at Trunk, MS65 PCGS. CAC. Crosby 7-B3, Noe-7, W-730, High R.6. Ex: Ford-Manley. No Pellets. 71.4 grains (per Ford catalog). Plated in Wurtzbach. The Pine Tree shilling can rightly be called the quintessential Colonial coin. It is well known even outside the realm of numismatics, and its image is ubiquitous in texts about the Massachusetts Bay colony. While not rare, Pine Tree shillings have a romantic quality that has enticed countless collectors. If a collector were to choose only one Colonial coin to own, it would undoubtedly be the Pine Tree shilling.

It is remarkable that this piece has survived for well over 300 years at the Gem level of preservation. It certainly makes one wonder how that is even possible. Perhaps a collector, in the same vein as Lord St. Oswald and his spectacular 1794 coins, saved this specimen from the moment it was struck. Thousands of Pine Tree shillings have survived to the present day, but this piece ranks above virtually all of them.

Michael Hodder (2005) writes that only 11 examples of the Noe 7 Pine Tree shilling are known. This was the only use of this obverse, which has the tree centered directly over the M in MASATHVSETS. A die crack bisects the reverse but does not obscure any of the letters or numerals. The present coin is a magnificent Gem Uncirculated example of this very rare variety.

The Pine Tree series is believed to have been struck between 1667 and 1682, although the exact date of its inception is unknown, and it is likely that there was a gradual transition from oak to pine styles. Two major types of Pine Tree shillings were struck: the first on large planchets and the second on small planchets. The Large Planchet shillings were struck using the antiquated rocker press, but the introduction of a screw press circa 1675 marked the beginning of the Small Planchet type. While both types are desirable, the Large Planchet pieces are especially popular.

Gunmetal-gray patina with subtle hazel accents cover the obverse of this specimen. The periphery of the reverse is light silver-gray, while the center has a pleasing bluish tint. The planchet is nearly round and virtually all of the letters are boldly struck. Only the VS in MASATHVSETS is not fully defined as a result of the rocker press. The tree is exceptionally sharp with no areas of weakness. Carl Wurtzbach, who once owned this specimen, described it succinctly: "Gem Coin. Cannot Be Excelled." We feel that his description accurately represents this stellar coin.

Ex: Charles E. Clapp; Carl Wurtzbach; T. James Clarke; F. C. C. Boyd; John J. Ford, Jr. (*Stack's*, 10/2005), lot 93. NGC ID# 5JDU, PCGS# 45370 Base PCGS# 23

1652 Pine Tree Shilling, MS64
Small Planchet
Finest Certified Noe-16

3506 1652 Pine Tree Shilling, Small Planchet, MS64 NGC. Noe-16, W-835, Salmon 2-B, R.2. 72.5 grains. An impressive full weight example struck at the 72 grains standard. Many examples of Noe-16 are full weight or nearly so, although we have records of pieces that are considerably underweight, such as lot 139 in the Hain Family Collection that was less than 60 grains.

The Small Planchet Pine Tree shillings are extremely rare in Mint State with just six such pieces certified at PCGS, and the present piece is far finer than the other five that all grade MS61 or MS62. In comparison, PCGS has certified 34 Mint State examples of the Large Planchet Pine Tree shillings, including seven pieces certified MS64 and one in MS65. The colonial type collector who seeks Mint State examples of both planchet types will find this Small Planchet type to be elusive. Approximately 20 Small Planchet varieties are known, but only three of those varieties, Noe-16, 17, and 29, rate more plentiful than R.5 based on the Sheldon rarity scale.

Unlike other examples of Noe-16, this piece is well-centered with a sharp strike and nearly complete obverse and reverse border details. The surfaces are fully lustrous light gray with attractive light gold toning on each side. Like many of the Massachusetts silver coins, the Noe-16 features inexperienced die work with poor spacing, recutting and other anomalies that add to the charm of these important early American coins. Listed on page 41 of the 2018 *Guide Book*. NGC ID# 2ARZ, PCGS# 24

(1688) American Plantation Token
Newman 4-E, MS63

- 3507** (1688) American Plantations 1/24 Part Real MS63 PCGS. CAC. Newman 4-E, W-1155, R.5. Originals and restrikes are thought to exist for the Newman 4-E die pair, and Q. David Bowers notes that Originals are tin while Restrikes are pewter. This exceptional example exhibits full luster on its light gray surfaces with splashes of darker gray toning on the high points. The surfaces are smooth and pleasing with little evidence of the tin pest normally associated with these pieces. Listed on page 41 of the 2016 *Guide Book*. NGC ID# AUB2, PCGS# 49

1779 Rhode Island Ship Medal, MS64
No Wreath, Brass, Betts-562

- 3508** 1779 Rhode Island Ship Token, No Wreath, Brass, MS64 PCGS. Betts-562, W-1730, R.3. The Rhode Island Ship tokens were British propaganda medals intended to keep the Dutch out of the Revolutionary War. The design extols the British occupation of Aquidneck Island in August 1778. Betts-562 is the intermediate variety with VLUGTENDE removed from the obverse exergue, since that word suggested Admiral Howe fled the scene. This unabraded and unworn example retains glimpses of the initial bright brass color in protected areas. The high points and open fields are toned gunmetal-gray. One minor field bulge below the L in ADMIRALS. Listed on page 52 of the 2018 *Guide Book*. Population: 2 in 64, 1 finer (4/17). NGC ID# 26LC, PCGS# 588

1787 Massachusetts Cent, MS65 Brown
The Finest Known Ryder 4-D

- 3509** 1787 Massachusetts Cent, Arrows in Left Talon MS65 Brown NGC. Ryder 4-D, W-6110, High R.3. When we cataloged the Partrick specimen that was graded MS64 Brown NGC, we noted that we felt it was the finest known of the variety, but here is a finer MS65 Brown NGC example that combines chestnut-brown surfaces and traces of mint red with delicate blue overtones on each side. The strike is sharper than the Partrick coin, and the surfaces are exceptional. Three examples in the Ford Collection graded no finer than AU. This early die state piece has no reverse die cracks that are sometimes seen on the Ryder 4-D. We are confident in stating that this piece is the finest known, and it will make an excellent addition to a specialized collection of Massachusetts copper coinage. Listed on page 61 of the 2018 *Guide Book*. NGC ID# 2B25, PCGS# 302

1787 Connecticut Copper, MS62 Brown
Hercules Head, Miller 7-I
Finest Known, Ex: Hall

- 3510** 1787 Connecticut Copper, Mailed Bust Left, Hercules Head, MS62 Brown NGC. M. 7-I, W-2830, R.6. 151.2 grains. The obverse is a reappearance of the 1786 Obverse 5.3 as it appears on Miller 5.3-G and 5.3-N, both offered above. In its rare 1787 reincarnation, both dies are used only for this one variety, and only about two dozen are known in all grades. The obverse shows several bulges and cracks, and was clearly serviceable for a limited time. The 1975 Pine Tree-EAC example was described as "Many details fully Very Fine, others Fine." At the time, the cataloger wrote that it was the finest example auctioned in more than 50 years. The Eric P. Newman specimen is far finer than the Choice VF Ford coin that Michael Hodder called the second best he had seen behind the Oechsner coin, also graded VF. Oechsner's was the Crosby plate coin. Other examples include Taylor's Choice Fine and Perkins' Fine. This example, from Dr. Hall and showing his famous edge paint, is typical of all others in showing considerable central weakness. However, the exceptional quality of this coin, showing faint cartwheel luster on its pleasing olive-brown surfaces, is anything but typical. While this variety poses grading difficulties, it is virtually as struck. The dies were of such high relief that, upon striking, the metal did not flow into their deeper recesses. There is no question that this example is far finer than any others that are known to us. Listed on page 63 of the 2018 *Guide Book*. Ex: Dr. Thomas Hall; Virgil Brand; Brand Estate; B.G. Johnson; Eric P. Newman; Eric P. Newman Numismatic Education Society.

1783 Nova Constellatio Copper
Crosby 3-C, Blunt Rays, MS64 Brown
The Finest NGC Certified

- 3511** 1783 Nova Constellatio Copper, Blunt Rays MS64 Brown NGC. Crosby 3-C, W-1875, R.3. This example ranks at the top of the NGC Census for the 1783 Blunt Rays variety, and PCGS has only graded one similar piece and one finer example (5/17). Since our Permanent Auction Archives began in 1993, we have offered 13 Mint State examples of this variety, none graded finer than MS63 Brown. The present example is the finest that we have offered, tied for the second finest certified, and clearly a Condition Census representative of the popular 1783 Blunt Rays type. The Crosby 3-C is the only die variety of that type, so examples are necessary for specialized collections and Guide Book collections, adding demand. This Choice Mint State representative has frosty cartwheel luster with splendid chocolate-brown surfaces and extraordinary eye appeal. Listed on page 56 of the 2018 *Guide Book*. NGC ID# 2AYZ, PCGS# 807

1787 Newman 10-T Fugio, AU50
1 Over Horizontal 1

- 3512** 1787 Fugio Cent, STATES UNITED, 1/Horizontal 1 AU50 PCGS. CAC. Newman 10-T, R.5. The 1 over Horizontal 1 obverse is an important and integral part of any Fugio cent collection, carrying its own listing in the *Guide Book*. A late die state with heavy obverse clash marks and a strong reverse crack from the border at 7 o'clock across the ring to the label at the first S. Pleasing dark brown and steel surfaces, the obverse and center of the reverse are sharp, the peripheral reverse weaker, as usual for the variety. Superior quality to John Ford's, lot 262 in Part I of the Stack's sales devoted to the Ford Collection. Listed on page 89 of the 2018 *Guide Book*. NGC ID# 28GJ, PCGS# 886

1787 Newman 104-FF Fugio Cent, MS64
Pleasing Brass Production

- 3513** 1787 Fugio Cent, New Haven Restrike, Brass, MS64 PCGS. Newman 104-FF, W-17560, R.3. This New Haven Restrike is a pleasing example struck in brass, exhibiting golden-brown surfaces and hints of pale orange luster on both sides. Minor splashes of maroon patina are evident on the obverse. This attractive example has a sharp strike and pristine surfaces. Population: 3 in 64, 1 finer (4/17). NGC ID# 2B8T, PCGS# 919

1783 Washington & Independence Cent, PR65
Draped Bust, No Button
Silver Restrike, Baker-3A

- 3514** 1783 Washington & Independence Cent, Draped Bust, No Button, Silver Restrike, PR65 PCGS. Baker-3A, Vlack 17-L, W-10380, Musante GW-1067, R.5. The circa-1860 W.S. Lincoln proof restrike is identified by a Large 3 in the date. The well-executed dies predominantly struck copper specimens, although scarce silver proofs are known. A flashy and undisturbed Gem bathed in light to medium caramel-gold toning. Housed in a green label holder. Listed on page 82 of the 2018 *Guide Book*. Population: 5 in 65, 1 finer (4/17). NGC ID# 2B6U, PCGS# 688

HALF CENT

1794 Half Cent, AU58
C-9, Scarce Early Type

- 3515** 1794 High Relief Head, C-9, B-9, R.2, AU58 PCGS. Manley Die State 3.0. A medium to deep brown representative. The obverse border is moderately granular, as made on an impure alloy planchet. Marks are confined to a few tiny ticks. The edge lettering is clear. This Liberty Cap Right type coin is evenly struck and attractive with wear apparent on the curls behind the ear and shoulder, and high point-friction also on select wreath leaves. This issue is seldom offered in AU holders. An AU50 PCGS CAC example realized \$9,400 in our ANA Signature sale (Heritage, 8/2016), lot 3945. Our EAC grade VF25. NGC ID# 2223, PCGS# 35063 Base PCGS# 35054
-

LARGE CENTS

1793 S-1, B-1 Cent, AG3
Famous Chain AMERI.

- 3516** 1793 Chain, AMERI., S-1, B-1, R.4, AG3 PCGS. The bust on the obverse is partially outlined, with LIBERTY complete and the date illegible. The reverse has a bold chain, with the legend and denomination complete. The fields are steel-toned, while most of the devices are lighter chestnut-brown. Our EAC grade Fair 2. NGC ID# 223G, PCGS# 35432 Base PCGS# 1340

1793 S-1, B-1 Cent, Good Details
Chain, AMERI.

- 3517** 1793 Chain, AMERI., S-1, B-1, R.4 — Rim Damage — PCGS Genuine. Good Details. Our nation's first regular issue copper coin was the Chain cent, struck in March 1793, and the first of five varieties was the Chain AMERI. cent, known as S-1 and B-1. This piece has minor rim damage and slight roughness on its dark brown surfaces. The obverse has a full date and LIBERTY with a partially outlined bust. The reverse has a bold chain as usual, with a complete denomination, and partial legend. A pleasing example, nonetheless, and worthy of strong bidding competition. Our EAC grade Fair 2.

1793 S-8 Wreath Cent, VF25
Vine and Bars Edge

- 3518** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, VF25 PCGS. Breen Die State II. A lavender-brown example with pleasing sharpness. All legends are crisp, and portions of Liberty's inner hair detail are apparent. The lightly granular surfaces are relatively unabraded, though we note a small rim knock at 5:30 on the reverse. The diagonal crack across the central reverse is an identifier for S-8, as is its large, triangular bow. Our EAC grade Fine 12. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

1793 S-10 Wreath Cent, XF40
Vine and Bars Edge

- 3519** 1793 Wreath, Vine and Bars Edge, S-10, B-10, R.4, XF40 PCGS. Housed in a green-label PCGS holder that is incorrectly labeled Lettered Edge, this Wreath cent deserves close inspection for its pleasing olive and chestnut-brown surfaces. A few scrapes and other surface anomalies are evident on each side. A small rim bump is visible outside the U in UNITED, and the narrow rim break over NITE is evident on this piece. The obverse beading is complete at the die flaw at 2:30. Despite a few minor challenges, this is an exceptional example of the Wreath cent design for a specialized large cent aficionado or a type collector. Our EAC grade VF25. NGC ID# 223H, PCGS# 35462 Base PCGS# 1347

1794 S-44, B-33 Cent, XF45
Popular Head of 1794 Variety

- 3520** 1794 Head of 1794, S-44, B-33, R.1, XF45 PCGS. Breen Die State IV, late, with some characteristics of Die State V. This pleasing chestnut and olive-brown example has a few splashes of maroon and emerald patina on the reverse. Both sides exhibit grade-consistent handling marks, mixed with pre-strike planchet marks. Our EAC grade VF25. NGC ID# 223P, PCGS# 35597 Base PCGS# 901374

PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, PR62
Snow-3, A Less-Often-Seen Variety

- 3521 1856 Snow-3 PR62 PCGS.** According to Rick Snow, the Snow-3 variety comprises approximately 20% of all 1856 Flying Eagle cents seen. Recutting on the 5 in the date is a distinctive die feature that this variety shares with Snow-1 and -10. Snow further writes: "...it is nearly certain that this issue makes up most or all of the 634 specimens originally distributed to Congress to help promote the passage of the pending coinage bill." This proof example shows the typical satiny luster but with above-average sharpness on the eagle's feathers and the wreath. Tan-gold surfaces have only light handling marks that limit the grade. NGC ID# 227A, PCGS# 47058 Base PCGS# 2037

1856 Flying Eagle Cent, PR58
Snow-9 Proof Restrike

- 3522 1856 Snow-9 PR58 PCGS.** A golden-brown Borderline Uncirculated example of the famous introductory cent issue. The 1856 Flying Eagle cent was first struck as a pattern, from Snow-3 business strike dies, to demonstrate the new and smaller cent diameter to Federal government officials. A few years later, Snow-9 proof dies were used to produce unofficial restrikes for sale to numismatists, who clamored for examples of the trendy low mintage key. The present well-struck specimen shows no signs of rub, but the field reflectivity is understated. As identifiers, we note inconsequential marks on the bottom of the T in CENT and below the first A in AMERICA. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

INDIAN CENTS

1859 Indian Head Cent, MS66
A Top One-Year Type Example

3523 1859 MS66 PCGS. CAC. The Flying Eagle design presented Mint officials with striking difficulties and was replaced with an Indian Head motif in 1859. The laurel wreath introduced in that year was substituted with an oak wreath and shield design in 1860, creating a popular one-year type in 1859. This Premium Gem cent boasts crisp feather and ribbon detail. Golden-amber surfaces show a handful of scattered ticks, but they are relatively insignificant, as this piece is among the finest survivors from a mintage of 36.4 million coins. Population: 33 in 66 (3 in 66+), 0 finer. CAC: 9 in 66, 0 finer (4/17). NGC ID# 227E, PCGS# 2052

1877 Cent, MS66 Red and Brown
A Top-Grade, Attractively Toned Rarity

3524 1877 MS66 Red and Brown PCGS. Like many key dates in various series, the 1877 Indian cent is heavily traded at auction and usually available for a price. However, examples are rarely seen as fine as the MS66 grade level, regardless of color designation. The last Premium Gem Red and Brown example that we sold was an NGC coin in lot 4018 of our January 2015 FUN Signature sale, where it realized \$32,900. The present coin is easily equal to that piece in terms of visual and technical merit. The strike lacks completeness only on the top three headdress feathers, and the luminous surfaces are devoid of abrasions and spotting. Rich olive-gold, amber-red, and copper-orange hues ornately decorate the original surfaces. No coins are graded MS67 at either leading service, regardless of color designation. Population: 5 in 66 Red and Brown, 0 finer (4/17). NGC ID# 2284, PCGS# 2128

1886 Cent, MS65 Red
Type One Obverse

- 3525** 1886 Type One MS65 Red PCGS. The lowest headdress feather points between the IC in AMERICA on the Type One 1886 obverse. This Gem Red example offers satiny copper-orange luster and sharp details. There is one noticeable fleck, in the vertical shield stripes on the reverse. Red coins are rare this fine and extremely rare finer. Population: 25 in 65 (1 in 65+) Red, 3 finer (4/17). NGC ID# 228D, PCGS# 2156

1894 Cent, MS66+ Red
Tied for Finest at PCGS

- 3526** 1894 MS66+ Red PCGS Secure. Glowing, frosty luster emits flaming copper-red and pinkish-orange hues on this high-end Premium Gem 1894 Indian cent. The strike is sharp, and only a few tiny flecks are seen under a loupe. No coins are finer at PCGS, and the date is rare in the current grade. The 1894 carries a premium over the common date in all grades, even circulated. Population: 35 in 66 (5 in 66+) Red, 0 finer (4/17). NGC ID# 228N, PCGS# 2189

1895 Cent, Vibrant MS67 Red
The Sole Finest at CAC

- 3527** 1895 MS67 Red NGC. CAC. Plentiful overall, the 1895 Indian cent is conditionally rare in MS67 Red. NGC reports only eight coins this fine and PCGS four, both services with none finer. In fact, no Superb Gems are reported in either the Brown or Red and Brown color categories (5/17). This piece is the sole finest 1895 cent endorsed by CAC, making it arguably the finest example of the date known. The strike is bold and metal flowlines in the fields generate extravagant cartwheel luster. Speaking of luster ... this piece glistens with original copper-gold luminance and is devoid of abrasions. An almost unnoticed fleck is located near the first S in STATES. NGC ID# 228P, PCGS# 2192

PROOF INDIAN CENTS

1861 Indian Cent, PR65
'Rattler' Holder, Good Eye Appeal

- 3528** 1861 PR65 PCGS. This thoroughly reflective, fully detailed Gem proof was struck from fresh dies. The obverse is tan-gold with vivid orange, amber, and reddish undertones, while the reverse has similar coloration in addition to a dash of olive-green along the left-hand border. Finer proof 1861 cents are exceedingly rare. Resides in a "rattler" holder. Population: 25 in 65 (1 in 65+), 3 finer (4/17). NGC ID# 229B, PCGS# 2256

1864 Copper-Nickel Cent, PR66 Cameo
Only 370 Proofs Produced

- 3529** 1864 Copper Nickel PR66 Cameo PCGS. The 1864 has the lowest mintage in the proof copper-nickel series with only 370 pieces struck. Most examples are not as well-preserved as this piece or the typical type coin for the series, the 1862. This proof displays deeply reflective fields that establish a "black" background for the mint frost that covers the devices. The obverse still retains much of the whiteness of the copper-nickel alloy, while the reverse is uniformly reddish toned. NGC ID# 229E, PCGS# 82265

1866 Cent, PR66 Red
Sharp and Deeply Mirrored

- 3530** 1866 PR66 Red PCGS. A fully struck, gleaming representative with bright, lemony-red color that exhibits just a touch of deeper tone over each side. Noticeable mint frost blankets the devices, and this coin falls just shy of a Cameo designation from PCGS. As a date, this issue is only available in Brown to Red and Brown grades — Red examples are scarce, and Cameos are extremely rare. Population: 4 in 66 Red, 0 finer (4/17). NGC ID# 229J, PCGS# 2287

LINCOLN CENTS

1909-S VDB Lincoln Cent, MS65+ Red Low-Mintage, First-Year Key

- 3531 1909-S VDB MS65+ Red PCGS.** The acquisition of a nice 1909-S VDB cent represents the pinnacle of achievement for collectors who specialize in this series. It claims a famously low mintage of 484,000 coins. Intense copper-orange hues color the majority of each side, yielding to occasional cherry-red and mint-green accents. Additional attributes include needle-sharp detail, minimal carbon spots, and vibrant mint frost. NGC ID# 22B2, PCGS# 2428

1909-S VDB Lincoln Cent, MS66 Red Rich, Lustrous Surfaces

- 3532 1909-S VDB MS66 Red PCGS Secure.** Frosty, luminous surfaces yield mint-gold and bronze hues throughout medium copper-gold luster. The strike is bold, and the corresponding eye appeal is superb. There are no abrasions or obvious spots. The 1909-S VDB Lincoln cent is among the most sought-after issues of the 20th century but remains marginally available in Premium Gem Red condition for the budget-conscious collector. Finer pieces are rare and exceedingly more costly to acquire, with just 16 such coins listed by PCGS and NGC combined (5/17). NGC ID# 22B2, PCGS# 2428

1909-S VDB Cent, MS66 Red The Lincoln Series Key

- 3533 1909-S VDB MS66 Red PCGS.** The 1909-S VDB cent was well-saved in Mint State, although such coins are challenging to acquire today at the Premium Gem Red level, and finer pieces are rare. This coin offers a sharp strike and luminous orange-gold luster with no obvious carbon spotting or other distractions. Housed in a green label holder. PCGS reports just 15 numerically finer representatives (5/17). NGC ID# 22B2, PCGS# 2428

1909-S VDB Lincoln Cent, MS66+ Red First-Year, Low-Mintage Key

- 3534 1909-S VDB MS66+ Red PCGS. CAC.** From a series-low, first-year mintage of 484,000 pieces, the 1909-S VDB is the sought-after key to the Lincoln cent series and examples are prized by collectors in all grades and conditions. This spectacular Plus-Graded Premium Gem exhibits razor-sharp definition on all design elements and the all-important designer's initials are boldly visible on the reverse. The original red surfaces display softly glowing satiny mint luster on both sides, with a few microscopic carbon spots visible through a loupe. Overall eye appeal is terrific. PCGS has graded only 15 numerically finer examples (4/17). NGC ID# 22B2, PCGS# 2428

1909-S/S Lincoln Cent, MS66+ Red S Over Horizontal S Phenomenal Mint Luster

- 3535 1909-S/S S Over Horizontal S, FS-1502, MS66+ Red PCGS. CAC.** Potent, frosty cartwheel luster adorns virtually unblemished surfaces on this high-end Premium Gem example. The surfaces display lovely peach-gold color that is unhindered by any degree of toning. A loupe reveals a faint fleck on the lower part of Lincoln's jacket. The S Over Horizontal S mintmark feature is weak due to the die state but still discernible. Population: 89 in 66 (11 in 66+) Red, 1 finer. CAC: 25 in 66, 0 finer (4/17). NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434

1909-S/S Lincoln Cent, MS66+ Red
Guide Book S Over Horizontal S

- 3536** 1909-S/S S Over Horizontal S, FS-1502, MS66+ Red PCGS. CAC. A first-year branch mint Lincoln cent that boasts vibrant luster and lovely orange-gold and olive-green surfaces. A trace of patina west of the T in CENT provides the sole visible imperfection. The design elements are sharply detailed and the primary mintmark is struck over an undertype S that is oriented horizontally. Population: 88 in 66 (11 in 66+) Red, 1 finer. CAC: 25 in 66, 0 finer (4/17). NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434

1913-D Lincoln Cent, MS66 Red
None Numerically Finer at PCGS

- 3539** 1913-D MS66 Red PCGS. CAC. The quality of this Premium Gem 1913-D cent is unsurpassed. Amber-gold surfaces awash in satin mint luster shimmer when rotated under a light source. Further, they fail to show any singular marks under close inspection. Obverse design detail is pinpoint-sharp, while softness is confined to the O in ONE and the upper reverse border. This piece is sure to command the attention of Registry Set builders. Population: 21 in 66 (3 in 66+) Red, 0 finer (4/17). NGC ID# 22BE, PCGS# 2464

1910-S Lincoln Cent, MS66+ Red
Few Known Finer

- 3537** 1910-S MS66+ Red PCGS. The availability of the 1910-S cent declines significantly in Premium Gem condition, and it nearly vanishes in finer grades. This MS66+ coin is luminous with rich golden luster and no distracting spots or abrasions. The design elements are sharply rendered. PCGS has Plus-graded only five MS66 coins and lists six Superb Gems finer (4/17). NGC ID# 22B6, PCGS# 2440

1914-D Cent, MS64 Red
Luminous Original Luster

- 3540** 1914-D MS64 Red PCGS. Struck from worn dies with the usual satiny, copper-red luster. No major abrasions are observed, although each side has a few small flecks. The 1914-D is a scarce key date, particularly elusive in Gem Red condition. This near-Gem coin will appeal to the budget-conscious collector. NGC ID# 22BH, PCGS# 2473

1911-D Lincoln Cent, MS66+ Red
Strong Registry Set Contender

- 3538** 1911-D MS66+ Red PCGS. CAC. 30th Anniversary Green Label Holder. A Plus-graded Premium Gem, this cent exhibits brilliant light orange color and satin luster with an exceptional strike, although the mintmark is weak. PCGS and NGC have each graded one finer piece, but we have never offered a finer example. This lovely cent is an excellent Registry Set candidate as few similarly graded pieces have been certified. The reverse is rotated about 30 degrees counterclockwise on this piece, as it is on many others. Population: 62 in 66 (6 in 66+) Red, 1 finer. CAC: 12 in 66, 0 finer (4/17). NGC ID# 22B8, PCGS# 2446

1914-D Cent, MS65+ Red
Few Seen This Fine

- 3541 1914-D MS65+ Red PCGS.** The 1914-D Lincoln cent in high grade is far scarcer than the 1909-S VDB, which was widely saved at the time of issue. This high-end Gem '14-D has only a few superiors. The strike is good, and satiny copper-red luster shows no major distractions. We have previously handled only a single Plus-graded Gem Red example of this key Denver issue, in lot 4626 of our October 2014 PNG Invitational Signature auction. The CAC-approved coin realized \$28,200. We would not be surprised to see the present example match or surpass that strong figure. Population: 71 in 65 (8 in 65+) Red, 7 finer (4/17). NGC ID# 22BH, PCGS# 2473

1916-D Lincoln Cent, MS66 Red
Two Finer Coins at PCGS

- 3542 1916-D MS66 Red PCGS.** Ex: Lone Star Collection. Excellent definition is apparent on Lincoln's hair, the legends, date, mintmark, the lines of the wheat stalks, and on all of the reverse lettering. Lustrous surfaces exhibit pinkish-orange hues on the obverse, and orange with hints of pink and sky-blue on the reverse. Both sides are impeccably preserved. A tiny mark to the right of the chin and above the 9 may help to pedigree the coin. Population: 17 in 66 (4 in 66+) Red, 2 finer (4/17).
Ex: Tom Mereshon Collection / FUN Signature (Heritage, 1/2007), lot 809, where it sold for \$34,500. NGC ID# 22BP, PCGS# 2491

1917-S Cent, MS65+ Red and Brown
Finest at PCGS, CAC Approval

- 3543 1917-S MS65+ Red and Brown PCGS. CAC.** Mint State examples of the 1917-S Lincoln cent are typically found with Red and Brown surfaces and usually no higher than MS64. Gems are very scarce, and this is the only such example at PCGS with a Plus designation for quality within the grade. CAC, too, has recognized this spectacular representative. Each side is razor-sharp with scintillating luster and pumpkin-gold color. Minimal carbon. Population: 60 in 65 (1 in 65+) Red and Brown, 0 finer. CAC: 10 in 65, 0 finer (4/17). NGC ID# 22BU, PCGS# 2502

**1925-S Cent, MS65 Red
Tied for the Finest Known**

- 3544 1925-S MS65 Red PCGS.** The 1925-S Lincoln cent is a great rarity in MS65 Red and is unknown finer. PCGS reports a dozen coins in this grade and NGC three (5/17). In fact, the date is rare in MS65 regardless of color designation. The last Gem Red coin to be sold by any major auction house was a PCGS coin that we offered in lot 144 of our December 2009 Houston Signature sale, which realized \$18,400. The present example is comparable in eye appeal and technical quality. The reverse is well-struck, but the obverse is soft with significant die erosion. Both sides offer softly frosted copper-red luster with no carbon spotting. NGC ID# 22CH, PCGS# 2566

**1928-D Cent, MS66 Red
Top-Grade Condition Rarity**

- 3545 1928-D MS66 Red PCGS.** The availability of the 1928-D cent in lower grades becomes a nonfactor in MS66 Red, where PCGS and NGC combined list only 19 coins with none finer. This piece displays original satin luster with copper-red luster that shows pinkish hues on the reverse. The strike is well-executed, and only a few faint flecks are seen beneath a loupe. Population: 16 in 66 Red, 0 finer (4/17). NGC ID# 22CS, PCGS# 2590

**1935-S Lincoln Cent, MS67 Red
Among the Finest Certified**

- 3546 1935-S MS67 Red PCGS.** The 1935-S Lincoln cent is one of the less often seen dates of the period in high-grade full Red condition, and the few Superb Gems certified are items of intense interest and demand among the rankings of Registry Set collectors. This MS67 Red coin is one of only 18 so-graded pieces at PCGS, where none are finer (4/17). The coin is well-struck for the issue, with glowing, satiny luster in rich orange-red hues. A few microscopic specks are detectable near the left reverse border with a loupe, but these are of little concern to the unaided eye. Tied numerically with the example in the current highest-rated Registry Set. NGC ID# 22DD, PCGS# 2647

**1941 Doubled Die Obverse Cent, MS66+ Red
Dramatic Doubling, FS-101**

- 3547 1941 Doubled Die Obverse, FS-101, MS66+ Red PCGS. CAC.** This is the more dramatic of three doubled die 1941 cents. In this case, the northward spread on the word LIBERTY is pronounced. The surfaces are even red over each side with glowing mint luster. Strike details are strong throughout, and there are no obvious or detracting abrasions. Population: 5 in 66+ Red, 0 finer (4/17). NGC ID# 22DW, PCGS# 37780 Base PCGS# 92695

**1946-S Lincoln Cent, MS67+ Red
Among the Finest Seen at PCGS**

- 3548 1946-S MS67+ Red PCGS. CAC.** Trumpet Tail S. more than 198 million Lincoln cents were struck at the San Francisco Mint in 1946, but few survivors can match the quality and eye appeal of the present coin. This piece is a magnificent Plus-graded Superb Gem, with sharply detailed design elements and vibrant mint luster throughout. The original red surfaces are impeccably preserved, with no visible signs of carbon. PCGS has graded no coins in higher numeric grades (4/17). NGC ID# 22EM, PCGS# 2749

1955 Cent, MS64 Red
Doubled Die Obverse

- 3549** 1955 Doubled Die Obverse, FS-101, MS64 Red PCGS. The population of the 1955 doubled die cent drops off sharply above MS64, regardless of color designation. This near-Gem Red coin remains within the grasp of most collectors and is thoroughly eye-appealing and lustrous. The strike is above average, and the copper-red surfaces are original. A loupe finds only a few small specks on each side. PCGS has seen 21 finer doubled die coins (4/17). NGC ID# 8H87, PCGS# 37912 Base PCGS# 2827

PROOF LINCOLN CENTS

1909 VDB Lincoln Cent, PR63 Brown
Scarce Matte Proof Issue

- 3550** 1909 VDB PR63 Brown PCGS. The 1909 VDB is the rarest of the matte proof Lincoln cents. This Select Brown example displays full detail and broad, squared rims. Deep burgundy and coppery-brown toning encompasses each side. A lone speck in the obverse field below IN is not out of line for the grade. Population: 6 in 63 Brown, 12 finer (4/17). NGC ID# 22KR, PCGS# 3300

1911 Cent, PR67 Brown
The Finest Brown Coin at PCGS

- 3551** 1911 PR67 Brown PCGS. CAC. This is the sole finest Brown 1911 matte proof at PCGS, and it is tied with one NGC coin as the finest Brown example overall. The strike is full and the rims are broad. Save for a dash of copper-gold at the lower obverse border, this piece is cast in deep burgundy and olive-green hues that blend over each side. NGC ID# 22KU, PCGS# 3309

1942 Lincoln Cent, PR67 Red Cameo
Tied for Finest Certified

- 3552** 1942 PR67 Red Cameo PCGS. The economic stresses of World War II caused the Philadelphia Mint to cancel its commercial proof offering after 1942, but a relatively generous mintage of 32,6500 proof Lincoln cents was produced before the program was discontinued. Examples with Cameo surfaces are rare, due to the all-brilliant finish used on proofs of this era.

The present coin is a magnificent Superb Gem, with razor-sharp definition on all design elements and deeply mirrored fields that contrast boldly with the frosty devices to create a dramatic cameo effect. The original red surfaces are impeccably preserved and overall visual appeal is terrific. Population: 4 in 67 Cameo, 0 finer (4/17). NGC ID# 22L9, PCGS# 83353

**1958 Cent, PR68 Red Deep Cameo
Condition Census Registry Coin**

- 3553 1958 PR68 Red Deep Cameo PCGS.** Deep Cameo Red proof 1958 cents are rare in the uppermost grades. PCGS reports seven coins in this grade and one finer (4/17). This Registry Set essential is fully struck and dramatically contrasted with original copper-gold color. The surfaces are carbon-free and unblemished. We have previously handled only a single PCGS-graded PR68 Deep Cameo proof, which realized more than \$6,460 in our January 2017 FUN Signature sale. NGC ID# 22LJ, PCGS# 93383

**1990 No S Cent, PR69 Red Ultra Cameo
Tied for the Finest Known**

- 3554 1990 No S, FS-101, PR69 Red Ultra Cameo NGC.** No 1990 No S proof cents are known in flawless condition, making this PR69 Ultra Cameo among the finest obtainable. The issue is rare this well preserved. The coin offers flawless striking and surfaces that appear pristine. Original copper-pink color enjoys dramatic field-motif contrast. Census: 25 in 69 Ultra Cameo, 0 finer (4/17). NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

TWO CENT PIECES

**1868 Two Cent, MS66 Red and Brown
A Top-Grade Coin**

- 3555 1868 MS66 Red and Brown PCGS.** CAC. This CAC-approved Premium Gem is among the finest Red and Brown coins certified. The strike is sharp, and neither side exhibit significant distractions. Subtle chestnut-brown overtones accent mainly copper-orange mint luster. Population: 7 in 66 Red and Brown, 0 finer. CAC: 6 in 66, 0 finer (4/17). NGC ID# 22NC, PCGS# 3598

**1871 Two Cent Piece, MS65 Red
Low-Mintage Late-Series Issue**

- 3556 1871 MS65 Red PCGS.** CAC. A modest mintage of 721,250 two cent pieces was accomplished in 1871, a testament to the declining popularity of the odd denomination. This delightful Gem exhibits sharply detailed design elements and well-preserved original red surfaces with a few hints of crimson in selected areas. Satiny mint luster adds to the outstanding eye appeal. Population: 13 in 65 (1 in 65+) Red, 2 finer (4/17). NGC ID# 22NE, PCGS# 3611

THREE CENT SILVER

**1851-O Three Cent Silver, MS66
Among the Finest at PCGS and CAC**

- 3557 1851-O MS66 PCGS.** CAC. The New Orleans three cent silver issue in MS66 is conditionally scarce. CAC-approved at this level, the date is genuinely rare. This Premium Gem CAC coin resides in a green label holder with beautiful frosty luster in warm champagne hues. The strike is above-average for the issue and eye appeal excels. Population: 32 in 66 (3 in 66+), 0 finer. CAC: 17 in 66, 0 finer (4/17). NGC ID# 22YY, PCGS# 3665

**1855 Silver Three Cent, MS65
Delicately Toned**

- 3558 1855 MS65 PCGS.** CAC. Lovely lavender, mint-green, and champagne hues reside on this Gem 1855 silver three cent piece, complementing pristine, frosty luster. There is trivial incompleteness of strike on the central shield lines and peripheral stars, but the coin is otherwise sharp. The preservation is high-end even for the MS65 grade. Population: 16 in 65, 9 finer. CAC: 9 in 65, 5 finer (4/17). NGC ID# 22Z4, PCGS# 3671

1867 Three Cent Silver, MS66
CAC-Approved in an Old NGC Holder
Few Known This Fine

3559 1867 MS66 NGC. CAC. With a mintage of only 4,000 coins and a low survival rate in high grade, the 1867 three cent silver is more often seen as a proof than in business strike format. This Premium Gem is virtually within the Condition Census, as any piece grading finer than MS64 is a distinct rarity. The coin shows expectedly reflective fields (a common characteristic of low-mintage issues) but with full design sharpness as well. The preservation is outstanding. Delicate aquamarine and pale pinkish hues blanket each side. Housed in a prior generation holder. Census: 2 in 66, 1 finer. CAC: 5 in 66, 3 finer (5/17). NGC ID# 22ZH, PCGS# 3687

1868 Three Cent Silver, MS66
Old Green Holder, Condition Census

3560 1868 MS66 PCGS. CAC. Coming from a scant mintage of 3,500 coins, the 1868 silver three cent is scarce in all grades and genuinely rare at the Mint State level. It is arguably rarer in Uncirculated condition than the 1867. Only a single coin is known finer than the present piece, placing this example firmly within the Condition Census. The strike is full and the fields are modestly reflective. Well-balanced olive-green, gold, and bluish hues complement a lack of abrasions. The visual appeal of this piece is exceptional. CAC-endorsed in a green label holder. Population: 4 in 66, 1 finer. CAC: 3 in 66, 1 finer (4/17). NGC ID# 22ZJ, PCGS# 3688

1872 Three Cent Silver, MS65
Gold CAC Label

- 3561 1872 MS65 PCGS. Gold CAC.** Solidly struck with frosty devices and reflective fields, this Gem 1872 silver three cent piece is the only example of the date to received a Gold CAC label. Housed in a green label PCGS slab, the coin offers appreciable cameo contrast and displays delicate lavender toning. Eye appeal surpasses expectations for the grade. The 1872 in this condition is a major rarity. We have previously handled only a handful of coins at the MS65 level, and the Gold CAC sticker makes this piece uniquely special. We anticipate strong bidder participation when this lot crosses the auction block. Population: 4 in 65 (1 in 65+), 7 finer (4/17). NGC ID# 22ZN, PCGS# 3693

1872 Three Cent Silver, MS66
Colorfully Toned, Conditionally Rare

- 3562 1872 MS66 PCGS. CAC.** The final circulation strike in the silver three cent series is a challenge in any grade. PCGS reports only 34 Mint State coins in all grades, with seven in MS66 or better condition. Only 1,000 pieces were struck, promoting this issue as a key date in any state of preservation. The current Premium Gem is delightfully toned in concentric multicolor hues with golden centers. The strike is only slightly soft on the central shield high points, and the reflectivity in the fields balances the eye appeal. A finer 1872 silver three cent may not appear at auction for a long time. Housed in a green label holder with CAC approval. Population: 4 in 66, 3 finer. CAC: 5 in 66, 2 finer (4/17). NGC ID# 22ZN, PCGS# 3693

PROOF THREE CENT SILVER

1857 Three Cent Silver, Toned PR66
Only About 75 Proofs Believed Known
Tied for Finest at PCGS

- 3563 1857 PR66 PCGS.** PCGS estimates that only 75 proof 1857 silver three cent pieces known from an unrecorded original mintage. The best of these in a PCGS holder grade PR66. Here offered is a sharp top-grade PCGS coin with a full strike and no distracting contact marks. The design elements show no die lapping and the fields are reflective. On the obverse, blue and violet border toning surrounds a warm golden interior, while the reverse exhibits mainly sea-green color with a hint of rose-gold at the center. This rare proof issue is highly sought-after in any grade. A Premium Gem example is far finer than most collectors will typically have an opportunity to acquire. Population: 5 in 66, 0 finer (4/17). NGC ID# 27C4, PCGS# 3704

1864 Three Cent Silver, PR67
Only 470 Pieces Struck

- 3564 1864 PR67 PCGS. CAC.** Only 470 proof silver three cent pieces were struck in 1864, as demand for proof coinage reached extremely low levels in the waning days of the Civil War. This spectacular Superb Gem exhibits sharply detailed design elements throughout, with impeccably preserved surfaces and deeply reflective fields. Attractive shades of cerulean-blue and greenish-gold toning add to the terrific eye appeal. Population: 11 in 67 (2 in 67+), 0 finer. CAC: 6 in 67, 0 finer (4/17). NGC ID# 27CA, PCGS# 3714

PROOF THREE CENT NICKEL

1877 Nickel Three Cent, PR67 Cameo
Few Cameos Known So Fine

- 3565 1877 PR67 Cameo NGC.** The 1877 three cent nickel was struck in proof format only with a production of just 900 pieces. Cameo examples are collectible in general but rare at the Superb Gem level. This piece displays brilliant surfaces and nice contrast. The strike is sharp. A couple of tiny olive-colored toning spots on the obverse below Liberty's ear and the I in AMERICA, respectively, serve as pedigree markers. Census: 25 in 67 Cameo (1 in 67+, 5 in 67 ★, 1 in 67+★), 2 finer (5/17). NGC ID# 275X, PCGS# 83773

SHIELD NICKELS

1867 Shield Nickel, MS66
With Rays Condition Rarity

- 3566 1867 Rays MS66 NGC.** Heavy die cracks appear in the obverse margins on this Premium Gem With Rays 1867 Shield nickel. The strike lacks slightly on the shield lines and several reverse stars, although there are no other distractions. A hint of light champagne toning graces each side. The With Rays 1867 is rare this well-preserved and nearly uncollectible finer. Census: 13 in 66 (1 in 66+), 1 finer (5/17). NGC ID# 22NY, PCGS# 3791

1873 Open 3 Shield Nickel, AU50
FS-1301, Lagre Over Small Date

- 3567** 1873 Open 3, Large Over Small Date, FS-1301, AU50 PCGS. "This is a very rare variety, always sought by the many Shield nickel specialists." — Thus states the *Cherrypickers' Guide* concerning this intriguing repunched date variety. The pickup point is a smaller, secondary 3 visible in the field between the primary 73 of the date. The coin in general is well-struck and shows satiny olive-gray surfaces. PCGS has only attributed 12 FS-1301 coins in all grades (4/17). NGC ID# 22P8, PCGS# 38394 Base PCGS# 3800

PROOF SHIELD NICKEL

1877 Shield Nickel, PR66 Cameo
High-End for the Issue

- 3568** 1877 PR66 Cameo PCGS. The proof-only 1877 Shield nickel comes from a small mintage of 900 pieces. Only a fraction of the survivors exhibit cameo contrast, and such coins are rare above PR66. This champagne-tinted Premium Gem Cameo displays sharp motifs and appreciable contrast. There are no distracting abrasions. Population: 42 in 66 (4 in 66+) Cameo, 9 finer (4/17). NGC ID# 276U, PCGS# 83831

LIBERTY NICKEL

1886 Nickel, MS65+
A High-End Example

- 3569** 1886 MS65+ PCGS. The key-date 1886 Liberty nickel is scarce in MS65 and rare any finer. This Plus-graded Gem offers semireflective fields and a hint of light golden toning. A 10x power loupe fails to reveal a single mentionable surface imperfection. The usual strike weakness on the lower-left portion of the wreath may contribute to PCGS' numeric designation. Population: 47 in 65 (2 in 65+), 9 finer (4/17). NGC ID# 277U, PCGS# 3847

PROOF LIBERTY NICKELS

1883 With Cents Liberty Nickel
Appealing PR67 Cameo

- 3570** 1883 With Cents PR67 Cameo PCGS. Ex: Groman. Between the two 1883 Liberty nickel proof types, the With Cents variant is the scarcer in high Cameo grades. This contrasted Superb Gem displays stark field-motif separation beneath a hint of light champagne toning. No marks or other distractions appear. The strike is sharp. Population: 5 in 67 Cameo, 0 finer (4/17). NGC ID# 277S, PCGS# 83881

1885 Liberty Nickel, PR67+ Cameo
Starkly Contrasted

- 3571** 1885 PR67+ Cameo PCGS. CAC. For a date-set collector the utility of the proof 1885 nickel is obvious as only 1.4 million circulation strikes were produced. It is tempting to call this piece untuned, but there is just the slightest hint of patina present over each side. The devices are heavily frosted with deeply reflective fields. A shallow, oval-shaped planchet flake is noted in the center of the reverse. Population: 17 in 67 (2 in 67+) Cameo, 0 finer. CAC: 14 in 67, 0 finer (4/17). NGC ID# 277T, PCGS# 83883

1907 Nickel, PR67+
Pale Toning, Among the Finest

- 3572** 1907 PR67+ PCGS. CAC. Pale ice-blue, rose, and golden toning are seen on this magnificently preserved nickel. The fields are deeply reflective and there is slight contrast evident between the fields and devices. The 1907 is excellent for proof type purposes with a mintage of 1,475 pieces, and this is one of the finest examples known. Population: 31 in 67 (14 in 67+), 0 finer. CAC: 9 in 67, 0 finer (4/17). NGC ID# 278H, PCGS# 3905

1908 Nickel, Delicately Toned PR68
Pastel Coloration

- 3573 1908 PR68 PCGS.** PCGS reports only two proof 1908 Liberty nickels in PR68, including the present coin and a single Cameo. None are known finer (5/17). This piece offers bold detail and seemingly pristine surfaces with deep mirroring in the fields. Modest cameo contrast appears on both sides at certain angles. The interiors are ice-blue, ceding to warmer mint-green and rose-gold pastel hues. NGC ID# 278J, PCGS# 3906

BUFFALO NICKELS

1914 Nickel, MS67
Among the Finest Certified

- 3574 1914 MS67 PCGS Secure.** Unlike the 1913, this second-year issue was not saved in vast quantities. Superb Gems like the present coin are very seldom offered. Nickel-gray surface gleam with soft, shimmering luster. Occasional blushes of gold patina are seen throughout, but each side is mainly brilliant. Razor-sharp with light clash marks in front of the portrait. Population: 31 in 67 (1 in 67+), 0 finer (4/17). NGC ID# 22R4, PCGS# 3924

1916 Buffalo Nickel, VG8
Guide Book Doubled Die Obverse

- 3575 1916 Doubled Die Obverse, FS-101, VG8 PCGS.** The doubling on the 1916 nickel is so pronounced it is a wonder it took until 1962 to be discovered. Of course, by that time not only were most 1916 nickels heavily worn, the vast majority had been pulled from circulation altogether. This well-known *Guide Book* variety is quite rare today. The present example is an original coin with even wear over the devices. Both dates are equally strong. Housed in a green label holder. NGC ID# 2TSS, PCGS# 145628 Base PCGS# 3931

1920-D Nickel, Luminous MS65+
Few Known Finer

- 3576 1920-D MS65+ PCGS.** Typically seen with a weak strike and lackluster surfaces, the 1920-D Buffalo nickel is a scarce issue in Gem condition, and finer coins are extremely rare. This Plus-graded Gem is indeed high-end for the grade level, and a loupe fails to readily identify any grade-limiting abrasions. A hint of light golden toning graces frosty luster. The usual strike weakness is seen on the bison's shoulder and head, and on the Indian's feathers. Population: 84 in 65 (13 in 65+), 5 finer (4/17). NGC ID# 22RR, PCGS# 3945

1920-S Nickel, Colorful MS65
Rare This Fine

- 3577 1920-S MS65 NGC.** The 1920-S is a rarity at the Gem level and is exceedingly so any finer. The present coin shows beautiful multicolor toning on both sides atop satiny, unabraded luster. Some strike weakness on the central high points is typical of the issue, and the reverse fields show moderate die erosion. This is the first Gem example that we have handled in nearly a year. Census: 15 in 65 (2 in 65 ★), 5 finer (5/17). NGC ID# 22RS, PCGS# 3946

1925-D Buffalo Nickel, MS66
None Finer at PCGS

- 3578 1925-D MS66 PCGS.** The 1925-D Buffalo nickel is a better date in the Denver Mint series, from a mintage of 4.4 million pieces. This spectacular Premium Gem is sharply detailed in most areas, with just a trace of the usual softness on the bison's shoulder. The well-preserved, lustrous surfaces are visited by shades of sea-green and lavender-gray toning. Population: 14 in 66, 0 finer (4/17). NGC ID# 22S3, PCGS# 3955

1927 Buffalo Nickel, MS67
Tied for Finest at PCGS

- 3579 1927 MS67 PCGS.** From a substantial mintage of nearly 38 million pieces, the 1927 Buffalo nickel is surprisingly rare at the MS67 grade level. This delightful Superb Gem exhibits sharply detailed design elements in most areas, with just a trace of softness on the hair above the braid. The impeccably preserved brilliant surfaces radiate vibrant mint luster throughout. Population: 16 in 67, 0 finer (4/17). NGC ID# 22S8, PCGS# 3960

1937-D Three-Legged Nickel, MS65
Old NGC Holder, Luminous Surfaces

- 3580 1937-D Three-Legged, FS-901, MS65 NGC.** The usual die erosion in the fields and design recesses is present on this Gem three-legged coin, although the surfaces are devoid of even minor abrasions. A light golden hue accents the satiny luster. Weakness in the strike appears on the bison's shoulder, as well as the hair above the Indian's braid. This is a major *Guide Book* variety and is somewhat scarce in MS65. Finer representatives are decidedly rare. The current coin shimmers when rotated beneath a light and is arguably superior to its peers from an aesthetic perspective. It resides in a prior generation holder. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

1938-D Buffalo Nickel, MS68
Exquisite Color, Needle-Sharp Strike

- 3581 1938-D MS68 PCGS.** An exceptionally sharp strike and nearly mark-free, highly lustrous surfaces are exceeded only by the vibrant, exquisite toning that graces both sides of this Superb Gem nickel. A thin band of violet melds into lemon-yellow and pale-gold toning for fantastic eye appeal.

The last of the erstwhile Buffalo nickel series was struck at the Denver Mint in 1938, and many examples were hoarded for that reason. There is no question that this remarkable example was put away and carefully preserved, at some point acquiring its sumptuous toning while retaining its Mint-fresh luster. Neither PCGS nor NGC have seen a numerically finer 1938-D nickel, making this Registry-grade MS68 a prime candidate for the finest set. Population: 23 in 68 (1 in 68+), 0 finer (4/17). NGC ID# 22T2, PCGS# 3984

PROOF BUFFALO NICKELS

1913 Type Two Buffalo Nickel, PR67
Lightly Toned Matte Proof Type Coin

- 3582 1913 Type Two PR67 PCGS.** This Superb Gem Type Two matte proof is fully struck and beautifully preserved, showing luminous, seemingly flawless surfaces cast in delicate golden toning. The 1913 Type Two proof is just as elusive in this grade as the Type One variant, and finer examples are rare. Population: 62 in 67 (5 in 67+), 7 finer (4/17). NGC ID# 278S, PCGS# 3990

1915 Nickel, PR67+
Few Known Finer

- 3583 1915 PR67+ PCGS. CAC.** Light golden-gray toning graces this fully struck Superb Gem, which is essentially perfect aside from the occasional minute toning fleck. The matte finish proofs of this era were not particularly popular with numismatists of the day, since proof mintages fell well below the levels achieved by the Liberty nickel. Only 1,050 proofs were struck in 1915, and high-grade survivors are treasured today, particularly for their intricate strikes. Population: 69 in 67 (10 in 67+), 4 finer. CAC: 32 in 67, 3 finer (4/17).

Ex: *Dallas Signature* (Heritage, 12/2005), lot 351; *Long Beach Signature* (Heritage, 6/2006), lot 879; *Long Beach Signature* (Heritage, 9/2006), lot 1104; *Summer FUN Signature* (Heritage, 6/2010), lot 3403. NGC ID# 278U, PCGS# 3992

JEFFERSON NICKELS

1942-D Nickel, MS65 Full Steps
FS-501, D Over Horizontal D

- 3584 1942-D D Over Horizontal D, FS-501, MS65 Full Steps PCGS.** Apparently the best Mint employees joined the armed forces during World War II, since a sizable number of blunders occurred in 1942. Besides the 1942/1 and 1942/1-D dimes, we have the present *Guide Book* variety. The mintmark punch was initially entered rotated 90 degrees clockwise, then entered a second time with the correct alignment. The lower curve of the initial horizontal D is visible west of the primary Denver mintmark. This Gem ranks in the top tier of known examples. It is mostly brilliant with traces of medium olive-gold toning and a crisp strike. Abrasions are limited to a single diagonal mark across the dome of Monticello. Population: 6 in 65 Full Steps, 3 finer (4/17). NGC ID# 22TL, PCGS# 38496 Base PCGS# 84015

1948-S Nickel, MS67 Full Steps
Among the Finest Certified

- 3585 1948-S MS67 Full Steps PCGS.** It is thought only one in 20 1948-S nickels qualify for the Full Steps designation, even though this San Francisco issue is generally well-produced. In high grades, the Full Steps award is even more challenging. The present Superb Gem example has brilliant, frosted centers and faint warm-gold toning at the peripheries that gravitates into the surrounding fields. No Full Steps examples are finer at either service. PCGS Population: 5 in 67 Full Steps, 0 finer (4/17). NGC ID# 22UA, PCGS# 84036

PROOF JEFFERSON NICKEL

1971 No S Nickel, PR69 Deep Cameo
Top-Grade Registry Coin

- 3586** 1971 No S, FS-501, PR69 Deep Cameo PCGS. Deep Cameo examples of this No S proof are seldom seen in any grade and are rare at the unsurpassed PR69 level. This piece displays a flawless strike and seemingly flawless preservation. A hint of light golden toning graces each side, delivering exceptional eye appeal. Population: 16 in 69 Deep Cameo, 0 finer (4/17). NGC ID# 22YN, PCGS# 569932 Base PCGS# 94204

EARLY HALF DIMES

1794 Half Dime, Attractively Toned MS63
V-4, LM-4, Exceptional Quality

- 3587** 1794 V-4, LM-4, R.4, MS63 PCGS. CAC. A leaf tip is under the left side of the U in UNITED, and one berry is under the I, promptly diagnosing the LM-4 die pairing. More classically stated, there are three inner berries under the left wing, and no outer berries under that wing. The strike is sharp for a 1794, with some blending on the eagle's breast feathers and the foremost leg. Bold clash marks appear on each side.

Although designated as R.4, Logan and McCloskey note in *Federal Half Dimes 1792-1837* that this is the "most common of the four 1794 die marriages." This piece offers exceptional, original mint-green, aqua, and pinkish-gray patina. While the surfaces are suggestive of a finer grade, a well-hidden scrape appears between STATES and OF on the reverse, and perhaps the luster that is somewhat subdued by the intense color that perhaps precludes an even finer grade. Population: 17 in 63, 18 finer. CAC: 5 in 63, 6 finer (4/17).

Ex: ANA Signature (Heritage, 8/2007), lot 1600. NGC ID# 22ZT, PCGS# 38584 Base PCGS# 4250

1795 Half Dime, V-5, LM-8, MS62
Pleasing Mint State Type Coin

3588 1795 V-5, LM-8, R.3, MS62 PCGS. The obverse was used to coin both the LM-8 and LM-9 varieties, with LM-8 representing the first use of the obverse die paired with the final use of the reverse die. A hoard of more than 100 Mint State half dimes was discovered in the 1870s, adding to the availability of high-grade pieces from the LM-8, LM-9, and LM-10 die marriages. Still, appealing Uncirculated pieces are scarce and much sought-after for type purposes.

This example displays rich border toning on the obverse, with shades of cobalt-blue, russet, and amber-gold. Similar toning on the reverse is less intense, while the centers are silver-gray on both sides. As normal for the variety, the strike is incomplete on a few of the central and lower hair strands and generally across the eagle's breast and wings. The remaining elements are bold, with only a few minor marks and soft luster present throughout the coin. Population (all varieties combined): 31 in 62, 96 finer (5/17). NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1797 Half Dime, V-2, LM-1, XF40
Well-Detailed Example

3589 1797 15 Stars, V-2, LM-1, R.3, XF40 NGC. The 1797 Draped Bust half dime claims a mintage of 44,527 pieces, with four die varieties known for the date. This coin represents the LM-1 variety, with 15 stars and the outer berry between N and I in UNITED. This lightly worn example retains much original design detail on the hairlines. The lightly abraded surfaces display shades of pale gold and lavender-gray toning. The central obverse portrait shows slight strike softness. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

1797 Half Dime, CAC-Approved XF40
15 Stars, V-2, LM-1

3590 1797 15 Stars, V-2, LM-1, R.3, XF40 PCGS. CAC. The half dimes of 1797 were struck with 15, 16, and later 13 stars around Liberty's portrait, representing the addition of states to the Union. Late in the year, Mint officials realized it would be increasingly difficult to continually add stars around the obverse and reverted to the original 13 colonies. The V-2, LM-1 variant is slightly more accessible than later die pairings. This is a marvelously original XF40 Small Eagle half dime with attractive antique patina. The motifs are well-detailed, with slight merging over the curls and feathers. From a reported mintage of 44,527 pieces. NGC ID# 22ZZ, PCGS# 38597 Base PCGS# 4258

1800 V-1, LM-1 Half Dime, AU55
Pleasing Bluish-Gray Patina

3591 1800 V-1, LM-1, R.3, AU55 NGC. A long rim cud beneath the 00 in the date denotes a late state of the dies, while pleasing silver-gray surfaces show relatively few marks and the devices are sharply defined. We note die clashing in the date area and a die crack from the rim to the shoulder tangent to the first 0 in the date. Bluish-gray and amber-gold accents gather at the borders and intersperse across the fields for a faint dappling of color. The Choice surfaces are smoothly lustrous and well-preserved. LM-1 is a good selection for the Draped Bust type — relatively available, here with nice eye appeal. Census (all varieties): 12 in 55, 48 finer (4/17). NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

PROOF SEATED HALF DIME

1856 Half Dime, PR66+

Ex: Garrett

3592 1856 PR66+ NGC. Ex: Garrett. V-2, with the date closer to the base than to the rim, and the 1 well left of the shield point. This splendid Plus-designated Premium Gem proof features gold, russet, and olive shading over well-struck devices and mirrored fields. The smallest details are fully delineated, with separation clear on the bowknot and the hair of Liberty. The depth of the reverse lettering is exceptional, and this is complemented by the obverse stars, which emerge strongly from the glassy fields. Pre-1858 proof coinage is one of the most challenging areas of American numismatics, but this well-pedigreed and attractive Gem is one of the more accessible pieces in the series, suitable for an advanced half dime or proof type collection.

Ex: Garrett Collection Part III (Bowers & Ruddy, 10/1980), lot 1617; Pre-FUN Elite (Superior, 1/2004), lot 188; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98199. NGC ID# 235L, PCGS# 4434 Base PCGS# 4435

EARLY DIMES

1797 Draped Bust Dime, MS62
JR-2, 13 Stars Obverse
As Few as Three Mint State Pieces Known

3593 1797 13 Stars, JR-2, R.4, MS62 PCGS. A *Bust Dime Identification Guide* by authors Winston Zack, Louis Scuderi, and Michael Sherrill was published last year, and the guide is extraordinarily useful for collectors, providing up-to-date information on all of the individual varieties. For example, the authors note that “as few as three JR-2 dimes are thought to exist in MS condition.”

PCGS and NGC combined report five Uncirculated JR-2 dimes, including this MS62 and two MS64s at PCGS, and a coin each in MS64 and MS65 at NGC (5/17). However, in more than two decades, we have only seen two Uncirculated representatives: the Gem NGC coin, and the present MS62 PCGS example. The NGC MS65, ex: Ed Price Collection, realized \$402,500 in our July-August 2008 ANA Signature sale. It has since been crossed to PCGS as MS64, but the NGC population report still lists it, accounting for at least one duplication in the certified figures. The Price coin more recently sold in Part I of the D. Brent Pogue Collection (Stack's/Bowers, 5/2015) for \$176,250 in its new MS64 PCGS holder. By comparison, a JR-1 coin in MS65 realized only about \$100,000 in our January 2013 FUN Signature sale.

The JR-2 1797 dime is a recognized rarity in Mint State and in high demand. This lovely MS62 example is well-within the Condition Census for the 13 Stars Obverse variety. The coin exhibits splashes of blue and iridescent toning on its satin surfaces with excellent design definition. The stars, hair, drapery, and feathers are all boldly defined. An exceptional type coin, but more likely headed to a specialized variety collection. NGC ID# 236D, PCGS# 38749 Base PCGS# 4463

1804 Dime, XF Details
JR-1, 13 Stars Reverse

BUST DIMES

1814 JR-1 Dime, MS64
Small Date

3594 1804 13 Stars Reverse, JR-1, R.5 — Questionable Color — PCGS Genuine. XF Details. Both varieties of the 1804 Draped Bust dime are rare in all grades, and JR-1 is arguably the scarcer die pairing in high grade. No Mint State examples of the 13 Stars Reverse variety are known. PCGS' only complaint regarding this XF-level example is the deep gunmetal-gray toning that overlays rich olive-green and gold undertones. Other than a couple of old, hair-thin scratches on the obverse we find no additional surface impairments. The central design elements are well-detailed and there is little wear. The reverse rim is complete, but the obverse dentils grow weak along the left-hand edge.

3595 1814 Small Date, JR-1, R.3, MS64 NGC. John Reich's Capped Bust design appeared in 1809, 1811, 1814, and 1820, continuing without intermission through 1825, and again from 1827 to 1837. Mint records suggest that 421,500 dimes were produced in 1814, and the survival quantity suggests that all of those pieces were actually dated 1814. This Choice Mint State piece has brilliant and satiny silver luster with gold, blue, and iridescent toning. Census for all 1814 dime varieties: 46 in 64, 40 finer (5/17). NGC ID# 236W, PCGS# 38773 Base PCGS# 4489

1829 JR-10 Dime, VF35
Rare Curl Base 2 Variant
Tied for Finest Known

3596 1829 Curl Base 2, JR-10, FS-301, R.6, VF35 PCGS. The base of the 2 is distinctly curved on the JR-10 obverse die that is known in combination with a single reverse, and only about 50 examples are known from the die marriage, mostly in VG and lower grades. John McCloskey is credited with the discovery of the Curl Base 2 in 1973.

This coin is tied with one other example as the finest-known of the type at the top of the VF range, and it is a recent discovery. The Condition Census for the variety is supported by just five other lower-level Very Fine coins that are thought to exist. Rich blue and steel toning in the fields accents the light gray devices of this pleasing piece. Both sides show trivial handling marks that are consistent with the grade. This is an extremely important offering for the advanced Capped Bust dime collector. Population: 2 in 35, 0 finer (4/17). NGC ID# 9BHH, PCGS# 38836 Base PCGS# 4512

SEATED DIMES

1837 No Stars Seated Dime, MS66
Large Date With Recut 7

3597 1837 No Stars, Large Date, F-101b, R.2, MS66 NGC. The fields and devices are unmarked and nearly faultless on this Premium Gem Large Date example. Struck from a lightly rusted obverse die, this Fortin-101b example displays the rightside leg of two radial die cracks that form a pie-shaped combination in a slightly later state of the variety. The crack at 4 o'clock is clear, yet the left leg crack at 7 o'clock is yet to form. Faintly iridescent surfaces display a slate-blue sheen with ivory undertones. The technical quality will be hard to surpass. Census: 25 in 66 (3 in 66+), 7 finer (4/17). NGC ID# 237R, PCGS# 537636 Base PCGS# 4561

1874 Arrows Dime, MS67
Richly Toned, Superior Preservation

3598 1874 Arrows MS67 NGC. In 1873, the weight of dimes was increased from 2.49 grams to 2.50 grams, resulting in arrows being placed at the date of the many of the 1873 and all of the 1874 Seated dime issues. This seemingly trivial weight change was made to conform to metric measurements. While the branch mint coins are scarce to rare in all grades, P-mint representatives are encountered with enough frequency to serve as type coins for most collectors. This status does not, however, apply to the present Superb Gem. This coin exudes both originality and well-preserved surfaces.

Both sides are richly frosted and free of the most trivial abrasions. One tiny planchet void is noted in the reverse field over the O and N of ONE. In addition to its technical superiority, this coin's original toning scheme also places it ahead of most all 1874 Arrows dimes that we have handled recently. Areas of deep emerald-green, magenta, and dusky-gold color are noted over the otherwise silver-gray surfaces. A conditionally rare type coin of singular beauty. One of only 11 MS67 examples certified at NGC (5/17) with two finer. Ex: FUN Signature (Heritage, 1/2005), lot 30160. NGC ID# 23BK, PCGS# 4668

1887 Dime, MS68 ★
Tied for Finest Certified

- 3599** 1887 MS68 ★ NGC. The 1887 Seated Liberty dime is an available date in most grades, with a reported mintage of more than 11 million coins. Of course, examples in MS68 with the Star designation are extremely rare. The present coin is delightfully toned in shades of gold and violet, with most of the color on the obverse. All the design details are sharply impressed. Census: 2 in 68 (2 in 68★), 0 finer (4/17). NGC ID# 23B5, PCGS# 4698

PROOF SEATED DIME

1859 Dime, PR66 Cameo
Stark Field-Motif Contrast

- 3600** 1859 PR66 Cameo PCGS. F-101, R.4. The official recorded mintage of proof dimes in 1859 was 800 pieces, the largest production total up to that point. Surviving examples are occasionally available in the absolute sense, but few are known with Cameo contrast. This Premium Gem representative displays bold, frosty devices, with glassy mirroring in the fields. Splashes of sun-gold, pale violet, and aquamarine encompass the recesses, giving this carefully preserved proof exceptional eye appeal. Population: 7 in 66 (2 in 66+) Cameo, 3 finer (4/17). NGC ID# 23CD, PCGS# 84748

BARBER DIMES

1894-O Dime, Patinated MS65
An Important Key Date

- 3601** 1894-O MS65 PCGS. The 1894-O, with a mintage of 720,000 pieces, is a semikey in lower grades and a key date in AU and above. David Lawrence assigns a rarity rating of R.6 in MS64 and finer. Gem-quality coins are extremely rare, appearing at auction even less frequently than might be expected from the small certified population totals. Bluish-green and golden-tan patination bathes the lustrous surfaces of this Gem example, deeper on the reverse. The design elements are well-struck, a characteristic of most 1894-O dimes. Close examination reveals no significant marks on either side. Population: 5 in 65, 10 finer (4/17). NGC ID# 23DU, PCGS# 4804

1895-O Barber Dime, MS66
Cornerstone Date in the Series
Merely One Coin Finer

3602 1895-O MS66 PCGS. This is, without a doubt, the key to the collectible series of Barber dimes, ranking second only to the extremely rare and virtually unobtainable 1894-S issue. The 440,000-coin mintage is the lowest in the series. In his recent *Guide Book of Barber Silver Coins* (2015), Bowers estimates that 1,000 to 1,200 examples survive in circulated grades, plus 15 to 18 pieces in MS65 and higher (no estimate is given for MS60 to MS64). Premium Gems are extremely rare, with two submissions at PCGS and one other at NGC. A single MS67 dime is reported at PCGS (4/17).

This example is radiantly lustrous with satiny surfaces. The obverse features mostly rich orange and russet patina, while the reverse is predominantly blue-green in tone. Both sides are fully struck, an unusual occurrence among O-mint dimes from this era, though not all that surprising for this well-made issue. NGC ID# C4KL, PCGS# 4807

1896-O Barber Dime, MS64+
Attractive Borderline Gem

3603 1896-O MS64+ PCGS. CAC. As the only Choice Uncirculated example at PCGS with the Plus designation and CAC-endorsed as well, this lightly toned and frosted example sits on the cusp of a full Gem grade. Silver luster shines beneath attractive almond-gold color that becomes richer at the borders. One or two tiny marks and some minor die clashing are the only interruptions on the sharply struck and nearly pristine surfaces of this challenging New Orleans issue. Population: 19 in 64 (1 in 64+), 16 finer. CAC: 5 in 64, 11 finer (4/17). NGC ID# 23DZ, PCGS# 4810

1910-S Barber Dime, MS67
Tied for Finest Certified

3604 1910-S MS67 PCGS. Despite the large mintage of over 1.2 million pieces, few 1910-S Barber dimes have survived in high Mint State grades and this stunning MS67 example is tied with a handful of other specimens for finest certified honors at both of the leading grading services (4/17). Well-detailed design elements and impeccably preserved, lustrous surfaces are evident, under attractive shades of golden-brown and lavender toning. NGC ID# 23FH, PCGS# 4856

MERCURY DIMES

1916-D Mercury Dime, AU Details

3605 1916-D — Cleaning — PCGS Genuine. AU Details. The strike is sharp around the borders but lacking slightly on the central high points. The recesses and portions of the Liberty portrait are heavily flowlined, likely accentuated as such by a heavy cleaning in the past. Wisps of grayish toning appear on each side. The key-date status of 1916-D creates a market for affordable coins such as this with good detail.

1919-D Dime, MS64+ Full Bands
Richly Toned Surfaces

- 3606** 1919-D MS64+ Full Bands PCGS. CAC. While a common coin in lower grades, the 1919-D is seldom encountered in high grades and even more infrequently with full bands definition. This is a richly toned coin that displays multiple shadings on each side. If abrasions caused this coin to not grade MS65, they are well concealed by the toning. Sharp, complete definition on the central bands. Population: 92 in 64 (6 in 64+) Full Bands, 22 finer. CAC: 12 in 64, 3 finer (4/17). NGC ID# 23H9, PCGS# 4925

1921-D Dime, MS66 Full Bands
Only One Coin Finer at PCGS

- 3607** 1921-D MS66 Full Bands PCGS. The 1921-D is slightly scarcer in high-grade Full Bands than its Philadelphia counterpart, and it is particularly rare at the Premium Gem level. PCGS has seen only a single Full Bands coin finer than the present (4/17). This piece displays a sharp central strike with minor weakness around the outer edge of the border legends. Satiny luster is unabraded and shows no significant toning. The last two PCGS coins that we offered in this grade garnered just shy of \$20,000 each. We look forward to seeing the present piece continue the trend. Population: 28 in 66 (6 in 66+) Full Bands, 1 finer (4/17). NGC ID# 23HF, PCGS# 4937

1942/1 Mercury Dime, MS66+
Popular Guide Book Variety

- 3608** 1942/1 FS-101 MS66+ PCGS. CAC. The 1942/1 Mercury dime is the most avidly sought-after variety of the series. The overdate was noted almost immediately after the coins were released and the variety became immensely popular because of the dramatic "naked eye" visibility of the overdate, a feature every collector notices when examining a coin. The fame of the variety was established by its early inclusion in the *Guide Book*, and its prestige and value have increased steadily over the years.

The present coin is a remarkable Premium Gem, with well-detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces show traces of sea-green and amber toning and overall eye appeal is outstanding. Population: 7 in 66 (2 in 66+), 0 finer. CAC: 3 in 66, 0 finer (4/17). NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

1942/1-D Dime, MS64 Full Bands
Rare, High-Grade Overdate

- 3609** 1942/1-D FS-101 MS64 Full Bands PCGS. A pleasing and lustrous near-Gem of this difficult wartime mint error. The strike is strong throughout, and the obverse is especially well-preserved. Delicately toned in cream and gold tints. Minor contact near PLURIBUS and a tiny spot on the T in UNITED are appropriate for the grade. Population: 54 in 64 Full Bands, 32 finer (4/17). NGC ID# 23K6, PCGS# 145476 Base PCGS# 5041

TWENTY CENT PIECE

1875-S Twenty Cent Piece, MS66
Bright Mint Luster and Even, Light Toning

- 3610 1875-S MS66 PCGS. BF-13.** This variety shows a misplaced 8 high in the denticles, "filled S/S" per Lane Brunner and John Frost, and die cracks encircling many of the peripheral letters. This example also shows a straight die line from the eagle's left (facing) wing to left thigh. A pair of arcing marks below connect the lower-left wing to the left claw. This Premium Gem 1875-S twenty cent piece shows slate-gray and cinnamon patina over a dove-gray base. A few of the stars lack central details and the claws are a bit lightly struck, but the impression is fairly strong overall. Excellent preservation puts this piece far ahead of most survivors of its ilk, despite the tiny patch of contact marks below OF on the reverse. The 1875-S twenty cent issue is not rare but is quite popular for type collectors. It has by far the largest mintage of this short-lived series, at 1.15 million pieces and is consequently the most available. NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECES

1877 Twenty Cent, PR63
Lightly Toned

- 3611 1877 PR63 PCGS. BF-1, R.3.** Light, iridescent toning deepens at the borders with shades of lilac, blue, almond-gold, and pale violet visible over the reflective surfaces. A few delicate lines beneath the pleasing patina define the Select Proof grade. Just 510 pieces were struck of this proof-only issue, of which many were melted as unsold. As a result, the 1877 issue is considerably scarcer than the 1878 proofs (also a proof-only date). Sharply struck except at Liberty's upper hair strands, with a lint mark in the left obverse field above Liberty's shoulder. Population: 77 in 63, 98 finer (4/17). NGC ID# 27H4, PCGS# 5305

1877 Twenty Cent Piece, PR63 Cameo
Low-Mintage, Proof-Only Issue

- 3612 1877 PR63 Cameo NGC. BF-1, R.3.** Brilliant save for a faint sheen of pale-gold patina, this Select proof displays nicely mirrored fields that contrast with frost-white motifs to justify the Cameo designation. Scattered light lines and a few small marks account for the assigned grade. While a reasonable mintage of 510 proofs was made, many pieces were melted as unsold upon abolishment of the twenty cent denomination. Census: 12 in 63 Cameo (1 in 63+), 49 finer (5/17). NGC ID# 27H4, PCGS# 85305

EARLY QUARTERS

1806/5 Browning-1 Quarter, AU55
Original Surfaces, Bold Overdate

- 3613 1806/5 B-1, R.2, AU55 NGC.** Tompkins Die State 2/3. A sharp, Choice About Uncirculated example with strong central elements and reddish-gold luster remaining beneath rich auburn-brown toning. Bluish-gray overtones add to the compellingly original patina. The obverse stars are rounded (as always on B-1), yet the denticles are exceptionally sharp for the issue on both the obverse and reverse. A few light lines to the left of the date are noted beneath the toning, although the surfaces are well-preserved and few other marks exist. Census: 8 in 55, 16 finer (4/17). NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

PROOF BUST QUARTER

1820 Capped Bust Quarter, PR64, B-4

Only Known Proof of This Variety

Ex: Earle / Norweb

3614 1820 Browning 4, Small 0 PR64 PCGS Secure. CAC. Ex: Norweb. Before the Mint began their program of commercial proof offerings in 1858, no records were kept of how many proof coins were made during any particular year. In the early days, before about 1840, proofs were struck whenever some government official, such as the Secretary of State, requested specimen coins for diplomatic presentations, or when well-connected collectors, like Robert Gilmore, Jr., made special arrangements to procure the coins for their collections. As we understand the process today, when the Mint received these orders, the workmen polished a business-strike die, perhaps polished specially selected planchets, and struck the desired coins on the screw press normally used to produce medals. Thus, if the Mint received requests for proofs at different times during the year, they were struck from whatever dies were on hand at the time, resulting in several different die varieties of proof coins of the same date and denomination. This is the case for the extremely rare proof quarters of 1820.

Only four examples of the 1820 Capped Bust proof quarter are known today, representing three different die varieties. The coin offered here is an example of the B-4 variety, with a small 0 in the date and small obverse stars. The same reverse die was used on the 1821 B-1 and B-3 varieties, and die state evidence suggests the B-4 business-strike coins were actually struck in 1821, after these other two emissions. This single proof example may have been struck in 1821 as well, if no suitable 1821-dated dies were available.

The present coin possesses an unbroken pedigree over the last century, at one time being a highlight of such celebrated gatherings known as the George Earle Collection and the famous collection of Ambassador and Mrs. R. Henry Norweb. In the Norweb Collection, this coin was accompanied by a remarkable specimen of the 1820 B-2 variety that Walter Breen believed was a one-sided proof, but that coin has now been certified as an MS64 business-strike by NGC. Breen also thought the present coin might be a one-sided proof because of some frosty luster on the reverse, but PCGS has determined this coin is definitely a proof striking.

This coin exhibits a stunning play of colors, with vivid shades of iridescent champagne-gold, cerulean-blue, and lavender patina blanketing the pleasing surfaces of both sides. The fields display areas of bright reflectivity under the toning. Some evidence of die rust can be seen in the obverse field near star 3, and on the reverse near the lowest leaves, adding credence to the idea that the coin was struck in 1821. The devices are sharply detailed throughout, adding to the incredible visual appeal. This combination of extreme rarity, high technical grade, and spectacular aesthetic appeal, with great historic interest and an extensive pedigree, makes this coin one of the most impressive offerings of the current sale. Population (all varieties): 1 in 64, 2 finer (5/17).

Roster of 1820 Proof Quarters

1. **PR66 PCGS. B-1.** Long Beach Signature (Heritage, 9/2005), lot 2639, which realized \$218,500 (as PR67 NGC); D. Brent Pogue Collection, Part I (Stack's/Bowers, 5/2015), lot 1061, which realized \$188,000.
2. **PR64 NGC. B-1.** Auction '89 (Superior, 7/1989), lot 566; Long Beach Signature (Heritage, 5/2008), lot 306, realized \$97,750.
3. **PR63 uncertified. B-2.** National Numismatic Collection, Smithsonian Institution, formerly in the Mint Cabinet.
4. **PR64 PCGS. B-4.** George Earle Collection (Henry Chapman, 6/1912), lot 3052; Hillyer C. Ryder; Wayte Raymond; Louis Eliasberg duplicates, (New Netherlands, 6/1957), lot 1146; Norweb Collection (Bowers and Merena, 3/1988), lot 1532; Auction '90 (Superior, 8/1990), lot 1069; Baltimore ANA (Heritage, 7/1993), lot 5246; Whitney P. Summerland Collection (Bowers and Merena, 3/1994), lot 1245; Pre-Long Beach Elite Auction (Superior, 9/2008), lot 180; Philadelphia Signature (Heritage, 8/2012), lot 5114; Regency Auction XIII (Legend, 9/2015), lot 117. **The present coin.**

Additional Appearances:

- A. **Brilliant Proof. B-1.** Thomas Cleneay Collection (S.H. & H. Chapman, 12/1890), lot 1330.
- B. **Brilliant Proof. B-1.** Richard B. Winsor Collection (S.H. & H. Chapman, 12/1895), lot 592.
- C. **Proof. B-1.** George Earle Collection (Henry Chapman, 6/1912), lot 3051.
- D. **Proof. B-1.** A specimen displayed by Howard Newcomb at the 1914 ANS Exhibition.
- E. **Proof. B-1.** World's Greatest Collection (Numismatic Gallery, 3/1945), lot 69.

Note: The B-2 specimen in the Anderson-Dupont, Norweb, and Goldberg's May 2003 sales has traditionally been called a one-sided proof, but it is now certified as MS64 NGC. This coin was also mistakenly identified as the Browning, Col. Green example in several references, but that coin was in the Eric P. Newman Collection, graded MS63. PCGS# 528377 Base PCGS# 5365

SEATED QUARTERS

1852 Seated Quarter, MS66
Just One Example Finer
Satiny and Richly Toned

3615 1852 MS66 PCGS. CAC. Briggs 2-B. The 1 in the date aligns with the fifth vertical shield stripe. The 1852 is an underrated issue with mintage of 177,060 pieces. Much of that production was likely melted, as the value of silver rose considerably relative to gold during the early 1850s. In 1991, Larry Briggs gave the 1852 an R.5 rating in Uncirculated condition. Today, PCGS CoinFacts estimates 50 Mint State pieces survive, but the population data at the leading services reveals just five MS66 submissions in all, likely including duplications, with a single finer example reported at NGC — the incomparable Eric P. Newman coin in MS68 ★.

This remarkable Premium Gem boasts satiny luster and a rich layer of multicolor patina that comprises shades of crimson, gold, lavender, blue, and green. The overlay is inarguably original and generates inimitable visual quality. The devices are well-struck, and there are only a handful of visible flecks on each side. Truly one of the finest examples of this date. Population: 4 in 66, 0 finer. CAC: 3 in 66, 0 finer (4/17). NGC ID# 23T8, PCGS# 5419

1852-O Seated Quarter, AU50
Rare in All Grades, Old Holder

3616 1852-O AU50 PCGS. Briggs 1-A. Vertical die lines connect the arrow shafts. This example of the rare 1852-O quarter shares the same reverse as the Briggs 1-A 1851-O quarter. While the Briggs commentary that the 1852-O is “rare to nonexistent in grades XF or finer” is perhaps slightly overstated, the rarity of this New Orleans issue cannot be denied. The present About Uncirculated coin displays pale golden-gray toning over reflective and partially lustrous surfaces. We note a few light field lines and a tiny dot of deep-toned residue above the eagle’s head. Seldom offered and well-defined for the grade, with characteristic rounded rims and tremendous appeal for date and mint collectors. Housed in a first-generation “old rattler” holder. Population: 3 in 50, 4 finer (4/17). NGC ID# 23T9, PCGS# 5420

1853/4 Arrows and Rays Quarter, MS64
Condition Census Example

3617 1853/4 Arrows and Rays MS64 PCGS. This enigmatic overdate shows a mistaken final-digit punch from the next year rather than the previous year. The die state of the present coin shows the upper portion of the 4 within the top of the 3 and also plainly displays the repunching above the right arrow shaft. Only 24 pieces have been certified in Mint condition by both of the major grading services combined. At the MS64 level, this coin is tied with just four others at PCGS with a single Gem finer (4/17). This is a lovely coin that has the usual strong mint luster one would expect on an 1853 quarter. The lustrous finish serves to backlight gray-olive surfaces that have a strong contrast of charcoal-gray over the devices. Sharply struck and seemingly defect-free.

Ex: ANA Signature (Heritage, 8/2016), lot 3742. NGC ID# 23U4, PCGS# 5427

1859-S Quarter Dollar, XF45
Few Known This Fine

3618 1859-S XF45 NGC. Briggs 1-A. A mintage of 80,000 pieces was insufficient to ensure the widespread survival of the 1859-S quarter dollar. The issue is scarce in all grades and unknown in Mint State. This Choice XF coin is conditionally rare. The strike is sharp and wear is light. Both sides have uniform olive-gray patina. Census: 3 in 45, 3 finer (5/17). NGC ID# 23TN, PCGS# 5450

**1875-CC Quarter, Pleasing MS65
Just One Piece Numerically Finer at PCGS**

- 3619 1875-CC MS65 PCGS. CAC. Briggs 1-A.** The scarcity of the 1875-CC is well-noted by several researchers over the past 40 years or so. While not rare in an absolute sense (140,000 coins were struck), it is certainly conditionally rare and high-grade auction appearances are few and far between. Some people suggest the new Carson City twenty cent piece captured the attention of the public, while the erstwhile quarter issue — struck in a nearly identical quantity — languished as uninteresting.

This Gem representative occupies a spot in the Condition Census for the issue. CAC endorsed for quality, the softly lustrous surfaces glow beneath a covering of golden-gray toning with amber-gold and blue accents that congregate at the borders and accentuate the central motifs. The fields show a hint of reflectivity, now mellowed by the natural patina. The strike is sharp but not full, with rounding on stars 11 through 13 and slight weakness of the hair details. A few light lines and tiny marks are well-hidden in the toning. Population: 4 in 65 (1 in 65+), 1 finer. CAC: 7 in 65, 1 finer (4/17). NGC ID# 23UY, PCGS# 5499

**1877-CC Quarter, MS66+
Lovely Original Toning**

- 3620 1877-CC MS66+ PCGS. CAC. Large CC.** The two Cs in the mintmark are closely spaced and lean slightly to the left, unlike any reverse listed in the *Briggs Encyclopedia*. This Premium Gem has lovely gray toning on both sides, with peripheral blue on the obverse. An impressive piece featuring a bold strike, this is an excellent example for an advanced Seated quarter cabinet or a Carson City type set. Population: 22 in 66 (8 in 66+), 6 finer. CAC: 12 in 66, 3 finer (4/17). NGC ID# 23V6, PCGS# 5505

**1879 Quarter Dollar, MS68
Among the Finest Known**

- 3621 1879 MS68 NGC. Briggs 1-A.** A Condition Census 1879 quarter dollar, this high-end Superb Gem displays near-brilliant luster and semiprooflike fields. The strike is sharp throughout the stars and central devices. With Mint resources largely devoted to striking large quantities of new silver dollars, small denomination silver production declined in 1879. The quarter dollar of this year boasts a mintage of only 13,600 pieces. The low mintage was recognized early, and today the date is collectible in Uncirculated condition. However, rarely is a piece encountered in the topmost grade of MS68. Census: 7 in 68 (2 in 68 ★), 0 finer (4/17). NGC ID# 23VB, PCGS# 5511

PROOF SEATED QUARTERS

1869 Quarter, PR67 ★ Cameo
One of the Top-Certified Examples

- 3622 1869 PR67 ★ Cameo NGC. Briggs 2-B.** The obverse is die doubled, most noticeably on the bottom of the horizontal shield lines, Liberty's left hand, and sandal. The interior portions on each side show magnificent contrast between frosted silver devices and gleaming, minimally toned mirrors. Golden-orange patina comprises the innermost circle of color, yielding to violet and blue hues with faint greenish elements toward the rims. Magnificent preservation and eye appeal. A paltry production of just 16,000 circulation strikes puts significant pressure on the 600 proofs struck in that year, especially considering business strikes are rated R.7 in Uncirculated condition. Still, proofs in this exalted grade are extreme rarities in their own right. This piece is tied with the Newman coin and one other example for the finest at either of the leading certification services. Census: 3 in 67 Cameo (3 in 67★), 0 finer (4/17).

Ex: Long Beach Signature (Heritage, 2/2012), lot 3496; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98525. NGC ID# 23X2, PCGS# 85568

1874 Arrows Quarter, PR65
Low-Mintage Subtype in Proof Format

- 3623 1874 Arrows PR65 PCGS. Briggs 5-D.** Only 500 Arrows proof quarters were struck in 1873, plus 700 more in 1874, creating a low total mintage for this two-year type in proof format. This lightly toned Gem specimen offers olive, golden-orange, and pale blue patina over each side, the reverse being noticeably lighter in hue. Population: 27 in 65, 35 finer (4/17). NGC ID# 23XS, PCGS# 5575

BARBER QUARTERS

1893-S Quarter Dollar, MS66+
Condition Census

- 3624 1893-S MS66+ PCGS.** The 1893-S quarter dollar is scarce in Mint State, and such pieces are typically seen only in the MS62 to MS64 grade range. This high-end Premium Gem is obviously a major rarity and an important Registry Set opportunity. Exceedingly sharp definition appears on all of the usual weak spots, such as the eagle's talons and right (facing) shoulder and the peripheral obverse stars. Light golden interiors cede to deeper russet border toning. A single tick behind Liberty's eye appears to be what limits the grade. Population: 4 in 66 (1 in 66+), 2 finer (4/17). NGC ID# 23XY, PCGS# 5606

1898-O Barber Quarter, MS65
Spectacular Multicolor Toning

- 3625 1898-O MS65 PCGS.** The 1898-O Barber quarter is an underrated issue in high grade and examples in MS65 condition are quite rare. This spectacular Gem displays well-preserved surfaces, with vibrant satiny mint luster under shades of golden-brown and magenta toning. The design elements are well-detailed and eye appeal is outstanding. Population: 8 in 65, 10 finer (4/17). NGC ID# 23YE, PCGS# 5620

PROOF BARBER QUARTER

1895 Barber Quarter, PR68 Cameo Eye-Stopping Contrast

- 3626 1895 PR68 Cameo PCGS.** A horseshoe-shaped lintmark (somewhat resembling the omega symbol) was on the hub, resulting in a curved raised line on the side of the nose (near the eye) that is seen on all 1895 proof quarters. Otherwise, there are no marks to mention on this brilliant and super-contrasted Superb Gem quarter. The thickly frosted motifs are dazzling-white against jet-black mirrored fields. Just a single Cameo proof is finer at PCGS. Population: 7 in 68 Cameo, 1 finer (4/17). NGC ID# 242A, PCGS# 85681

STANDING LIBERTY QUARTERS

1916 Standing Liberty Quarter AU Details

- 3627 1916 — Cleaning — PCGS Genuine. AU Details.** Light golden toning and some field luster form the chief visual attributes of this AU-level 1916 Standing Liberty quarter. The strike is about as strong as is ever seen on this issue, and high-point wear is minimal. Thoroughly hairlined surfaces were aggressively cleaned in the past. The high cost of a problem-free AU coin will spur many collectors to consider this more affordable but equally well-detailed alternative.

1916 Standing Liberty Quarter, AU50 Partial Luster Remains

- 3628 1916 AU50 PCGS.** Bright silver surfaces retain partial luster in the fields on this AU 1916 Standing Liberty quarter, while light wear is observed on the eagle and figure. The date is full. The 1916 is widely sought in all grades, and About Uncirculated examples are particularly popular. Only a small number of examples have been certified at the AU50 level. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, AU55 Partially Lustrous, Original Surfaces

- 3629 1916 AU55 PCGS.** Specialists of the Standing Liberty quarter series will appreciate this coin — a properly graded, Choice AU example with what appear to be original surfaces. Hints of luster remain in the fields, and each side offers light olive-gray toning that deepens toward the borders. The date is full, and the only obvious wear points are on Liberty's knee and along the leading edge of the eagle's left (facing) wing. An excellent alternative to high-priced Mint State pieces that often lack eye appeal in lower grades. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, AU55 Spectacular Visual Appeal

- 3630 1916 AU55 NGC.** Substantial original luster remains in the fields and recesses of this Choice AU 1916 Standing Liberty quarter, and only the barest trace of high-point friction is discernible on the devices. A hint of champagne color warms otherwise silvery surfaces. The potent eye appeal of this piece is downright rare on an AU-level 1916. This is a coin that is sure to please even the most discerning specialist. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, MS64 Full Head
First-Year Series Key

- 3631 1916 MS64 Full Head PCGS.** The Standing Liberty design was introduced in 1916, and the Philadelphia Mint accomplished a mintage of just 52,000 pieces, an extremely low production total for any 20th century coin. In addition, the design was modified the following year, making the Type One a sought-after two-year design type. The coins were actually released early in 1917, and Mint State examples are quite elusive, especially with the Full Head designation.

The present coin is an attractive Choice specimen, with vibrant satiny mint luster and highlights of gold and aquamarine toning. The design elements are well-detailed, with a touch of softness on the shield rivets, but showing Full Head definition.

Ex: *New York Signature* (Heritage, 11/2011), lot 3763. NGC ID# 2AMV, PCGS# 5705

1918/7-S Quarter Dollar, Pleasing VF30

- 3632 1918/7-S FS-101 VF30 PCGS.** The usual late die state, showing heavily lapped and eroded recesses on the obverse but before the clash marks appear to the right of Liberty's hip. The date on this overdate quarter is clear, and the design in general shows strong detail for the VF level. Pleasing pewter-gray surfaces are smooth and problem-free. The specialist of the series will appreciate the rare quality-within-the-grade that this 1918/7-S quarter offers. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

1918/7-S Quarter, AU55
Problem-Free, Still Partially Lustrous

- 3633 1918/7-S FS-101 AU55 PCGS.** The title of a Paul M. Green article published in the November 14, 2006 edition of *Numismatic News*, "Nothing's easy with 'S' Standing Liberty quarters," is particularly true regarding one special variety. After discussing the regular 1918-S issue, he continues to the date's popular and challenging variant:

"There was a special 1918-S but it was not discovered until years later. There had been a 1918/7-S variety. The fact that collectors at the time were not examining coins closely, and not saving them in any numbers as well, would prove to be important here, as by the time the 1918/7-S was discovered it was far too late to find examples in top grades. The only Mint State examples would be ones set aside as regular 1918-S quarters."

Green continues by noting that the 1918-S issue's high overall mintage (over 11 million pieces) made the likelihood of an overdate coin's surviving this way much lower, by diluting the concentration of overdate coins relative to the population at large. Standing Liberty quarter specialist J.H. Cline indicates that the overdate's first auction appearance did not come until late in 1937, almost two decades after its creation, but that the coin was offered as Uncirculated, indicating that overdate coins must have survived in the way Green indicates. Most survivors are heavily circulated and locating a problem-free Choice AU, such as this piece is very challenging. The surfaces are untuned and show only slight friction over the high points of the design and much of the original mint luster still survives. NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

1928-D Quarter, MS66 Full Head
Challenging With Complete Definition

- 3634** 1928-D MS66 Full Head PCGS. While especially scarce as a non-Full Head coin, pieces with Full Head detail and in high grade are especially challenging to locate. This example displays the usual glowing mint frost characteristic of coins in this series. Strike details are complete throughout, and each side shows a light layer of golden toning. Population: 19 in 66 (2 in 66+) Full Head, 3 finer (4/17). NGC ID# 243Y, PCGS# 5769

1929-D Quarter, MS65 Full Head
Rich Original Luster

- 3635** 1929-D MS65 Full Head PCGS. Designated a Gem with Full Head detail by PCGS, this high-end, frosty 1929-D quarter is indeed sharply struck and beautifully preserved. Delicate champagne toning graces each side, and the high points of Liberty's figure are free of distracting contact marks. Only some faint grazes in the reverse fields limit the grade. The 1929-D is a scarce date in high grade Full Head. Population: 46 in 65 Full Head, 18 finer (4/17). NGC ID# 2443, PCGS# 5775

1929-D Quarter Dollar, MS66 Full Head
Incredibly Sharp Head and Shield
None Finer at PCGS

- 3636** 1929-D MS66 Full Head PCGS. The 1929-D quarter is a better date in Full Head, and it becomes particularly scarce as such in Gem or better condition. This Premium Gem example is among the finest at PCGS, and only a single MS67 Full Head coin is better at NGC (4/17). Delicate pastel hues accentuate light champagne toning on each side, and the satiny surfaces are virtually pristine. Unlike on some Full Head pieces that are just barely "there" with regards to the head detail, this coin has an intricately sharp strike that includes the head, shield rivets, and eagle's feathers. The two bottom stars on the obverse are the only incomplete portions of the design. This coin is easily one of the finest 1929-D quarters known. Population: 18 in 66 (3 in 66+) Full Head, 0 finer (4/17). NGC ID# 2443, PCGS# 5775

WASHINGTON QUARTERS

1932-S Quarter Dollar, MS65+
Original Luster, Few Coins Known Finer

3637 1932-S MS65+ PCGS. The 1932-S Washington quarter is scarce in Gem condition. PCGS reports only seven Plus-graded coins in MS65 and four MS66s finer (4/17). The present example displays sharp detail and rich, satiny luster. The interiors are essentially brilliant, while the obverse border shows subtle russet toning. Ideal for Registry purposes. NGC ID# 2449, PCGS# 5792

1936-D Quarter, MS67
Semikey Issue

3638 1936-D MS67 PCGS. A frosty, Superb Gem that displays original, silver-gray surfaces with faint traces of golden-gray peripheral toning and soft mint luster. The sharply struck devices and nearly mark-free fields show only two or three tiny, insignificant ticks on the eagle. Population: 22 in 67 (1 in 67+), 0 finer (4/17). NGC ID# 244H, PCGS# 5801

1936-D Quarter, Stand-Out MS67
CAC-Approved Registry Coin

3639 1936-D MS67 PCGS. CAC. The 1936-D quarter is a rarity this fine, and higher-grade coins are unknown. The present Registry-grade example displays a full strike and satiny luster. Bits of russet appear on the obverse, leaving the rest of each side with a faint suggestion of champagne color. A loupe shows virtually perfect surfaces — a couple of microscopic ticks at the base of Washington's bust are the only imperfections on the obverse, and a similarly unimportant tick on the eagle's left (facing) leg is the only flaw seen on the reverse. Population: 22 in 67 (1 in 67+), 0 finer. CAC: 5 in 67, 0 finer (4/17). NGC ID# 244H, PCGS# 5801

1943-S Washington Quarter, MS66+
Guide Book Doubled Die Obverse

3640 1943-S Doubled Die Obverse, FS-101, MS66+ PCGS. CAC. This Plus-graded Premium Gem shows strong doubling on the motto, LIBERTY, designer's initials, and the date, identifying this rare *Cherrypickers* variety. The doubling was noticed at a fairly early date and the variety has been listed in the *Guide Book* since the 1979 edition. Examples are prized by collectors and always command large premiums.

The present coin exhibits well-detailed design elements and impeccably preserved, mostly brilliant surfaces, with just a few subtle hints of golden-tan toning. Vibrant satiny mint luster blends with traces of prooflike reflectivity in selected areas and eye appeal is outstanding. Population: 14 in 66 (4 in 66+), 0 finer. CAC: 11 in 66, 0 finer (4/17). NGC ID# 2457, PCGS# 145154 Base PCGS# 5823

EARLY HALF DOLLARS

1794 O-101 Flowing Hair Half, Fine Details

3641 1794 O-101, T-7, High R.3 — Scratch — PCGS Genuine. Fine Details. The border dentils are complete around both sides of this Overton-101 example, although they grow weak below the date. The central devices are well-outlined and show some internal detail. Both sides of this piece are bright steel-gray and vigorously cleaned, save for an “ink splat” of deep russet toning on the upper-right obverse. PCGS notes a few old, thin scratches on the devices that are seen under a glass.

Mint Director David Rittenhouse

1794 Flowing Hair Half Dollar, Fine 15
Historic First-Year Issue, O-101a

3642 1794 O-101a, T-7, High R.3, Fine 15 PCGS. Half dollars were struck for the first time in 1794, when a small mintage of 23,464 pieces was produced, with 11 die varieties known for the date. This coin was struck from the O-101 die pair, with star 1 piercing the middle of the lowest curl and 21 berries in the wreath. A die crack from the edge through the F in OF, turning sharply upward, just missing the outer berry, to the last S in STATES, identifies the late die state O-101a.

This piece is a problem-free Fine 15 specimen, with the hair ends distinguishable and some interior detail on the upper hair lines intact. The lavender-gray and blue-steel surfaces are free of large or distracting abrasions and the overall presentation is quite pleasing. NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1794 Half Dollar, Choice Fine Example
O-107, Very Scarce Die Pairing

3643 1794 O-107, T-5, R.6, Fine 15 PCGS. The very scarce Overton-107 (Tompkins-5) variety is the sole use of this obverse die on a Flowing Hair half dollar — an interesting fact, since the variety is only known with a perfect obverse and shows no signs of the die's early demise. Nor did the reverse die fail during the O-107 marriage, because it appears on two subsequent 1794 marriages. The position of Star 1 is diagnostic, where the point of the star touches the first curl, but does not overlap it or extend beyond the curl. In total, six obverse dies were employed when striking 11 known die marriages that comprise the small mintage of 1794 half dollars, the first year of both the denomination and the Flowing Hair design.

Attractive gunmetal-gray fields contrast with light, silver-gray raised devices for a pleasing "circulation cameo" appearance. The obverse is smooth and appealing for the grade, despite moderate adjustment marks that angle downward across the hair recess near the ear. The similarly toned reverse shows a minor edge bump above ES of STATES and a short scrape at the eagle's left leg above the talon. Overall, the coin is well-defined for the Choice Fine grade. All 1794 half dollars are scarce and in-demand and this important O-107 is a prize for any variety collector. It clearly ranks in the Condition Census for the die pair, tied with one other example for fifth in the Tompkins reference listed as 25, 20, 20, 20, 15, 15, 12. We note that the Census does not include the outstanding O-107 we sold in the April, 2017 Central States Platinum Night event graded XF45 NGC as lot 4041, which brought \$42,300 from the Terry Brand Estate. NGC ID# 24E6, PCGS# 39209 Base PCGS# 6051

1795/1795 Flowing Hair Half Dollar, VF35
2 Leaves, O-112, T-20

- 3644** 1795/1795 2 Leaves, O-112, T-20, R.4, VF35 NGC. The scarce O-112 die pair showcases one of the most dramatic date-punching blunders in U.S. Mint history — merely calling the spread south “wide” is underselling how incredible it is. A richly toned Choice VF example, the coin shows a range of shadings, from dusky-gold to green and slate-gray. Struck from a late state of the obverse die, the coin also displays one of the most distinctive die cracks of the early half series, with a bold, bisecting die crack that descends from the edge above R in LIBERTY, through the portrait at Liberty’s earlobe, and to the 9 in the date. BE in LIBERTY are broadly recut. Strong detail remains beneath the patina, with a few small marks and small areas of minor roughness. NGC ID# 24E7, PCGS# 39246 Base PCGS# 6055

1795 Flowing Hair Half Dollar, VF30
2 Leaves, O-117, T-3

- 3645** 1795 2 Leaves, O-117, T-3, R.4, VF30 PCGS. The lowest curl has a blunt end at the upper point of star 1 and the reverse berries are arranged in a 9x8 pattern, identifying the O-117 variety. This pleasing VF30 example retains much interior detail in Liberty’s hair and the surfaces are blanketed in attractive shades of lavender-gray and golden-brown toning. The field is unfinished below Liberty’s chin and a few planchet adjustment marks show in the hair. NGC ID# 24E7, PCGS# 39233 Base PCGS# 6052

1796 15 Stars Half Dollar, O-101
Well-Defined, Fine Details

- 3646** 1796 15 Stars, O-101, T-1, R.5 — Plugged, Repaired — NGC Fine Details. Amato-158. The present Fine Details offering is an important opportunity for the type collector to obtain a Draped Bust Small Eagle half dollar. This coveted piece of Americana is a significant “stopper” for anyone attempting to complete a type collection of United States coinage. Some may question the feasibility of investing in a coin that has been plugged and repaired. But the high prices being realized for original, problem-free specimens prevent many collectors from acquiring an example for their collection. Moreover, this particular coin exhibits well-defined design elements, especially on the obverse. Liberty’s hair shows fairly strong detail, as do the eye, ear, drapery lines, and the peripheral devices. Indeed, few would likely argue with the obverse being being classified as Very Fine, maybe even VF25 Details. And in the opinion of this cataloger (JPA), even the reverse possesses some VF Detail.

Both sides reveal steel-gray patina and soft bluish accents. Some smoothing is noted in the obverse fields, and TY in LIBERTY was re-engraved, as was the lower-right reverse ribbon. The usually seen crack from the rim at 5 o’clock to the bottom of the bust has been removed by smoothing in that area, but becomes visible from the right side of the bust through stars 15-14. Despite the impairments, this coin will be an appropriate, and perhaps “affordable” addition to an advanced U.S. type collection.

Ex: John Stimson, Sr. Collection, Part 2, Long Beach Signature (Heritage Auctions, 2/2008), lot 527.

1806/5 O-101 Draped Bust Half, AU50
Large Stars, Knobbed-Top 6 Over 5

- 3647** 1806/5 O-101, T-6, R.3, AU50 PCGS. CAC. Tompkins Die State 1/2. An attractive and well-defined representative of this popular overdate. This is a strong example for the assigned grade, with glimpses of luster shining through a natural overlay of golden-gray toning with slate-gray overtones. Repunching is clearly visible beneath both the 0 and 6 of the date. CAC endorsed, with minimally marked surfaces and bold dentils throughout both sides. Population (all : 11 in 50, 25 finer. CAC: 3 in 50, 14 finer (4/17). NGC ID# 24EK, PCGS# 39296 Base PCGS# 6077

1806 Half Dollar, AU53
O-106, Knob 6, Small Stars

- 3648** 1806 Knob 6, Small Stars, O-106, T-4, R.4, AU53 PCGS. The 8 in the date is minutely recut on this variety. The present coin is partially lustrous and shows almost no true wear, although some strike weakness occurs on the stars and clouds above and to the right of the eagle's head, as well as on Liberty's lower bust. Silvery interiors cede to russet and olive border toning. NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075

1806 O-109 Bust Half, AU58
Smooth Surfaces, Still Lustrous

- 3649** 1806 Pointed 6, No Stem, O-109, T-15, R.1, AU58 NGC. Tompkins Die State 2/2. This somewhat early die state has clash marks on the obverse ("waves" above the date and a double collar above the bust) but no evidence of the late-state die crack through star 12, nor any reverse die cracks. Both sides display light, silver-gray patina with delicate gold overtones. The satin surfaces retain plentiful mint luster with slight high point wear but remarkably few marks.
 Ex: *Summer FUN Signature* (Heritage, 7/2011), lot 3577. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

BUST HALF DOLLARS

1808 O-103 Half Dollar, MS63
Ideal Type Set Candidate

- 3650** 1808 O-103, R.1, MS63 NGC. A relatively plentiful variety in circulated grades, identified by the joined letters AM in AMERICA. In Select Uncirculated condition, of course, the issue is significantly less accessible. This is an attractively lustrous, gold-tinged example from a later die state, which shows clashes and some die erosion, as well as the beginnings of cracks through the reverse lettering. Census (all 1808 varieties): 13 in 63, 26 finer (4/17).
 Ex: *ANA Signature* (Heritage, 3/2011), lot 4421. NGC ID# 24EP, PCGS# 39364 Base PCGS# 6090

**1811 Small 8 Half Dollar
O-110, Richly Toned Gem Example**

- 3651 1811 Small 8, O-110, R.1, MS65 PCGS.** A richly toned and nicely lustrous Gem example of the Small 8 type, with dappled and gleaming gunmetal-blue and rose toning plus lavender hues. The coin shows a sharp early strike, with no visible die cracks on the obverse and the well-defined stars are not drawn to the edge as typical of later strikes. The eagle is boldly struck with full plumage and sharp definition on the wing edges.

Numerous Small 8 varieties exist and the Overton-110 is among the most-available of those. Gem examples are scarce nonetheless. The Spring 2017 Stephen Herrman listing of Condition Census examples shows three MS65 coins tied for third in the early die state roster. PCGS reports just two numerically finer pieces among all the Small 8 varieties. Population: 4 in 65 (1 in 65+), 5 finer (5/17). NGC ID# 24EU, PCGS# 39434 Base PCGS# 6097

**1814/3 O-101a Half Dollar, MS62
Lustrous, Late Die State**

- 3652 1814/3 O-101a, R.2, MS62 PCGS.** Nearly all examples of this overdated variety come from a late state of the dies, designated O-101a in the Overton reference. This example displays a long crack through the left-side stars, across the cap, and down through the right-hand stars. An additional, heavy crack runs beneath the date. Both sides exhibit multiple die clashing. Attractive steel-blue toning at the lower-left quadrant merges with lustrous, silver-gray shades with olive-gold highlights. Population (with overdate): 7 in 62, 8 finer (4/17). NGC ID# 24F4, PCGS# 39488 Base PCGS# 6106

**1819/8 Half Dollar, MS64
Overton-104, Large 9**

- 3653 1819/8 Large 9, O-104, R.1, MS64 PCGS. CAC.** The early die state variety, as usual, with no crack through the arrowheads. This Choice CAC example displays good sharpness on the central devices but is weak on select stars and on PLURIBUS. Dusky golden toning warms each side, ceding to amber-orange border hues on the reverse. There are no distracting abrasions. NGC ID# 24FC, PCGS# 39559 Base PCGS# 6119

**1819 O-112 Half Dollar, MS65
Tied for Finest of the Variety**

- 3654 1819 O-112, R.3, MS65 PCGS. CAC.** A Mint-made die line connects the tops of the TE in STATES, a unique pick-up point for the conditionally rare Overton-112. The numerals in the date are more widely spaced than many 1819 varieties. Dappled apple-green and chestnut-gold shades overlie lustrous pearl-gray surfaces. The strike is bold, and marks are confined to a few exceedingly minor grazes in the left obverse field. The natural eye appeal is terrific.

Stephen Herrman's Spring 2017 roster reports that this coin sits at the top of the Condition Census for the variety, tied with two other Gem examples. Based on auction prices realized, the present coin realized almost double the price of the other two MS65 coins despite being then-holdered in an MS64 holder with a gold CAC seal. It has since been upgraded to MS65 in the present holder with a green CAC seal of endorsement. Population (all non-overdated 1819 varieties combined): 5 in 65 (1 in 65+), 1 finer. CAC: 3 in 65, 1 finer (4/17). NGC ID# 4FXD, PCGS# 39550 Base PCGS# 6117

**1820 Half Dollar, Sharp MS63
O-105, Square Base Knob 2, Large Date**

- 3655 1820 Square Base 2, Large Date, Knob 2, O-105, R.1, MS63 NGC.** The Square Base 2 with a Knob top and a tripled dentil near the leftmost pair of leaves on the reverse identifies the popular O-105 variety. This attractive Select specimen offers sharply detailed design elements and lightly marked, lustrous surfaces, under pleasing shades of champagne-gold toning. Overall eye appeal is terrific. NGC ID# 24FD, PCGS# 39567 Base PCGS# 6122

**1823 O-112 Half Dollar, MS64+
Delicate Pastel Toning**

- 3656 1823 O-112, R.1, MS64+ PCGS.** A lovely near-Gem Capped Bust half dollar, this 1823 O-112 exhibits frosty mint luster and bold design elements on both sides. The obverse is lovely light gray with excellent eye appeal resulting from delicate gold and teal toning. The reverse features vibrant gold and teal toning over its pristine surfaces. Population: 68 in 64 (6 in 64+), 15 finer (4/17). NGC ID# 24FJ, PCGS# 39618 Base PCGS# 6131

**1824 Over Various Dates Half Dollar, MS64
O-103, Richly Toned and Original**

- 3657 1824 Over Various Dates, O-103, R.1, MS64 PCGS Secure.** Ex: Link. A near-Gem example of an overdate that still causes controversy among specialists. The O-103 used to be known as the 1824/20 variety, but in truth the underdigits are undistinguishable and unclear. High-grade specimens such as the present coin give the best look for those who study the die pair. This example is sharper than usual on the right-side stars, although characteristically flat on the left stars. Rich peach and orange-gold toning at the centers deepens to gunmetal-blue at the margins. Housed in a PCGS Secure holder, this Choice coin ranks solidly in the Condition Census for the variety. Population: 8 in 64, 1 finer (4/17). NGC ID# 24FK, PCGS# 39646 Base PCGS# 6138

1825 Half Dollar, O-102, MS64+
Early Die State Example

- 3658** 1825 O-102, R.1, MS64+ PCGS. CAC. An early die state example, showing recutting on the 8 in the date and faintly visible die lines in the field below the tip of Liberty's bust. The strike is sharp throughout the stars and obverse portrait but slightly soft on the lowest leaf pair on the reverse. Original, frosty mint luster shows no distracting abrasions but is cast in attractive lavender and turquoise-blue toning. The visual appeal is outstanding. NGC ID# 24FL, PCGS# 39648 Base PCGS# 6142

1828 O-116 Half Dollar, MS64+
Square Base 2, Small 8s, Large Letters

- 3659** 1828 Square Base 2, Small 8s, Large Letters, O-116, R.2, MS64+ PCGS. CAC. Aquamarine fields and devices are encompassed by golden-brown peripheries. Lustrous and unmarked with outstanding eye appeal. The strike is crisp except on the stars. Among the finest survivors of the die marriage. O-116 is typically attributed by its horizontal die lines west of the date, along with the rust near the right (facing) claw. Well within the Condition Census for the variety, with both the PCGS Plus and CAC endorsements. NGC ID# 24FR, PCGS# 39770 Base PCGS# 6151

1829 Large Letters Bust Half, MS64+
O-110, Recut 9 in Date
Top of the Census

- 3660** 1829 Large Letters, O-110, R.2, MS64+ PCGS. The Large Letters reverse gives the legend a crowded look, especially where UNITED STATES appears as one word. Overton-110 represents the sole die marriage with the Large Letters legend. This is a splendid near-Gem example of the variety, immersed in copper-gold, gunmetal-blue, and golden-gray toning with strong mint luster shining through the natural patina. A glass reveals a few tiny marks (although none are readily apparent in-hand). Sharply struck, this Plus-graded coin earns extra credit for its tremendous eye appeal. The Stephen Herrman Spring, 2017 report suggests the present coin will rank at the top of the O-110 Condition Census, since the sole MS65 coin is a late die state O-110a (5/17). NGC ID# 4D7S, PCGS# 39791 Base PCGS# 6154

**1829 O-115 Capped Bust Half
Album-Toned Gem, CAC-Endorsed**

- 3661 1829 Small Letters, O-115, R.1, MS65 PCGS. CAC.** This MS65 example is among the finest known of the variety with pleasing, turquoise-blue margins merging into reddish-gold hues and silver-gold centers on both sides of the coin. Clean, unabraded fields surround well-struck central devices, with the eagle especially bold and Liberty's hair fully defined. Steve Herrman's Spring, 2017 report shows this coin tied for second behind a single MS66 example in the Condition Census.

The O-115 variety is identified by sharp stars cut close to the milling and by Star 7 pointing to the lower-half junction of the curl and headband. On the reverse, the shield extends into arrow feathers at the bottom and the lower-most arrowhead is recut near the shaft. A pair of pincer-like tines is visible at the tip of the branch stem above "C." Population (all non-overdate varieties): 29 in 65 (5 in 65+), 4 finer. CAC: 11 in 65, 2 finer (4/17).

Ex: ANA National Money Show Signature (Heritage, 2/2014), lot 3904. NGC ID# 24FS, PCGS# 39800 Base PCGS# 6154

**1830 Small O Bust Half, MS64+
O-113, Condition Census Example**

- 3662 1830 Small O, O-113, R.2, MS64+ PCGS.** A small but clearly noticeable tine from the left wing shoulder into the field between the wing and neck is the primary pick-up point for the O-113 variety. Everything is sharp on the obverse — the star centers, the cap folds, the drapery lines, the hair curl definition — and the reverse is similarly well-struck, save for trivial blending at PLUR on the scroll. Shades of steel-blue and orange-gold provide strong eye appeal over the lustrous, frosty surfaces. This coin should rank third in the O-113 Condition Census by virtue of its PCGS Plus designation according to current rankings in both the Donald Parsley reference and the Spring 2017 Stephen Herrman report (5/17). NGC ID# 24FU, PCGS# 39825 Base PCGS# 6156

**1835 O-107 Half Dollar, MS64+
Seldom Found Finer**

- 3663 1835 O-107, R.1, MS64+ PCGS.** An evenly struck, high-end near-Gem with well-defined central devices but consistently minor softness around the obverse stars. PLURIBUS is weak, as usual. The coin shows vibrant luster and delicate champagne toning with no major abrasions. Minor slide marks on Liberty's cheek appear to be all that limit the grade. Population (all varieties included): 38 in 64 (5 in 64+), 3 finer (4/17). NGC ID# 4EKB, PCGS# 39933 Base PCGS# 6168

SEATED HALF DOLLARS

1840 Seated Liberty Half Dollar, MS65
Small Letters Reverse of 1839

3664 1840 Small Letters, Repunched Date, FS-302, WB-104, MS65 PCGS. The undertype 1 and 8 are visible slightly to the left of the primary digits and a secondary 0 is easily seen above the final numeral on this popular repunched date. The reverse features the Small Letters of 1839. The WB-104 is an underrated issue in most price guides because of its unacknowledged appeal as a Small Letters type coin.

The present coin is an impressive Gem, with sharply detailed design elements throughout. The well-preserved surfaces are blanketed in attractive shades of lavender-gray toning and show minimal signs of contact. Satiny original mint luster shines through the toning. Population: 8 in 65, 6 finer (4/17). NGC ID# 24GM, PCGS# 392648 Base PCGS# 6234

1842 Liberty Seated Half, MS65
WB-101, Small Date, Large Letters
Finest at NGC, Tied Finest Overall

3665 1842 Small Date, Large Letters, WB-101, Die Pair 6, R.3, MS65 NGC. Reverse of 1842. Extremely rare in Gem condition, this is the first MS65 example we have ever offered in one of our auctions. Not that we're alone — just two uncertified MS65 coins have been seen in any auction, according to our records, since 1973. Whether those coins were truly MS65 is a matter of conjecture. The combined grading services have tallied just three examples in MS65 (including one in MS65+ PCGS) but no pieces numerically finer (5/17).

The current example is a lovely, multicolored Gem with a bold strike and mark-free surfaces. Soft luster resides beneath the variegated toning. A diagnostic network of reverse die cracks confirms the die marriage. The rarity of this issue is underrated and underappreciated — perhaps overshadowed by the super-rare 1842 Small Date, Small Letters (Reverse of 1839) with just four pieces known in all grades. NGC Census (all Large Letters reverse varieties): 1 in 65, 0 finer (5/17).

Ex: *Central States Signature* (Heritage, 4/2014), lot 5600, which realized \$21,150.00. NGC ID# 24GT, PCGS# 572011 Base PCGS# 6240

1846-O WB-103 Half Dollar, MS64
Repunched Medium Date

- 3666** 1846-O Medium Date, Repunched Date, WB-103, Die Pair 5, MS64 PCGS. The date is lightly repunched, most apparent below the base of the 1. Die cracks along the reverse periphery confirm the die pair. This ocean-blue and butter-gold near-Gem offers coruscating luster, a sharp strike, and a virtual absence of abrasions or other detractors. Population: 4 in 64, 1 finer (4/17). NGC ID# 27SW, PCGS# 572050 Base PCGS# 6255

1861-O WB-101 Seated Half, MS65
Early Die State Louisiana Issue

- 3667** 1861-O WB-101, Die Pair 6, R.3 MS65 NGC. Struck from a fresh obverse die employed by the State of Louisiana while that authority operated the New Orleans Mint prior to Confederate takeover. A diagnostic, lumplike defect on the upright of R in AMERICA confirms the variety. This sharply struck example displays mottled shades of blue and tan-gold toning with lilac hues and colorful iridescence near the margins. All Seated halves from the 1860s are very scarce in Gem condition, and this attractive MS65 coin is no exception. Census: 9 in 65, 3 finer (5/17). NGC ID# 24J8, PCGS# 572146 Base PCGS# 6303

1862-S WB-102 Half Dollar, MS65
Late State of Die Pair 4
Finest at NGC

- 3668** 1862-S MS65 NGC. WB-102, Die Pair 4, R.3. The obverse has die lines below Liberty's chin, and elsewhere, suggesting an important Late Die State example. A die line through the N of UNITED is clearly visible, and additional die lines are visible in the lower right reverse field. Prominent clash marks in the lower right part of the shield on the reverse are not mentioned for this variety, although similar clash marks are described for some other varieties of this issue. This lovely Gem has delicate champagne toning on its frosty and full lustrous obverse surfaces. Both sides have bold design motifs. An exceptional example and one of the finest known examples of the die pair. Census: 1 in 65, 0 finer (5/17). NGC ID# 24JA, PCGS# 6308 Base PCGS# 6308

1867 WB-101 Seated Half, MS66
Attractive, Just Two Pieces Graded Finer

3669 1867 WB-101 MS66 PCGS. CAC. This razor-sharp Premium Gem displays deep lilac, cobalt-blue, and green-gray patina throughout both sides. Liberty shows a narrow toning streak near her profile, which pedigrees the piece and distinguishes it among the few coins that exist near the top of the Condition Census. The surfaces retain much reflectivity beneath the toning, and the date rides high in the exergue as noted by Breen as B-4937. CAC endorsement adds to the appeal.

Although more than 400,000 pieces were struck, this Philadelphia date circulated extensively, and only a fraction of the survivors are in XF or better grades. PCGS and NGC combined have encapsulated fewer than 250 examples in all grades, confirming the overall elusive nature of the issue. At MS66, it is conditionally rare, witnessed by the extremely low PCGS population and the fact that NGC has not certified any examples above MS65. PCGS population: 3 in 66, 2 finer. CAC: 2 in 66, 1 finer (4/17). PCGS# 572177 Base PCGS# 6321

1868 Seated Half Dollar, MS65
WB-101, Rare in Gem Mint State

3670 1868 WB-101 MS65 PCGS. This gleaming Gem example is mostly prooflike in the fields and needle-sharp on the frosted devices. Gunmetal-blue toning cedes to sea-green and tan-gold shades on the obverse, while the reverse is richly toned in dappled shades of orange-gold, lilac, and blue. Curiously, the date was punched far too high and slants downward left to right. PCGS reports just two numerically finer examples, while NGC shows just one finer coin. PCGS population: 6 in 65, 2 finer (4/17). PCGS# 572182 Base PCGS# 6323

1873-CC Arrows Half Dollar, AU55
Large CC, WB-103

3671 1873-CC Arrows, Large CC, WB-103, Die Pair 6, R.4, AU55 PCGS. Open 3. The Large CC varieties share a common reverse, which combines with three distinct obverses. Here, the 7 in the date is positioned between two dentils. There is no repunching on the date or misplaced digits below. The Carson City Mint struck roughly twice as many half dollars after the statutory weight was increased infinitesimally part-way through 1873 as it had before the change. Golden color encircles largely brilliant surfaces. Crisp devices display a hint of high-point wear. Population (all Arrows varieties): 16 in 55, 28 finer (4/17). NGC ID# 24L8, PCGS# 572216 Base PCGS# 6344

**1877 WB-103 Half Dollar, MS66+
Important Condition Rarity**

- 3672 1877 Closed Bud, WB-103, MS66+ PCGS. CAC.** Type Two Reverse (Closed Bud). A mintage exceeding 8 million pieces was a “last hurrah” of sorts for the Philadelphia Mint’s Seated half dollar production. Soon after, the focus shifted to silver dollars and no subsequent P-Mint Seated half production exceeded 200,000 pieces. Despite the huge mintage, the 1877 is a condition rarity in Premium Gem condition and seldom seen any finer. This Plus-graded MS66 coin coruscates with vibrant golden-lilac toning that deepens at the margins. A sharp strike attends all but Liberty’s topmost hair details and the opposing right (facing) talon. A CAC endorsed example by virtue of the surface quality and eye appeal. Population: 8 in 66+, 2 finer. CAC: 13 in 66, 0 finer (4/17). NGC ID# 24KK, PCGS# 572246 Base PCGS# 6355

**1877-S Seated Half Dollar, MS66
Ideal S-Mint Type Coin**

- 3673 1877-S Closed Bud, Very Small S, WB-104, Die Pair 27, R.4, MS66 PCGS. CAC.** A heavy arching die gouge through Liberty’s gown and a prominent die lump in the shield above the T in LIBERTY join a pair of reverse die lumps to confirm the variety. Caramel-gold toning intermixes with blushes of green, orange, magenta, and cobalt-blue to imbue the nearly mark-free surfaces. The attractive, multihued toning combines with luminous luster radiating beneath the patina, providing this boldly struck Premium Gem with considerable visual quality to match its impressive technical grade. CAC endorsed. Population (all varieties combined): 24 in 66 (1 in 66+), 1 finer. CAC: 7 in 66, 2 finer (4/17). NGC ID# 24KM, PCGS# 572255 Base PCGS# 6357

**1889 Half Dollar, MS66+
Just One Finer Example at PCGS**

- 3674 1889 WB-101 MS66+ PCGS.** A stunning border of reddish-russet hues emerges from a thin band of electric blue toning at the rims and complements the dappled, pearlescent-silver centers of this low-mintage, late-series Seated half. The fields are reflective and virtually without fault as befits the high-end Premium Gem grade. The strike is only a whisper short of full and marks are limited to a few tiny, inconsequential ticks on the portrait. PCGS reports just a single coin with the Plus designation at this grade, and one numerically finer example in circulation-strike format from the 12,000-piece mintage. Population: 13 in 66 (1 in 66+), 1 finer (4/17). PCGS# 572274 Base PCGS# 6371

**1891 Seated Liberty Half, MS66+
WB-101, Mirrored Fields, Few Are Finer**

- 3675 1891 WB-101 MS66+ PCGS. CAC.** Although not designated as such, this Premium Gem example from the last issue of Liberty Seated half dollars exhibits prooflike surfaces due to strongly mirrored fields. Faint toning is present in hues of tan and bluish-gray. The strike is sharp overall, with minor incompleteness at the upper obverse and the lower portion of the eagle. The mintage increased to 200,000 pieces in the final year of the long-running Seated half design, but apparently only a few high-grade examples were saved by nostalgic collectors. Population: 4 in 66+, 3 finer. CAC: 11 in 66, 2 finer (4/17). PCGS# 572276 Base PCGS# 6373

PROOF SEATED HALF DOLLARS

1883 Half, PR66 Cameo
Exceptional Contrast on Each Side

- 3676 1883 PR66 Cameo PCGS.** The 1883 is one of the late-series Seated half issues that were struck in small quantities, although the proof mintages remained in the normal range. In high grades, proofs are often called on to fill spots in both business strike and advanced proof sets. This example is brilliant-white at the centers and richly frosted on the central motifs. Cobalt-blue, lavender, and amber-gold toning graces the margins while the strongly mirrored fields provide stark white-on-black contrast. The strike is razor-sharp. Population: 14 in 66 Cameo, 4 finer (4/17). NGC ID# 27UJ, PCGS# 86444

1883 Half Dollar, PR66 Deep Cameo
Conditionally Rare

- 3677 1883 PR66 Deep Cameo PCGS.** Deeply contrasted surfaces on this Premium Gem Deep Cameo proof boast sharp, frosty devices and mirrored fields. Light golden toning surrounds the borders but leaves the interiors brilliant. PCGS has seen only 13 Deep Cameos in all grades, with this coin among the best. Population: 2 in 66 Deep Cameo, 1 finer (4/17). NGC ID# 27UJ, PCGS# 96444

1886 Seated Half, Partially Toned PR67

- 3678 1886 PR67 PCGS.** The multicolored surfaces are largely pastel-toned in jade, pale golden-brown, and blue, but a couple of small dark patches protrude through the fabric on the obverse. The surfaces show remarkable preservation, however, and the overall bold strike and eye appeal are both equally high-quality. The mintage of the 1886 proofs was an easy-to-remember 886 pieces. Population: 5 in 67, 0 finer (4/17). NGC ID# 27UM, PCGS# 6447

BARBER HALF DOLLARS

1900-S Half Dollar, MS65
Prooflike Fields, Conditionally Rare

- 3679 1900-S MS65 PCGS. CAC.** The 1900-S Barber half is an elusive issue in any Mint State grade, and this CAC-endorsed Gem has the added appeal of deeply prooflike fields produced by fresh dies. The presence of the mintmark and slight strike weakness on the eagle's right (facing) talons and wing junction are all that differ from a true proof half dollar of this date. The coin is brilliant and shows only a few light marks. The 1900-S Barber half is a great rarity this fine. Population: 9 in 65, 5 finer. CAC: 4 in 65, 2 finer (4/17). NGC ID# 57PC, PCGS# 6488

1901-S Half Dollar, MS65
Only One Finer at NGC

- 3680 1901-S MS65 NGC.** *The Complete Guide to Certified Barber Coinage* ranks this tricky issue third in Mint State rarity, surpassed only by the 1904-S and 1896-O emissions. NGC has certified only four Gems of this date with one piece finer; PCGS has certified six pieces in MS65 and six finer (5/17).
This example offers silver surfaces lightly tinged with gold throughout, and even under a loupe there are no singularly distracting abrasions. For an S-mint coin, however, the strike is curiously soft on the right shield corner and the nearby areas. Some interesting die cracks appear on both sides, the sign of die fatigue. Census: 4 in 65 (1 in 65+), 1 finer (5/17). NGC ID# 5EPB, PCGS# 6491

1902-O Barber Half Dollar, MS64+
Eye-Appealing Strike Rarity

- 3681** 1902-O MS64+ PCGS. CAC. Originality and eye appeal are the defining attributes of this Choice O-mint Barber half dollar. The 1902-O is a well-known strike rarity, and David Lawrence (1991) notes: "Well struck coins are worth a premium ..." Liberty's forecurl shows excellent definition, as do stars 1 through 10. Only the eagle's head and the right (facing) talons and wing junction display incompleteness, while the remaining reverse motifs are crisply rendered. Multicolor toning is more prominent on the reverse, but the underlying luster is radiant throughout. Population: 18 in 64 (1 in 64+), 8 finer. CAC: 6 in 64, 1 finer (4/17). NGC ID# 24MG, PCGS# 6493

Mint Engraver Charles E. Barber

1908 Half Dollar, MS67
None Finer, Ex: Duckor

- 3682** 1908 MS67 PCGS. Ex: Duckor. This outstanding Superb Gem possesses a bold strike on the obverse, with minor weakness on the reverse only at the junction of the shield and right (facing) wing. The frosty luster is aglow with a tinge of light golden toning, while the surfaces are devoid of any blemishes aside from a few microscopic ticks visible only with a glass.

This is one of only two PCGS coins in this grade we have ever offered, and it comes with an impressive pedigree. In total, PCGS and NGC each report three 1908 Barber halves in this grade with none finer at either service (4/17). Only the 1908-S is scarcer among the four 1908 issues of this denomination. This piece is truly remarkable and should not be passed up.

Ex: *Heritage* (3/2003), lot 5973; *Stewart Blay* (4/2004); *The Dr. and Mrs. Steven L. Duckor Barber Half Dollar Collection / ANA Signature* (*Heritage*, 8/2010), lot 3223; *ANA Signature* (*Heritage*, 8/2015), lot 4093. NGC ID# 24N4, PCGS# 6512

1908-S Barber Half Dollar, MS65
Underrated Issue in High Grade

- 3683 1908-S MS65 PCGS. CAC.** An underrated issue in the Barber half dollar series, the 1908-S is seldom seen in Gem condition, much less in finer grades. The surfaces on this Gem are mostly silver-white in the centers, ceding to a melange of russet and lilac near the rims. The strike is sharp, just missing fully struck status. Population: 10 in 65, 7 finer. CAC: 3 in 65, 4 finer (4/17). NGC ID# 24N7, PCGS# 6515

PROOF BARBER HALF DOLLAR

1892 Barber Half, PR67 Cameo
Registry Grade, First-Year Proof

- 3684 1892 PR67 Cameo PCGS.** Vivid shades of champagne-gold, cerulean-blue, lavender, silver-gray, and violet toning visit the impeccably preserved surfaces of this spectacular Superb Gem. The sharply detailed design elements are richly frosted, creating intense cameo contrast with the deeply mirrored fields. From a first-year proof mintage of 1,245 pieces. Population: 8 in 67 (1 in 67+) Cameo, 0 finer (4/17). NGC ID# 24NU, PCGS# 86539

WALKING LIBERTY HALF DOLLARS

1917-D Walking Liberty Half Dollar, MS65
Obverse Mintmark Variant

- 3685 1917-D Obverse MS65 PCGS.** This impressive Gem was one of the 765,400 Walking Liberty half dollars struck early in 1917 at the Denver Mint, before the mintmark was moved to the reverse. The design elements are sharply detailed and the well-preserved surfaces are visited by highlights of greenish-gold and magenta toning. Vibrant mint luster adds to the considerable visual appeal. Housed in a green label holder. Population: 74 in 65 (3 in 65+), 5 finer (4/17). NGC ID# 24PR, PCGS# 6570

1918-S Walking Liberty Half, MS64+
Popular World War One Issue

- 3686 1918-S MS64+ PCGS.** From a huge wartime mintage of more than 10 million pieces, the 1918-S Walking Liberty half dollar is not difficult to locate in MS64 condition, but finer coins are elusive. This Plus-graded Choice specimen offers well-detailed design elements, with a touch of the usual softness on the wreath hand and eagle's leg. The well-preserved surfaces are brightly lustrous and lightly toned. PCGS has graded 35 numerically finer examples (4/17). NGC ID# 24PX, PCGS# 6576

1919 Walking Liberty Half Dollar, MS64+
Low-Mintage Philadelphia Issue

- 3687 1919 MS64+ PCGS. CAC.** The 1919 Walking Liberty half dollar claims a low mintage of 962,000 pieces, making the issue one of the most elusive dates from the Philadelphia Mint. This Plus-graded Choice example exhibits sharply detailed design elements, with clear separation between Liberty's thumb and fingers on the wreath hand. The well-preserved surfaces radiate vibrant mint luster, under shades of golden-brown and lavender-gray toning. NGC ID# 24PY, PCGS# 6577

1919-D Walking Liberty Half, MS62
Better Early Series Date

- 3688 1919-D MS62 PCGS.** Fewer than 1.2 million 1919-D half dollars were struck, and heavy circulation during the years following their issuance reduced the majority of surviving examples to lower circulated grade levels. This Mint State representative is surprisingly void of bothersome abrasions, though a degree of noticeable weakness on the central devices (typical of this issue) contributes to the grade. The luster is a slightly muted, light golden hue, though the relief elements exhibit deeper amber coloration. Housed in a green label holder. NGC ID# 24PZ, PCGS# 6578

1920-D Walking Liberty Half Dollar, MS65
Underrated Issue in High Grade

3689 1920-D MS65 PCGS. The 1920-D Walking Liberty half dollar is more elusive than its mintage of 1.5 million pieces would suggest, and the issue is an underrated “sleeper” outside of series specialists. Although the 1920-D has a reputation as a strike rarity, most examples seen exhibit at least some emerging detail on the central obverse (admittedly, the strike on Liberty’s head is usually weak). The real objection to most 1920-D Walkers is their subdued luster characteristics, which can vary widely.

Fortunately, this delightful Gem offers unusually vibrant mint luster on both sides, with well-preserved surfaces that show a few subtle hints of golden-tan toning. The strike is typical for the issue, with some separation evident between Liberty’s thumb and fingers on the wreath hand, but soft definition on the head. The 1920-D is very scarce in MS65 condition, and finer coins are condition rarities. Population: 47 in 65, 7 finer (4/17). NGC ID# 24R4, PCGS# 6581

1921 Half Dollar, AU55+
Sole Plus-Graded Coin in AU

3690 1921 AU55+ NGC. This is the only Plus-graded 1921 Walker in any circulated grade, and it is one of only three Plus-designated coins at NGC in any condition (4/17). Moderate luster remains in the fields, and the sharply struck design elements show no obtrusive abrasions or significant wear. A delicate glaze of light golden toning warms otherwise bright silver luster. NGC ID# 24R6, PCGS# 6583

1921-D Walking Liberty Half, MS65+
Sought-After, Low-Mintage Issue

3691 1921-D MS65+ PCGS. CAC. The 1921-D has the lowest mintage of the famous triumvirate of Walking Liberty halves from this year, but the 1921-S, with a higher mintage, is the rarest Walking Liberty half in Mint State. The 1921-D is nonetheless rare in its own right: Jeff Ambio, in his recent treatise, says, "The 1921-D is not quite as rare as the 1919-D, 1919-S, or 1921-S in terms of total number of Mint State coins known. On the other hand, this issue is rarer than the 1919-S in high grades. A 1921-D that grades even MS-62 or MS-63 represents an extremely important buying opportunity in any numismatic market."

The present Plus-graded Gem offers pale, even golden-lilac patina over each side, with exceptionally strong underlying mint luster. The strike, although generally bold, is just a trifle soft on the head of Liberty and the eagle's foreleg. The surfaces overall are remarkably clean and show no obvious marks. Population: 34 in 65 (3 in 65+), 3 finer. CAC: 11 in 65, 2 finer (4/17).

Ex: *Central States Signature* (Heritage, 4/2009), lot 251 NGC ID# 24R7, PCGS# 6584

1921-S Half Dollar, MS64
 Low-Mintage Key Issue
 Rarest Walking Liberty Half in Mint State

3692 1921-S MS64 PCGS. CAC. Only 548,000 Walking Liberty half dollars were struck at the San Francisco Mint in 1921. Production was down at all three active U.S. mints in 1921, and the Philadelphia and Denver facilities actually produced even fewer coins than San Francisco. However, despite the larger mintage, the 1921-S is the most elusive of these three key issues in today's market. In fact, the 1921-S is the rarest issue of the Walking Liberty series in Mint State grades. It may be that contemporary collectors saved the lower mintage Philadelphia and Denver coins in larger numbers, while the 1921-S was relatively neglected at the time of issue.

Unfortunately, the 1921-S was not a well-produced issue and is known as a strike rarity, with almost all examples seen showing some softness on Liberty's head and the wreath hand. The reverse is usually sharper, but some softness is typical on the eagle's trailing leg. The 1921-s generally has below-average luster characteristics, as well. In his *Collecting and Investing Strategies for Walking Liberty Half Dollars*, Jeff Ambio recommends the 1921-S in grades of MS63-MS64, noting "Choice examples have tremendous appeal in virtually any numismatic market."

This delightful Choice specimen offers well-detailed design elements that show some of the typical softness on Liberty's head. The wreath hand shows better-than-average definition, with just a hint of separation between Liberty's thumb and fingers, and the eagle's leg is much sharper than usual. Vibrant satiny mint luster is evident on both sides and the well-preserved surfaces are essentially brilliant, with just a few subtle hints of pale gold and lavender toning in selected areas. Overall eye appeal is outstanding for this always popular series key. Population: 48 in 64 (2 in 64+), 18 finer. CAC: 9 in 64, 5 finer (4/17). NGC ID# 24R8, PCGS# 6585

**1923-S Walking Liberty Half, MS65
Very Rare Any Finer**

- 3693 1923-S MS65 PCGS.** From a mintage of 2.1 million pieces, the 1923-S was the only Walking Liberty half dollar struck at any U.S. Mint from 1922 through 1926. Commercial demand over that extended period ensured that the coins circulated heavily and the 1923-S is much more elusive in high grade than its reported mintage would suggest. This impressive Gem exhibits well-detailed design elements, with a touch of the usual softness on the central obverse, but unusually sharp definition on the reverse. The well-preserved surfaces radiate vibrant mint luster and show a few hints of golden-tan toning. Overall eye appeal is outstanding. Housed in a green label holder. Population: 45 in 65 (5 in 65+), 9 finer (4/17). NGC ID# 24R9, PCGS# 6586

**1927-S Half Dollar, MS64+
Challenging in Higher Grades**

- 3694 1927-S MS64+ PCGS. CAC.** An outstanding example, this near-Gem has a better than average strike with full, frosty mint luster. The obverse exhibits a lovely display of mottled iridescence. The reverse is mostly brilliant with peripheral gold and iridescent toning. PCGS has only certified 88 finer examples (4/17). NGC ID# 24RA, PCGS# 6587

**1927-S Half Dollar, MS65
Lightly Toned and Original**

- 3695 1927-S MS65 PCGS.** No half dollars were struck in Philadelphia or Denver in 1927, making the 1927-S essential for date set completion. This Gem example displays original satin luster and excellent preservation. The usual weakness is seen on Liberty's head and branch hand. Light golden toning on each takes on deeper olive hues across portions of the obverse. Population: 80 in 65 (6 in 65+), 8 finer (4/17). NGC ID# 24RA, PCGS# 6587

**1928-S Walking Liberty Half, MS65
Very Rare Any Finer**

- 3696 1928-S MS65 PCGS.** The San Francisco Mint struck 1.9 million Walking Liberty half dollars in 1928, and none were struck at any other facility. Commercial demand was large enough to ensure that the coins circulated heavily and few were saved by contemporary collectors. As might be expected, the 1928-S is very scarce in MS65 condition, and finer coins are very rare. This delightful Gem offers well-detailed design elements and well-preserved, lustrous surfaces. Housed in a green label holder. Population: 60 in 65 (1 in 65+), 7 finer (4/17). NGC ID# 24RB, PCGS# 6588

**1929-S Half Dollar, MS66
Only One Finer at PCGS**

- 3697 1929-S MS66 PCGS.** The 1929-S is an important condition rarity in the Walking Liberty half dollar series, plentiful in MS65, but elusive in MS66, and essentially impossible in finer grades. This lovely Premium Gem has mottled iridescent toning along the obverse border, with a brilliant silver reverse that exhibits wisps of gold. Population: 55 in 66 (1 in 66+), 1 finer (4/17). NGC ID# 24RD, PCGS# 6590

1934 Half Dollar, MS68
Among the Finest Known

- 3698 1934 MS68 NGC.** Not even a dozen 1934 Walkers are reported this fine at NGC, and none are in higher grades. Most earlier issues in the series are not even known in MS67, let alone MS68. This remarkably high-end type coin displays a bold strike and original, frosty mint luster with warm yellow-gold toning overall. There are no distracting abrasions. Census: 11 in 68 (1 in 68+), 0 finer (4/17). NGC ID# 24RE, PCGS# 6592

1941 Half Dollar, MS68
None Known Finer

- 3699 1941 MS68 PCGS.** Available in lower grades, the 1941 Walking Liberty half dollar is conditionally rare in MS68, the finest grade known for the date. Registry Set collectors clamor for coins in this grade. The present piece is luminous and satiny with well-preserved surfaces. A hint of light golden toning on each side attests to the originality of the luster. Population: 26 in 68 (1 in 68+), 0 finer (4/17). NGC ID# 24S3, PCGS# 6611

1942-D Walker, Top-Grade MS68
Exceptional Original Luster

- 3700 1942-D MS68 NGC.** Fewer than a dozen 1942-D Walkers grade MS68 at NGC and PCGS combined, and none are finer, not even by the margin of a Plus designation. The present coin has original satin luster and looks just as good under a 10x loupe as it does to the naked eye. Liberty's head is full and the branch hand shows partial definition. The coin is mostly silver-white but with splashes of bronze-gold along the left-hand obverse margin. Census: 6 in 68, 0 finer (4/17). NGC ID# 24S7, PCGS# 6615

1945-S Half Dollar, Frosty MS67
Spectacular Eye Appeal

- 3701 1945-S MS67 PCGS.** The 1945-S Walker is scarce in MS67, and this piece is the only such coin awarded a Plus designation by either leading service. No finer examples are known. Impressively frosty, unblemished mint luster glistens on each side with delicate champagne interior toning and more vivid rainbow border toning. Liberty's head and branch hand, and the eagle's trailing leg, show the usual strike weakness. Population: 43 in 67 (1 in 67+), 0 finer (4/17). NGC ID# 24SH, PCGS# 6626

PROOF WALKING LIBERTY HALF DOLLAR

1941 Half Dollar, PR68
Beautifully Toned

- 3702 1941 PR68 PCGS. CAC.** Tied for the finest at PCGS and CAC and conditionally rare as such, this high-end proof 1941 Walking Liberty half dollar delivers deeply mirrored fields and needle-sharp relief elements. Beautiful iridescent hues emerge from golden patina on each side, with deeper olive-gold color around the borders. Population: 25 in 68, 0 finer. CAC: 24 in 68, 0 finer (4/17). NGC ID# 24SP, PCGS# 6641

FRANKLIN HALF DOLLARS

1948-D Franklin Half, MS67 Full Bell Lines
Top-Tier Registry Coin

- 3703 1948-D MS67 Full Bell Lines PCGS.** This is a rare opportunity to acquire one of the few finest-known 1948-D Franklin half dollars with Full Bell Lines. PCGS reports six pieces in this grade and none finer; none are this fine at NGC. Even without the Full Bell Lines designation, PCGS shows no Superb Gems, and NGC records only one (5/17). This top-graded Registry coin displays an incredibly sharp strike and frosty original mint luster that glistens with a hint of champagne toning. Population: 6 in 67 Full Bell Lines, 0 finer (5/17). NGC ID# 2549, PCGS# 86652

1950 Franklin Half, Border-Toned MS67+
Full Bell Lines Condition Rarity

- 3704 1950 MS67+ Full Bell Lines PCGS.** Superb Gem 1950 Franklin half dollars are rare, but almost all are designated Full Bell Lines by the grading services. This Plus-graded MS67 Full Bell Lines coin is tied for the finest known. We have handled a number of MS67s in the past, but only one has been Plus-graded. That piece, lot 4146 in our August 2015 ANA Signature sale, realized more than \$18,000. The current coin is the only other Plus-graded Superb Gem known. Most of each side is satiny with light golden toning, although about 75% of the obverse border showcases vivid forest-green, violet, amber, and sun-gold toning. The strike is sharp, and there are no distracting abrasions. Population: 19 in 67 (2 in 67+) Full Bell Lines, 0 finer (4/17). NGC ID# 24SW, PCGS# 86656

1953-S Franklin, MS66 Full Bell Lines
Finest Offered in 16 Years
The Sole Finest at NGC

- 3705 1953-S MS66 Full Bell Lines NGC.** The 1953-S Franklin half dollar is a rarity with Full Bell Lines. NGC has so-designated only 13 coins in all grades, and this Premium Gem is the sole finest. PCGS reports two Full Bell Lines pieces in this grade, also with none finer (4/17). We have offered an ANACS-certified coin in this grade on two occasions, but the only NGC or PCGS-graded MS66 Full Bell Lines example that we have previously handled was in our August 2001 Atlanta Signature sale, lot 6331, where a PCGS coin garnered more than \$35,000. In fact, no major auction house has sold an NGC or PCGS coin in this grade since.

This remarkable condition rarity will appeal to Registry Set collectors as a must-have Condition Census coin. The strike is bold, and the incredibly frosty surfaces show no toning and no distracting abrasions. A loupe reveals only a few microscopic mint-made marks, caused by debris in the recesses of the die — a common sight on Franklin half dollars. NGC ID# 24T8, PCGS# 86666

PROOF FRANKLIN HALF DOLLAR

1958 Half Dollar, PR68+ Ultra Cameo
Nearly Flawless, Superbly Contrasted

- 3706** 1958 PR68+ Ultra Cameo NGC. Viewed at an angle, the frost-white devices appear starkly three dimensional over glassy, jet-black fields. The coin is brilliant — fully devoid of toning — with exceedingly sharp definition and no marks to disturb the near-flawless surfaces. Ultra and Deep Cameo proofs are comparatively rare in the series, and only three 1958 proofs have received the elusive PR69 Ultra Cameo grade. This Superb PR68 Ultra Cameo is the sole example with the Plus designation at either PCGS or NGC. Census: 14 in 68 Ultra Cameo (1 in 68+, 2 in 68★), 3 finer (5/17). NGC ID# 27VH, PCGS# 96699

EARLY DOLLARS

1795 B-5, BB-27 Dollar, VF30
Three Leaves Reverse

- 3707** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF30 NGC. The 1795 B-5 silver dollar is a plentiful variety that is encountered more often than all others combined. This pleasing piece exhibits faint hairlines on both sides, indicative of an ancient cleaning, but it has now toned to light champagne and offers excellent eye appeal. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1796 B-4, BB-61 Dollar, XF45
Small Date, Large Letters

- 3708** 1796 Small Date, Large Letters, B-4, BB-61, R.3, XF45 PCGS. Bowers Die State I, the usual early die state for this marriage. A pleasing piece with light gray surfaces and faint emerald, gold, and blue overtones. This is the only plentiful variety for the Small Date, Large Letters type, as only three examples are known of the other variety, B-6, BB-64. An important opportunity for the *Guide Book* variety collector of early silver dollars. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1797 Small Eagle Dollar, VF20
B-1, BB-73, 9x7 Stars

- 3709** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, VF20 PCGS. Bowers Die State II. This moderately well-detailed example is evenly struck with no visible adjustment marks. Both sides display varying shades of lavender-gray and peach-olive toning. The surfaces are smooth and appealing. BB-73 in this condition makes an excellent Small Eagle type coin. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1797 9x7 Stars Draped Bust Dollar
B-1, BB-73, AU50

- 3710** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, AU50 NGC. Bowers Die State II. The coin is unevenly struck with considerable weakness at the upper obverse and lower reverse, with strong detail elsewhere. Steel-gray surfaces show light golden toning and have hints of satiny luster in the fields. Wear is light across the high points of the devices. There is a planchet flaw on the rim above the TY in LIBERTY, visible from both sides. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1798 Heraldic Eagle Dollar, AU53
B-24, BB-124

- 3711** 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2, AU53 PCGS. Bowers Die State II. The reverse shows slight evidence of lapping. This is an outstanding example of the third major design type among the early dollars. The Flowing Hair type was struck in 1794 and 1795, the Draped Bust, Small Eagle type was coined from 1795 to 1798, and the Draped Bust, Heraldic Eagle design was current from 1798 through 1803. This light silver-gray example has satin luster with delicate gold and faint blue toning. NGC ID# 24X6, PCGS# 40041 Base PCGS# 40018

1799 7x6 Stars Draped Bust Dollar
B-11, BB-161, Sharp AU53

- 3712** 1799 7x6 Stars, B-11, BB-161, R.3, AU53 PCGS. Bowers Die State "IV," an unlisted extremely late die state with a shattered reverse and a die chip below the eagle's beak. This coin is impressively sharp despite metal flowlines and other die fatigue around the reverse borders. Mottled olive-gray toning accents silvery surfaces, and wear is light. This smooth problem-free example is highly appealing. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

1799 Dollar, B-22, BB-168, VF20

- 3713** 1799 7x6 Stars, B-22, BB-168, R.4, VF20 PCGS. Bowers Die State IV. The late die state, showing a heavy bisecting crack across the reverse from 9 to 3 o'clock, and crisscrossing die cracks on the obverse at the date. The strike is even and wear is minimal. Both sides show light golden-gray patina with a few deeper gunmetal-gray flecks on the reverse. NGC ID# 24X7, PCGS# 40059 Base PCGS# 6878

1799 B-21, BB-169 Dollar, AU55
Partially Lustrous

- 3714** 1799 7x6 Stars, B-21, BB-169, R.3, AU55 PCGS. Bowers Die State III. This lovely Heraldic Eagle type coin displays golden-brown and lilac-gray toning. Luster is plentiful at the borders and across the motifs. Evenly struck aside from the softness on the lower right (facing) wing characteristic of BB-169. Small marks are present but none detract from the impressive eye appeal.
Ex: Orlando Signature (Heritage, 7/2013), lot 3202. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

1800 B-19, BB-192 Silver Dollar, XF40

- 3715** 1800 AMERICA1, B-19, BB-192, R.2, XF40 PCGS. This appears to be an extremely early die state that should gain the attention of specialists. There are no die cracks or clash marks, although the obverse has short, raised die lines below and left of the date. Lovely pewter-gray surfaces exhibits steel-blue toning that surrounds the bust. NGC ID# 24X9, PCGS# 40082 Base PCGS# 6892

GOBRECHT DOLLAR

1836 Gobrecht Dollar, Toned PR58
Judd-60, Die Alignment IV

- 3716** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR58 NGC. Silver. Plain Edge. Die Alignment IV (center of Liberty's head opposite the right side of F in OF). Die State E. A rim nick shows above the A in STATES, and there is a small die chip apparent below the right side of the R in DOLLAR. The previous die state's diagnostic, the diagonal die clash mark above the eagle's wing, is faintly evident. The fields are more reflective than seen on many 1836 dollars with good mirroring flashing through the speckled charcoal-gray and pale golden toning scattered across each side. The Mint's account books show that these, and other Original Gobrecht dollars, were struck in the final week of December 1836. At the AU58 level, this piece represents a good opportunity for the type collector, with substantial savings compared to a strictly PR60 or finer coin. NGC ID# BLWV, PCGS# 11225

SEATED DOLLARS

1855 Silver Dollar, AU Details
Smooth Surfaces, Better Date

- 3717 1855 — Questionable Color — PCGS Genuine. AU Details. OC-1, High R.3.** Coming from a limited mintage of 26,000 pieces, the 1855 Seated dollar is a better date in all grades and particularly scarce in AU and Mint State. The present coin has smooth, unblemished surfaces, although the deep gunmetal-blue and gray toning on each side was deemed to be of questionable origin by PCGS. Little wear is observed, although strike weakness is seen on several stars, Liberty's foot, and the eagle's left (facing) talons.

1859 Seated Dollar, MS63
Elusive Mint State Specimen

- 3718 1859 MS63 PCGS OC-3, High R.3.** Osburn-Cushing Die State a/b. When Mint State 1859 Seated dollars are the topic of conversation, the discussion usually focuses on New Orleans pieces. Those from Philadelphia and San Francisco are rarely encountered. This Select Mint State example is richly toned in gray-gold on the obverse, with light gold toning on the lustrous reverse. A splendid example for the connoisseur. Population: 15 in 63, 8 finer (4/17). NGC ID# 24YZ, PCGS# 6946

1859-S Dollar, AU58
Only 20,000 Pieces Struck

- 3719 1859-S AU58 PCGS. OC-2, R.4. Repunched 18.** Osburn-Cushing Die State a/a. The first silver dollar issue from the San Francisco Mint had a low mintage of only 20,000 pieces. This example is well-struck with minimally toned silver-gray surfaces. Hints of mint luster cling to the devices. The high points show modest wear, and a scattering of field marks and hairlines exist on each side. Still, this is a pleasing and desirable near-Mint representative of an important S-Mint issue. The scarce OC-2 variety features the date further right, with digits 1 and 8 noticeably repunched at the bottom on this early die state example. Population: 17 in 58, 23 finer (4/17). NGC ID# 24YZ, PCGS# 6948

1859-S Seated Dollar, MS61
Rare in Mint State

- 3720 1859-S MS61 PCGS. OC-2, R.4.** The date is lightly recut at the bases of the 18. The 1859-S Seated dollar is a rarity in Uncirculated condition, although this MS61 coin remains accessible to some collectors. The strike is slightly soft on the upper edge of the eagle's left (facing) wing but well-executed elsewhere. Semireflective fields complement a blush of light golden toning overall. A splash of russet toning paints the reverse shield. Scattered abrasions define the grade. Population: 3 in 61, 18 finer (4/17). NGC ID# 24YZ, PCGS# 6948

1859-S Seated Dollar, MS62
Mint State Rarity

- 3721 1859-S MS62 PCGS OC-1, R.2.** Osburn-Cushing Die State a/d. The inaugural silver dollar from this branch mint, the 1859-S was produced to the extent of just 20,000 coins. Most of these were exported and subsequently melted, and even high-grade circulated survivors will set one back several thousand dollars. Uncirculated examples are even rarer, with few coins grading above the present level of preservation. There is some hallmark strike softness over the reverse portrait, but all other features are bold, if not sharp. The number of distractions is few for the grade — a small area of tiny marks in the right obverse field is noted for accuracy. A pleasing example, nonetheless, with a delicate overlay of steel-gray and mixed pastel colors. Population: 9 in 62, 9 finer (4/17). NGC ID# 24YZ, PCGS# 6948

1871-CC Seated Liberty Dollar, AU58
Low-Mintage Carson City Key

3722 1871-CC AU58 NGC. OC-1, High R.4. The 1871-CC claims the lowest mintage of any Carson City Seated Liberty dollar, at a meager 1,376 pieces. One pair of dies was sufficient to strike the entire production run. This was the only use of the obverse die, which shows the top of an errant 1 in the denticles, below the 7 in the date. The reverse die was used previously to strike the OC-4 variety in 1870 and shows a “Wide CC” mintmark. Because of its limited mintage, the 1871-CC is one of the most challenging issues of the series, although the 1873-CC seems to be of about equal rarity. The surviving population numbers about 100 examples in all grades and high-grade specimens are very rare.

The present coin is an impressive near-Mint piece, with well-detailed design elements that show just a trace of actual wear. The lightly abraded surfaces are visited by subtle shades of lavender-gray and jade-gold toning, with a mix of satiny mint luster and prooflike reflectivity underneath. The overall presentation is most attractive. Census: 8 in 58, 4 finer (4/17). NGC ID# 24ZH, PCGS# 6967

PROOF SEATED DOLLAR

1870 Seated Liberty Dollar, PR64
Pleasing Multicolor Toning

3723 1870 PR64 PCGS. OC-P1. From a relatively generous mintage of 1,000 pieces, the 1870 proof Seated Liberty dollar is one of the more available proof issues of the series. This impressive Choice example offers well-detailed design elements and reflective fields, under attractive shades of cerulean-blue and golden-brown toning. Population: 55 in 64, 23 finer (4/17). NGC ID# 252S, PCGS# 7018

TRADE DOLLAR

1875-S Trade Dollar, MS65
Lustrous and Satin-Smooth

3724 1875-S Type One Reverse MS65 NGC. Large S. Type One Reverse. This lustrous Gem Trade dollar is extremely sharp with reddish-gold and tan toning accents at the borders and satin-smooth, semireflective silver fields. Each of the star centers shows full definition and Liberty's head is only slightly incomplete at the hair framing the forehead and over the ear. The reverse strike is top-notch. An excellent selection for a high-grade Trade dollar set or for a Gem-quality silver dollar type set. While near-Gem coins abound, relatively few examples qualify for the next level and such pieces are highly valued as such. Census: 35 in 65, 5 finer (4/17). NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

PROOF TRADE DOLLARS

1879 Trade Dollar, Toned PR66

3725 1879 PR66 NGC. This high-end proof Trade dollar is razor-sharp throughout every element of the design, and it shows deep reflectivity in the fields. Ocean-blue and lavender borders spill into the interior margins on the obverse at the upper-right and lower-left, leaving the center silvery brilliant. The reverse shows light golden color with a splash of deep russet below the eagle. Finer proofs are rarely seen. Census: 30 in 66, 8 finer (4/17). NGC ID# 27YR, PCGS# 7059

1879 Trade Dollar, PR67
Delightful Coloration

3726 1879 PR67 PCGS. The 1879 proof-only Trade dollar is plentiful in the absolute sense but is seldom seen in Premium Gem condition and is rare in PR67. This example displays a bold strike and frosty devices with a deeply reflective backdrop in the fields. The obverse showcases colorful violet, ocean-blue, sun-gold, crimson, and forest-green toning, while the reverse reflects more uniform amber coloration with hints of lavender-blue around the periphery. PCGS reports half a dozen non-Cameos in this grade and none finer (5/17). The eye appeal is spectacular. Any proof 1879 Trade dollar is rare this fine. NGC ID# 27YR, PCGS# 7059

MORGAN DOLLARS

1878-CC Morgan Dollar, MS66+
Condition Rarity in Finer Grades

3727 1878-CC MS66+ PCGS. The Carson City Mint produced more than 2.2 million silver dollars in 1878, the first year of the Morgan design. The issue is always in demand from branch mint type collectors and date collectors alike. Many high-grade coins have survived, but the population thins out drastically above the MS66 grade level, making this Plus-graded Premium Gem an excellent balance of quality and value. The design elements exhibit razor-sharp definition throughout, and the impeccably preserved surfaces radiate vibrant mint luster on both sides. An interesting die crack runs through the base of the letters in dollar. PCGS has graded only six numerically finer examples (4/17). NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS66+
Near the Top of the Population

- 3728 1878-CC MS66+ PCGS. VAM-9, CC Tilted Right.** Curious die lines in the reverse fields quickly identify this frequently seen VAM variety. As a date, the 1878-CC Morgan dollar is available in MS66 but exceedingly rare any finer. It is more plentiful in MS66 and finer grades than the various Philadelphia issues of 1878, but it is significantly scarcer than the 1878-S. Within the context of the Carson City short set, the 1878-CC is a better date and among the more challenging to acquire in Gem or better condition.

This high-end Premium Gem showcases frosty, radiant mint luster and a bold strike. A few tiny grazes on the cheek are all that prevent an even finer grade, although they are invisible to the naked eye at most angles. The visual appeal generated by this VAM-9 coin easily surpasses that of many other Premium Gems. PCGS has seen six finer representatives (4/17). NGC ID# 253M, PCGS# 7080

1878-CC Morgan Dollar, MS65 Deep Prooflike
Cameo Contrast

- 3729 1878-CC MS65 Deep Prooflike NGC.** Among the finest Deep Prooflike coins at NGC, this Gem 1878-CC Morgan dollar yields brilliant surfaces and appreciable cameo contrast with no distracting abrasions. The devices are sharp and frosty. The inaugural Morgan dollar from the Carson City Mint is elusive in high grade even without reflective fields. Census: 32 in 65 (1 in 65+ Deep Prooflike, 1 in 65 ★), 0 finer (4/17). NGC ID# 253M, PCGS# 97081

1879-CC Silver Dollar, MS64
Frosty and Original

- 3730 1879-CC MS64 PCGS. CAC.** Normal Mintmark. Frosty original luster is the hallmark of this near-Gem 1879-CC Morgan dollar, and well-defined relief elements further contribute to the visual appeal. The interiors are brilliant, while the borders show a touch of golden toning. A few scattered grazes on the obverse limit the grade, while the reverse is a point finer all by itself. Higher-grade 1879-CC silver dollars are out of reach for most Morgan enthusiasts. NGC ID# 253U, PCGS# 7086

1879-CC Silver Dollar, MS65
Frosty Original Luster
Only Three Coins Finer at PCGS

3731 1879-CC MS65 PCGS. Normal Mintmark. The scarcity of the 1879-CC Morgan dollar in Gem condition makes it the second-most elusive issue in the Carson City short set. Gems are scarcer at auction than even the minimal certified population would suggest, and higher-grade pieces are almost uncollectible. In fact, since 1993, we have handled only a single coin finer than the present PCGS-graded Gem.

Carson City specialists will appreciate the traditional frosty, brilliant luster that radiates dramatic cartwheel luster. There are a few minor grazes on Liberty's cheek but none that warrant individual mention. The originality of the surfaces is highly appealing. PCGS reports three MS66 coins finer (4/17). NGC ID# 253U, PCGS# 7086

GSA DOLLAR

1879-CC GSA Dollar, MS62+
Brilliant Semiprooflike Surfaces

3732 1879-CC GSA MS62+ NGC. CAC. Just 4,123 examples of the 1879-CC were sold as part of the GSA release of the 1970s, roughly on par with 1890-CC. But outside of a GSA holder, the 1879-CC is considerably scarcer than the 1890-CC. This example has a normal mintmark and is brilliant throughout. The reverse is well preserved, as is the obverse field, though Liberty's cheek and neck display the expected number of individually delicate abrasions. NGC ID# 253T, PCGS# 518848 Base PCGS# 7086

MORGAN DOLLARS

1879-CC Morgan Dollar, MS64
VAM-3, Capped Die

3733 1879-CC Capped Die, VAM-3, MS64 PCGS. A Top 100 Variety. Frosty silver luster rolls around minimally marked surfaces on this near-Gem 1879-CC Capped Die dollar. A hint of light golden rim toning frames the untuned interiors. The design elements are well-detailed. VAM-3 is a famous and popular variety that is usually collectible through MS64. However, PCGS has seen just 13 numerically finer representatives (5/17). NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Capped Die Dollar, VAM-3, MS64

3734 1879-CC Capped Die, VAM-3, MS64 NGC. A Top 100 Variety. Die chipping is prominent around the repunched mintmark, which shows a medium-sized CC punched over a smaller version. Whispers of soft grayish-tan visit the lustrous surfaces of this near-Gem. The strike is typical in that the obverse center is weak. Minute obverse handling marks preclude Gem status. NGC has seen only seven coins finer (4/17).
Ex: Dallas Signature (Heritage, 10/2009), lot 916. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Morgan Dollar, MS64
Popular Capped Die, VAM-3 Variety

- 3735** 1879-CC Capped Die, VAM-3, MS64 PCGS. A Top 100 Variety. The 1879-CC is the second-rarest Carson City Morgan dollar, from a low mintage of 756,000 pieces. This attractive Choice specimen exhibits well-detailed design elements with the remnants of a partially effaced small CC under the primary mintmark, identifying the popular VAM-3 variety. The well-preserved surfaces radiate vibrant mint luster, with subtle hints of golden-tan and lavender toning. PCGS has graded 13 numerically finer examples (4/17). NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

GSA DOLLAR

1879-CC GSA Dollar, MS63+
VAM-3 'Capped Die,' Top 100

- 3736** 1879-CC Capped Die, VAM-3, GSA, MS63+ NGC. CAC. A Top 100 Variety. In the September 1965 *Numismatic Scrapbook Magazine*, Leroy Van Allen stated the "Capped Die" variety was a Large CC over Small CC mintmark, and the myriad die chips near the mintmark were from a mint worker's attempt to efface evidence of the initial (and wrong-sized) mintmark punch. The present lustrous example displays a trace of tan-gold toning, and exhibits minimal contact for the MS63+ grade. NGC ID# 253U, PCGS# 533225 Base PCGS# 7088

MORGAN DOLLARS

1880/79-CC Morgan Dollar, MS66
VAM-4, A Top 100 Variety

- 3737** 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS66 PCGS. A Top 100 Variety. This popular Reverse of 1878 VAM variety shows a bold overdate feature. The current coin is high-end for the date and variety. Frosty, original mint lust illuminates boldly rendered design elements, while the surfaces are free of any significant abrasions. Eye appeal is outstanding. Housed in a green label holder. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

1880-CC Morgan Dollar, MS66
8/7 Variety, Reverse of 1878

- 3738** 1880-CC 8/7, Reverse of 1878, VAM-7, MS66 PCGS. A Hit List 40 Variety. This variety is clashed with a dash under the second 8 in the date. Premium Gem examples are scarce. This piece offers sharp detail and frosty, clean surfaces with untuned luster. Only a few tiny surface grazes are observed beneath a loupe. Eye appeal is outstanding. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

1880-CC Silver Dollar, MS66
VAM-7A, Reverse of 1878

- 3739** 1880-CC 8/7, Reverse of 1878, VAM-7A, MS66 PCGS. A Hit List 40 Variety. "8/7 Dash, Clashed Obverse n," according to VAMworld.com. VAM-7A is an elusive variety in high grade. This Premium Gem example displays frosty, untuned mint luster and incredibly sharp design elements. Only a few faint grazes are discernible with a loupe. The Reverse of 1878 1880-CC dollar as a whole is rare finer than the present coin. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110

1880-CC Morgan Dollar, Frosty MS67
Among the Finest Certified

- 3740 1880-CC MS67 PCGS. VAM-9, 8/7 Dash.** A bold dash beneath the second 8 in the date is the chief point of interest on this VAM variety, while a number of minor die lumps confirm the attribution. Overall, the 1880-CC silver dollar is rare in MS67 and unknown finer. This example offers intense, frosty mint luster with a delicate touch of light champagne color. The strike is well-executed, and neither side exhibits distracting abrasions — Liberty's cheek is particularly clean, as are the fields. The 1880-CC is a popular date with collectors, as several major overdate varieties are known. VAM-9 is one of the lesser varieties, although it is still collectible among VAM specialists. Population: 36 in 67 (1 in 67+), 0 finer (4/17). NGC ID# 2542, PCGS# 7100

1880-CC Morgan Dollar, MS66 Prooflike
Only Two Numerically Finer at PCGS

- 3741 1880-CC MS66 Prooflike PCGS.** The 1880-CC Morgan dollar claims a small net mintage of 495,000 pieces, after a number of coins were found to be outside acceptable weight and fineness limits and melted for recoinage. This spectacular Premium Gem exhibits well-detailed design elements, with just a touch of blending on the strands of hair above Liberty's ear. The well-preserved surfaces are hazily reflective and lightly toned, creating bold contrast with the frosty devices. Population: 13 in 66 (1 in 66+), Prooflike, 2 finer (4/17). NGC ID# 2542, PCGS# 7101

GSA DOLLAR

1880-CC GSA Dollar, MS66
Light Original Toning

- 3742 1880-CC GSA MS66 NGC. VAM-9.** A scarcer die variety identified by a round die dot on the lower left corner of the second L in DOLLAR. Light wheat-gold toning adorns this lustrous and carefully preserved scarcer date Carson City dollar. The reverse is virtually void of contact. A GSA box and certificate accompany the lot. NGC ID# 2542, PCGS# 518851 Base PCGS# 7100

MORGAN DOLLARS

1880-S Morgan Dollar, MS68+
Exceptional Silver Type Coin

3743 1880-S MS68+ PCGS. The Morgan dollar was the only silver denomination struck at the San Francisco Mint in 1880, as the Mint struggled to comply with the provisions of the Bland-Allison Act, which mandated the government purchase of millions of ounces of silver to support the price of that precious metal in the face of rising production from the Western mines. A large mintage of 8.9 million silver dollars was accomplished at the San Francisco facility, with most of the unneeded coins stored in Treasury vaults for release in future decades.

Surprisingly, the 1880-S was one of the best produced issues of the series. The present coin is a magnificent Plus-graded MS68 example, with razor-sharp definition on all design elements and virtually pristine surfaces. A few subtle hints of pale gold toning add to the terrific visual appeal. Both sides radiate vibrant mint luster and some areas show hints of prooflike reflectivity at selected angles. PCGS has graded five numerically finer examples (4/17). NGC ID# 2544, PCGS# 7118

1880-S Morgan Dollar, MS68
Conditionally Very Rare in Finer Grades

3744 1880-S MS68 PCGS. CAC. Large S. This sharply struck Superb Gem has beautiful powder-blue and golden-brown bands along the left borders. The reverse is semiprooflike, while the obverse exhibits blazing cartwheel sheen. Careful perusal with a loupe locates only minuscule contact. Certified in a green label holder. PCGS has graded five numerically finer examples (4/17). Ex: Vanek Collection (Heritage, 7/2007), lot 1308, which realized \$5,462.50. NGC ID# 2544, PCGS# 7118

1881-CC Dollar, MS67
Rainbow-Toned Obverse

3745 1881-CC MS67 PCGS. The obverse of this Superb Gem is attractively toned in gold, russet, green, and several other colors, while the reverse is mostly brilliant with splashes of light gold near the border. Pristine surfaces provide a base for the frosty luster on this sharply defined Morgan dollar. Ex: Central States Signature (Heritage, 4-5/2009), lot 2990, where it brought \$3,484.50. NGC ID# 2549, PCGS# 7126

1881-CC Morgan Dollar, MS67
Very Rare Any Finer

3746 1881-CC MS67 PCGS. Golden-brown, sea-green, and lavender shades endow the right reverse margin of this lustrous, low mintage, and beautifully preserved Carson City Morgan. The obverse has only a hint of tan toning. One small spot is noted behind the eagle's neck. Housed in a green label holder. PCGS has graded four numerically finer examples (4/17). Ex: Central States Signature (Heritage, 5/2000), lot 5138. NGC ID# 2549, PCGS# 7126

**1881-S Silver Dollar, MS68
Semiprooflike Fields**

- 3747 1881-S MS68 PCGS. CAC.** Gleaming semiprooflike fields provide a brightly mirrored backdrop for the bold, frosty relief elements of this high-end Morgan dollar type coin. The preservation is exceptional, and blushes of light golden toning attest to the originality of the surfaces. PCGS lists two MS69 coins finer (4/17), although this CAC-endorsed MS68 is piece is among the finest generally considered collectible. NGC ID# 2549, PCGS# 7130

**1883-S Silver Dollar, MS64
Elusive in Finer Grades**

- 3748 1883-S MS64 PCGS.** The 1883-S Morgan dollar is seen with moderate frequency in Choice Mint State and lower grades, but rarely any finer. This example has brilliant silver luster with satin surfaces and wisps of peripheral rose toning. Scattered marks are consistent with the grade. PCGS has certified just 23 numerically finer examples (4/17). NGC ID# 254K, PCGS# 7148

**1885-CC Morgan Dollar, MS67
Only One Numerically Finer at PCGS**

- 3749 1885-CC MS67 PCGS.** The mintmark is tilted left with the right C almost touching the wreath. This beautiful Superb Gem combines the desirability of a limited mintage (228,000 pieces) and the allure of the CC mintmark. The fully untuned surfaces glow with cartwheel luster and exhibit pinpoint striking definition on all of the design elements. A spindly die crack extends along the tops of UNITED STATES OF, and die chips are noted inside of both Cs in the mintmark. Outstanding surface preservation only allows for the presence of a few tiny nicks on either side of this visually alluring silver dollar. PCGS has graded one numerically finer example (4/17). NGC ID# 254S, PCGS# 7160

**1885-CC Silver Dollar
Impressive Carson City Superb Gem**

- 3750 1885-CC MS67 NGC. VAM-3.** The mintmark tilts and a series of die scratches appear at the eye brow and along the inside bridge of the nose in front of the eye, diagnostic of the VAM-3 variety. This is a blazing-white Carson City Superb Gem, brilliant and lustrous with nearly abrasion-free surfaces. Thick mint frost covers the central motifs and the eye appeal is exceptional. PCGS has certified just a single example with a numerically finer grade. Population: 91 in 67 (4 in 67+), 1 finer (4/17). NGC ID# 254S, PCGS# 7160

**1888 Silver Dollar, MS67
Two-Sided Rainbow Border Toning**

- 3751 1888 MS67 PCGS.** This is an available date in all grades through MS66, but the present Superb Gem is conditionally rare and among the finest at PCGS. The strike is sharp, and radiant cartwheel luster has an attractive satin sheen. Vivid rainbow rings surround the borders on both sides, leaving the interiors brilliant. Population: 46 in 67, 0 finer (4/17). NGC ID# 26KE, PCGS# 7182

**1888-O Silver Dollar, MS62
VAM-1B4, Scarface
Late Die State**

- 3752 1888-O Scarface, VAM-1B4, MS62 PCGS.** A Top 100 Variety. This is the sought-after late die state with the crack extending all the way into the hair curls at the base of the neck. The coin is lustrous and lightly toned with lavender-gold hues around the borders. Scattered abrasions determine the grade. The usual strike softness is seen on the central high points. Population: 67 in 62 (4 in 62+), 31 finer (4/17). NGC ID# 2556, PCGS# 133918 Base PCGS# 7184

1889-CC Silver Dollar, AU58
Smooth, Satiny Surfaces

- 3753 1889-CC AU58 PCGS.** This brilliant near-Mint 1889-CC Morgan dollar displays bright, satiny surfaces with luster remaining in the fields. The design elements are sharp, showing only slight high-point friction in harmony with the grade. There is an appreciable lack of individual abrasions. The scarcity of the 1889-CC Morgan in Mint State boosts collector interest in About Uncirculated representatives. Near-Mint coins are elusive compared to the demand for them, and it is unlikely that the average Carson City dollar collector will be able to acquire a Mint State coin without breaking a budget. We look forward to strong bidder interest in this unusually pleasing AU-level example. NGC ID# 2559, PCGS# 7190
-

1889-CC Silver Dollar, MS64 A Great Rarity in This Condition

3754 1889-CC MS64 NGC. The late 1960s was a good time for investors to seek out and purchase Uncirculated 1889-CC Morgan dollars. Already a recognized condition rarity at that time, the famous Carson City issue would only increase in popularity after the GSA sales of the early 1970s. In 1969, an Uncirculated 1889-CC Morgan could be purchased retail for less than \$1,000, according to the *Guide Book*. The GSA sales of 1972 to 1974 changed the landscape of the Carson City Morgan dollar market. Many dates, including all of the early 1880s issues, were flooded into the collecting community in staggering quantities, primarily in Mint State. But the 1889-CC was not so well represented. In fact, only a single '89-CC dollar is known from the entirety of the GSA sales. It was clear that the high-grade population of this key date was not going to increase as did those of most of its counterparts. In just a few short years after the GSA sales, the value of an Uncirculated 1889-CC Morgan more than tripled.

Today, the '89-CC is the rarest of the Carson City issues and is one of the biggest key dates in the Morgan series, regardless of mintmark. The date is scarce in any Mint State grade, but is particularly elusive in MS63. In MS64, it is genuinely rare, and finer representatives are extremely rare and headline auctions whenever they are offered. The last near-Gem NGC coin that we offered was in lot 3664 of our December 2014 Houston Signature sale, where it realized \$70,500. PCGS-graded examples in this grade have breached the six-figure barrier in recent years.

The present coin displays well-struck devices with brilliant surfaces that show partial reflectivity in the fields. Light, scattered surface grazes determine the grade but are less obtrusive than those on some other MS64 coins. This coin is a highlight of the current sale and an outstanding key-date Morgan dollar. Census: 43 in 64 (1 in 64+, 1 in 64 ★), 6 finer (4/17). NGC ID# 2559, PCGS# 7190

**1891 Morgan Dollar, MS65+
Very Rare in Finer Grades**

- 3755 1891 MS65+ PCGS. CAC.** The 1891 Morgan dollar is scarce in MS65 and rare as such with a CAC endorsement. Finer coins are extremely rare. This piece displays well-struck design elements and satiny luster. The obverse shows rich aquamarine, amber-gold, and deep violet toning, while the reverse has similar hues around the border but is brilliant in the center. There are six finer examples certified, three at each service; CAC: 24 in 65, 0 finer (4/17). NGC ID# 255G, PCGS# 7204

**1892-O Morgan Dollar, MS65+
Condition Rarity in Finer Grades**

- 3758 1892-O MS65+ PCGS.** From a mintage of 2.7 million pieces, the 1892-O Morgan dollar is a prime condition rarity in grades above the MS65 level. This Plus-graded Gem exhibits well-detailed design elements, with just a trace of blending on the hair strands above Liberty's ear. The well-preserved surfaces radiate vibrant mint luster, under shades of lavender-gray and greenish-gold toning, with most of the color on the obverse. PCGS has graded six numerically finer examples (4/17). NGC ID# 255N, PCGS# 7216

**1892-CC Silver Dollar, MS65
Seldom Offered Finer**

- 3756 1892-CC MS65 PCGS.** The 1892-CC is available in MS65 for a price, but finer examples are rare. This Gem displays frosty original luster and a radiant cartwheel effect. The usual strike weakness occurs on the hair above Liberty's ear and the eagle's breast feathers. PCGS reports only 31 numerically finer submissions (4/17). NGC ID# 255M, PCGS# 7214

**1893 Morgan Dollar, MS65
Low-Mintage Philadelphia Key**

- 3759 1893 MS65 PCGS.** The 1893 Morgan dollar is a low-mintage Philadelphia issue and the date is very rare in grades above the MS65 level. This attractive Gem exhibits sharply detailed design elements throughout and the well-preserved, mostly brilliant surfaces show delicate hints of lavender-gray toning at selected angles. Vibrant mint luster adds to the outstanding visual appeal. PCGS has graded six numerically finer examples (4/17). NGC ID# 255R, PCGS# 7220

**1892-CC Morgan Dollar, MS65
Well-Preserved, Lustrous Example**

- 3757 1892-CC MS65 NGC.** The 1892-CC Morgan dollar is an elusive issue in grades above MS65. This delightful Gem exhibits sharply detailed design elements throughout, with some faint die cracks visible through some peripheral devices on both sides. The well-preserved brilliant surfaces radiate vibrant mint luster and eye appeal is outstanding. NGC has graded 15 numerically finer examples (5/17). NGC ID# 255M, PCGS# 7214

**1893 Morgan Dollar, MS65
Low-Mintage Issue**

- 3760 1893 MS65 PCGS. VAM-2.** The 3 in the date is lightly repunched north. Orange-gold toning graces the borders of this lustrous and carefully preserved Gem example. The centers show softness of impression, and a pair of mint-made roller marks pass through the eagle's lower body. A low-mintage date. NGC ID# 255R, PCGS# 7220

1893 Dollar, MS62 Prooflike
Very Rare With Reflective Fields

- 3761 1893 MS62 Prooflike PCGS.** In 1993, Bowers described the 1893 Morgan dollar as “very rare” with Prooflike surfaces. That estimation holds up nearly 25 years later, supported by the population totals at the leading grading services. PCGS reports just seven Prooflike submissions, and this MS62 is among the top three (4/17). This bright, untuned semikey displays considerable field reflectivity and pleasing frost over boldly struck devices. Each side is expectedly marked. NGC ID# 255R, PCGS# 7221

1893-CC Morgan Dollar, MS61
Popular Final-Date Issue

- 3762 1893-CC MS61 PCGS. CAC.** The 1893-CC Morgan dollar claims a small mintage of 677,000 pieces, accomplished during the last year of coinage operations at the famous Carson City Mint. This attractive MS61 example is lightly marked for the grade, with sharply detailed design elements and vibrant mint luster on both sides. Housed in an old green label holder. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS62
From the Redfield Collection

- 3763 1893-CC MS62 Uncertified.** This final-year Carson City Morgan silver dollar remains in the Paramount International Coin Corp. distribution holder for the Redfield Collection, a massive accumulation of silver dollars that was distributed in the 1970s. A mostly brilliant and frosty example with lovely peripheral iridescence. The Redfield case is cracked on the right side of the obverse, not affecting the coin. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS63
Final-Date Branch Mint Type Coin

- 3764 1893-CC MS63 PCGS.** As the final date of the Carson City series, the 1893-CC Morgan dollar is a favorite choice of branch mint type collectors. From a small mintage of 677,000 pieces, the 1893-CC was not well-represented in the GSA sales of the 1970's, making it a challenging issue in high grade. This sharply detailed Select specimen offers lightly marked surfaces with vibrant mint luster and outstanding eye appeal. NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS63
Toned Final-Year Carson City Morgan

- 3765 1893-CC MS63 PCGS.** Frosty original luster illuminates lightly abraded surfaces on this Select final-year Carson City Morgan. The surfaces are largely amber-gold in color, although deeper sea-green hues appear around the peripheral relief elements. Slight strike weakness occurs on the central high points, as is usual for this issue. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS64
Rare Issue in Finer Grades

3766 1893-CC MS64 PCGS. A small mintage of 677,000 Morgan dollars was struck at the Carson City Mint in 1893, the last year of coinage operations at the famous Western facility. All the silver dollars were struck before May 23, and the mintage was either released into circulation, or placed in government storage, to be paid out over the years. By the time of the great GSA sales of the 1970s, only one 1893-CC Morgan dollar was left in the government stockpile.

The present coin is an attractive Choice specimen, with sharply detailed design elements throughout. A network of spidery die cracks is evident through the letters in the reverse legends and some clash marks are evident near the wreath. The well-preserved brilliant surfaces show only minor signs of contact and eye appeal is outstanding. PCGS has graded 15 numerically finer examples (4/17). NGC ID# 255S, PCGS# 7222

1893-CC Silver Dollar, MS64
Few Available Finer

3767 1893-CC MS64 PCGS. The 1893-CC is one of three Carson City issues that were represented by only a single coin in the GSA sales of the early 1970s, making it among the more elusive dates in the series in high grade. Choice coins are occasionally available, but collector demand for such pieces is unusually high due to the magnificent rarity of finer representatives. PCGS has seen just 15 Gem or better examples of the 1893-CC dollar (4/17), which in the context of the Morgan series, is an extremely paltry number. The '93-CC is the final Carson City issue of this denomination and holds a special place in the hearts of CC-mint specialists. The current coin displays original frosty luster and well-struck design elements. No major abrasions are observed. NGC ID# 255S, PCGS# 7222

1893-CC Morgan Dollar, MS64
Rare Any Finer

3768 1893-CC MS64 NGC. The fabulous Comstock Lode was finally playing out by 1893, and the far-reaching financial panic that gripped the nation that year resulted in the repeal of the Sherman Silver Purchase Act. With no mandate to produce millions of silver dollars every year, and declining sources of bullion in the area, the Carson City Mint was considered expendable, and the famous Western facility ceased coinage operations on June 1, 1893. Fortunately for present-day numismatists, a small mintage of 677,000 Morgan dollars was struck before the doors closed and collectors value those coins as mementos of a romantic era of the American West.

The present coin is an impressive Choice example, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces are blanketed in natural shades of golden-brown, lavender-gray, and violet toning. NGC has graded eight numerically finer examples (5/17). NGC ID# 255S, PCGS# 7222

1893-O Silver Dollar, MS62
Attractive for the Grade

3769 1893-O MS62 PCGS. A mintage of 300,000 coins for the 1893-O Morgan is among the lowest in the entire series. This date is a semikey in all grades and genuinely rare in the upper Mint State levels. The current MS62 piece is accessible by the average collector, showing a bold strike and cartwheel luster. The interiors are brilliant, surrounded by lavender and sea-green toning. Light marks on Liberty's cheek determine the grade. NGC ID# 255T, PCGS# 7224

1893-O Silver Dollar, MS63+
Scarce Any Finer

3770 1893-O MS63+ PCGS. Occasionally seen in MS63, the 1893-O Morgan dollar is scarce any finer and far out of reach for the average enthusiast in those grades. This collectible Select example displays better-than-average design definition and semiprooflike fields on the reverse. Scattered abrasions on the obverse limit the grade but make limited visual impact due to mottled golden-brown and sea-green toning. NGC ID# 255T, PCGS# 7224

1893-S Morgan Dollar, MS61
Sought-After, Low-Mintage Key
Especially Rare in High Grade

3771 1893-S MS61 PCGS. The Panic of 1893 had far-reaching economic consequences, including the repeal of the Sherman Silver Purchase Act, which had mandated the production of millions of unneeded silver dollars since it replaced the Bland-Allison Act in 1890, and resulted in the depletion of the nation's gold reserves. Accordingly, silver dollar mintages were drastically reduced at all U.S. mints in 1893 and following years. A modest mintage of Morgan dollars was accomplished at the San Francisco Mint in January of 1893, before the effects of the panic were fully realized, but none were coined in later months, resulting in a series-low business-strike mintage of 100,000 pieces for the issue. All the coins were struck from a single pair of dies that show a diagnostic die line on the cross bar of the T in LIBERTY.

Most, if not all, of the small mintage was released into circulation near the time of issue and circulated heavily in the hard-money economy of the Western United States. Conventional wisdom suggests the coins were rarely seen in numismatic circles in the first few decades after they were struck, but a few high-quality examples were saved by contemporary collectors at an early date. John M. Clapp purchased one of the finest examples we know about today from Philadelphia numismatist John Colvin Randall in March of 1894. Another Uncirculated example was offered in the William Friesner Collection (Edouard Frossard, 6/1894), lot 696, described tersely in the section of S-mint dollars as, "1893 Uncirculated." The lot realized only \$1.10. Similar offerings can be found in two sales by the Chapman brothers in 1904, where the coins realized \$1.15 and \$1.25 respectively. Likewise, the coin in lot 545 of the Chapman's H.P. Smith Collection (5/1906) brought only \$1.30. As late as the B.W. Smith Sale (B. Max Mehl, 5/1915), a Fine specimen in lot 731 realized only \$1.85. None of these prominent coin dealers described the 1893-S as rare, and the modest premiums they brought suggests they were not widely sought-after by collectors. It seems the elusive nature of the 1893-S was not recognized in the late 19th or early 20th century.

Although Augustus Heaton published his landmark treatise on mintmarks in 1893, he did not mention the 1893-S as a key issue. Since the book was published before the end of the year, he had no way of knowing how small the mintage would be. Since they were not considered rare or interesting numismatically, the great majority of the coins circulated freely for several decades before collectors began to cull them from circulation in the 1930s. If a large number of coins was initially held in government storage they must have been melted in 1918, under the provisions of the Pittman Act. Only a few, scattered examples were discovered in the Treasury releases of the 1960s. As might be expected, the 1893-S is very rare in Mint State grades today, and the issue is most often seen in VF grades.

Today, the 1893-S is recognized as the rarest issue in the Morgan dollar series in high grade. This attractive MS61 specimen offers sharply detailed design elements and vibrant mint luster, under attractive shades of lavender, gray, and golden-brown toning. The pleasing surfaces show the minimum number of minor contact marks for the grade and overall eye appeal is quite strong. Population: 9 in 61, 26 finer (4/17). NGC ID# 255U, PCGS# 7226

1894 Morgan Dollar, MS63
Low-Mintage Philadelphia Issue

- 3772 1894 MS63 PCGS.** The 1894 Morgan dollar claims a mintage of 110,000 pieces, the second-lowest production total of the series. This impressive Select specimen exhibits well-detailed design elements, with just a touch of the usual softness on the hair above the ear. The creamy, lustrous surfaces show a few scattered minor contact marks and eye appeal is quite strong. NGC ID# 255V, PCGS# 7228

1894 Silver Dollar, MS64
Few Known Finer

- 3773 1894 MS64 NGC.** Frosty and brilliant, this Choice 1894 dollar offers a bold strike and well-preserved surfaces. From a mintage of only 110,000 pieces, the 1894 is available through the AU and lower Mint State grades, but it becomes scarce in MS64 and is rare at the Gem grade level. NGC reports only five pieces finer than the current near-Gem (5/17). NGC ID# 255V, PCGS# 7228

1895-S Silver Dollar, MS64+
Few Abrasions for the Issue, CAC-Endorsed

- 3774 1895-S MS64+ PCGS. CAC.** The low mintage of just 400,000 pieces is one attraction, while the lack of any 1895 business strikes from the Philadelphia Mint and the rarity of 1895-O pieces in Uncirculated grades makes the 1895-S a high-demand issue. A faint glimmer of gold at the centers exists, but this high-end Choice example is otherwise brilliant with frosted devices and moderate reflectivity in the fields. The strike is quite sharp and abrasions are minimal for an 1895-S. Population: 51 in 64+, 45 finer. CAC: 64 in 64, 8 finer (4/17). NGC ID# 255Z, PCGS# 7238

1896-S Morgan Dollar, MS65
Prime Condition Rarity in Finer Grades

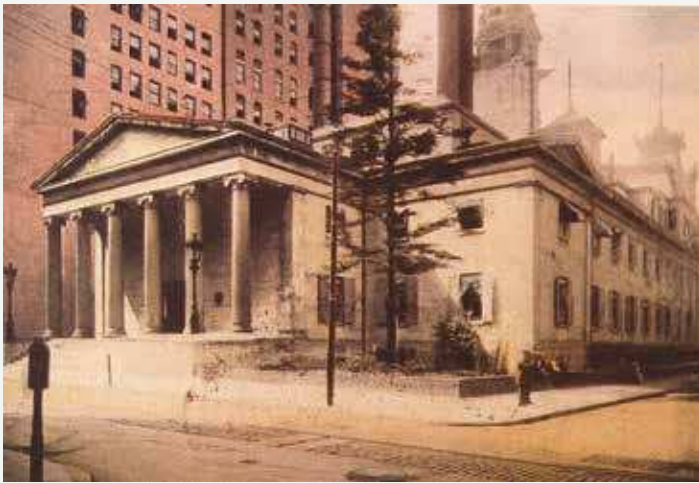

- 3775 1896-S MS65 PCGS.** Despite the more-than-adequate mintage of 5 million pieces, the 1896-S Morgan dollar is one of the most challenging issues of the series in high grade. Even circulated examples are comparatively scarce, suggesting many specimens may have been melted in 1918, under the provisions of the Pittman Act. Additionally, the 1896-S was not a well-produced issue, and many survivors have weak strikes and subdued luster. Excessive surfaces marks are often a problem.

This attractive Gem exhibits well-detailed design elements that show just a touch of the typical softness on the hair strands above Liberty's ear. The surprisingly well-preserved surfaces are mostly brilliant, with a few subtle highlights of golden-tan and lavender. Vibrant mint luster radiates from both sides and eye appeal is outstanding. Population: 73 in 65 (3 in 65+), 5 finer (4/17). NGC ID# 2564, PCGS# 7244

1901 Silver Dollar, MS62
Satin and Lightly Toned

3776 1901 MS62 PCGS. Well-struck, satiny, and lustrous, this Mint State 1901 Morgan dollar offers quite a bit of eye appeal for the grade. Each side has a hint of light golden toning, and grade-limiting abrasions are at a minimum. Finer 1901 Morgans become increasingly elusive and costly to acquire. NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS64
Clean Surfaces for the Grade
A Major Rarity This Fine

3777 1901 MS64 PCGS. We rarely have an opportunity to offer a 1901 Morgan dollar in Choice condition. The date is genuinely rare this fine and prohibitively so any finer, fully embracing its status as one of the biggest condition keys in the series. The last two MS64 examples that we offered realized \$47,000 and \$51,700, respectively. The most recent Gem that sold at auction was an NGC coin in Bowers and Merena's November 2009 Baltimore auction, which realized more than \$155,000. Clearly, the rarity of the 1901 Morgan dollar in high grade is not at all overstated.

This near-Gem offers a hint of light golden toning atop the usual satin luster. The strike is a trifle soft on the eagle's breast feathers but bold elsewhere. To the unaided eye, the coin appears a grade point finer, but a loupe reveals a few faint marks that affirm the MS64 designation. We look forward to this coin's sale with great anticipation. Population: 35 in 64, 3 finer (4/17). NGC ID# 256J, PCGS# 7272

**1901-O Dollar, MS65 Deep Mirror Prooflike
Scarce as a Gem and With Reflective Fields**

- 3778 1901-O MS65 Deep Mirror Prooflike NGC.** The 1901-O is readily obtained in lustrous Mint State, but Gems with prominently reflective fields are rare. This nicely struck example displays rich peach-gold, rose-red, and forest-green toning throughout the borders. Cameo contrast is produced on both sides. Certified in a former generation NGC holder. Census: 22 in 65 Deep Mirror Prooflike, 1 finer (5/17). NGC ID# 256K, PCGS# 97275

**1903-S Silver Dollar, MS63
Old 'Rattler' Holder**

- 3779 1903-S MS63 PCGS.** Early 20th century Morgan dollars usually have a New Orleans mintmark. Aside from the 1901, the two conditional rarities from that decade are both from the San Francisco Mint: the 1903-S and 1904-S. The present 1903-S dollar displays light wheat-gold toning and potent cartwheel luster. The reverse is well preserved, and the left obverse shows only moderate contact. Certified in a first-generation "rattler" holder. NGC ID# 256T, PCGS# 7288

PROOF MORGAN DOLLARS

**1880 Morgan Dollar, PR67 Cameo
Spectacular Toning and Contrast**

- 3780 1880 PR67 Cameo PCGS.** We have pointed out many times before that any Gem proof Morgan dollar is a condition rarity, and that obviously applies far more so to this Superb Gem Cameo 1880-dated proof, one of 27 submissions (certainly not all separate coins) in this grade (two in MS67 ★, two in MS67+) with 17 finer at NGC (4/17). This is not an untuned proof; *au contraire*, both sides are toned, but from quite different palettes. The center obverse is silver with concentric sunset-orange, fire-red, and cobalt-blue, the reverse showing pale pastel tones moving in horizontal bands from top to bottom, smoke-gray, rose, and the palest jade hue imaginable. The contrast and eye appeal are absolutely stunning.
Ex: FUN Signature (Heritage, 1/2014), lot 6022; Long Beach Signature (Heritage, 1/2015), lot 3222. NGC ID# 27Z4, PCGS# 87315

1880 Morgan Dollar, PR68 Cameo
One Finer Coin at NGC

- 3781 1880 PR68 Cameo NGC.** The Trade dollar was only produced in proof format in 1880, sparking a short-lived, but extensive, speculation in proof sets that year. The increased demand for proof sets resulted in a generous mintage of 1,355 proof Morgan dollars, as a kind of “coat tail” effect. Despite the larger than average production total, the 1880 Morgan dollar is very rare in PR68 condition, with Cameo surfaces. This magnificent specimen exhibits razor-sharp definition on the richly frosted design elements, and the fields are deeply reflective, creating intense cameo contrast. The essentially brilliant surfaces show a few delicate hints of pale gold toning, enhancing the incredible eye appeal. Census: 16 in 68 Cameo (3 in 68★), 1 finer (5/17). NGC ID# 27Z4, PCGS# 87315

1886 Morgan Dollar, PR67
Among the Finest Non-Cameos Known

- 3782 1886 PR67 PCGS.** The 1886 proof Morgan is available in low grades but rare above the Gem level. PCGS has seen only eight examples in PR67, including four non-Cameos, two Cameos, and two Deep Cameos. None are finer in any of the three categories (5/17). This top-grade non-Cameo shows deep original toning atop fully struck design elements and deeply reflective fields. Orbs of silvery-lavender form off-set centers on each side, surrounded by more vivid amber, olive-gold, and aquamarine rings that stretch to the rims. The collector of old-time proof dollars will appreciate the strong aesthetics of this Superb Gem 1886 Morgan. NGC ID# 27ZF, PCGS# 7321

1895 Morgan Dollar, PR64+ Cameo
Famous Series Rarity
Only Known in Proof Format

3783 1895 PR64+ Cameo PCGS. Intrigue regarding the production of any business strike Morgan dollars in 1895 has persisted for more than 120 years. Officially, Philadelphia Mint records indicate a production of 12,000 business strikes were coined in June 1895. However, the failure of any authenticated circulation strike examples to surface tends to support two conceivable scenarios. It is possible that the entire 12,000-coin mintage was melted under the terms of the Pittman Act of 1918, and that no coins ever got into the hands of entrepreneurial Mint employees or well-connected collectors. Another possibility is that the Mint never produced any pieces in the first place. The prevailing opinion among most numismatic researchers tends to support the latter scenario, which suggests the reported mintage of 12,000 coins is merely the result of an improper entry or clerical error.

One notable voice supporting the actual mintage of circulation strikes comes from Roger Burdette, who documented evidence that the blanks were on hand, later shown on the cashier's daily balance that they were struck on June 28, 1895, and that six circulation samples were indeed provided to the assay commission. Although no circulation strike dies were prepared in 1895 according to Chief Engraver Charles Barber's annual report of dies, the circulation strike coins were perhaps struck from proof dies. Burdette concluded the whereabouts of the coins is still unknown, but most likely they were melted.

Whether they were melted or misrepresented in the ledger books, business strike representatives are unavailable to those looking to complete a Morgan dollar date and mintmark set. Consequently, collectors must turn to the estimated 400 survivors from an original mintage of 880 proofs. The result is perennially fierce competition for an extremely limited supply of 1895 Morgan dollar proofs in relation to collector demand. The issue's captivating history, relative scarcity, and legendary status make it the "King of the Morgan Dollars," and the presence of an example in any collection is the mark of a series specialist.

The present coin is an attractive, high-end Choice specimen with razor-sharp definition on all design elements and deeply mirrored fields that contrast boldly with the frosty devices. The well-preserved surfaces show a few highlights of pale gold toning and eye appeal is outstanding. Population: 34 in 64 (2 in 64+) Cameo, 33 finer (4/17). NGC ID# 27ZR, PCGS# 87330

1902 Silver Dollar, Toned PR67
Few Known So Fine

- 3784 1902 PR67 PCGS. CAC.** The number of proof 1902 Morgan dollars in the Cameo category is so small that it is almost irrelevant for collectors. This Superb Gem non-Cameo is conditionally rare and in the upper reaches of the non-Cameo population — usually the finest that collectors can hope to acquire. The strike is a trifle soft on the eagle's breast feathers and the hair above Liberty's ear but sharp elsewhere. The fields are deeply reflective. Deep sea-green and lavender toning merges across much of each side, giving this coin a uniform appearance. No distracting marks or hairlines are observed beneath the rich patina. CAC-endorsed in a green label holder. Population: 5 in 67, 3 finer. CAC: 4 in 67, 1 finer (4/17). NGC ID# 2822, PCGS# 7337

1903 Morgan Dollar, PR67
Registry Grade Example

- 3785 1903 PR67 PCGS.** The Philadelphia Mint switched to an all-brilliant finish for proof coins in 1902, polishing the recessed areas of the dies to minimize mint frost and contrast, and the new finish was continued in following years. Only 755 proof Morgan dollars were struck in 1903, produced in quarterly deliveries throughout the year. The present coin is a delightful Superb Gem, with razor-sharp definition on all design elements and deeply reflective fields. The impeccably preserved surfaces are blanketed in pale shades of greenish-gold toning. This coin should find a home in a fine collection or Registry Set of proof Morgan dollars. Population: 10 in 67 (1 in 67+), 1 finer (4/17). NGC ID# 2823, PCGS# 7338

1904 Dollar, PR67
Final Regular-Issue Morgan Proof

- 3786 1904 PR67 NGC.** A stunning example of the all-brilliant proof format employed by the Mint in the years leading up to the end-of-decade experiments in other proof formats. Dappled steel-blue and russet toning at the borders surround chromelike silver centers of this Superb Gem. Despite the Mint's intention, the central motifs show a thin coat of mint frost that contrast with the glassy-mirrored fields. Census: 23 in 67 (1 in 67+, 1 in 67★), 4 finer (5/17). NGC ID# 2824, PCGS# 7339

1921 Morgan Dollar, PR63 ★
Zerbe Proof, VAM-1AG

3787 1921 Zerbe PR63 ★ NGC. Zerbe proofs are a controversial issue, supposedly struck at the behest of prominent numismatist Farran Zerbe. Per VAMworld.com, researcher Ash Harrison studied 1921 Morgan dollars designated as Zerbe proofs by the leading third party grading services. He determined that they were typically VAM-1AG, identified by specific die scratches on both sides of the coin. These are evident on the present coin, as is the line to the dentils from the second U in UNUM, the chief diagnostic for VAM-47, the traditional Zerbe proof assignment. This is a brilliant, satiny, and fully struck specimen with exemplary surfaces for the Select level. NGC ID# 257A, PCGS# 7341

PEACE DOLLARS

1927-D Peace Dollar, MS65+
Seldom Encountered Finer

3788 1927-D MS65+ PCGS. CAC. The 1927-D Peace dollar is a better date in the series and the issue is conditionally rare above the MS65 grade level. This Plus-graded Gem exhibits sharply detailed design elements and well-preserved surfaces that show subtle hints of golden-tan toning on both sides. Vibrant mint luster adds to the terrific eye appeal. PCGS has graded 13 numerically finer examples (4/17). NGC ID# 257T, PCGS# 7371

1928-S Peace Dollar, MS65
Only One Finer Coin at NGC

3789 1928-S MS65 NGC. From a mintage of 1.6 million pieces, the 1928-S Peace dollar is surprisingly elusive in high grade and the rarest issue of the series at the MS65 grade level. The 1928-S was not well-produced in general, and striking problems were the rule, rather than the exception, with this issue. Additionally, the 1928-S was somewhat overlooked by contemporary collectors, and relatively few examples were saved in pristine condition.

The present coin is an attractive Gem, with a much better-than-average strike and vibrant, satiny mint luster throughout. The well-preserved surfaces are visited by attractive highlights of greenish-gold, lavender-gray, violet, and amber toning. Overall eye appeal is terrific. Census: 42 in 65, 1 finer (5/17). NGC ID# 257W, PCGS# 7374

1935 Peace Dollar, MS66+
Tied for Finest at PCGS

3790 1935 MS66+ PCGS. CAC. The 1935 Peace dollar is a scarce issue at the MS66 grade level and finer coins are virtually unobtainable. This Plus-graded Premium Gem offers well-detailed design elements and impeccably preserved, lustrous surfaces with highlights of golden-tan toning. PCGS has graded no examples in numerically finer grades. CAC: 75 in 66, 0 finer (4/17). NGC ID# 2582, PCGS# 7378

EISENHOWER DOLLAR

1978-D Eisenhower Dollar, MS67
Lovely Rainbow Toning

- 3791 1978-D MS67 PCGS.** The 1978-D Eisenhower dollar is a great condition rarity in MS67. PCGS has seen three coins in this grade and NGC four, with none finer at either service (5/17). The present coin is a must-have Registry Set item. The strike is bold, and the satiny surfaces showcase beautiful rainbow hues in concentric circles. We have never before offered a Superb Gem example in a PCGS holder. NGC ID# 258R, PCGS# 7426

GOLD DOLLARS

1852-D Gold Dollar, AU58
Low-Mintage Better Date

- 3792 1852-D AU58 NGC. Variety 4-F.** The 1852-D Type One gold dollar claims a mintage of 6,360 pieces, making it one of the scarcer issues of the Dahlonega series. This impressive near-Mint specimen shows just a trace of wear on the well-detailed design elements, with some dramatic clash marks on both sides and a faint die crack near the final A in AMERICA. The lightly abraded orange-gold surfaces retain much original mint luster. Census: 34 in 58, 30 finer (5/17). NGC ID# 25BS, PCGS# 7519

1853 Gold Dollar, MS66
Frosty and Bold Type One Example

- 3793 1853 MS66 PCGS.** More than 4 million gold dollars were struck by the Philadelphia Mint in 1853, by far the largest mintage of the series. This example shows faint die clashing but only minor die wear at the borders. The centers are razor-sharp — especially the portrait — with vertical striations that radiate mint luster. The lemon-gold surfaces show pleasing orange and rose-gold accents. Marks are few, with an oval of grease that was struck into the reverse at the time of manufacture between N and I of UNITED. NGC ID# 25BU, PCGS# 7521

1853 Type One Gold Dollar
Glittering Premium Gem

- 3794 1853 MS66 PCGS.** A strong die crack at star 3 is typical of the difficulties encountered when striking the Type One gold dollars, which led to one design change in 1854, and yet another in 1856. The dies were often cracked or clashed, although this radiant Premium Gem shows no signs of die clashing. Finely grained surfaces are frosted and sharply struck for the issue — uncommonly so — as confirmed by the high Mint State grade. In spite of a mintage exceeding 4 million pieces, the 1853 is scarce in MS66 and rare any finer. Population: 60 in 66 (5 in 66+), 12 finer (4/17). NGC ID# 25BU, PCGS# 7521

1854 Gold Dollar, MS63
Type Two Representative

- 3795 1854 Type Two MS63 PCGS.** Struck from worn, clashed dies but still moderately well-detailed, this Select 1854 Type Two gold dollar displays grade-appropriate abrasions and pleasing straw-gold coloration. The 1854 is one of only two dates of the Type Two design that are usually available in Mint State for type purposes. NGC ID# 25C3, PCGS# 7531

1854 Type Two Gold Dollar, MS63
Strong Strike and Excellent Mint Luster

- 3796 1854 Type Two MS63 PCGS.** This short-lived Type Two design is always popular for type, and the 1854 issue is the date of choice for collectors seeking a Select or finer Mint State example. Struck from clashed dies, the present example shows relatively few abrasions or marks and a strong strike on the Small Head motif. Lovely orange-gold color shines from the frosted and lustrous surfaces, which are attractive and high-end for the assigned grade. NGC ID# 25C3, PCGS# 7531

**1858-S Gold Dollar, MS63
Underrated Issue in Mint State**

3797 1858-S MS63 PCGS. From a mintage of 10,000 pieces, the 1858-S gold dollar is a major rarity in Mint State grades, and the issue is definitely underrated when compared to the more popular emissions from the Charlotte and Dahlonega Mints. Few examples were saved by contemporary collectors, as collecting branch mint issues was not popular before Augustus Heaton published his landmark treatise on mintmarks in 1893. The typical survivor grades no better than VF-XF and probably no more than 12-18 examples are extant in Mint State grades.

The present coin is an attractive Select specimen, with sharply detailed design elements and pleasing orange-gold surfaces that show only scattered, minor signs of contact. Satiny mint luster is present throughout, but slightly dimmed on the obverse. Population: 2 in 63, 2 finer (4/17). NGC ID# 25CK, PCGS# 7550

**1882 Gold Dollar, MS67+
Few Known Finer**

3798 1882 MS67+ PCGS. CAC. Despite its small mintage of 5,000 coins, the 1882 gold dollar is collectible in high grade. However, this high-end Superb Gem example is conditionally elusive, and finer pieces are rare. The strike is sharp, and the fields are subtly reflective with rich orange-gold and peach hues. We observe no mentionable abrasions. Population: 33 in 67 (4 in 67+), 11 finer. CAC: 14 in 67, 11 finer (4/17). NGC ID# 25DL, PCGS# 7583

**1889 Gold Dollar, MS68
Registry Grade Specimen**

3799 1889 MS68 NGC. A magnificent MS68 gold dollar from a mintage of 29,000 pieces, this coin exhibits sharply detailed design elements and unusually vibrant mint luster on both sides. The orange-gold surfaces are virtually pristine and overall eye appeal is terrific. This coin should find a home in the finest collection or Registry Set. Census: 17 in 68 (1 in 68+), 0 finer (5/17). NGC ID# 25DU, PCGS# 7590

PROOF GOLD DOLLARS

1877 Gold Dollar, PR66 Ultra Cameo
Elusive in All Grades

3800 1877 PR66 Ultra Cameo NGC. This Gem proof 1877 gold dollar has a perceptible orange-peel effect due to improper die annealing on both sides, and a loupe reveals some small dotlike planchet impressions of little significance on the portrait of Liberty. Both the proof and circulation-strike issues of this evocative date were produced in limited numbers, 20 of the former and 3,900 of the latter. This coin's yellow-orange fields sparkle with reflectivity and contrast nicely against the deeper reddish-orange, frosted devices on each side, producing an appealing degree of cameo contrast.

As one might expect from an issue of only 20 proof coins (and a denomination whose proof examples were often subjected to multiple indignities including frequent mounting as jewelry or being spent outright during hard times), Premium Gem survivors of the 1877 are quite rare. Several other examples are certified in the Cameo or Deep/Ultra Cameo grades, but the population data are clearly riddled with duplications. Census: 3 in 66 Ultra Cameo (1 in 66 ★), 0 finer (4/17). NGC ID# 25EL, PCGS# 97627

1882 Gold Dollar, PR65 Deep Cameo
125 Examples Struck

3801 1882 PR65 Deep Cameo PCGS. The mintage of proof gold dollars rose above three figures in 1882 for the first time since 1861. A generous mintage of 125 proof gold dollars was accomplished in 1882, with small deliveries spaced throughout the year to satisfy customer demand. Of course, this production figure was dwarfed by the 207 proofs produced the following year and the 1,000+ proof mintages from 1884-1889. The issue has a fairly high survival rate, with probably 60-80 examples extant in all proof grades today.

The present coin is sharply detailed throughout, with deeply reflective fields that contrast profoundly with the frosty devices. The highest ribbon point is below the left side of the second 8 in the date and the interiors of many letters in the legend are frosty. The well-preserved lemon-yellow surfaces show a tiny planchet flake in the right obverse field and a few minor lintmarks on the reverse. Overall eye appeal is terrific. Population: 4 in 65 (1 in 65+) Deep Cameo, 7 finer (4/17). NGC ID# 25ES, PCGS# 97632

EARLY QUARTER EAGLES

1796 No Stars Quarter Eagle, Lustrous AU50
More-Available BD-2 Variety

3802 1796 No Stars on Obverse, BD-2, R.4, AU50 PCGS. Bass-Dannreuther Die State c/b. This was the second use of this obverse die, after it struck the small quota of BD-1 (Extended Arrows) coins. The obverse shows the lower hair curls of Liberty lapped but still intact. The remnants of the earlier die crack through the bases of LIBERTY are largely effaced from lapping, now confined to traces of the crack on each side of the E, the one on the right continuing through the R and its diagonal. A curving crack from 9 o'clock rises upward into the left obverse field, but there is as yet no trace of a later second crack (State d) that will appear nearby. The reverse shows a die lump at the right-side rim, above the eagle's right (facing) wing. Planchet adjustment marks show on the reverse, one set running diagonally through the eagle's head, neck, breast, and upper (horizontal) shield lines, a second set running horizontally through the lower (vertical) shield stripes, and a third smaller set running intermittently in two directions through the centermost clouds.

About half of the original luster remains on this piece, which sports prevailing wheat-gold color with some original patina around the device edges in hues of lilac, rose-copper, and pale blue. A few linear marks appear on the portrait of Liberty, including on the bustline, the lower drapery, the hair behind the ear, and the middle of the cap. A small planchet depression, as made, shows near the obverse rim at 8 o'clock.

Technical descriptions such as this one aside, the 1796 No Stars carries crucial importance as the first year of the type, and a distinct one-year design. Collectors never tire of pursuing collectible examples such as this attractive piece.

From The Faris Collection. NGC ID# 25F2, PCGS# 45501 Base PCGS# 7645

1808 Quarter Eagle, XF45 An Essential One-Year Type

3803 1808 BD-1, R.4, XF45 PCGS. Die State b. Any United States gold coin type collection would be incomplete without an example of the 1808 Capped Bust quarter eagle. Ranked among Jeff Garrett and Ron Guth's *100 Greatest U.S. Coins* (fourth edition), the 1808 is a famous and widely sought-after single-year type. The issue's low production total of just 2,710 coins heightens its desirability, and while there are several other dates in the early quarter eagle series that surpass it in terms of overall rarity, the 1808 is arguably the most in-demand because of its unique type coin status.

John Reich immigrated to the United States from his native Germany in 1800 to take a position at the Philadelphia Mint befitting an engraver of his caliber. However, in the early years Reich was displeased with the menial tasks he had been assigned and contemplated a return to Europe. His fortune changed for the better in 1807, when he was promoted to the position of Assistant Engraver. In that same year Mint Director Patterson charged Reich with proposing a series of new coinage designs. His Capped Bust motif was quickly accepted and implemented starting with the half dollars and half eagles of 1807, followed by the half cents, cents, and quarter eagles of 1808, and the dimes and quarter dollars of 1809. Rather than include his initials, Reich signed the coins bearing his design with a small notch on the star 13 punch.

The low production of just 2,710 quarter eagles, all struck on February 26 using a single pair of dies, largely reflects the denomination's lack of popularity among the public. The two and a half dollar coins had fallen out of favor with gold depositors, as their face value was too high for domestic circulation and half eagles were preferred for international exchange. This is reflected by the comparatively high mintage of 55,578 half eagles accomplished in the same year, and the Mint's failure to strike any more quarter eagles until 1821. In addition to the low mintage of the 1808, the issue's high attrition rate further explains its rarity. Breen (1988) suggests that it may have been a result of the dies breaking early in the minting process, narrowing the borders and exposing the surfaces to excessive wear. The Bass-Dannreuther reference (2006) estimates that just 125 to 150 coins are extant. This is a bright orange-gold example that shows only slight, even wear over the high points and traces of mint luster can still be found surrounding the devices. The most readily available pedigree identifier is a small, round abrasion located just below the eagle's beak.

From The Faris Collection. NGC ID# BFVZ, PCGS# 45515 Base PCGS# 7660

1827 BD-1 Quarter Eagle, AU55
The Usual Die State

1831 Capped Head Left Quarter Eagle, MS61
BD-1, Only Dies for the Date

3804 1827 BD-1, R.5, AU55 PCGS. This is the only die variety of 1827 quarter eagles, and the obverse is therefore unique to the BD-1 die pair. The reverse appeared on some 1825 quarter eagles, and all 1826 and 1827 quarter eagles. Bass-Dannreuther Die State a/c, as usual for the variety. The obverse die is perfect, as expected, with no die cracks, clash marks, or evidence of lapping. The reverse has a very slight clash mark below the left end of the scroll that appears to be from Liberty's throat. The die has been lapped, and there are no other clash marks or die cracks.

The mintage is estimated between 1,750 and 2,800 pieces, according to John Dannreuther who estimates that 45 to 55 examples are known today. This example has pleasing light greenish-gold surfaces and sharp design features on a well-centered impression with scattered, grade-consistent marks. Population: 8 in 55, 20 finer (4/17). NGC ID# BFW6, PCGS# 45522 Base PCGS# 7666

3805 1831 BD-1, R.4, MS61 NGC. Bass-Dannreuther Die State a/a. A small mintage of 4,520 Capped Head Left quarter eagles was accomplished in 1831, with a single die variety known for the date. This was the only use of the obverse die, but the reverse was used to strike all quarter eagles produced from 1830 through the end of the series in 1834. Probably no more than 110-125 examples of the issue survive today in all grades.

The present coin is a pleasing MS61 specimen, with sharply detailed design elements in most areas, and just a touch of softness on the area at the juncture of the shield and left (facing) wing. Close inspection with a loupe reveals some faint planchet adjustment marks in the cap and hair above the brow. The antique-gold surfaces are lightly abraded for the grade and traces of prooflike reflectivity are evident in sheltered areas around the peripheral devices. NGC ID# BFWA, PCGS# 45525 Base PCGS# 7671

1833 Two and a Half, BD-1, AU58
Excellent Color, Reflective Fields

- 3806** 1833 BD-1, R.5, AU58 PCGS. Bass-Dannreuther Die State a. Only one die variety is known for the 1833 quarter eagle, and there are fewer than 80 examples believed known. In *Early U.S. Gold Coin Varieties*, John Dannreuther writes: "... all known examples of this entire type number only into the hundreds, as the noted meltings consumed the vast majority of them." Most surviving 1833 coins are in the XF and AU grades, with occasional appearances at the low end of the Mint State spectrum. This near-Mint coin is highly appealing, showing prooflike fields and bold design elements. Violet overtones in the fields complement the orange-gold coloration elsewhere. A rare and important early gold offering. Population: 4 in 58, 14 finer (4/17).

From The Faris Collection. NGC ID# BFWC, PCGS# 45527 Base PCGS# 7673

CLASSIC QUARTER EAGLES

1839 Classic Quarter Eagle, MS61
Seldom Seen Any Finer

- 3807** 1839 MS61 NGC. Breen-6148, Variety 21, R.3. From a mintage of 27,021 pieces, the 1839 Classic Head quarter eagle is rare in MS61 condition, and very rare any finer. This impressive MS61 specimen exhibits well-detailed design elements, with just a touch of softness on some star centers and the shield border. The lustrous orange-gold surfaces are lightly abraded and eye appeal is strong. The final digit in the date is recut, causing earlier numismatists to believe this issue was an overdate. Census: 9 in 61, 4 finer (4/17). NGC ID# 25G3, PCGS# 7698

1839-C Two and a Half, AU50
Late Die State

- 3808** 1839-C AU50 PCGS. Breen-6150, Winter-2, Variety 22, R.4. The 3 in the date is boldly recut. Die cracks appear on the obverse from the rim toward the center from stars 2 and 9 and the 3 in the date. The reverse has die breaks through the eagle's beak and along the top of the left (facing) wing. The coin is well-detailed and displays pleasing olive-gold patina with coppery and greenish overtones in the peripheral fields. NGC ID# 25G4, PCGS# 7699

LIBERTY QUARTER EAGLES

1845 Quarter Eagle, MS63+
Rare in Mint State

- 3809** 1845 MS63+ PCGS. In Mint State, the 1845 quarter eagle is among the more plentiful dates from the 1840s, although it is still itself a rarity in this condition. Here offered is a Plus-designated Select example with a sharp strike and partially reflective fields. Only light, scattered grazes determine the grade. A heavy die crack bisects the reverse from wingtip to wingtip, cutting across the eagle's neck. Population: 8 in 63 (1 in 63+), 6 finer (4/17). NGC ID# 25GW, PCGS# 7737

**1857 Liberty Quarter Eagle, MS66
Tied for Finest at NGC**

- 3810 1857 MS66 NGC.** The 1857 Liberty quarter eagle claims a substantial mintage of 214,130 pieces, but the issue is very rare at the MS66 grade level. This delightful Premium Gem exhibits sharply detailed design elements in most areas, but the eagle's left (facing) leg shows a touch of the usual softness. The lustrous orange-gold surfaces are impeccably preserved and eye appeal is terrific. Census: 4 in 66, 0 finer (5/17). NGC ID# 25JC, PCGS# 7782

**1880 Two and a Half, MS63 Prooflike
Contrasted and Reflective**

- 3811 1880 MS63 Prooflike NGC. CAC.** This is the finest of three Prooflike 1880 quarter eagles certified at NGC (5/17). The strike is needle-sharp and each side offers appreciable cameo contrast. Scattered light abrasions are not obtrusive. The 1880 comes from a mintage of only 2,996 pieces and is scarce in any Mint State grade. Including non-Prooflike pieces, NGC has seen just five submissions in MS63 and nine finer (5/17). NGC ID# 25L4, PCGS# 77832

**1890 Two and a Half, MS65
Conditionally Rare**

- 3812 1890 MS65 PCGS.** Surviving from a limited mintage of 8,720 pieces, this beautiful 1890 quarter eagle displays clean, semi-reflective surfaces and great eye appeal. The coin is fully struck overall with a hint of green-golden patina seen at the reverse border. The 1890 is scarce in all grades and a genuine rarity in MS65. Population: 7 in 65, 1 finer (4/17).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 8158. NGC ID# 25LE, PCGS# 7842

**1899 Two and a Half, MS67
Top-Grade PCGS Rarity**

- 3813 1899 MS67 PCGS.** One of the finest pieces at PCGS, this Superb Gem 1899 quarter eagle offers bold detail and frosty, unblemished wheat-gold mint luster. Eye appeal is outstanding. NGC reports a single coin finer, although the entire combined PCGS and NGC population in MS67 and higher grades is only 15 coins. Population: 8 in 67, 0 finer (4/17). NGC ID# 25LP, PCGS# 7851

**1906 Two and a Half, MS67+
Pristine Yellow-Gold Luster**

- 3814 1906 MS67+ PCGS.** As the Plus designation indicates, the MS67 grade is conservative on this high-end 1906 Liberty quarter eagle. The strike is sharp, and we can find no distinct imperfections in the frosty yellow-gold luster. The 1906 is a popular type coin, although Superb Gems are conditionally scarce, and pieces grading finer than the present example are extremely rare. Population: 72 in 67 (6 in 67+), 2 finer (4/17). NGC ID# 7JW8, PCGS# 7858

INDIAN QUARTER EAGLES

**1911-D Indian Quarter Eagle, AU58
Low-Mintage Series Key**

- 3815 1911-D AU58 NGC.** The 1911-D Indian quarter eagle is the most sought-after issue of the series, from a memorably low mintage of 55,680 pieces. This impressive near-Mint specimen displays just a trace of wear on the strongly impressed design elements, but the mintmark is a little faint. The pleasing orange-gold surfaces are lightly abraded, with traces of original mint luster. NGC ID# 7KR7, PCGS# 7943

**1911-D Indian Quarter Eagle, AU58
Strong D Mintmark**

- 3816 1911-D AU58 PCGS.** Strong D. The 1911-D Indian quarter eagle is the acknowledged key to the series, due to its low mintage of 55,680 pieces. This attractive near-Mint specimen shows just a trace of wear on the well-detailed design elements and the D mintmark is quite bold. The pleasing orange-gold surfaces are lightly abraded and the original mint luster is only slightly dimmed. NGC ID# 7KR7, PCGS# 7943

**1911-D Quarter Eagle, AU58
Strong D, Excellent Eye Appeal**

- 3817 1911-D AU58 PCGS. CAC.** Strong D. A sharp wire rim along the right-hand obverse border and a strong, clear mintmark confirm the authenticity of this near-Mint 1911-D quarter eagle. A CAC endorsement accompanies original bronze-gold coloration and smooth fields. Hints of satin luster remain in the recesses. The key Denver issue of the Indian quarter eagle series is seldom found in the AU grade range with original, eye-appealing surfaces. NGC ID# 7KR7, PCGS# 7943

**1911-D Two and a Half, MS61
Strong D Mintmark**

- 3818 1911-D MS61 PCGS.** An almond-gold representative of this perennial want list favorite. Many '11-D quarter eagles have a faint mintmark, but the D has full relief on the present satiny example. The surfaces are uncommonly free from marks, and we note only minor incompleteness of detail on the eagle's shoulder and the base of the headdress. NGC ID# 7KR7, PCGS# 7943

**1914 Indian Quarter Eagle, MS64+
Elusive Issue in Finer Grades**

- 3819 1914 MS64+ PCGS.** The 1914 Indian quarter eagle claims a mintage of 240,000 pieces, the second-lowest production total of the series. Nice MS64 specimens can be found with a little patience, but finer examples are very scarce. This attractive Choice specimen exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. PCGS has graded 64 numerically finer examples (4/17). NGC ID# 7KRA, PCGS# 7946

**1925-D Quarter Eagle, MS66
Superior Strike, Nice Luster and Color**

- 3820 1925-D MS66 NGC.** The sharp strike is nearly unaffected by minor die buckling that is mostly visible at the lower obverse rim, and the reverse is especially bold for this Denver issue with a sharp mintmark and crisply defined plumage on the eagle's shoulder. Marks are limited to a few wispy lines, none of which significant even at the Premium Gem grade. Lustrous, straw-gold surfaces gleam brightly with attractive coloration. The 1925-D is seldom finer, with NGC reporting a single numerically finer piece and no examples exceed MS66 at PCGS. NGC census: 54 in 66 (2 in 66★), 1 finer (4/17). NGC ID# 7KRD, PCGS# 7949

THREE DOLLAR GOLD PIECES

**1860-S Three Dollar Gold, AU50
Hints of Luster Remain**

- 3821 1860-S AU50 PCGS.** Not counting the unique and uncollectible 1870-S, the 1860-S is one of only four three dollar gold issues struck at the San Francisco Mint. Token quantities of this denomination were also produced in New Orleans and Dahlonega in 1854, but the bulk of the series was struck at Philadelphia. This About Uncirculated 1860-S is well-detailed with relatively smooth surfaces and medium wheat-gold color. Hints of luster remain in the protected regions of the fields. Population: 14 in 50, 35 finer (4/17). NGC ID# 7K5M, PCGS# 7981

1888 Three Dollar Gold, MS66
Reflective Fields, Rich Color

3822 1888 MS66 PCGS. The 1888 three dollar gold piece is one of only a few dates in the series that can be considered collectible in MS66, although even this issue is scarce so fine. PCGS reports two finer examples in MS67, although the present coin is still within the Condition Census grade level. The strike is bold save for the usual weakness on the wreath bowknot, and each side offers original peach-gold and straw-colored hues. Semiprooflike fields are hallmark of the 1888, which boasts a mintage of only 5,000 pieces and is known for its reflective surface qualities. A loupe reveals only a few tiny marks that determine the grade. Eye appeal abounds. Population: 33 in 66 (2 in 66+), 2 finer (4/17). NGC ID# 25NB, PCGS# 8010

PROOF FOUR DOLLAR GOLD PIECE

1879 Flowing Hair Stella, Unc Details
Accessible Example of Famous Type

3823 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3 — Repaired — PCGS Proof Genuine. Unc Details. The story of the 1879 Flowing Hair stella is a complicated one, with a host of well-known characters. From Representative John A. Kasson, Alexander H. Stephens, and William Wheeler Hubbell, to Charles Barber and George T. Morgan, there were many players involved in the production of the stella, or so it seems.

It was widely believed for decades that John A. Kasson, the United States ambassador to Austria-Hungary, called for the production of a new denomination that could easily be exchanged against the standard gold pieces of France, Italy, Austria, and the other countries that made up the Latin Monetary Union. It has also been said that Kasson was allied with Western mining interests and sought to have the United States government buy up their gold and silver by promoting a new gold piece.

Roger Burdette's extensive research did much to clarify who was really responsible for the creation and design of the curious four dollar denomination. In thoroughly examining the historical record, Burdette found the Kasson narrative problematic. Kasson had been the chairman of the Committee on Coinage, Weights, and Measures. He knew perfectly well that a four dollar coin was not suitable for a one-to-one exchange. The standard gold coins of the LMU were worth \$3.88, not \$4, rendering the stella obsolete. Kasson wrote to the State Department in January 1879 arguing for the use of the Austrian eight florin as the standard for certifying invoices to the Austrian consulate. He explained that it would be helpful for the United States Mint to produce "a new gold coin ... to be the *exact value* [emphasis added] of the gold piece already better known throughout Europe and the East than any other single coin."

Eventually, Representative Alexander H. Stephens, then chair of the committee Kasson had headed earlier, got hold of the letter. Burdette writes: "Stephens, probably after verbal consultation with Hubbell [proponent of a patented goloid composition], changed the meaning of Kasson's letter from 'exact value' to 'approximate denomination' when he replied to Treasury Secretary Sherman."

Collectors have Stephens and Hubbell to thank for pushing the production of the stella. William W. Hubbell stood to profit mightily from the Mint employing his goloid composition, while Stephens, an ardent supporter of Hubbell, sought to help a friend and gain the support of his constituents and fellow congressmen.

This example of the 1879 Flowing Hair proof issue is noted as Repaired by PCGS, although the work is skillfully done. A few subtle areas of smoothing are visible on the obverse, especially in the left field near the 3 and its adjacent stars in the legend. An additional repair may have been executed at the stars and M near the opposite rim. We note a thin, small mark near DEO and some faint delicate lines in the reverse fields. Still, nice eye appeal remains on both sides of the coin and the honey-gold surfaces show attractive, delicate orange accents with sharp definition throughout the motifs.

EARLY HALF EAGLES

1798 Large Eagle Five, AU55+
BD-4, 13 Stars Reverse

3824 1798 Large Eagle, Large 8, 13 Stars Reverse, BD-4, High R.4, AU55+ NGC. Bass-Dannreuther Die State d/e, as usual. The dies are clashed and lapped with rim cuds on the reverse above the ES in STATES and the O in OF. A die crack connects the right-hand stars on the obverse. As scarce as BD-4 is with fewer than 100 pieces believed known, it is actually the most plentiful 1798 half eagle variety. This is the final use of both dies, and they are seen here in the latest die state.

The coin is bright yellow-gold with subtle reflectivity in the fields. The surfaces are generally smooth and without distractions. Strike weakness on the central hair curls and on the base of the eagle's neck is typical for the issue. Only slight high-point wear is discernible. NGC ID# BFX6, PCGS# 507324 Base PCGS# 8078

1803/2 BD-3 Half Eagle, AU53

3825 1803/2 BD-3, R.4, AU53 NGC. Two obverse dies are known for the 1803 half eagle coinage, and both dies are 1803/2 overdates. This obverse die has the 3 separated from the bust. Bass-Dannreuther Die State e/a has a faint die crack through the stars at the left obverse, with no indication of the later reverse die crack. This piece is light yellow with hints of green overtones, exhibiting minor grade-consistent marks. Luster remains in the protected areas. NGC ID# 25NY, PCGS# 504950 Base PCGS# 8084

1808/7 BD-2 Half Eagle, AU55
Reverse of 1807

3826 1808/7 Close Date, BD-2, High R.4, AU55 PCGS. Bass-Dannreuther Die State a/c. The reverse die was first used with the 1807 half eagles of this design type, and has not materially changed in the present use. This piece has delicate luster in the protected areas with scattered, grade-consistent marks on its satiny light yellow surfaces. NGC ID# 25PB, PCGS# 45637 Base PCGS# 8103

1810 BD-4 Half Eagle, Choice VF
Large Date, Large 5 Variety

3827 1810 Large Date, Large 5, BD-4, R.2, VF35 PCGS. Bass-Dannreuther Die State c/b, cracked vertically from the rim to the clasp between the 81 of the date. The coin is evenly struck with complete rims and original orange-gold coloration. Tiny remnants of luster can be seen in the protected areas, despite moderate wear on the devices. Other than the usual array of surface chatter, there are no distracting surface characteristics. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1813 BD-2 Half Eagle, MS64
Few Known Finer

- 3828 1813 BD-2, R.4, MS64 PCGS.** Bass-Dannreuther Die State d/b. BD-2 is the scarcer of the two 1813 half eagle varieties, with only 150 to 200 pieces known. This late die state coin is not only high-end for the variety, it is high-end for the date. Even BD-1 is scarce in MS64 and extremely rare any finer. This BD-2 near-Gem example is sharp throughout the stars and obverse portrait, but the eagle's left (facing) wing and right talons exhibit considerable weakness. There are a few light grazes on Liberty's cheek, but the surfaces are otherwise well-preserved.

The last MS64 coin that we handled realized \$64,625. It was lot 5870 in our January 2017 FUN Signature sale. The present coin is comparably attractive and worthy of an equally strong bid. Population (both varieties included): 54 in 64 (1 in 64+), 3 finer (4/17).

From The Faris Collection. NGC ID# 25PM, PCGS# 45648 Base PCGS# 8116

LIBERTY HALF EAGLES

1840 Liberty Half Eagle, MS62
Narrow Mill Variant

- 3829 1840 Narrow Mill MS62 PCGS.** While not a rare coin in the absolute sense, with lower grade specimens always being available, in Mint State condition, the 1840 is a significant coin and well worth the attention of specialists. The strike on this piece is noteworthy with all the details fully brought up including the characteristically weak eagle's left leg. The fields show die striations which have in turn imparted a bright semi-prooflikeness to each side. There are a number of small abrasions in the fields that limit the grade, but none that deserve singular mention. Population: 7 in 62 (1 in 62+), 4 finer (4/17). NGC ID# 25SA, PCGS# 8194

1843 Liberty Half Eagle, MS63
Rare This Nice

- 3830 1843 MS63 NGC. CAC.** A substantial mintage of 611,205 Liberty half eagles was accomplished in 1843, but few examples have survived in high grade. This attractive Select example exhibits sharply detailed design elements and lustrous orange-gold surfaces with some scattered minor contact marks on both sides. Census: 13 in 63 (1 in 63+, 1 in 63★), 9 finer. CAC: 2 in 63, 2 finer (5/17). NGC ID# 94FD, PCGS# 8213

1846-O Five Dollar, AU58
Underrated Southern Gold Issue

- 3831 1846-O AU58 PCGS. Variety 1.** The mintmark sits low above VE of FIVE, the more-available of two known varieties for this conditionally challenged New Orleans issue. The Doug Winter reference notes that the 1846-O is scarce and underrated in About Uncirculated condition and becomes rare in AU55 to AU58 grades. This near-Mint example is brilliant with bright, yellow-gold color and a strong definition on the devices. Faint, delicate lines account for the grade, but there are no heavy marks and traces of original, prooflike surface remain. Population: 10 in 58, 7 finer (4/17). NGC ID# 25TK, PCGS# 8230

1860-C Liberty Half Eagle, AU55
Scarce Branch Mint Issue

- 3832 1860-C AU55 PCGS Secure. Variety 1.** The 1860-C Liberty half eagle claims a low mintage of 14,813 pieces, making it a scarce issue in all grades. The central reverse is always somewhat indistinct, as it was struck from an improperly annealed die. This Choice AU specimen shows just a trace of wear on the well-detailed design elements and the lustrous, sun-gold surfaces are lightly abraded on both sides. Population: 15 in 55, 25 finer (4/17). NGC ID# B2AC, PCGS# 8285

1862 Half Eagle, AU58
Rare Wartime Issue
Only 4,430 Pieces Struck

- 3833 1862 AU58 PCGS.** As Garrett-Guth point out, once the federal government suspended gold payments during the early days of the Civil War, there was little need to strike gold coins. As a consequence, the mintage for half eagles dropped from 688,084 pieces in 1861 to a paltry 4,430 coins in 1862. All 1862 half eagles are rare — regardless of grade — even rarer than most C and D-mint gold from the 1840s and 1850s. This is a sharply defined example that shows bright yellow-gold color that is tinged with a slight hint of rose. Field marks are denser on the reverse than the obverse. One curious area is seen around the S and O in STATES OF — an area that appears to be a planchet depression, although it may have been produced by a clogged die. Population: 7 in 58 (2 in 58+), 4 finer (4/17). NGC ID# 25VP, PCGS# 8292

INDIAN HALF EAGLES

1909-O Half Eagle
The Key New Orleans Issue

- 3834 1909-O PCGS Genuine.** The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen with altered surfaces overall and an old gouge on the eagle's neck. The coin is otherwise pleasantly orange-gold and well-detailed with a clear mintmark. The scarcity of the 1909-O half eagle will generate interest in this piece from budget-conscious collectors.

Bela Lyon Pratt

1909-O Half Eagle, AU50
Elusive CAC-Approved Example
The Branch Mint Key to the Series

- 3835 1909-O AU50 PCGS. CAC.** In the Indian half eagle series, the 1909-O is the rarest issue in Mint State, which boosts collector demand for About Uncirculated coins. Gold coinage at the New Orleans Mint was suspended April 1st, 1909, after only 34,200 half eagles had been struck of Bela Lyon Pratt's Indian Head design. The bulk of the mintage entered circulation. Most survivors are lightly worn, and some grade as low as the VF level. However, CAC-approved coins are scarce across all grades. Considering the more than 1,000 1909-O half eagles certified in AU and Mint State, it is unusual that fewer than 100 coins across that same grade range have received CAC green labels. Here offered is well-struck yellow-gold example with lightly marked, satiny surfaces. The mintmark is clear, and there are no severe abrasions. CAC: 6 in 50, 91 finer (4/17). NGC ID# 25ZK, PCGS# 8515

1909-O Half Eagle, AU55
Always-Popular Series Key

- 3836 1909-O AU55 PCGS.** The 1909-O has long been considered a key date in the Indian half eagle series, and its popularity has only increased in recent decades; as a result, examples of the date are frequently traded in the auction arena, much to the delight of eager series collectors. Among other key-date issues in the series, the heavily melted 1929 has a lower overall certified population than the 1909-O, but in Mint State grades the New Orleans issue emerges as the rarer date, and is extremely challenging in these grades. Of the small number of Uncirculated survivors known, the vast majority are heavily abraded, grading no finer than MS61. Which is why a problem-free Choice AU, such as this piece makes such a compelling purchase for the collector.

As the only Indian half eagle struck at the New Orleans Mint, the 1909-O also makes a nice "cap" on an O-mint half eagle collection, and is a necessity for a complete set of New Orleans gold. The resulting popularity of the issue in all grades ensures significant bidder attention for virtually all examples that appear at auction. The surfaces are bright and surprisingly problem-free for this often problematic issue. The mintmark is also well-defined.

From The Faris Collection. NGC ID# 25ZK, PCGS# 8515

1915 Half Eagle, MS65 Among the Finest Known

- 3837** 1915 MS65 PCGS. Indian gold pieces of pretty much any date are difficult to acquire in Gem condition and boast proportionately high collector demand at that level. This 1915 half eagle displays well-struck design elements and original, frosty mint luster with only a few small ticks to limit the grade. Rich straw-gold color pleases the viewer's eye. None are designated numerically finer at either leading certification service. Population: 58 in 65 (6 in 65+), 0 finer (4/17). NGC ID# 28DX, PCGS# 8530

1929 Indian Head Five, AU58 Rarely Offered in This Grade

- 3838** 1929 AU58 PCGS. Although the Mint struck 662,000 half eagles in 1929, few were ever distributed to the public. Most of the mintage was still in government vaults when the 1933 gold recall order mandated its melting. Since the issue never circulated to a meaningful extent, most pieces known today are in various Mint State grades. The present high-end AU coin is a rarity with light high-point wear. Such pieces are in demand among budget-restricted collectors, and the supply is extremely limited. We have previously handled dozens of Mint State coins but only four AU58 pieces. This is the first near-Mint example we have handled in a PCGS holder since 2007. More recently, an NGC coin in this grade garnered more than \$30,000 (Heritage, 2/2014).

The present example shows satiny yellow-gold surfaces with little evidence of wear. Scattered light abrasions are typical of the grade and issue. A loupe reveals minor strike softness on the lower headdress feathers.

From The Faris Collection. NGC ID# 28E2, PCGS# 8533

EARLY EAGLES

1799 BD-10 Ten Dollar, AU Details Large Stars Obverse Type Coin

- 3839** 1799 Large Obverse Stars, BD-10, R.3 — Cleaning — PCGS Genuine. AU Details. Bass-Dannreuther Die State a, no clashing, lapping, or cracks. BD-10 is the plentiful Large Stars die marriage, although it is in high demand among type collectors. This example is intricately and evenly struck with smooth olive-gold surfaces. A loupe reveals hairlines in the fields that denote a light cleaning, although the coin as a whole remains quite appealing.

LIBERTY EAGLES

1838 Liberty Eagle, XF45 Exceptional Original Coloration Fewer Than 100 Pieces Believed Known

- 3840** 1838 XF45 PCGS. CAC. The ornate Obverse of 1838 is usually collected by type enthusiasts via the 1839 issue, which is the more available of the two options. The entire population of the 1838 gold eagle is estimated at just 80 to 100 coins, surviving from a small mintage of 7,200 pieces. Only a handful of examples are known in Mint State. This CAC-approved Choice XF coin offers the collector a well-detailed but still accessible option with original orange-gold surfaces that yield shades of silvery-green and pale lavender when tilted beneath a light. The strike is sharp, and the surfaces are devoid of any unsightly marks. The visual appeal of this piece is exceptional. Population: 21 in 45, 28 finer. CAC: 3 in 45, 2 finer (4/17). NGC ID# 262D, PCGS# 8575

1839/8 Ten Dollar, AU53
Head Type of 1838

- 3841 1839/8 Large Letters AU53 NGC.** Uncirculated examples of the 1839/8, Type of 1838 eagle are rare and far out of reach for most collectors. This About Uncirculated representative presents a more affordable but still high-end alternative. The yellow-gold surfaces produce bold detail and retain hints of luster. Scattered abrasions are typical for the issue and grade. NGC ID# 54XF, PCGS# 8576

1839/8 Ten Dollar, AU53
Type of 1838

- 3842 1839/8 Large Letters AU53 PCGS.** The 1839 gold eagle with the 1838 obverse hub type is rare in mint State and scarce at the AU level. However, it is the ideal type coin for the variety when one considers the absolute rarity of the 1838 issue. This AU representative displays excellent detail and some remaining luster. The straw-gold surfaces have the usual scattered chatter. Population: 17 in 53, 29 finer (4/17). NGC ID# 54XF, PCGS# 8576

1843 Liberty Eagle, AU58
Triple-Punched Date

- 3843 1843 AU58 NGC. VP-001.** The 1843 Liberty eagle claims a relatively generous mintage of 75,462 pieces, but the issue is quite elusive today, especially in high grade. The date on this coin is triple punched (Breen-6861) and certified as 1843/1843 by the NGC Variety Plus program. The variety is interesting, but not significantly more difficult to locate than the perfect date of this year. Only a trace of wear shows on the well-detailed design elements of this attractive near-Mint specimen and the pleasing orange-gold surfaces are lightly abraded. NGC ID# 262P, PCGS# 8588

1854 Ten Dollar, MS61
Condition Rarity

- 3844 1854 MS61 PCGS. CAC.** The 1854 eagle is a rare date in Uncirculated condition — most issues from this period are, regardless of mintage or mint of origin. PCGS has seen only 11 1854 eagles in all Mint State grades combined. This CAC-approved coin displays bold detail and satiny yellow-gold luster with no major abrasions. Eye appeal excels for the grade. Population: 6 in 61, 5 finer. CAC: 2 in 61, 2 finer (4/17). NGC ID# 263G, PCGS# 8613

1856-O Liberty Eagle, AU58
Only One Numerically Finer Coin at PCGS

- 3845 1856-O AU58 PCGS.** The 1856-O Liberty eagle claims a mintage of 14,500 pieces, certainly a small total in absolute terms, but not unusually small for a New Orleans issue of this time frame. After the San Francisco Mint opened in 1854, most of the gold from the California fields that had previously been shipped to New Orleans for coinage was sent to the closer San Francisco facility instead, making gold production at the New Orleans Mint much smaller than in earlier years. The 1856-O is rare at the AU58 grade level, and finer examples are very rare.

The present coin is an attractive near-Mint specimen, with just a trace of wear on the well-detailed design elements. There is a die crack through the T in UNITED and evidence of die rust shows around the letters in LIBERTY. The lustrous orange-gold surfaces are lightly abraded and overall eye appeal is strong. Population: 7 in 58 (1 in 58+), 1 finer (4/17). NGC ID# 263R, PCGS# 8620

1860-S Ten Dollar Gold, AU Details Rare in All Conditions

- 3846 1860-S — Cleaning — PCGS Genuine. AU Details.** With a low mintage of just 5,000 pieces, the 1860-S is scarce in all circulated grades and extremely rare in Mint State. It is one of the more underappreciated issues in the long and challenging Liberty Head eagle series. This example is smooth and sharply defined with even, medium-gold surfaces — partially the result of cleaning, which has removed most of the nuances of natural patina. Still, a highly acceptable example of this very scarce branch mint issue.

1862 Ten Dollar, AU55 Challenging in High Grade

- 3847 1862 AU55 PCGS.** A sharp Choice AU example, this high-end 1862 Liberty eagle boasts original olive-gold patina with hints of luster remaining in the fields. Two scrapes in front of Liberty's nose join scattered lesser abrasions on each side, typical of the grade. This date is rare in the upper AU grades and prohibitively so in Mint State. Population: 29 in 55, 10 finer (4/17). NGC ID# 2649, PCGS# 8635

1869 Ten Dollar, AU50 Rare in All Grades

- 3848 1869 AU50 PCGS.** Coming from a mintage of only 1,830 coins, the 1869 eagle is a rarity in all grades. It is believed that fewer than 75 examples survive, with only a handful in Mint State. This About Uncirculated representative shows bold detail and pleasing orange-gold coloration with hints of prooflike reflectivity around the borders. Scattered abrasions are typical of the issue. Population: 6 in 50, 10 finer (4/17). NGC ID# 264R, PCGS# 8655

1879-CC Ten Dollar, VF Details Few Examples Survive

- 3849 1879-CC — Improperly Cleaned — NGC Details. VF. Variety 1-A.** The Carson City Mint struck only 1,762 ten dollar gold pieces in 1879, marking the lowest mintage in the series from that mint. Fewer than 60 coins are believed to survive in all grades. The last problem-free VF example that we handled was a VF30 PCGS coin in lot 4987 of our September 2012 Long Beach Signature sale, which realized \$17,625. The present coin is lightly cleaned but is otherwise a visually pleasing and well-detailed representative that will appeal to the budget-conscious collector. Smooth olive-gold surfaces show grade-consistent wear with no other mentionable characteristics.

1882-CC Ten Dollar, XF45 Pleasing Eye Appeal

- 3850 1882-CC XF45 PCGS. Variety 2-A.** This Choice XF coin retains elements of prooflike reflectivity in the protected regions of the fields, not unusual for a date with a mintage of only 6,764 pieces. The design is sharp despite light wear, and the surfaces offer pleasing orange-gold coloration. Some light chatter is visible but there are no heavy abrasions. NGC ID# 2663, PCGS# 8696

1885-S Ten Dollar, MS64 Extremely Rare This Fine

- 3851 1885-S MS64 PCGS.** The 1885-S eagle is a major rarity in MS64 and unknown finer. The current coin is tied with just five others as the finest at PCGS, and there are only two coins in this grade at NGC (5/17). Full detail characterizes the devices amid frosty yellow-gold luster in the fields. Light, scattered surface marks define the grade but pose little distraction. We have previously handled a near-Gem on five occasions, all representing NGC or ANACS-certified coins. This is the first PCGS piece in this grade that we have offered. NGC ID# 554W, PCGS# 8707

1893-CC Ten Dollar, AU55
Challenging in High Grade

- 3852 1893-CC AU55 PCGS. Variety 1-A.** The 1893-CC is a rare Liberty eagle issue in Mint State — PCGS has so-graded just nine coins, the best of which are MS62. This Choice AU representative is partially lustrous and sharply detailed with unusually smooth surfaces for the grade. It is a far more affordable and arguably more eye-appealing than a low-grade Uncirculated piece. Budget-conscious collectors will be particularly interested when this coin crosses the auction block. Population: 39 in 55, 44 finer (4/17). NGC ID# 2672, PCGS# 8726

1899-S Ten Dollar, Radiant MS65
Few Known This Fine

- 3853 1899-S MS65 PCGS.** The number of Gem or finer 1899-S gold eagles that we have previously handled can be counted on two hands with fingers left over. This is only the fourth MS65 coin that we have offered and the first PCGS-graded example to appear in our auctions in more than a decade. Radiant yellow-gold luster cartwheels around the satiny surfaces, illuminating sharp design elements. A single graze under Liberty's eye is the only mentionable abrasion. The 1899-S is only plentiful through MS62. Select examples are scarce, and in MS65 this issue is a magnificent condition rarity. Population: 2 in 65, 3 finer (4/17). NGC ID# 267L, PCGS# 8744

1901-O Ten Dollar, MS64
Conditionally Rare

- 3854 1901-O MS64 PCGS. Variety 3.** The 1901-O is a better date in high grade, rare in MS64 and prohibitively so any finer. This piece displays sharp design elements and frosty wheat-gold luster with subtle greenish hues near the rims that show up when rotated. A few scattered marks are within the parameters of the grade. Population: 23 in 64 (4 in 64+), 1 finer (4/17). NGC ID# 267R, PCGS# 8748

1903-O Liberty Eagle, MS64
One Finer Coin at PCGS

- 3855 1903-O MS64 PCGS.** Although the 1903-O Liberty eagle claims a mintage of 112,771 pieces, the issue is rare in MS64 condition, and finer coins are virtually unobtainable. This impressive Choice specimen offers well-detailed design elements and lustrous orange-gold surfaces that show a few small copper alloy stains on the obverse. Population: 22 in 64, 1 finer (4/17). NGC ID# 267W, PCGS# 8753

INDIAN EAGLES

1907 Wire Rim Ten, MS64+ The Intended Saint-Gaudens Design

3856 1907 Wire Rim MS64+ PCGS Secure. CAC. The 1907 Wire Rim Indian eagle is avidly collected by series specialists and pattern collectors alike as the only available issue that shows Augustus Saint-Gaudens' original design for the ten dollar gold piece. It is listed as Judd-1901 in the current pattern reference, but most numismatists now believe these coins should be considered business strikes.

Initially, 542 examples of the design were struck, but only 472 specimens were ever distributed. The remaining 70 coins were melted after 1915. The design exemplifies the style of Saint-Gaudens, sculpted in high relief, with concave fields that slope up directly into the edge of the coin. A thin fin, or wire rim, of metal is seen around the edge of the coin, caused by the extrusion of metal between the collar and the dies.

Unfortunately, the lack of a protective rim around the coin and the extremely high relief of the eagle motif on the reverse made the design unsuitable for coinage. The coins did not stack properly and the design details were not sufficiently brought up. Mint Director George Roberts feared the coins would be easy to counterfeit. President Theodore Roosevelt was eventually convinced of these difficulties, and the Wire Rim design was retired in favor of the famous Rolled Rim design.

Whether the coins were patterns or regular issues became a more-or-less moot point when Roosevelt lifted the ban on selling experimental coins for the 1907 Saint-Gaudens issues. Subsequently, the coins were sold to a wide range of VIPs, Congressmen, Treasury officials, and museums. In the initial distribution, only a few reached collector's hands.

Prominent coin dealer Henry Chapman did manage to secure a few examples for his customers, however. He wrote to Baltimore collector Robert Garrett, suggesting he should apply to Mint Director Frank Leach to acquire examples of both the Wire Rim and Rolled Rim issues at face value, plus shipping (Chapman related he had privately paid as much as \$150 for a single example himself, but Leach would not sell him any more coins):

"As he has but a few of the wire edge; which he refuses to let me have a specimen of, I would suggest that you write immediately upon receipt of this ... If you succeed in getting them, you are going to get two coins worth \$400."

Garrett did succeed in obtaining the coins directly from the Mint. The Wire Rim specimen sold for \$20,000 when it was auctioned in September of 1980. In more recent times, the spectacular MS67 PCGS example from the Husky Collection realized \$345,000 when it sold in 2008. Because of its inherent beauty and historic appeal to collectors of many disciplines, the 1907 Wire Rim Indian ten will always attract intense competition at any public offering.

The present coin is a high-end Choice Uncirculated example, with smooth and finely granular surfaces that capture light and return it many-fold. In hand, the coin appears silky and smooth. The deeply impressed strike is medallion in style and stunning to behold. Any marks are microscopic, confirming that this richly imbued yellow-gold coin was carefully preserved since its mintage and distribution. Population: 3 in 64+, 91 finer. CAC: 14 in 64, 18 finer (4/17). NGC ID# 26F2, PCGS# 8850

1907 Indian Eagle, MS65
Short-Lived No Motto Design

- 3857** 1907 No Motto MS65 NGC. An attractive Gem from the first year of Saint-Gaudens' beautiful Indian design, this coin features the short-lived No Motto motif that was modified the following year. The design elements are well-detailed and the well-preserved orange-gold surfaces are lustrous and appealing. Overall eye appeal is outstanding. NGC ID# 28GF, PCGS# 8852

1908-D No Motto Indian Ten, MS63
Elusive Branch Mint Type

- 3858** 1908-D No Motto MS63 PCGS. The 1908-D No Motto Indian eagle is an underrated issue from a mintage of 210,000 pieces. The 1908-D is very scarce in MS63 condition, and rare in finer grades. This attractive Select specimen displays well-detailed design elements, with vibrant mint luster and just a few minor contact marks.
Ex: October ANA Signature (Heritage, 10/2012), lot 6101, where it brought \$8,812.50. NGC ID# 28GH, PCGS# 8854

1908-D Indian Eagle, MS64
Conditionally Scarce No Motto Coin

- 3859** 1908-D No Motto MS64 PCGS. The No Motto 1908-D Indian eagle is usually available in Mint State, but collectors will more than likely have to accept moderate to severe abrasions. Choice examples are scarce and Gems are rare. This softly frosted near-Gem offers luminous wheat-gold mint luster and well-defined motifs. A loupe reveals faint slide marks on Liberty's cheek that limit the grade, as the fields are devoid of any serious abrasions. Eye appeal exceeds that of many other comparably graded representatives. It would be difficult for even a patient collector to locate a finer 1908-D No Motto ten below the Gem grade level. Population: 57 in 64 (6 in 64+), 8 finer (4/17). NGC ID# 28GH, PCGS# 8854

1908 With Motto Indian Ten, MS65
Vibrant Mint Luster

- 3860** 1908 Motto MS65 PCGS. In Gem condition, the 1908 With Motto Indian eagle is the most plentiful 1908-dated issue, making it the ideal choice for type collectors. However, it is still scarce in such a high grade. This representative is well-preserved with original cartwheel luster that shows straw-gold and wheat-colored hues. The strike is well-executed, and only a few minor abrasions are observed beneath a loupe. NGC ID# 28GJ, PCGS# 8859

1910-D Ten Dollar, MS65
Better Date in Gem Condition

- 3861 1910-D MS65 PCGS.** Finely granular surfaces avoided the usual bagmarks and abrasions that often accompany even highly graded Mint State examples of this Denver issue. Bountiful mint luster shines from the attractive and frosted wheat-gold surfaces, with faint orange accents in sheltered areas. The strike is sharp throughout. While a mintage of more than 2.3 million pieces suggests ready availability of the issue, it is quite scarce in the MS65 grade or finer. Population: 102 in 65 (3 in 65+), 47 finer (4/17). NGC ID# 28GS, PCGS# 8866

1911-S Eagle, MS63
Conditionally Elusive

- 3862 1911-S MS63 PCGS.** While 1911-S eagles are now less rare than formerly due to the discoveries of a couple of small hoards, Mint State examples remain elusive, particularly in higher grades. This piece displays attractive eye appeal over orange-gold, mattelike surfaces. A few tiny abrasions are consistent with the grade. Population: 27 in 63 (2 in 63+), 61 finer (4/17).
Ex: FUN Signature (Heritage, 1/2009), lot 5631; Central States Signature (Heritage, 4/2012), lot 6799, where it realized \$11,212,50. NGC ID# 28GV, PCGS# 8870

1912-S Ten Dollar, MS64
Few Available Finer

- 3863 1912-S MS64 PCGS.** The 1912-S is a better date in all grades, although it is distinctively rare in Gem condition. Here offered is a more-affordable but yet eye-appealing near-Gem. Original, frosty luster shows hues of peach and green-gold with an attractive cartwheel effect. Sharp design elements exhibit the usual scattering of unimportant small marks seen at the MS64 level. Population: 78 in 64 (23 in 64+), 15 finer (4/17). NGC ID# 269G, PCGS# 8872

1914 Indian Eagle, MS65+
Seldom Encountered Finer

- 3864 1914 MS65+ PCGS. CAC.** The 1914 Indian eagles an elusive issue at the MS65 grade level, and finer coins are rare. This Plus-graded Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces with vibrant mint luster on both sides. Overall visual appeal is outstanding. Population: 39 in 65 (2 in 65+), 14 finer. CAC: 13 in 65, 7 finer (4/17). NGC ID# 28H2, PCGS# 8875

1914-S Indian Eagle, MS63
Better Date in High Grade

- 3865 1914-S MS63 NGC.** From a mintage of 208,000 pieces, the 1914-S Indian eagle is an elusive issue in MS63 condition and finer coins are very scarce. This attractive Select specimen is sharply detailed in most areas, but a touch of softness is evident in the feathers on the eagle's shoulder. The pleasing orange-gold surfaces are lightly marked and lustrous. NGC has graded 45 numerically finer examples (5/17). NGC ID# 28H4, PCGS# 8877

1916-S Indian Eagle, MS63+
Very Scarce in Finer Grades

- 3866 1916-S MS63+ PCGS. CAC.** While the 1916-S Indian eagle is not too difficult to locate in lower Mint State grades, the issue becomes scarce at the MS63 grade level, and finer coins are quite elusive. This Plus-graded Select example offers sharply detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster throughout. PCGS has graded 67 numerically finer examples (4/17). NGC ID# 28H7, PCGS# 8880

1932 Eagle, Luminous MS66
Only One Coin Finer at PCGS

- 3867 1932 MS66 PCGS.** The 1932 Indian eagle is an available date in lower grades, but the issue is very scarce at the Premium Gem level and very rare any finer. This well-detailed example displays especially vibrant mint luster, and the light orange-gold surfaces are virtually mark-free. PCGS records only a single Superb Gem finer (4/17). NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

1850 Twenty Dollar, AU53
First-Year Type Coin

- 3868 1850 AU53 NGC.** The bright yellow-gold surfaces seen here are characteristic of the 1850 double eagle, which was struck largely with California gold that was shipped to Philadelphia before the San Francisco Mint was established. The coin is lightly worn and moderately abraded, following the general reputation of the issue. We observe hints of luster in the most protected regions of the fields that improve the aesthetics. NGC ID# 268F, PCGS# 8902

1850 Liberty Double Eagle, AU55
Gold Rush Era Type Coin

- 3869 1850 AU55 NGC.** This first-year of denomination double eagle has significant aesthetic, historic, and numismatic significance. The obverse devices are all fully detailed with full radials on each of the peripheral stars and complete hair curls. The reverse only lacks a bit of definition on the oval of stars for a complete strike on that side. Bright green-gold color with a few small marks over each side, the only one of any significance is a shallow scratch along Liberty's jawline. NGC ID# 268F, PCGS# 8902

1851 Liberty Double Eagle, MS60
Second-Year Type One Issue

- 3870 1851 MS60 PCGS.** The 1851 Liberty double eagle was produced in large numbers, but few were saved by contemporary collectors and the issue is scarce in Mint State grades today. The orange-gold surfaces of this impressive MS60 specimen show the expected number of minor contact marks for the grade. The design elements are well-detailed and traces of original mint luster are evident in sheltered areas. NGC ID# 268H, PCGS# 8904

1851 Liberty Twenty, MS61
Lightly Marked, Lustrous Surfaces

- 3871 1851 MS61 PCGS.** A large mintage of more than 2 million Liberty double eagles was struck at the Philadelphia Mint in 1851, making the issue readily available in absolute terms. However, most of the coins circulated heavily and Mint State specimens are very scarce. This attractive MS61 example is sharply detailed and lustrous, with orange-gold surfaces that are minimally marked for the grade. Housed in a 30th Anniversary green label holder. NGC ID# 268H, PCGS# 8904

1851-O Double Eagle, AU53
Collectible New Orleans Issue

- 3872 1851-O AU53 PCGS.** The 1851-O is one of the more collectible New Orleans issues in the Liberty double eagle series, although it is still challenging to acquire in high grade. This About Uncirculated representative offers partially lustrous fields and pleasing yellow-gold color. The design elements are well-detailed. Scattered abrasions on each side are consistent with the denomination and grade. NGC ID# 268J, PCGS# 8905

1851-O Twenty Dollar, AU53
Good Candidate for New Orleans Type

- 3873 1851-O AU53 NGC. Variety 3.** Only a few Type One double eagles are readily available for New Orleans type. The 1851-O leads the way thanks to a sizeable mintage of 351,000 pieces. This example retains nice mint luster and displays flashy, medium-gold surfaces. Small abrasions frequent the fields and central devices, but they create minimal impact at the assigned grade level. Sharp definition remains on the devices and the eye appeal is undeniable. NGC ID# 268J, PCGS# 8905

1852-O Twenty Dollar, AU53
Scarce New Orleans Type Coin

- 3876 1852-O AU53 PCGS. Variety 1.** Five different mints struck Liberty double eagles, and New Orleans is the stopper to a set with one example from each facility. The 1852-O is scarcer than its 1851-O predecessor, but nonetheless often selected for Southern type purposes. The present olive-green and peach-gold twenty displays numerous pockets of bright luster. The reverse is only lightly abraded, while the obverse displays several faded thin marks. NGC ID# 268L, PCGS# 8907

1852 Liberty Twenty, MS61
Remarkably Clean Surfaces

- 3874 1852 MS61 PCGS.** The 1852 Liberty double eagle claims a large mintage of more than 2 million pieces, but most of the coins circulated heavily, and Mint State specimens are very scarce in today's market. This impressive MS61 specimen exhibits well-detailed design elements and lustrous orange-gold surfaces with the absolute minimum number of minor contact marks for the grade. A few minor rim dings are evident on the reverse. Population: 46 in 61, 49 finer (4/17). NGC ID# 268K, PCGS# 8906

1853 Double Eagle, MS61
Repunched Date, Breen-7160

- 3877 1853 MS61 PCGS. Breen-7160.** The 3 in the date is repunched, but this is different from the well-known 1853/"2" FS-301 variety. The 1853 is rare in Mint State, despite a mintage of 1.2 million coins and the recovery of nine Uncirculated survivors from the S.S. *Central America*. This MS61 No Motto twenty is brightly lustrous and boldly struck with pleasing rose and yellow-gold surfaces. Expectedly abraded. Population: 17 in 61, 27 finer (4/17). NGC ID# 268M, PCGS# 8908

1852-O Double Eagle, XF45
Accessible O-Mint Twenty

- 3875 1852-O XF45 PCGS. Variety 1.** No New Orleans double eagle is plentiful in Mint State, but the first three emissions from the Louisiana branch mint are refreshingly collectible in XF and AU grades. When the San Francisco Mint became operational in 1854, gold deposits at New Orleans declined significantly, and double eagle production dropped proportionately. This 1852-O twenty was likely struck with California gold. It is well-detailed and has hints of luster in the protected regions. Surface chatter is consistent with the grade. NGC ID# 268L, PCGS# 8907

1853/2' Double Eagle, AU50
Pleasing for the Grade

- 3878 1853/2' FS-301 AU50 PCGS.** A large raised die dot beneath the R in LIBERTY easily identifies this popular variety despite the lapped die state. The overdate status of FS-301 has been debunked by photographic overlays, although the intrigue of the anomaly in the date remains. This About Uncirculated representative displays yellow-gold surfaces with hints of luster in the protected regions. Light chatter is consistent with the grade. NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

**1854-S Liberty Double Eagle, AU50
First-Year Branch Mint Type Coin**

- 3879 1854-S AU50 NGC.** The San Francisco Mint opened in 1854 and a fairly modest mintage of 141,468 double eagles was accomplished. The coins circulated widely at the time of issue and most examples seen today are heavily worn. Most Mint State specimens are from shipwreck finds. This impressive AU example shows light wear on the well-detailed design elements and the orange-gold surfaces retain traces of original mint luster. NGC ID# 268U, PCGS# 8913

**1855 Twenty Dollar, AU58
Few Available Finer**

- 3880 1855 AU58 NGC.** The 1855 double eagle is a rarity in Mint State, and even in AU58 it is elusive. This near-Mint coin displays sharp detail and original green-gold coloration with moderate luster remaining in the fields. The scattered abrasions cast over each side are a familiar sight on AU-level Type One double eagles. Census: 77 in 58 (1 in 58+), 17 finer (5/17). NGC ID# 268V, PCGS# 8914

**1857-S Liberty Twenty, MS61
Colorful, Lustrous Example**

- 3881 1857-S MS61 PCGS.** The 1857-S Liberty double eagle was very elusive in Mint State grades before the recovery of the S.S. Central America. Fortunately, that shipwreck find yielded more than 5,000 examples of the 1857-S, many of them in high grade. This attractive MS61 specimen exhibits sharply detailed design elements and vibrant mint luster throughout, and the orange-gold surfaces are lightly marked for the grade. NGC ID# 2696, PCGS# 8922

**1857-S Twenty Dollar, MS66
Ex: S.S. Central America
Bold S, Variety 20B**

- 3882 1857-S MS66 PCGS. CAC. Variety 20B.** Ex: S.S. Central America. SSCA 5724. The "Bold S" die variety with a deeply entered mintmark. A remarkable Premium Gem. The reverse is essentially immaculate, and the cheek and obverse field display only incidental contact. The surfaces are predominantly sun-gold, with hints of tan toning near LIBERTY and the right-side obverse stars. Much nicer than the typical SSCA Bold S example, which grades MS64. Housed in a gold label holder. Included with the lot is a forest-green Blanchard box and a *Ship of Gold* faux book. NGC ID# 2696, PCGS# 8922

**1858-O Twenty Dollar, AU58
Nearly Unobtainable in Mint State**

3883 1858-O AU58 NGC. Variety 4. The date is positioned low and left, as on Varieties 1 and 3, while the mintmark placement matches that of Variety 2. Type One New Orleans double eagles are all highly desirable, though some are far more available than others. The 1858-O ranks among the more obtainable issues, but it can hardly be considered available in this relatively high grade. In fact, representatives of this quality are conditionally rare, and only five or six Mint State survivors are known.

This near-Mint twenty would serve as a perfect alternative for those unable to contend for an extremely rare Uncirculated piece. Medium green-gold color and flashes of luster deliver above-average eye appeal. The strike is also better than expected for this notoriously poorly produced issue. Wispy marks are present throughout each side, but the only overt blemish occurs on Liberty's cheek. Census: 28 in 58 (1 in 58+, 2 in 58★), 6 finer (5/17). NGC ID# 2698, PCGS# 8924

**1858-S Twenty Dollar, MS60
Prooflike and Contrasted**

3884 1858-S MS60 NGC. This Uncirculated 1858-S twenty is not only conditionally rare, it is prooflike. The dies are not fresh, just heavily polished prior to striking this coin. The devices are sharply rendered, and there is modest cameo contrast apparent on each side. Scattered marks that limit the grade are surprisingly unobtrusive considering the MS60 designation. Eye appeal excels. Census: 2 in 60, 17 finer (4/17). NGC ID# 2699, PCGS# 8925

**1859 Liberty Double Eagle, XF40
Low-Mintage Philadelphia Issue**

3885 1859 XF40 PCGS. From a modest mintage of 43,597 pieces, the 1859 Liberty double eagle is scarce in all grades. Few examples were saved by contemporary collectors and only two specimens were recovered from the wreck of the *S.S. Republic*, so high-grade examples are especially elusive. This attractive XF specimen shows some wear on the prongs of the coronet and hair curls, but the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 269A, PCGS# 8926

**1861 Twenty Dollar, MS60
Original Mint Luster**

3886 1861 MS60 PCGS. An Uncirculated example of one of the most popular type coins in the Type One double eagle series. This 1861 twenty displays original yellow-gold luster and well-defined motifs. Heavy abrasions on each side determine the grade. Although not truly scarce in Mint State, the 1861 does present a challenge in such condition due to type collector demand. NGC ID# 269G, PCGS# 8932

**1861-S Liberty Twenty, AU58
Rare Any Finer**

- 3887 1861-S AU58 NGC.** From a mintage of 768,000 pieces, the 1861-S Liberty double eagle is very scarce in AU58 condition, and Mint State coins are rare. This attractive near-Mint specimen shows just a trace of wear on the well-detailed design elements, and a die crack travels through the obverse stars on the right. Another network of cracks connects most of the letters in the reverse legends. The lustrous orange-gold surfaces are lightly abraded. NGC has graded 14 numerically finer examples (4/17). NGC ID# 269K, PCGS# 8935

**1861-S Twenty Dollar, AU58
Better Date in High Grade**

- 3888 1861-S AU58 PCGS.** For most collectors, the 1861-S double eagle is uncollectible in Mint State due to its rarity at that level. However, the present near-Mint coin is accessible. Partial luster remains in the fields, and the design elements are bold. Scattered light marks accompany minor high-point friction but are less obtrusive than expected. Population: 40 in 58 (1 in 58+), 23 finer (4/17). NGC ID# 269K, PCGS# 8935

**1861-S Liberty Double Eagle, AU58
Seldom Encountered in Finer Grades**

- 3889 1861-S AU58 PCGS. CAC.** After a small number of Paquet Reverse double eagles were coined early in the year, the San Francisco Mint struck 768,000 Liberty double eagles of Longacre's regular design. This impressive near-Mint representative shows just a trace of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain much of their original mint luster. Population: 40 in 58 (1 in 58+), 23 finer. CAC: 17 in 58, 10 finer (4/17). NGC ID# 269K, PCGS# 8935

**1861-S Liberty Double Eagle, MS62+
CAC-Endorsed, Just Two Pieces Are Finer**

- 3890 1861-S MS62+ PCGS. CAC.** After a small production of Paquet Reverse double eagles early in the year, the San Francisco Mint went on to strike 768,000 Liberty twenties during the rest of 1861, using the old Longacre reverse. Like most S-mint double eagles, the 1861-S circulated heavily at the time of issue and few were preserved by contemporary collectors. The issue is available in abundant quantities in circulated condition, but high-grade coins are quite rare today, even factoring in the coins recovered from the S.S. *Brother Jonathan* and the S.S. *Republic*.

The coin offered here is a Plus-graded MS62 specimen, with an unusually sharp strike for this issue, which is among the most weakly struck Type One S-mint twenties. The stars show complete radials and bold definition is evident on Liberty's hair. The lustrous orange-gold surfaces are lightly marked for the grade and the overall presentation is most appealing. CAC endorsement joins the PCGS Plus designation to signify the coin's high quality for the grade. Only two examples are graded finer at PCGS and none are finer at NGC. Population: 6 in 62 (2 in 62+), 2 finer. CAC: 4 in 62, 1 finer (4/17). NGC ID# 269K, PCGS# 8935

1862-S Double Eagle, AU55
Partially Lustrous Fields

- 3891 1862-S AU55 NGC.** Well defined overall, the surfaces are mostly orange-gold in appearance. Some rich, copper-tinged iridescence is also evident on the reverse, as are freckled charcoal accents along the bottom rim. The number of small and moderate abrasions is typical of a circulated S-mint gold coin of this size. The 1862-S double eagle is scarce in high grade.
Ex: Santa Clara Bullet Sale (Heritage, 11/2001), lot 1564; FUN Signature (Heritage, 1/2002), lot 8385. NGC ID# 269N, PCGS# 8938

1864 Twenty Dollar, AU Details
Better Date in High Grade

- 3892 1864 — Cleaning — PCGS Genuine. AU Details.** This is a sharply detailed, bright yellow-gold example with the usual scattering of minor abrasions associated with AU-level double eagles. The cleaned surfaces are not particularly bothersome when one considers the scarcity of the 1864 double eagle in high grade. This is an issue that is elusive in AU and decidedly rare in Mint State.

1864-S Liberty Twenty, AU55
Scarce Type One Issue in High Grade

- 3893 1864-S AU55 PCGS.** Despite the substantial mintage of 793,660 pieces and the recovery of a number of specimens from recent shipwreck finds, the 1864-S Liberty double eagle remains a scarce issue in high grade. This impressive Choice AU specimen shows just a touch of wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded, with a small amber alloy streak on the reverse. Population: 63 in 55, 99 finer (4/17). NGC ID# 269T, PCGS# 8942

1867 Double Eagle, Lustrous MS61

- 3894 1867 MS61 PCGS.** Sun-gold shadings blend with light rose-gold hues throughout this Uncirculated 1867 double eagle. The Mint produced more than a quarter-million twenty dollar gold pieces that year, but survivors are very scarce at this grade level and certainly any finer. Myriad marks are present over each side, including a long, shallow mark in the left obverse field. The motifs are well-defined, and the luster is remarkably lively. NGC ID# 269Z, PCGS# 8951

1867 Double Eagle, MS61
Rose-Golden Hues

- 3895 1867 MS61 PCGS.** The year 1866 saw a significant modification to the Liberty double eagle design with the addition of the motto IN GOD WE TRUST above the eagle, creating a new collectible subtype. Production fell to 251,015 pieces in the second year of Type Two production. The 1867 is scarce in Mint State, and there are only a handful of coins finer than MS62. Each side offers glittering frost, and rose-golden color. Well-defined with myriad abrasions. NGC ID# 269Z, PCGS# 8951

1870-S Liberty Twenty, MS60
Vivid Color, Vibrant Luster

- 3896 1870-S MS60 PCGS.** A substantial mintage of 982,000 Liberty double eagles was accomplished at the San Francisco Mint in 1870, but the issue is decidedly scarce in Mint State grades today. This attractive MS60 example offers sharply detailed design elements, aside from a touch of softness on some star centers. The lustrous orange-gold surfaces are lightly marked for the grade. Population: 27 in 60, 74 finer (4/17). NGC ID# 26A9, PCGS# 8959

**1870-S Liberty Double Eagle, MS61
Rare Any Finer**

- 3897 1870-S MS61 NGC.** Despite a large mintage of 982,000 pieces, the 1870-S Liberty double eagle is very scarce in MS61 condition, and finer coins are rare. This attractive MS61 example offers sharply detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. Census: 38 in 61 (1 in 61+), 13 finer (5/17). NGC ID# 26A9, PCGS# 8959

**1870-S Double Eagle, Frosty MS62
Green and Rose-Gold Hues**

- 3898 1870-S MS62 PCGS. CAC.** The Saddle Ridge Hoard of 2013 yielded three 1870-S double eagles in MS62, significantly altering the population of top-graded representatives. PCGS now shows 13 submissions in this grade and a single coin finer (4/17). Those numbers speak to the conditional rarity of the 1870-S, which boasts an unassuming mintage of 982,000 coins. This marvelous, original example showcases pale rose and green-gold hues amid swirling mint frost, all of which account for the spectacular visual appeal. Strike detail is good, though incomplete over the highest points, and marks are peppered uniformly over each side. NGC ID# 26A9, PCGS# 8959

**1871-S Twenty Dollar, MS61
Challenging in Mint State**

- 3899 1871-S MS61 PCGS. Micro S.** What appears to be the base of a misplaced 1 is evident in the field below the 87 of the date. This Uncirculated 1871-S twenty dollar displays a bold strike and lustrous yellow-gold fields. Scattered abrasions define the grade. This Type Two San Francisco issue is scarce in Mint State and borderline rare above the present grade level. NGC ID# 26ND, PCGS# 8962

**1873-S Open 3 Twenty, MS60
Appealing for the Grade**

- 3900 1873-S Open 3 MS60 PCGS.** The 1873-S Open 3 double eagles are about three times scarcer than those exhibiting a Closed 3 in the date, contrary to the twenty dollar gold pieces struck at Philadelphia that same year. This Uncirculated representative enjoys slightly better eye appeal than is typical for the grade. Elements of peach, green, and rose-gold blend with frosty luster. Abrasions are uniformly scattered. NGC ID# 26AM, PCGS# 8979

**1873-S Liberty Twenty, MS60
Scarcer Open 3 Variant**

- 3901 1873-S Open 3 MS60 PCGS.** This 1873-S Liberty double eagle features the Open 3 in the date, indicating it was struck later in the year, after the new dies arrived at the San Francisco Mint. The Open 3 twenties are definitely scarcer than their Close 3 counterparts. This attractive MS60 specimen is sharply detailed and lustrous, with no large or distracting abrasions. Population: 56 in 60, 65 finer (4/17). NGC ID# 26AM, PCGS# 8979

1874-CC Double Eagle, AU50
Nice Carson City Type Coin

- 3902 1874-CC AU50 PCGS. Variety 3-A.** The 1874-CC is a collectible Carson City issue, although it is far scarcer in high grade than the following two CC-mint issues. Uncirculated '74-CC twenties are rare and always heavily bagmarked. This AU example displays good detail and medium yellow-gold coloration. Some semiprooflike reflectivity remains in the protected regions of the fields. Scattered light abrasions are consistent with the grade. NGC ID# 26AP, PCGS# 8971

1874-CC Liberty Head Twenty, AU50
Partial Luster Remains

- 3903 1874-CC AU50 NGC. Variety 4-A.** The 1874-CC is a moderately scarce Carson City double eagle in high grade, making AU coins of all levels highly sought-after. This piece is well-struck with hints of the original prooflike quality remaining in the fields. Reasonable wear and numerous small abrasions help to define the basal AU grade level.
Ex: Long Beach Signature (Heritage, 9/2004), lot 7814. NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, AU55
High-Mintage, Heavily Circulated Issue

- 3904 1874-CC AU55 NGC. Variety 1-A.** Double eagle mintage increased dramatically at the Carson City Mint in 1874, with a production total of 115,085 pieces. The coins circulated heavily at the time of issue, however, and most examples seen have numerous abrasions. This Choice AU example displays well-detailed design elements with lustrous yellow and greenish-gold surfaces that show the usual number of abrasions for the issue. NGC ID# 26AP, PCGS# 8971

1874-CC Double Eagle, AU55+
Popular Branch Mint Type Coin

- 3905 1874-CC AU55+ NGC. CAC. Variety 1-A.** A Plus-graded Choice AU specimen of this popular branch mint type issue, with just a touch of wear on the strongly impressed design elements. A die chip shows about half way up the neck, near the hair. The orange-gold surfaces retain much of their original mint luster and exhibit the expected number of minor abrasions for the grade. NGC ID# 26AP, PCGS# 8971

1875 Liberty Double Eagle, MS63+
Only Four Finer Coins at PCGS

- 3906 1875 MS63+ PCGS.** Vibrant, frosty mint luster washes over this rose-gold twenty dollar gold piece. Although the central curls are typically soft, the eagle's neck, wing, and tailfeathers are boldly rendered. PCGS has awarded a Plus designation for quality within the grade, and it does not take much imagination to see why. The fields are minimally abraded with only trivial grazes. A single tick occurs on the neck. Population: 84 in 63 (3 in 63+), 4 finer (4/17). NGC ID# 2547, PCGS# 8973

1875-CC Twenty Dollar, AU50
Partially Lustrous Fields

- 3907 1875-CC AU50 PCGS. Variety 9-A.** Some luster remains in the fields, and each side boasts original olive-gold patina with relatively smooth surfaces. The strike is weak on the central high points and several peripheral stars, making the coin look more worn than it actually is. Eye appeal is otherwise excellent. The 1875-CC is a popular type coin for Carson City collectors. NGC ID# 26AT, PCGS# 8974

1875-CC Double Eagle, AU58
Lustrous and Attractive

- 3908 1875-CC AU58 PCGS. Variety 5-A. Other than an old scrape near star 2 and a couple of tiny ticks on Liberty's cheek, there are no individual abrasions of note. This near-Mint Carson City double eagle shows only slight high-point friction atop well-defined motifs. Original luster remains in the fields, and the olive-gold patina is from more than a century of natural aging. NGC ID# 26AT, PCGS# 8974

1875-CC Liberty Double Eagle, AU58
New Variety 9-A

- 3909 1875-CC AU58 NGC. CAC. Variety 9-A (not listed in Winter). From a mintage of 111,151 pieces, the 1875-CC Liberty double eagle is the most available Type Two Carson City twenty. Doug Winter notes, "I am aware of two varieties, but I am virtually certain others exist." Heritage numismatist Brian Koller has identified this coin as the new Variety 9-A, with the CC mintmark left of the second T in TWENTY and the 7 in the date centered over the left edge of a dentil. This still-lustrous, lightly abraded near-Mint specimen also shows a faint die line from the edge to the E in AMERICA. NGC ID# 26AT, PCGS# 8974

1875-CC Liberty Double Eagle, MS61
Attractive for the Grade

- 3910 1875-CC MS61 PCGS. Variety 4-A. The 1875-CC is not only the premier Type Two Carson City issue and an extremely popular coin for type, but it is also one of the few CC dates that allow Mint State purchases at a collector-friendly price. This example is at the lower end of the Mint State scale, yet it offers outstanding eye appeal, a sharp strike, and minimally abraded surfaces as well.

Medium green-gold color has peach-gold undertones and vibrant mint luster. As always, abrasions are the sticking point for numeric grade, although this MS61 coin shows minimal marks for the grade. Eye appeal abounds. One can hardly find a more pleasing example for the grade and we expect strong bidder interest in this Uncirculated example. NGC ID# 26AT, PCGS# 8974

1875-CC Liberty Double Eagle, MS62
Attractive Type Two Branch Mint Issue

- 3911 1875-CC MS62 NGC. Variety 2-B.** The 1875-CC Liberty double eagle is the archetypal branch mint type coin. With a reported mintage of 111,151 pieces and a relatively high survival rate, the 1875-CC is the most available Type Two double eagle from the Carson City Mint and the easiest to locate in Mint State condition. That being said, the 1875-CC becomes scarce at the MS62 grade level and finer coins are rare.

The present coin is an attractive MS62 specimen, with well-detailed design elements that exhibit just a touch of softness on Liberty's hair and some star centers. The colorful orange-gold surfaces show the expected number of minor contact marks for the grade, with especially vibrant mint luster on sides. Overall eye appeal is quite strong. NGC has graded 26 numerically finer examples (5/17). NGC ID# 26AT, PCGS# 8974

1876 Twenty, Lustrous MS63
Conditionally Scarce Example

- 3912 1876 MS63 NGC.** This Philadelphia Mint issue had a substantial mintage of 583,905 coins, and examples are plentiful in AU and Mint State grades up to MS62. Select Uncirculated examples like this one are extremely scarce, and coins rated any finer than MS63 are rare. Outstanding, intense mint frost is the hallmark of this piece. The surfaces exhibit scattered small marks and lovely peach-gold and rose toning. Census: 46 in 63 (1 in 63+), 10 finer (5/17). NGC ID# 26AV, PCGS# 8976

1876-CC Twenty Dollar, AU50
Pleasing for the Grade

- 3913 1876-CC AU50 PCGS. Variety 3-D,** the elusive Wide CC reverse. The 1876-CC double eagle is plentiful in the AU grade range as a date that was used in the foreign trade and has a number of survivors that came from overseas vaults. It is a popular type coin for collectors seeking a single piece from this mint. The current coin displays partially lustrous fields and medium olive-gold patina. The design elements are well-detailed. NGC ID# 26AW, PCGS# 8977

1876-CC Double Eagle, AU55
Partially Reflective Fields

- 3914 1876-CC AU55 NGC. Variety 1-A.** This Choice AU 1876-CC double eagle is far more appealing than the bulk of the known coins in this grade. The fields are semiprooflike, and they are only slight muted in the open areas by light friction. The design elements are sharp, and neither side exhibits major abrasions. The surfaces are straw-gold in color. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, AU55
Reflective Fields, Strong Detail

- 3915** 1876-CC AU55 PCGS. **Variety 4-A.** Original honey-gold coloration enjoys frosty luster on the devices, and semiprooflike mirroring in the fields where minor friction has not muted it. A few abrasions are more noticeable than the general surface chatter on each side, including a few marks below Liberty's eye and another near the D in TWENTY D. The 1876-CC is suitable for branch mint type purposes. NGC ID# 26AW, PCGS# 8977

1877-CC Twenty, AU53
Low-Mintage Carson City Issue

- 3916** 1877-CC AU53 PCGS. **Variety 1-A.** The first C in the mintmark is markedly lower than the second, and the last 7 in the date is centered over a dentil. Liberty's ear opening shows "earbar" clash marks from the reverse, an interesting effect seen more often on Bust halves than on Liberty Head twenties. Light wear and a fairly soft strike combine on this Carson City twenty, although abrasions are few for the assigned grade. The surfaces are an attractive orange-gold deepening to amber-gold around some of the device outlines. A faint die grease streak appears in the left obverse field. The mintage was a low 42,565 pieces for this issue. NGC ID# 26AZ, PCGS# 8983

1877-CC Liberty Double Eagle, AU55+
Type Three Carson City Issue

- 3917** 1877-CC AU55+ NGC. **Variety 1-A.** The design of the double eagle was modified in 1877 to the Type 3 motif, with the denomination fully spelled out as TWENTY DOLLARS, instead of the abbreviated TWENTY D. of prior years. This was the only major design change for U.S. gold coinage that took place during the years the Carson City Mint was operating, making the issue an important one for branch mint type collectors. The 1877-CC claims a smallish mintage of 42,565 pieces, making it much more difficult to locate than the issues of the 1874-1876 era. The 1877-CC is usually seen in the XF-AU grade range, and most high-grade coins we know about today trace their origins to a hoard that entered the marketplace in the 1990's.

The present coin is a Plus-graded Choice AU specimen, with sharply detailed design elements that show only the slightest trace of wear. The pleasing orange-gold surfaces retain much original mint luster and show the expected number of minor abrasions for the grade, with most of the marks on the obverse. Eye appeal is quite strong for the issue. NGC ID# 26AZ, PCGS# 8983

1877-CC Liberty Twenty, AU58
First CC-Mint Type Three Issue

- 3918 1877-CC AU58 NGC. Variety 1-A.** From a mintage of 42,565 pieces, the 1877-CC Liberty double eagle is a better date in the series and branch type collectors prize the issue as the first Type Three twenty from the Carson City Mint. This impressive near-Mint specimen shows just a trace of wear on the sharply detailed design elements, with some interesting clash marks from the horizontal bars of the shield showing above Liberty's earlobe on close inspection. There is a faint die line from star 10 to the rim and another from E in AMERICA to the rim on the reverse. A few more die lines are seen after the S in DOLLARS. The lightly abraded orange-gold surfaces retain traces of original mint luster on both sides. NGC has graded 24 numerically finer examples (5/17). NGC ID# 26AZ, PCGS# 8983

1878-CC Double Eagle, XF45
Low-Mintage Carson City Issue

- 3919 1878-CC XF45 NGC. Variety 1-A.** Production of twenty dollar gold coins at the Carson City mint dropped to just 13,180 pieces in 1878, making it one of the most elusive dates from the Nevada facility. This partly lustrous Choice XF example displays bright yellow-gold surfaces and crisply impressed design motifs, notably on Liberty's hair and the eagle's feathers. The stars show full radial lines, and the eye appeal is strong despite a number of small abrasions. NGC ID# 26B4, PCGS# 8986

1878-S Twenty Dollar, MS62
Few Known in Higher Grades

- 3920 1878-S MS62 NGC.** Uncirculated 1878-S double eagles are occasionally seen, but rarely is a piece found above MS62. The current coin is vibrantly lustrous with original surfaces and sharp design elements. Some reflectivity appears in the fields, contrasting with scattered abrasions that define the grade. Census: 93 in 62 (4 in 62+), 7 finer (5/17). NGC ID# 338K, PCGS# 8987

1878-S Twenty Dollar, MS62
Incredibly High-End for the Grade

- 3921 1878-S MS62 PCGS.** Collectible in MS62, the 1878-S double eagle becomes substantially rarer just one grade point finer. The present coin is arguably the most visually appealing MS62 example known. The well-struck design elements boast sharp detail and reside amid frosty, radiant luster. Nothing more than a few stray lines on the obverse limit the grade, and the reverse is pristine. Eye appeal is simply exceptional. PCGS reports only 11 finer coins (4/17), some of which do not have the aesthetics of the present piece. NGC ID# 338K, PCGS# 8987

**1878-S Liberty Double Eagle, MS62+
Very Rare Any Finer**

- 3922 1878-S MS62+ NGC.** The 1878-S Liberty double eagle claims a large mintage of 1.7 million pieces, but the issue circulated heavily and examples in MS62 condition are elusive in today's market, while finer coins are very rare. This Plus-graded MS62 specimen exhibits well-detailed design elements and lustrous canary yellow surfaces that show a scattering of grade-consistent contact marks. Considerable traces of prooflike reflectivity are evident in selected areas. NGC has graded seven numerically finer examples (5/17). NGC ID# 338K, PCGS# 8987

**1879 Liberty Twenty, MS62
Seldom Offered This Fine**

- 3923 1879 MS62 NGC.** The 1879 double eagle is plentiful in MS60 and MS61, but this MS62 coin is conditionally scarce, and finer representatives are decidedly rare. The strike is sharp, and each side displays radiant cartwheel mint luster. Light, scattered abrasions define the grade but pose minimal distraction compared to what is frequently seen in this grade. Census: 30 in 62, 12 finer (5/17). NGC ID# 26B6, PCGS# 8988

**1882-CC Twenty Dollar, AU53
Original Surfaces**

- 3924 1882-CC AU53 PCGS. Variety 1-B.** Original olive-gold patina with luminous peach undertones gives this partially lustrous AU coin impressive appeal. The design elements are sharply detailed despite slight high-point wear. A graze near star 5 and a mark on the cheek below Liberty's eye are the only singular faults. The 1882-CC is a popular and collectible Carson City double eagle in AU condition. NGC ID# 26BF, PCGS# 8997

**1882-CC Twenty Dollar, AU58
Prooflike Reverse**

- 3925 1882-CC AU58 PCGS. Variety 1-A.** In Mint State, the 1882-CC double eagle is scarce and exists primarily in MS62 and lower grades, where eye appeal is often lacking due to heavy abrasions and bagmarks. A more affordable option that occasionally comes with smooth, attractive surfaces is an AU58 coin. Here offered is a partially lustrous yellow-gold near-Mint example with limited surface marks and sharp detail. The obverse displays frosty patina, while the reverse has deeply prooflike fields, produced by a freshly polished die. The originality of the coloration is unquestioned. Carson City gold is seldom seen with the "two-faced" appearance of this 1882-CC double eagle. NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar, AU58

- 3926 1882-CC AU58 PCGS. Variety 1-B.** A satiny surfaced, butter-gold Borderline Uncirculated double eagle from the legendary Carson City Mint. The surfaces are sharply defined with just the slightest bit of high-point friction evident. Each side exhibits interesting clash marks and the surfaces are only lightly abraded given its brief stint in western commerce. The usual die variety for the issue with a die line in front of Liberty's eye and a left-leaning mintmark. The 1882-CC has a notably low mintage of only 39,140 pieces. Examples finer than the present piece are seldom encountered. NGC ID# 26BF, PCGS# 8997

1882-CC Liberty Twenty, MS61
Popular Branch Mint Type Issue

- 3927 1882-CC MS61 PCGS. Variety 1-A.** Double eagle coinage was suspended in 1880 and 1881 at the Carson City Mint. When coinage resumed in 1882, an adequate mintage of 39,140 Liberty double eagles was accomplished, making the 1882 one of the more available issues of the decade and a popular choice of branch mint type collectors.

The present coin is an impressive MS61 specimen, with well-detailed design elements that show just a touch of the usual softness on the curls above Liberty's ear and the eagle's claws. A vertical spike in front of Liberty's eye and a die line above the A in DOLLARS identify the scarcer Variety 1-A. The vivid orange-gold surfaces radiate vibrant mint luster and show the expected number of minor contact marks for the grade. Population: 45 in 61, 26 finer (4/17). NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar, MS61
Infrequently Seen in Full Mint State

3928 1882-CC MS61 PCGS. Variety 2. The Mint State population of this low-mintage Carson City double eagle is almost entirely in the MS60 to MS62 range, with just two pieces certified finer than MS62 by both services combined. The rigors of foreign export and took their toll on the 1882-CC twenties, since it functioned as little more than a trade coin and those pieces that circulated domestically received significant marks from transportation and handling as well.

The present MS61 coin displays nice mint luster and light-green overtones with orange accents over lightly abraded, yellow-gold surfaces. The minor scuffiness aside, the coin is sharp and frosted with no heavy contacts. Considering that Select Uncirculated or finer coins are for all purposes unavailable, the MS61 level represents a good selection for many collectors who desire a clearly Mint State example. Population: 45 in 61, 26 finer (4/17). NGC ID# 26BF, PCGS# 8997

1883-CC Liberty Twenty, AU58
Elusive in Finer Condition

3929 1883-CC AU58 PCGS. Variety 2-A. Nearly Uncirculated and thoroughly lustrous, this high-grade 1883-CC double eagle shows only a trace of high-point friction and is devoid of heavy abrasions. Only some olive-gold grazes on the obverse are singularly noticeable. The 1883-CC is a scarce issue in Mint State, heightening demand for high-end AU coins. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty, AU58

3930 1883-CC AU58 NGC. Variety 2-A. The 1883-CC is among the more available CC-mint double eagles through the AU grade level. This is a curious reality, especially given the issue's original mintage of only 59,962 pieces. Ample mint luster is evident on both sides and modest cartwheel effects are noted at select angles. The light wear does not detract from the crisp overall detail, but a number of small to medium-sized marks are concentrated on the obverse. Ex: Long Beach Signature (Heritage, 2/2006), lot 3310. NGC ID# 26BH, PCGS# 8999

1883-CC Liberty Twenty, AU58

3931 1883-CC AU58 NGC. CAC. Variety 2-A. The 1883-CC Liberty double eagle is one of the more available Carson City twenties and a popular type coin. This impressive near-Mint specimen, with just a trace of wear on the well-detailed design elements. Some evidence of die rust is apparent, with die dots between stars 8 and 9 and to the right of 3 in the date. The lustrous orange-gold surfaces show a moderate number of minor abrasions for the grade. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, MS60
Luminous Original Surfaces

1883-CC Liberty Double Eagle, MS61
Rare Any Finer

3932 1883-CC MS60 PCGS. Variety 2-A. Gold specialist Mike Fuljenz speaks very highly of Carson City double eagles as an investment and a collecting pursuit. In *Type Three Double Eagles*, second edition, he writes of the 1883-CC: "This is one of my favorite Carson City double eagles for the new collector who wants a great introduction to this fascinating series. ... due to the fact that it is generally well made with good luster and an above-average appearance." The above-average appearance is in comparison to 1870s CC-mint twenties, which often lack the luster and sharpness seen on the 1883-CC.

The current coin is a conditionally elusive Mint State example with original olive-gold patina that shows ample peach-gold luster in the fields and recesses. We find no mentionable points of strike weakness, and grade-limiting abrasions are at a minimum for the grade. NGC ID# 26BH, PCGS# 8999

3933 1883-CC MS61 PCGS. Variety 2-A. From a mintage of 59,962 pieces, the 1883-CC Liberty double eagle is one of the more available issues of the Carson City series. The 1883-CC was a well-made issue and its relative availability in high grade makes it a popular choice with branch mint type collectors. The present coin is an impressive MS61 example, with a better-than-average strike and pleasing orange-gold surfaces that show the expected number of minor contact marks for the grade. Two small, raised die dots are evident, one to the right of the 3 in the date and the other touching the outer point of star 9. Much original mint luster remains intact and eye appeal is strong for the grade. Population: 68 in 61, 25 finer (4/17). NGC ID# 26BH, PCGS# 8999

**1883-CC Double Eagle, MS61
Sharp Original Surfaces**

- 3934 1883-CC MS61 PCGS. Variety 2-A.** Already elusive in Mint State, the 1883-CC seems even moreso because of strong collector demand. Equally popular with series collectors, Carson City specialists, and type maven, the issue also draws attention for its better-than-average sharpness and eye appeal.

This original example displays a medium-green hue and deep-gray overtones that confirm the naturally aged surfaces. The frosted fields and devices show bright cartwheel luster and only minor busyness exposed areas. The strike is sharp on the star centers, Liberty's hair bun and curls, and throughout the reverse motifs. PCGS reports just 26 numerically finer coins. Population: 67 in 61, 26 finer (4/17). NGC ID# 26BH, PCGS# 8999

1883-S Double Eagle, Lustrous MS63

- 3935 1883-S MS63 NGC.** Small Squat S. Readily appreciable characteristics include blended shades of mint-green and rose-gold, frosty luster, and a near-full strike. A series of reeding marks behind Liberty's hair and a dark toning spot between stars 2 and 3 will identify this Select 1883-S double eagle in future sales. Finer examples of the date are rarely offered. Census: 87 in 63 (1 in 63+), 6 finer (4/17). NGC ID# 26BJ, PCGS# 9000

**1884-CC Twenty Dollar, AU53
Peach and Green-Gold Coloration**

- 3936 1884-CC AU53 PCGS. Variety 1-A.** Greenish elements accompany the peach-gold color that dominates this lightly circulated Carson City double eagle. A few grazes, scattered bagmarks, and a touch of rub over the hair and cheek account for the grade. Several spots of struck-in grease occur around the reverse legends. The 1884-CC claims a mintage of 81,139 coins and is somewhat collectible through AU condition. NGC ID# 26BK, PCGS# 9001

**1884-CC Double Eagle, AU53
Remaining Glowing Luster**

- 3937 1884-CC AU53 PCGS. Variety 1-A.** The 1884 *Mint Director's Annual Report* noted that "gold deposits, coinage, and work at the [Carson City Mint] varied but little from that of the previous year." Double eagle output increased to 81,139 pieces from just under 60,000 coins in 1883. Remaining luster glows from the stars and other protected areas of this green-gold twenty. Abrasions are unobtrusive, and strike detail is crisp with only slight high point wear. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, AU53
Smooth Surfaces

- 3938 1884-CC AU53 PCGS. Variety 1-A. Light high-point wear accompanies original olive-gold hues on this About Uncirculated example, while the fields and Liberty's cheek are uncommonly smooth for the grade. Remnants of luster remain in the protected regions, and eye appeal surpasses expectations for the grade. NGC ID# 26BK, PCGS# 9001

1884-CC Liberty Head Twenty, AU53
Smooth, Luminous Surfaces

- 3939 1884-CC AU53 PCGS. Variety 1-A. Original luster glows in the fields when rotated beneath a light, illuminating fairly smooth surfaces on this About Uncirculated Carson City twenty. The strike is sharp and wear is light. The 1884-CC is plentiful in AU grades but elusive in Mint State. Examples in any grade are scarce with smooth, appealing surfaces. NGC ID# 26BK, PCGS# 9001

1884-CC Liberty Double Eagle, AU53

- 3940 1884-CC AU53 PCGS. Variety 1-A. The 1884-CC Liberty double eagle boasts a substantial mintage in the context of the series, at 81,139 pieces. As might be expected, the 1884-CC is a relatively available issue and a popular choice of branch mint type collectors. This impressive AU53 example shows a few traces of wear on the well-detailed design elements and the orange-gold surfaces are moderately abraded for the grade. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, AU53
Type Three Carson City Issue

- 3941 1884-CC AU53 PCGS. Variety 1-A. Lustrous fields ornately accent sharp design elements on this yellow-gold About Uncirculated example. A few marks on Liberty's cheek and scattered abrasions in the fields are consistent with norms for the grade. This issue is available in AU condition, as numerous examples survived U.S. gold melts via overseas hoards. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, AU55
Original Coloration

- 3942 1884-CC AU55 PCGS. Variety 1-A. Original green-gold surfaces yield remnants of luster in the protected regions of the fields and offer well-detailed design elements. Scattered abrasions are typical of the grade. The 1884-CC is a plentiful Carson City issue in AU grades, popular among collectors seeking a single representative from this mint. NGC ID# 26BK, PCGS# 9001

1884-CC Liberty Double Eagle, AU55

- 3943 1884-CC AU55 PCGS. CAC. Variety 1-A. Double eagle production increased to a respectable 81,139 coins at the Carson City Mint in 1884, making the 1884-CC one of the more available CC-mint twenties. This attractive Choice AU specimen shows just a trace of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 26BK, PCGS# 9001

1884-CC Double Eagle, AU58

- 3944 1884-CC AU58 NGC. Variety 1-A.** The 1884-CC Liberty double eagle is a relatively available issue in the Carson City series, from a mintage of 81,1329 pieces. This impressive near-Mint example displays just a touch of friction on the well-detailed design elements and the lustrous orange-gold surfaces are lightly abraded. A pair of crossing die lines intersect above the designer's initials, close to the hair. NGC ID# 26BK, PCGS# 9001

1884-CC Twenty Dollar, MS62
Few Pieces Exist Any Finer

- 3945 1884-CC MS62 PCGS. Variety 1-A.** As a date, the 1884 Carson City issue is readily available compared to other CC-Mint double eagles. As always, bagmarks are a concern, but a lens reveals only occasional tiny marks and abrasions on this frosty, sharply struck twenty. Liberty's hair strands and bun detail are complete, while essentially full details accompany the frosty, minimally marked reverse.

The mint luster is fantastic on both sides of the coin. Orange and rose-gold highlights capture the light, while the surfaces radiate sun-gold brilliance. It is worth noting PCGS reports just six numerically finer coins, all at the MS63 level. Population: 71 in 62, 6 finer (4/17). NGC ID# 26BK, PCGS# 9001

1887-S Double Eagle, MS62
Elusive in Finer Condition

- 3946 1887-S MS62 PCGS.** Cartwheel luster produces yellow and rose-gold hues as it travels around each side of this Uncirculated 1887-S double eagle. Sharp design elements further complement the appearance. As the grade suggests, this conditionally challenging S-mint double eagle has scattered abrasions on each side. NGC ID# 26BS, PCGS# 9007

1888-S Double Eagle, MS65
One of Two Top-Graded Examples
Worthy of a Premium Bid

- 3947 1888-S MS65 NGC.** Although the 1888-S is among the most often seen S-mint double eagles from the decade, it is extremely rare in MS65. In fact, our records suggest that this is one of only two Gems certified at NGC and PCGS combined. The NGC *Census* records three MS65 grading events, but one of those is a resubmission. In accordance with its top-rated status, this amazing twenty dollar gold piece is undoubtedly deserving of a premium bid.

Spectacular mint frost issues from delightful rose and peach-gold surfaces. The fields are exceptionally clean, while the cheek shows a few faint, wispy marks. Stars 1 to 3 are incomplete, though the others are nearly fully defined. Liberty's hair strands and the eagle's feathers are similarly well-impressed. A top-quality example sure to be a highlight in even the finest collection of Liberty Head double eagles. NGC ID# 26BU, PCGS# 9009

1889-CC Double Eagle, AU55
Original Surfaces

- 3948 1889-CC AU55 NGC. **Variety 1-A.** Despite its low mintage of only 30,945 pieces, the 1889-CC is one of the more plentiful double eagles from this mint, likely due to the discovery of one or more hoards of the date in the 1990s, according to Winter. This piece exhibits only slight friction, with rich green-gold color and remnants of luster in the design recesses. Distracting surface abrasions are minimal, adding to the overall eye appeal. NGC ID# 26BV, PCGS# 9011

1889-CC Liberty Double Eagle, MS60
Popular Branch Mint Type Issue

- 3949 1889-CC MS60 PCGS. **Variety 1-A.** The Carson City Mint resumed coinage operations in 1889 for the first time since 1885. A relatively small mintage of 30,945 Liberty double eagles was accomplished, but the issue is more available than that small production total suggests, thanks to a significant hoard (or hoards) that surfaced in the mid-1990's. The 1889-CC is still a scarce issue in Mint State grades, however. The present coin is an impressive Mint State specimen, with well-detailed design elements that exhibit a touch of the usual softness on some star centers. The pleasing orange-gold surfaces show the expected number of minor contact marks for the grade and retain much original mint luster. The overall presentation is quite attractive for a Carson City issue. NGC ID# 26BV, PCGS# 9011

1889-CC Double Eagle, MS61
Variety 1-A, Only Dies for the Date

- 3950 1889-CC MS61 PCGS. **Variety 1-A.** No coins were struck at the Carson City Mint in the years 1886-1888. When the facility resumed coinage operations in 1889, a small mintage of 30,945 Liberty double eagles was accomplished, using a single die pair to strike the whole production run. Fortunately, the 1889-CC has a surprisingly high survival rate, making the issue a popular choice of branch mint type collectors.

The present coin is an attractive MS61 specimen, with sharply detailed central design elements and just a touch of the usual softness on some star centers. A faint die crack shows through the bottom of the date and slight doubling is evident on Liberty's ear. The vivid orange-gold surfaces are lustrous and appropriately marked for the grade. Population: 58 in 61, 63 finer (4/17). NGC ID# 26BV, PCGS# 9011

1890-CC Liberty Twenty, AU55
Late Die State

- 3951 1890-CC AU55 PCGS. **Variety 1-A.** This attractive Choice AU specimen was struck from a late state of the dies and shows some missing detail in the eagle's tail feathers, due to lapping. The design elements were strongly impressed, however, and just a touch of actual wear is evident on the high points. The lightly abraded orange-gold surfaces retain surprising amounts of original mint luster. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, AU55
Lustrous and Appealing

- 3952** 1890-CC AU55 PCGS. Variety 1-A. The usual late die state, showing the eagle's tailfeathers partially effaced by die lapping. The coin otherwise benefits from a sharp strike and is well-detailed throughout despite light high-point wear. The original straw-gold surfaces retain moderate luster in the protected regions, and there are no major abrasions. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Twenty, AU55+

- 3953** 1890-CC AU55+ NGC. CAC. Variety 1-A. A Plus-graded Choice AU specimen from a mintage of 91,209 pieces, this coin exhibits strongly impressed design elements in most areas, but the reverse shows some incomplete detail in the tail feathers, due to lapping. Just a trace of high-point wear is evident, and the lightly abraded orange-gold surfaces remain lustrous and attractive. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, AU58

- 3954** 1890-CC AU58 PCGS. Variety 2-B. With its mintage of 91,209 pieces, the 1890-CC is one of the more available Carson City twenties. The mint luster on this piece is essentially complete (just a bit thin), and sweeps the fields and cheek. The reverse field exhibits myriad pinpoint depressions of unknown origin. Unlike most 1890-CC twenties, the reverse is not die doubled.
Ex: Dallas Signature (Heritage, 10/2006), lot 3301. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Double Eagle, MS61
Popular Branch Mint Type Issue

- 3955** 1890-CC MS61 NGC. Variety 1-A. The 1890-CC Liberty double eagle claims a mintage of 91,209 pieces, a substantial production total in the context of the series. Many of the coins were used to settle accounts in foreign trade and a significant number of pieces have been repatriated from European holdings over the years. As a result, the 1890-CC is a relatively available issue in today's market and a favorite choice of branch mint type collectors.

The present coin is an impressive MS61 specimen, with well-detailed design elements that show a touch of softness on some star centers. The tail feathers have lost some detail, due to lapping, and a long die crack extends through the tops of the letters in UNITED STATES OF AMERICA. The orange-gold surfaces retain much original mint luster and show the expected number of minor contact marks for the grade. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Twenty, MS61
Strong for the Grade

3956 1890-CC MS61 PCGS. Variety 1-A. As the most-available Type Three twenty from the Carson City Mint, the 1890-CC is plentiful in circulated grades but much is much scarcer in all Uncirculated conditions. This lustrous, greenish-gold example is well-struck and displays a few orange accents in the recesses and some deep-gray “dirt” on the high points of the portrait. Such originality is prized by gold specialists.

Virtually all examples of the issue show bagmarks from handling and transport during and after mintage. Coin-to-coin contact is less prevalent on the present example than on many, and only a short nick on the cheekbone and another on the chin exceed the minor chatter that exists sporadically nearby. As usual, the reverse fields and raised elements are more sheltered and less prone to marks. This piece is nice for the grade and will be a prized acquisition for the fortunate bidder who obtains it. Population: 103 in 61, 76 finer (4/17). NGC ID# 26BY, PCGS# 9014

1890-CC Double Eagle, MS62
Always Popular Branch Mint Type Coin

3957 1890-CC MS62 PCGS. Variety 1-A. The 1890-CC is a notable “demand rarity” in the Liberty Head double eagle series as well as a conditionally rare issue in Select Uncirculated or finer grades. It is quite scarce at the MS62 level as well. Abrasions are the main grade-limiting factor, although the present coin shows fewer and less-severe marks than normally associated with its assigned grade.

The colorful toning and lustrous eye appeal set this coin apart from its peers. Reddish highlights and lilac accents enrich the orange-gold patina. A crisp strike lacks full details only on the highest hair strands, while the right tailfeathers are incomplete from die lapping. Moreover, the vibrant visual impression and quality surfaces make this example an ideal alternative to the much rarer and expensive coins graded just one point higher. Population: 68 in 62 (4 in 62+), 8 finer (4/17). NGC ID# 26BY, PCGS# 9014

**1892-CC Liberty Double Eagle, AU53
Lower-Mintage CC-Mint Issue**

- 3958 1892-CC AU53 PCGS. Variety 1-A.** Only 27,265 Liberty double eagles were struck at the Carson City Mint in 1892. Fortunately, a number of coins were found in some hoards that surfaced in the 1990's, making the issue somewhat more available than the small production total would suggest. The well-detailed design elements of this impressive AU53 example show just a touch of actual wear and the pleasing orange-gold surfaces are lightly abraded, with traces of original mint luster on both sides. NGC ID# 26C6, PCGS# 9020

**1892-CC Liberty Double Eagle, AU55
Lustrous and Colorful**

- 3959 1892-CC AU55 NGC. Variety 1-A.** The 1892-CC Liberty double eagle was produced in limited numbers, but the issue has a high survival rate, thanks to some hoards that surfaced in recent times. This Choice AU specimen exhibits strongly impressed design elements, with just a touch of wear on the high points. A faint diagonal die line shows from the 2 in the date and a small die chip touches the dentils above the I in AMERICA. The vivid orange-gold surface retain much of their original mint luster. NGC ID# 26C6, PCGS# 9020

**1892-CC Double Eagle, AU58
Partially Reflective, Original Coloration**

- 3960 1892-CC AU58 PCGS. Variety 1-A.** A brush of high-point friction denies a Mint State grade, although the originality of the surfaces and the reflectivity in the protected portions of the fields deliver visually pleasing results. The olive-gold color and relatively smooth nature of the surfaces further heightens the appeal. NGC ID# 26C6, PCGS# 9020

**1892-CC Twenty Dollar, AU58
Exceptionally Lustrous**

- 3961 1892-CC AU58 PCGS. Variety 1-A.** This glimmering high-end 1892-CC double eagle sits on the threshold between AU and Mint State. Partially reflective fields and original straw-gold color are among the visual attributes, while sharp design elements exhibit almost no high-point wear. A scattering of light abrasions on each side is less distracting than what is seen on most low-end Uncirculated coins. Finer examples of the date are scarce. NGC ID# 26C6, PCGS# 9020

**1892-CC Liberty Twenty, MS61
Low Mintage, High Survival Rate**

- 3962 1892-CC MS61 PCGS.** A small mintage of 27,265 Liberty double eagles was accomplished at the Carson City Mint in 1892, with a single die variety known for the date. As might be expected, the 1892-CC was considered a rare date when collecting double eagles first became popular in this country, in the 1940s. Fortunately, a number of coins have surfaced in hoards since the mid-1990s, making the issue relatively available today.

The coin offered here is an impressive MS61 specimen, with well-detailed design elements that show some of the usual softness on the star centers. A minute die chip is evident on the dentils, above the I in AMERICA. The lustrous orange-gold surfaces show a number of minor contact marks and luster grazes on both sides, explaining the grade. Population: 60 in 61, 58 finer (4/17). NGC ID# 26C6, PCGS# 9020

1892-CC Double Eagle, MS61
Partially Reflective Fields

3963 1892-CC MS61 PCGS. Variety 1-A. “It is scarce and underrated in all uncirculated grades...” — Thus states Mike Fuljenz in *Type Three Double Eagles*, second edition. We have seen only limited numbers of Mint State 1892-CC double eagles with most in MS60 or MS61. The date is scarce in these lowest Uncirculated grades, but it is more accessible in these and collectible by some budget-conscious enthusiasts. Collectors need only select for quality and eye appeal.

The present coin is indeed eye-appealing for the grade, showing semireflective fields and original wheat-gold luster with remarkably few abrasions. Light handling marks on Liberty's cheek are all that limit the numeric designation. Population: 61 in 61, 58 finer (4/17). NGC ID# 26C6, PCGS# 9020

1893-CC Twenty Dollar, AU58
Smooth, Appealing Surfaces

3964 1893-CC AU58 PCGS. Variety 1-A. The final Carson City double eagle is a challenging issue in high grade, although not as much as it once was. Several quantities of the date have turned up from foreign hoards, making the date more collectible than it otherwise would be with a mintage of only 18,402 coins. Even so, near-Mint examples are elusive with smooth, attractive surfaces. The current coin is a scarce exception with original olive-gold patina that has no major abrasions. The design elements are sharp, and the fields are thoroughly lustrous when rotated beneath a light. A finer example will be difficult to locate below the Mint State level. NGC ID# 26C9, PCGS# 9023

1893-CC Liberty Double Eagle, AU58
Popular Branch Mint Type Coin

3965 1893-CC AU58 NGC. CAC. Variety 1-A. The 1893-CC Liberty double eagle was struck in small numbers, but the issue has a high survival rate. A significant portion of the mintage was used in foreign trade and a surprising number of coins have been recovered from European and Central American sources in recent years. Two die varieties are known for the date. This coin represents Variety 1-A, with the B in JBL centered over the 8 in the date. The 1893-CC was struck during the final year of operations at the Carson City Mint, an important consideration for type purposes.

The present coin shows just a trace of wear on the high points of the well-detailed design elements. The pleasing orange-gold surfaces are lightly abraded and retain much original mint luster. The overall presentation is quite attractive. NGC ID# 26C9, PCGS# 9023

1893-CC Liberty Twenty, MS61
Final Carson City Issue

3966 1893-CC MS61 NGC. Variety 1-A. Only 18,402 Liberty double eagles were struck at the Carson City Mint in 1893, the last year of coinage operations at the famous Western facility. Surprisingly, the 1893-CC is much more available in high grade than its nominal production total would suggest. A substantial number of pieces have been repatriated from European holdings in recent times. Although the 1893-CC is still a scarce issue in higher Mint State grades, its status as the final Carson City double eagle makes it especially popular with branch mint type collectors.

The present coin exhibits sharply detailed central design elements, with the slightest softness on some peripheral devices. From an early state of the dies, this piece does not show the usual die cracks through the bottom of the date and the letters TAT in STATES. The orange-gold surfaces radiate vibrant mint luster and are lightly marked for the grade. NGC ID# 26C9, PCGS# 9023

**1893-CC Double Eagle, MS62
Upper-End for the Grade**

- 3967 1893-CC MS62 ANACS. Variety 2-A.** The 1893-CC twenty is a curious issue with a low mintage, only 18,402 pieces, and a relatively high availability. This is primarily from the export of a substantial portion of the mintage to Europe. This is a highly appealing example of this final-year Carson City issue, with frosty green-gold luster and sharply struck design elements. Close scrutiny with a loupe reveals some faint interruptions in the luster on Liberty's cheek, likely what precluded ANACS from awarding this piece a finer grade, as the surfaces are devoid of the noticeable abrasions and deep cuts that typically affect gold pieces at this level. Numerically finer examples are rare. NGC ID# 26C9, PCGS# 9023

**1894-S Liberty Twenty, MS64
Nice Luster and Color**

- 3968 1894-S MS64 PCGS.** From a mintage of just over 1 million pieces, the 1894-S Liberty double eagle is scarce in MS64 condition and finer coins are very rare. This attractive Choice specimen offers sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster. PCGS has graded three numerically finer examples (4/17). NGC ID# 26CC, PCGS# 9026

**1903 Twenty Dollar, MS65+
Only Four Finer Coins at PCGS**

- 3969 1903 MS65+ PCGS. CAC.** This high-end Gem 1903 double eagle is among the finest examples of the date endorsed by CAC. PCGS has seen a few finer pieces, none of which we have yet handled. An NGC MS66 coin realized nearly \$10,000 in our August 2016 ANA Signature sale. This high-end PCGS Gem displays sharp detail and frosty yellow-gold mint luster. There are no distracting abrasions. Population: 14 in 65+, 4 finer. CAC: 33 in 65, 0 finer (4/17). NGC ID# 26CW, PCGS# 9043

**1905 Double Eagle, MS62
Pleasing for the Grade**

- 3970 1905 MS62 PCGS.** Light handling marks on Liberty's cheek define the grade on this Uncirculated 1905 double eagle, while in general the surfaces are smooth and pleasing. The strike is sharp. Fewer than 100 finer coins are reported by PCGS and NGC combined (5/17), making the 1905 a popular date in this more collectible grade of MS62. NGC ID# 26D2, PCGS# 9047

**1905 Twenty Dollar, MS62
Original Mint Luster**

- 3971 1905 MS62 PCGS.** Thoroughly lustrous surfaces offer original yellow-gold luster on this Mint State representative. The Liberty portrait and eagle are sharply defined, and eye appeal is good for the grade. Scattered abrasions on the obverse dictate the numeric designation. Finer 1905 double eagles are infrequently offered. NGC ID# 26D2, PCGS# 9047

**1905 Liberty Head Double Eagle, MS62
Low-Mintage Philadelphia Issue**

- 3972 1905 MS62 NGC.** The 1905 double eagle enjoys popularity from its low 58,919-coin mintage, although it is not entirely difficult to locate in grades below MS63. The scarcity of the Select and finer coins promotes strong demand for attractive MS62 coins such as the present. This piece offers radiant yellow-gold luster and bold detail. Scattered abrasions are in harmony with the grade. NGC reports 19 finer examples (5/17). NGC ID# 26D2, PCGS# 9047

**1907-D Liberty Head Twenty, MS65+
Elusive Any Finer**

- 3973 1907-D MS65+ PCGS.** This final-year Denver issue is scarce in Gem condition and rare finer. The present Plus-graded Gem offers frosty yellow-gold luster and boasts a lack of major abrasions. A luminous cartwheel effect increases the eye appeal. There are only 18 Plus-graded Gems at PCGS, and 19 finer coins (4/17). NGC ID# 26D8, PCGS# 9053

HIGH RELIEF DOUBLE EAGLES

**1907 High Relief Double Eagle
Wire Rim, AU Details**

- 3974 1907 High Relief, Wire Rim — Cleaning — PCGS Genuine. AU Details.** Luminous satin luster shows faint hairlines under 10x magnification at just the right angle. Otherwise, there is nothing to differentiate this coin from its numerically graded counterparts. The design is sharp, and we detect only the faintest traces of high-point rub, which may be attributed to the light cleaning from ages ago. A sharp wire rim surrounds much of each side. The budget-conscious collector will want to examine this piece in person and consider its appeal compared to higher-priced numerically graded coins.

**1907 High Relief Twenty, AU58
Wire Rim, CAC-Endorsed
Excellent Value**

- 3975 1907 High Relief, Wire Rim AU58 PCGS. CAC.** Augustus Saint-Gaudens was a lifelong advocate of realism. He advocated to his pupils that the ancient Greeks should be an artistic influence, even before Michelangelo. When asked in 1905 to name the sculptors he set before his followers, the first two were Phidias and Praxiteles. Then came Michelangelo. The influence of Classical sculptors is clearly seen on the designs used for the ten and twenty dollar gold coins from 1907. The loose, flowing drapery on Liberty seen on the High Relief twenty is clearly reminiscent of sculpture from Hellenistic Greece. All the high-relief features are clearly evident on this near-Mint example. The deep folds in the drapery give much of the three-dimensionality to the obverse. Just a bit of high-point friction is apparent as well as slight friction in the fields that has thinned the satiny luster on each side. The bright yellow-gold surfaces show just the slightest tinge of reddish patina. Some lucky collector will see this near-Mint, CAC-endorsed High Relief for the good value it is. NGC ID# 26F2, PCGS# 9135

1907 High Relief Double Eagle, MS60
Wire Rim, Original Color

3976 1907 High Relief, Wire Rim MS60 NGC. Both sides have an almost complete wire rim on this Uncirculated High Relief double eagle. The luminous peach-gold coloration is original, and there is no discernible wear on the devices. Scattered light marks limit the numeric grade but are less distracting than the light cleaning that is seen on many pieces that are graded one or two points finer. There is a faint rim bump on the reverse at the eagle's head that is not immediately noticed.

High Relief Saints are frequently offered in the lower Uncirculated grades, but it is unusual for a problem-free coin to receive an MS60 designation, as opposed to MS61 or MS62. A great many of the low-end Uncirculated pieces that we have handled were Details-graded only, with no numeric designation. Demand for problem-free, low-end Uncirculated High Reliefs never subsides. NGC ID# 26F2, PCGS# 9135

MCMVII High Relief Double Eagle, MS62
Wire Rim Variant

3977 1907 High Relief, Wire Rim MS62 NGC. Augustus Saint-Gaudens is well known for a few monumental sculptures, even though he also produced several hundred lesser works. The snail's pace that he worked on those few well-known sculptures were maddeningly long to the patrons who commissioned them, but his lack of speed is explained as integral to his method of work in his autobiography, edited by his son, Homer, after his death.

"To him a good thing was no better for being done quickly. Change after change should be made if needed to produce what was best. "Conceive an idea," he would say, "Then stick to it. Those who hang on are the only ones who amount to anything."

Even with the ten and twenty dollar gold coins from 1907 the pace was slow and methodical. In each case, the models were essentially complete when President Roosevelt gave him the commission in 1905. But two and a half years of minor adjustments delayed striking of actual coinage, and it wasn't until a month after the sculptor's death that the High Relief twenties actually went into production. Numismatists would certainly agree the results were worth the wait. The High Relief twenties are universally acclaimed the most beautiful U.S. coin. This example displays the usual, reddish patina over each side of the bright, satiny surfaces. A few short contact marks on the obverse explain the grade. NGC ID# 26F2, PCGS# 9135

PROOF HIGH RELIEF DOUBLE EAGLE

1907 Saint-Gaudens Double Eagle, PR62
High Relief, Wire Rim Proof Specimen

3978 1907 High Relief PR62 NGC. No official records have surfaced to confirm the striking of High Relief Saint-Gaudens double eagles in proof format, but many students of the series believe a limited number of proofs were struck, and NGC certifies coins struck from one specific die-collar combination as proof strikings. The most easily recognized feature of the proof coins is the edge lettering, which was applied by the same collar that was used to strike the famous Ultra High Relief double eagles.

This impressive PR62 specimen shows the expected sharpness of detail on the design elements, and the lightly marked orange-gold surfaces show a number of swirling die polish lines in the fields. There is a die line through the base of the dome on the Capitol building. The coin has a pronounced fin, or Wire Rim, around the edges and shows some recutting on the B in PLURIBUS. All these features are diagnostic of the NGC proofs. Pleasing matte luster adds to the considerable eye appeal. NGC ID# 28AX, PCGS# 9132

SAINT-GAUDENS DOUBLE EAGLES

1907 Saint-Gaudens Twenty, MS66
Arabic Numerals, Vivid Sun-Gold Coloration

3979 1907 Arabic Numerals MS66 PCGS. Premium Gem examples of the 1907 Arabic Numerals double eagle are deceptively elusive, since the issue is readily available in lesser Mint State grades. This MS66 representative displays tremendous eye appeal with rich and vibrant, sun-gold surfaces. The strike is expectedly sharp and only a few small marks provide any deterrent to a finer grade. PCGS reports a mere 18 pieces at the next numeric level (5/17). NGC ID# 26F5, PCGS# 9141

1908 No Motto Double Eagle, MS67
Ex: Wells Fargo Hoard, Dazzling Luster

3980 1908 No Motto, Wells Fargo Nevada, MS67 PCGS. Ex: Wells Fargo Nevada Gold. Short Rays Obverse. The famous Wells Fargo Hoard remains the single largest hoard of U.S. gold coins ever discovered. Most of the 1908 No Motto double eagles had the Short Rays Obverse that was carried over from the 1907 master die. Such coins were typically less-sharp than later-issued Long Rays Obverse coins. The present Short Rays Superb Gem is crisply struck with only minor weakness at the nose, knee, and stars. Bright mint luster rolls across the vibrant orange-gold surfaces with no significant marks of note. The overall quality is exceptional, with eye appeal that suggests an even finer grade. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

1908 No Motto Twenty, MS67
From the Wells Fargo Hoard

3981 1908 No Motto, Wells Fargo Nevada, MS67 PCGS. Ex: Wells Fargo Nevada Gold. Unbelievably, the Wells Fargo hoard contained nearly 20,000 1908 No Motto double eagles in high-grade Brilliant Uncirculated conditions — many of which were at the Superb Gem level including 10 incredible MS69 coins. This frosty example is “only MS67,” which speaks to the overall quality of the find. Vibrant and frosted rich-gold surfaces offer a pinpoint-sharp strike and only isolated, tiny abrasions. Cartwheel mint luster gleams across the finely grained, delightful surfaces. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

**1908 No Motto Double Eagle, MS67
Wells Fargo Hoard Representative**

- 3982 1908 No Motto, Wells Fargo Nevada, MS67 NGC.** Ex: Wells Fargo Nevada Gold. A majestic Superb Gem from the famous Wells Fargo Hoard, this coin features the short-lived No Motto design that is always popular with type collectors. Like most examples from the Hoard, the obverse displays the Short Rays motif from the 1907 master die. The design elements are sharply detailed and the impeccably preserved orange-gold surfaces radiate vibrant mint luster throughout. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

**1908-D No Motto Saint-Gaudens Twenty
Appealing Gem Example**

- 3984 1908-D No Motto MS65 PCGS.** Original satin luster illuminates orange-gold surfaces on this Gem 1908-D No Motto double eagle. The strike is decent throughout the relief elements, and no distracting abrasions are seen. While the Philadelphia No Motto coin of this date is common throughout much of the Mint State grade range, this Denver issue is not. Gems are elusive, and PCGS has seen only 13 numerically finer pieces (4/17). NGC ID# 26F7, PCGS# 9143

**1908 No Motto Twenty, MS67
Ex: Wells Fargo Hoard**

- 3983 1908 No Motto, Wells Fargo Nevada, MS67 PCGS.** Ex: Wells Fargo Nevada Gold. Single-handedly, the Wells Fargo Hoard of 1908 double eagles made the No Motto design readily available for double eagle collectors in high grades. While superlatives are commonplace in describing the hoard and the quality of the 1908 No Motto twenties it contained (nearly 20,000 pieces in mint-sealed bags), the incredible accumulation has lived up to its billing. This sharp Superb Gem representative is characteristically frosted and lustrous, untouched by the abrasions and marks that usually accompany even high-grade Uncirculated double eagles. The eye appeal is excellent. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

**1908-D No Motto Double Eagle, MS65
Outstanding Orange-Gold Patina**

- 3985 1908-D No Motto MS65 PCGS.** Long Rays Obverse. Mint Engraver Charles Barber continued to tinker with the double eagle motifs to increase Mint efficiency and die life, although not always to the aesthetic intent of the Augustus Saint-Gaudens design. Indeed, the 1908-D No Motto coins with the Long Rays Obverse seem to be better struck than their Short Rays counterpart. The Long Rays Obverse is identified by a ray nearly touching the stem tip of the olive branch. Wonderful orange-gold patina distinguishes this Gem example, with vibrant mint luster and remarkably few abrasions. A minor contact on Liberty's midsection is the sole mark of note. PCGS reports just 13 numerically finer examples (5/17). NGC ID# 26F7, PCGS# 9143

**1908-S Saint-Gaudens Twenty, MS64
Long Rays, With Motto Type**

3986 1908-S MS64 PCGS. CAC. Of all the regular-issue Saint-Gaudens double eagles struck after 1907, the 1908-S boasts the lowest mintage, as only 22,000 pieces were struck for circulation. It is also a condition rarity in high grade. The design was modified twice in 1908, first by adding the motto *IN GOD WE TRUST* to the reverse, and later by making the rays of the sun longer on the obverse. While both the Denver and Philadelphia Mints produced coins of all three design subtypes, all the coins struck at San Francisco show long rays on the obverse and the motto on the reverse.

The present coin is boldly impressed throughout. An abrasion on Liberty's right knee and a couple of marks on the eagle, are well-concealed. The fields are remarkably clean on this apricot-gold near-Gem, suggestive of a finer grade. Overall eye appeal is outstanding. Population: 33 in 64 (4 in 64+), 30 finer. CAC: 5 in 64, 18 finer (4/17).

Ex: *FUN Signature* (Heritage, 1/2009), lot 4173. NGC ID# 26FA, PCGS# 9149

**1910 Twenty Dollar, MS65
Extremely Rare One Grade Point Finer**

3987 1910 MS65 PCGS. The 1910 double eagle, with a mintage of just under half a million pieces, is available in grades through MS64 but elusive as a Gem and a rarity any finer. This marvelous MS65 example has light apricot-gold color and effusive luster. Boldly impressed devices are carefully preserved with just a few tiny ticks noted on the rays below the eagle. PCGS has certified just four coins finer (4/17).

Ex: *Central States Signature* (Heritage, 4-5/2010), lot 3985. NGC ID# 26FE, PCGS# 9154

**1910-D Twenty Dollar, MS66
Only Two Coins Finer at PCGS**

3988 1910-D MS66 PCGS. Available in lower grades, the 1910-D Saint-Gaudens double eagle is conditionally scarce in MS66 and prohibitively rare any finer. This Premium Gem example is unusually clean both in the fields and on the high points of Liberty's figure. Warm peach-orange hues ornately accent straw-gold luster. PCGS and NGC each report two finer representatives (4/17). NGC ID# 26FG, PCGS# 9155

**1910-D Twenty Dollar, MS66
High-Quality Denver Issue, Two Finer at NGC**

3989 1910-D MS66 NGC. Peach-gold surfaces with tangerine-gold highlights provide plentiful eye appeal for this early mintmarked Saint-Gaudens twenty. Readily available up to the MS65 level but elusive thereafter, the 1910-D is known for being brilliant, lustrous, and attractive regardless of grade. This Premium Gem epitomizes the reputation and takes it to an even higher level. Census: 46 in 66, 2 finer (4/17). NGC ID# 26FG, PCGS# 9155

1913 Saint-Gaudens Twenty, MS64
Better Date From the Philadelphia Mint

- 3990 1913 MS64 NGC. CAC.** The 1913 Saint-Gaudens double eagle claims a modest pre-war mintage of 168,700 pieces, making it one of the better early series dates from the Philadelphia Mint. This impressive Choice specimen exhibits sharply detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster throughout. A diagonal scratch through the top rays on the left is all that prevents a Gem designation. NGC has graded 19 numerically finer examples (5/17). NGC ID# 26FN, PCGS# 9161

1913-D Double Eagle, MS65
Few Offered Finer

- 3991 1913-D MS65 PCGS.** The 1913-D Saint is one of several issues that are available through MS64, become elusive in MS65, and are rare finer. PCGS has seen only seven '13-D coins finer than the current Gem (4/17). This piece offers bold detail and original straw-gold luster with accents of peach-orange throughout. Only tiny marks are discernible beneath a loupe. NGC ID# 26FP, PCGS# 9162

1914-S Double Eagle, MS66
Only One Coin Known Finer

- 3992 1914-S MS66 NGC.** The S mintmark pegs this 1914-dated double eagle as the most plentiful issue of the year, although it is still scarce in Premium Gem condition. The current coin is vibrantly lustrous with rich yellow-gold coloration. The strike is bold, and only a few tiny marks are visible under a loupe. NGC reports a single coin finer, PCGS none (4/17). NGC ID# 82KA, PCGS# 9166

1915-S Saint-Gaudens Twenty, MS66
None Finer at PCGS

- 3993 1915-S MS66 PCGS.** Ex: Jay Brahin. Among the finest 1915-S twenties certified by PCGS, this piece is numerically equal to the Simpson coin in the current highest-rated PCGS Registry Set. Original honey-gold and lime toning invigorates the boldly struck and nearly mark-free Premium Gem. Only a single example (an NGC MS67) has been certified finer by either major service (4/17). Ex: *Long Beach Signature (Heritage, 9/2008)*, lot 4458. NGC ID# 26FW, PCGS# 9168

1921 Double Eagle, Satiny MS62 Major Series Rarity

3994 1921 MS62 PCGS. The 1921 is among the keys to the Saint-Gaudens double eagle series, an issue that was not released in any great numbers and which at one point in the 1940s was thought to have a population of only four or five coins. Over time, additional examples came to light, many with light wear from circulation. New research by Roger Burdette finds that all of the 1921 double eagles known today originated from pyx residuals and a small quantity that was forwarded to the Mint Cashier in 1921. These two sources combined would have made a maximum of 582 coins available to the public. The existence today of numerous AU-level coins suggests that the majority of the population entered circulation briefly before the issue was recognized as a rarity. Issued more than a decade before the gold recall order of 1933, the 1921 did not even benefit from generic hoarding.

PCGS estimates that only about 150 1921 Saints are known, while more recent studies by Burdette indicate a population in the neighborhood of 175 coins. Most of these are lightly circulated or heavily abraded. PCGS and NGC combined report only 25 pieces finer than the current example, including likely resubmissions. Burdette estimates that only about 22 coins are known in those grades. In the top grades, high six-figure prices are the norm, and in the past the seven-figure barrier has been breached. Thus, the present MS62 coin, while itself a rarity and headliner in our current sale, is actually among the more accessible Mint State examples known.

We have not previously handled this specific coin. It shows a bold strike and satiny straw-gold luster with scattered but light surface abrasions. A tiny allow spot near the obverse rim at 8:30 is usable as a pedigree identifier. We have seen a number of low-end Uncirculated pieces with eye appeal inferior to that of the present coin. NGC ID# 26G2, PCGS# 9172

**1922 Saint-Gaudens Twenty, MS65+
Conditionally Rare in Finer Grades**

- 3995 1922 MS65+ PCGS.** The 1922 Saint-Gaudens double eagle is an available issue in MS65 condition, but finer coins are condition rarities. This Plus-graded Gem exhibits razor-sharp definition on all design elements and the well-preserved orange-gold surfaces radiate vibrant mint luster throughout. PCGS has graded eight numerically finer examples (4/17). NGC ID# 26G3, PCGS# 9173

**1922-S Double Eagle, MS64
Condition Rarity in Finer Grades**

- 3996 1922-S MS64 PCGS.** Although the 1922-S Saint-Gaudens double eagle can be found in MS64 condition with some patience, the issue is conditionally rare in finer grades. This impressive Choice specimen is sharply detailed in most areas, with just a touch of the typical softness on the Capitol dome. A network of spidery die cracks shows at the peripheries of both sides. The well-preserved orange-gold surfaces radiate vibrant mint luster and eye appeal is outstanding. PCGS has graded 20 numerically finer examples (4/17). NGC ID# 26G4, PCGS# 9174

**1923-D Saint-Gaudens Double Eagle, MS66+
Exceptional Branch Mint Type Coin**

- 3997 1923-D MS66+ PCGS. CAC.** From a mintage of 1.7 million pieces, the 1923-D Saint-Gaudens double eagle is an available issue at the MS66 grade level, but finer coins are very scarce. This Plus-graded Premium Gem offers sharply detailed design elements throughout and the impeccably preserved orange-gold surfaces radiate vibrant mint luster on both sides. Eye appeal is terrific. NGC ID# 26G6, PCGS# 9176

**1924-D Double Eagle, MS63
Scarce Issue in High Grade**

- 3998 1924-D MS63 PCGS.** Decades ago, the 1924-D was a premiere rarity in the Saint-Gaudens double eagle series, but a number of coins surfaced in European sources over the years to augment the supply available to U.S. collectors. The 1924-D is still a scarce issue in high grade, however. This attractive Select specimen exhibits well-detailed design elements and lightly marked, lustrous orange-gold surfaces. NGC ID# 34VF, PCGS# 9178

**1924-S Saint-Gaudens Twenty, MS63+
Scarce, Heavily Melted Issue**

- 3999 1924-S MS63+ PCGS.** Despite the large mintage of 2.9 million pieces, the 1924-S Saint-Gaudens double eagle is a scarce issue, thanks to the massive melting of gold coins that followed the Gold Recall of 1933. This Plus-graded Select example offers well-detailed design elements and vivid orange-gold surfaces that show only minor signs of contact. Vibrant mint luster adds to the outstanding visual appeal. NGC ID# 26G9, PCGS# 9179

**1925-S Double Eagle, MS62
Upper-End for the Grade**

- 4000 1925-S MS62 PCGS.** The 1925-S Saint-Gaudens double eagle is a better date in Uncirculated condition. This MS62 coin is exceptionally appealing for the grade, showing relatively clean fields and original sun-gold luster. Liberty's figure is sharp, and thereon are seen the only grade-limiting abrasions, which are mostly unnoticed by the unaided eye. An outstanding 1925-S for the quality-conscious collector. NGC ID# 26GC, PCGS# 9182

**1926-D Saint-Gaudens Double Eagle, MS63
Seldom Encountered Finer**

4001 1926-D MS63 PCGS. CAC. While other issues in the Saint-Gaudens series, such as the 1922-S and 1926-S, were once considered great rarities, over the past 50 years substantial hoards of those coins have been found in European bank vaults. In fact, very few of the rarities from the 1940s and early 1950s have withstood the test of time. However, the 1926-D remains a scarce issue. Probably fewer than 600 pieces are extant today in all grades, and the vast majority of those are graded MS62 or lower.

As indicated by the CAC sticker, this is a premium coin for the grade. Much of this appeal comes from the subtle interplay of reddish-golden and lilac color on each side. The surfaces are also remarkably clean for the MS63 grade. The only marks of any note are a diagonal series of shallow digs that trails down to Liberty's right (facing) arm from the T in LIBERTY. A short, diagonal contact mark is also located just below the bottom of the R in LIBERTY. Sharply defined in most areas, the only area of softness is seen on the Capitol building, but this appears to be a trait common to most 1926-D twenties. Population: 56 in 63 (1 in 63+), 28 finer. CAC: 5 in 63, 6 finer (4/17).

Ex: ANA Signature (Heritage, 7-8/2008), lot 2122; FUN Signature (Heritage, 1/2012), lot 5115. NGC ID# 26GE, PCGS# 9184

**1926-S Twenty Dollar, MS64+
Lustrous and Appealing**

4002 1926-S MS64+ PCGS. The 1926-S is a better date in Mint State, although examples in MS64 are moderately available for a price. The issue becomes rare in MS65, which gives this MS64+ coin particularly strong appeal. Frosty wheat-gold luster rolls around each side, and the fields are mostly clean. A few small marks on the high points of Liberty's well-defined figure are all that prevent a full Gem grade. NGC ID# 26GF, PCGS# 9185

**1926-S Saint-Gaudens Twenty, MS65
Condition Rarity in Finer Grades**

4003 1926-S MS65 PCGS. This no-questions Gem has a pleasing, near full strike, and also displays exceptionally appealing medium golden-orange color. The glowing satiny luster is lovely as well, if not flashy, and helps to accent the exquisitely preserved features. Several small contact marks are visible under the eagle, and the obverse shows only trivial blemishes. An attractive and minimally abraded example of this mass-melted issue. Most certified 1926-S Saints fall into the MS62 to MS64 grade range, and specimens grading as high as the present example can be considered conditionally rare. Population: 38 in 65, 4 finer (4/17).

Ex: The Phillip H. Morse Collection of Saint-Gaudens Coinage (Heritage, 11/2005), lot 6690. NGC ID# 26GF, PCGS# 9185

1927 Double Eagle, MS66+
CAC-Approved Type Coin

4004 1927 MS66+ NGC. CAC. This available type coin issue is scarcely seen finer than the Premium Gem level, making the current Plus-graded MS66 coin particularly appealing. Boldly struck design elements reside amid frosty rose-gold luster that is devoid of serious abrasions. NGC has seen 58 finer coins, and CAC has green-stickered only four (5/17). NGC ID# 26GG, PCGS# 9186

1929 Saint-Gaudens Double Eagle, MS64
Late-Series Rarity

4005 1929 MS64 PCGS. This is one of the premier dates among Saint-Gaudens double eagles and an issue that certainly reflects the times in which it was produced. Writing in *The Great Crash of 1929* (1955), economist John Kenneth Galbraith explained:

“The singular feature of the great crash of 1929 was that the worst continued to worsen. What looked one day like the end proved on the next day to have been only the beginning. Nothing could have been more ingeniously designed to maximize the suffering, and also to insure that as few as possible escaped the common misfortune.”

In a climate of such financial despair, demand for the high-denomination double eagles remained understandably low. Roger W. Burdette found that just 23,020 coins from a mintage of nearly 1.8 million pieces were paid out. The issue suffered a high rate of attrition, leaving a strictly limited supply for present-day collectors.

The coin offered here is an attractive Choice specimen, with sharply detailed design elements throughout. The lightly marked orange-gold surfaces radiate vibrant mint luster from both sides and eye appeal is outstanding. PCGS has graded 33 numerically finer examples finer (4/17). NGC ID# 26GL, PCGS# 9190

COMMEMORATIVE SILVER

1936 Gettysburg Half Dollar, MS67+
Bright Mint Luster

4006 1936 Gettysburg MS67+ PCGS. CAC. This fully struck Gettysburg commemorative half dollar displays glowing, frosty mint luster with a hint of iridescence that appears throughout the undisturbed surfaces. The eye appeal is exceptional. PCGS has seen only three numerically finer representatives (4/17). NGC ID# BYGM, PCGS# 9305

1938 New Rochelle Half Dollar, SP67
50 Examples Struck

4007 1938 New Rochelle, Specimen Finish, SP67 PCGS. CAC. The 1938 New Rochelle half dollars were struck from a design by Gertrude Lathrop to commemorate the 250th anniversary of the founding of that city by the Huguenots. A total of 50 presentation pieces (now certified as Specimen strikings by PCGS and NGC) were struck on polished blanks from polished working dies and distributed to members of the Coinage Committee, the Westchester County Coin Club, and local dignitaries. The Specimen coins are rarely offered today and examples are highly prized by commemorative collectors.

The present coin is a spectacular Superb Gem, with sharply detailed design elements and deeply mirrored fields on both sides. The impeccably preserved surfaces are visited by delicate shades of pale gold toning and overall eye appeal is terrific. Population: 9 in 67 (2 in 67+), 1 finer. CAC: 7 in 67, 0 finer (4/17). NGC ID# BYN6, PCGS# 99335 Base PCGS# 9335

MODERN BULLION COINS

1995-W Silver Eagle, PR70
Magnificent Ultra Cameo Example

4008 1995-W Silver Eagle PR70 Ultra Cameo NGC. The profoundly deep mirroring of the fields on this 1995-W Silver Eagle are interrupted only by the reflection of the viewer. The sharp motifs are frosty and fully struck, and neither side exhibits a single discernible flaw. Prior to the year 2000, only a single Silver Eagle issue was struck at the West Point Mint: the 1995-W. This issue was specially struck solely for the 10th anniversary bullion coin proof sets that bore the W mintmark on each coin. Only 30,125 sets were distributed, this being the entire mintage of the 1995-W Silver Eagle. The date is understandably an unrivaled key date today, especially in perfect PR70 Ultra Cameo condition. NGC ID# CFWX, PCGS# 9887

1995-W Silver Eagle, PR70 Deep Cameo
Flawlessly Preserved and Brilliant

4009 1995-W Silver Eagle PR70 Deep Cameo ANACS. ANACS declares this coin flawless, and after careful examination, we concur. The brilliant white-on-black surfaces showcase dramatic contrast and deep mirroring in the fields. The strike is full throughout. In 1995, the Mint celebrated the 10th anniversary of the bullion coin program by issuing a special proof set of the five gold and silver denominations from the West Point Mint. Only 30,125 sets were sold, and today the 1995-W Silver Eagle is far and away the key to the proof Silver Eagle series. NGC ID# CFWX, PCGS# 9887

**1995-W Silver Eagle, PR70 Deep Cameo
Edmund C. Moy Signature Holder**

- 4010** 1995-W Silver Eagle, Moy Signature PR70 Deep Cameo PCGS. The collectible Edmund C. Moy PCGS signature holder. PCGS has certified nearly 200 1995-W Silver Eagles in PR70 Deep Cameo, although just 29 of those are in Moy signature holders, making this an elusive “variety” of the issue. Registry Set collectors will be especially intrigued by this piece, which backs up its numeric grade with flawless, brilliant surfaces that showcase dramatic white-on-black contrast and a full strike. There are currently 562 proof Silver Eagle sets listed on the PCGS Registry (4/17), revealing the extent of the collector demand for top-grade examples of this key West Point issue. PCGS# 522923 Base PCGS# 9887

**2015-W High Relief One-Ounce Gold Piece
MS70 Prooflike**

- 4011** 2015-W High Relief One-Ounce Gold, .9999 Fine, First Strike, Moy Signature, MS70 Prooflike PCGS. PCGS reports 122 MS70 Prooflike examples of the 2015-W High Relief one-ounce gold issue, but only 20 of those reside in Edmund C. Moy signature holders (4/17). This piece is fully struck and flawlessly preserved with appreciable cameo contrast on the reverse. The American Liberty High Relief Gold series is only in its second issue but is slated to see a new issue and design every two years. This 2015-W coin is the inaugural issue. PCGS# 546098 Base PCGS# 546021

TERRITORIAL GOLD

**C. Bechtler Five Dollar, AU53
134G, With Star, K-20 Variety**

- 4012** (1837-1842) C. Bechtler Five Dollar, 134G, With Star AU53 PCGS. K-20, R.4. America's first gold rush took place in Georgia and the Carolina's in the 1820s and 1830s. Private coiner Christian Bechtler coined gold deposits into well-accepted coinage for the miners of the region, saving them the arduous and hazardous overland trip to the Philadelphia Mint. Bechtler's coinage circulated widely in the Southeast United States until the Civil War. This variety was struck in the sixth series of Bechtler coinage, from 1837-1842. The five dollar coins are scarcer than their one dollar counterparts. This attractive AU53 example offers well-detailed design elements and lightly abraded antique-gold surfaces that retain traces of original mint luster in selected areas. Listed on page 393 of the 2018 *Guide Book*. Population: 14 in 53, 20 finer (4/17). NGC ID# 2B9T, PCGS# 10097

1849 Mormon Quarter Eagle, AU Details
Elusive One-Year Issue, K-1

- 4013** 1849 Mormon Quarter Eagle — Scratch — PCGS Genuine. AU Details. K-1, High R.5. Some soldiers of the Mormon Battalion, who were stationed in California during the Mexican War, were among the early discoverers of gold in the waters of the American River late in 1848. Four denominations of gold coins (\$20, \$10, \$5, and \$2 1/2) were struck from gold dust found by these soldiers after their return to Salt Lake City, where the local economy was suffering from an almost complete lack of circulating coinage. Unfortunately, the Mormon assayers lacked experience in this field, and their coins were determined to be of low weight and fineness when examined by the assayers at the United States Mint. Reports of this low intrinsic value caused the Mormon coinage to be widely repudiated outside the Mormon community, and most of the coins were melted for recoinage at an early date. The five dollar denomination was struck again in 1850 and 1860, but the other denominations were one-year issues. The 1849 Mormon quarter eagle is elusive in all grades today.

The present coin shows some light wear on the well-detailed design elements, but the pleasing orange-gold surfaces are lightly abraded, outside of a thin gouge on the reverse that extends from the H in HALF to the Clasped Hands. Listed on page 408 of the 2018 *Guide Book*.

1850 Mormon Five Dollar, AU Details
K-5, Important Territorial Issue

- 4014** 1850 Mormon Five Dollar — Edge Damaged — PCGS Genuine. AU Details. K-5, High R.5. Mormon veterans of the Mexican War, as well as settlers, artisans, and converts faced hard times after the long journey westward. The gold fields of California beckoned, and those that were successful gathered a small fortune in gold before returning to the Great Salt Lake Valley, which was settled by the Mormons in 1847. Coinage operations were established there in 1849. Soldiers who received their pay in gold added to the bullion pool for the Mormon mint.

The simplistic design for this Mormon five dollar gold piece incorporates traditional Mormon symbols (as do all of the Mormon denominations), with a crowned eye and clasped hands on the five dollar pieces. The coins produced were substandard in terms of their gold value, which mattered little to the coinage circulating among the Mormon community. Those coins that circulated more widely were subject to scrutiny. The edge damage on this example may indeed be test cuts for those testing the coin for fineness. The smooth surfaces display greenish-gold color and only a few small marks. Because many Mormon coins were melted, the supply for today's collectors is limited and this Genuine piece is sure to attract much attention from bidders.

1860 Mormon Five, AU Details
Popular Lion Obverse, K-6

- 4015** 1860 Mormon Five Dollar, K-6, High R.5 — Cleaning — PCGS Genuine. AU Details. Among the consequences of the discovery of gold in Colorado in 1858 was this final attempt at a Mormon coinage, a full decade after the previous effort was abandoned. J.M. Barlow and Douglas Brown struck the coins at a mint established in Barlow's jewelry store, with full approval from Brigham Young. The coins circulated readily in the local economy but, outside the Mormon community there was considerable mistrust of the coinage, and it only circulated at a steep discount. Coinage operations continued until 1861, when governor Alfred Cumming prohibited further production by the Mormon mint. Most examples were melted shortly afterward, making the issue very scarce in later years.

The attractive design featured a recumbent lion on the obverse, with the date below, and the motto HOLINESS TO THE LORD around. The lettering was inscribed in the Deseret alphabet, and is historically important as one of the few examples of this script to survive today. The reverse features an eagle behind a beehive, with the legend DESERET ASSAY OFFICE. PURE GOLD. around, with 5.D. below. The reverse is lettered in Latin script.

The present coin is an impressive specimen with well-detailed design elements that show just a touch of actual wear. The pleasing orange-gold surfaces are lightly abraded, but the luster is somewhat dimmed by a light cleaning, long ago. The overall presentation is quite attractive. Listed on page 409 of the 2018 *Guide Book*.

1860 Clark, Gruber Ten, K-3, VF Details

- 4016** 1860 Clark, Gruber & Co. Ten Dollar — Reverse Scratched — NGC Details. VF K-3, R.5. Bright yellow-gold surfaces offer the typical appearance of this Pikes Peak ten dollar gold issue. The relief elements are worn but retain moderate detail. Heavy abrasions appear in the fields. A small dig near the tip of the eagle's right (facing) wing and several vertical pinscratches in the field above the eagle's head prevent a numeric designation from NGC.

S.S. CENTRAL AMERICA GOLD BAR

Kellogg & Humbert Gold Ingot, 107.76 Ounces
Classed in the 'Very Large' Category

4017 Kellogg & Humbert Gold Ingot. 107.76 Ounces. CAGB-487. The recovery of the S.S. *Central America* yielded far more than the 532 gold ingots and thousands of coins contained within its rusted hull. It illuminated a fascinating and to that point narrowly understood history of California Gold Rush assayers. Researchers were generally unfamiliar with the style of Western assayers' bars from that period, and as Dave Bowers writes in his monumental *California Gold Rush History*, "The array of ingots furnished the unique opportunity to study characteristics and features the likes of which have never been recorded."

As much as the historic shipwreck discovery revealed about the prominent San Francisco assayers of the mid-1850s, it also confirmed something that was already well-known to numismatists, that the partnership of J.G. Kellogg and Augustus Humbert was the best-reputed firm in Gold Rush-era California. Kellogg & Humbert ingots represented 65% of the treasure. There were 343 such bars in all, 258 more than any other assayer, including the largest ingot, the "Eureka" bar, weighing an astonishing 933.94 ounces.

Augustus Humbert is widely known for his involvement in the production of the iconic, fifty dollar gold "slugs" manufactured in 1851 and 1852. He joined up with John Grover Kellogg in April 1855, striking twenty dollar gold coins despite the ongoing operation of the fledgling San Francisco branch mint, which had opened one year earlier. In fact, while the two facilities worked simultaneously to produce coinage for the West Coast economy, the private firm of Kellogg & Humbert was held in much higher esteem. A May 1, 1855 article in the *Alta California* explains:

"It is not generally known, but is nevertheless the fact, that the principal private assay office in the country [K&H] effects over fifty percent more towards the supply of coin to the country than the United States Mint does. The highest point reached by the Mint has been about \$1,500,000 per month in coin. The assay office has for weeks at a time, manufactured about \$60,000 to \$80,000 per diem. Every banker in the State will acknowledge that but for the assay office the financial crisis in this State would have been prolonged for weeks and weeks."

These Kellogg & Humbert ingots are always in high demand. Their historical and numismatic significance, combined with the storied tale of their 1857 sinking and amazing recovery 138 years later explain the allure. This particular example's immense proportions are also certain to impress.

The S.S. *Central America* ingots were categorized by size, ranging from very small to colossal. This 107.76 ounce gold bar falls within the very large size range of 100.01 to 300.00 ounces. The 55 mm x 111 mm dimensions correspond to Mold K&H-04. The top side is neatly laid out with the serial number, 621, at the top, followed by the company hallmark / 107.76 Oz / 871 FINE / \$1940.24. The serial number is repeated at the top of the back side. The ingot is bright yellow-gold throughout with no traces of rust, but in the center of the back side there is an area of what appears to be some sort of ocean debris. A massive and highly attractive ingot from this historic salvage effort. NGC ID# ANKB, PCGS# 10171

PHILIPPINES

1905 Philippines Peso, PR66
Scarce Proof-Only Issue

- 4018** 1905 Philippines Peso PR66 PCGS. Philippines pesos were struck in proof each year between 1903 and 1908. The 1905 through 1908 issues are proof-only. The 1907 is non-collectible, since just two pieces are known. The 1905 is the second-rarest date, and has a proof mintage of 471 pieces. Much of the mintage was likely lost during the World War II Japanese occupation. This is a lustrous Premium Gem that boasts a sharp strike and exemplary eye appeal. Hints of straw-gold and silver-gray toning adorn the borders. Only an infrequent tiny fleck denies perfection. Population: 4 in 66, 5 finer (4/17). NGC ID# 2CAJ, PCGS# 90404

PATTERNS

1849 Three Cent Silver, Probably in Silver
The So-Called 'Ugly Duckling'
Judd-113 Original, Toned PR64

- 4019** 1849 Three Cent Silver, Judd-113 Original, Pollock-127, High R.7 PR64 PCGS. Popularly known as the "Ugly Duckling," this pattern combines the Arabic and Roman numerals 3 and III, one on each side, with no other legends, date, denomination, or other device. Not only is this a "coin without a country," it states a quantity with no units. Struck in a "silver-copper alloy of unknown proportions," according to Judd, with a plain edge. Saul Teichman believes these pieces are more than likely standard coin silver, rather than 50% silver / 50% copper as seen on Judd-111, or 60% silver / 40% copper as seen on Judd-112. Restrikes apparently exist, and were struck later than 1849. This is an original. The fields show remarkably deep reflectivity for such a richly toned coin. Each side displays cobalt-blue toning with lighter accents scattered about. NGC ID# 33HY, PCGS# 11495

1851 Unperforated Cent in Silver
Judd-128b, PR64
Believed Only Two Known

- 4020** 1851 Cent, Judd-128b, Pollock-152, R.8, PR64 PCGS. The obverse displays the denomination CENT above and the composition ONE TENTH SILVER below a non-perforated center. On the reverse, the legend UNITED STATES OF AMERICA surrounds a laurel wreath. Struck in silver with a reeded edge. The 1851 cent was a continuation of the perforated and unperforated pattern cents begun in 1850. Only two examples are believed known in silver, unperforated, and with a reeded edge. Possibly struck on a dime planchet. The only other known Judd-128b was in the Stack's 7/2008 auction, and this is not that coin. Very likely ex: Farouk. NGC ID# 298P, PCGS# 11549

1852 Annular Gold Dollar in Copper-Nickel
Judd-140, PR64

- 4021 1852 Gold Dollar, Judd-140, Pollock-167, Low R.7 PR64 PCGS.** One of the proposed solutions to the problem of the undersized and easily lost gold dollar was an annular pattern. The large center perforation (as struck) and narrow margin forces a simple design. The obverse has only USA above the hole with 1852 below, while the reverse has a series of laurel sprigs amidst heavy concentric die lines. Curiously, no denomination is stated. Struck in copper-nickel with a plain edge. The surfaces have toned a light brown but still retain the distinctive underlying golden-tan color common to copper-nickel alloy. Original, untampered surfaces with a couple of small, dark incrustations on each side. NGC ID# 2996, PCGS# 11589

Undated (1853) Cent in Copper-Nickel
The Size of a Quarter Eagle
Judd-151c, PR65

- 4022 (1853) Cent, Judd-151c, Pollock-179, R.7, PR65 PCGS.** Cent patterns were struck in 1853 in an effort to replace the cumbersome "large" cents then in circulation. On the Judd 149-151 pieces the obverse is adapted from quarter eagle dies while the reverse has ONE CENT inside a laurel wreath. The Judd 151b, c, and d pieces are struck from an unfinished obverse die with dentils around the border, but no lettering or motifs. The reverse is the same as on the Judd 149-151 patterns. The Judd-151 pieces were struck in a 40% nickel, 60% copper composition with a plain edge. Fewer than half a dozen pieces are believed known of this seldom-seen pattern. The copper-nickel composition is readily apparent with the original honey-tan color a few shades deeper from the passage of time. Problem-free. NGC ID# 299L, PCGS# 62413

1857 Quarter, Struck in Copper
Blank Center of the Reverse
Judd-188, Glossy PR64 Brown

- 4023 1857 Quarter Dollar, Judd-188, Pollock-225, Low R.7, PR64 Brown PCGS.** The obverse is the regular-issue Seated Liberty quarter from 1857, while the reverse is from an incomplete die that shows UNITED STATES OF AMERICA and QUAR. DOL. at the rim in a smaller font than on the regular issues, with the letter Q shaped much differently. The center of the reverse is blank. Struck in copper with a plain edge. Judd describes this pattern as the first work by Anthony Paquet. USPatterns.com speculates it may be a set-up piece for his quarter pattern from the following year, Judd-221. Known to have been struck in both thick and thin planchets, this appears to be a thick planchet example. The surfaces are glossy and reddish-brown and evenly matched from side to side. The reverse was double struck with an approximate 2-3% rotation between strikes. NGC ID# 29B7, PCGS# 11825

1858 Paquet-Designed Cent in Copper-Nickel
Judd-204, PR65

- 4024 1858 Flying Eagle Cent, Judd-204, Pollock-248, R.5, PR65 PCGS.** Anthony Paquet's small flying eagle motif is paired with an ornamental shield and oak wreath reverse. Struck in copper-nickel with a plain edge. This is the relatively common version of this popular pattern. The scarcer variant was struck in copper and only a half-dozen or so are known of those, making this the buy for the value-conscious collector. The obverse fields show dramatic, deep reflectivity and lighter tan color. The reverse is a few shades deeper with a hint of red and not quite as reflective as the obverse. A few specks of carbon are scattered about, this being just about the only flaw we see on this piece. NGC ID# 29BK, PCGS# 11871

1859 Half Dollar Pattern Struck in Silver
Judd-245, Pollock-301, Deeply Toned PR66

- 4025** 1859 Half Dollar, Judd-245, Pollock-301, R.7, PR66 NGC. The obverse features the so-called "French Head" of Liberty facing right. In fact, the profile was almost certainly modeled after the Apollo Belvedere statue in Rome. A large eagle with a heraldic shield dominates the reverse. The eagle clutches a ribbon in its beak, and the claws grasp an olive branch and three long arrows. The "Perfect Ribbon" subvariety is characterized by four vertical lines in the shield, seven tail feathers, pointed left (observer's right) wingtip, and full leaf above the A in HALF. Struck in silver with a reeded edge. Rich, multicolored toning covers each side and partially subdues the proof mirrors in the fields. Each side, however, appears free from any mentionable contact marks. NGC ID# 29CS, PCGS# 11988

1866 'Dutch 5' Shield Nickel in Bronze
Judd-491, PR65 Red and Brown
Thick Planchet Variant

- 4026** 1866 Shield Five Cents, Judd-491, Pollock-578, Low R.7, PR65 Red and Brown PCGS. Five cent pattern with an obverse similar to the adopted Shield nickel design with date separated by the ball at the bottom of the shield. The reverse features a "Dutch" numeral 5 inside a laurel wreath. Struck in bronze with a plain edge. Allegedly pieces were struck in both copper and bronze, although there is no visual way to determine which is which, and there is no designation on the PCGS insert that indicates elemental analysis was done. However, there is no difference in rarity stated in the Judd reference between the two; both are Low R.7. Pieces were also struck on thin and thick planchets. This is clearly a thick planchet variant. Significant amounts of bright red mint luster surrounding and within the devices, with medium brown patina elsewhere. NGC ID# 29KV, PCGS# 70687

1870 Three Cent Silver, Struck in Silver
Judd-796, PR66 Cameo

- 4027** 1870 Three Cent Silver, Judd-796, Pollock-883, High R.7, PR66 Cameo PCGS. The obverse is the Seated Liberty design of William Barber. Liberty faces left, right hand supporting a shield and simultaneously holding a ribbon reading LIBERTY. She bears an olive branch in her left hand, and a Liberty cap protrudes from behind. UNITED STATES is to the left, and OF AMERICA to the right. The date 1870 is in exergue. On the reverse, somewhat mismatched in size, is the regular-issue reverse for the three cent silver. Struck in silver with a plain edge. Less than a dozen examples are known of this plain edge silver variant. Many appear to have been struck on half dime planchets rather than three cent silver planchets. The deeply reflective mirrors establish a "black" background for the frosted devices. Light rose toning is seen over each side. The dies were heavily striated, as seen in the fields on both sides. PCGS# 624015 Base PCGS# 61039

1870 Standard Silver Dime in Aluminum
Judd-865, PR66 Cameo

- 4028** 1870 Standard Silver Dime, Judd-865, Pollock-954, High R.7, PR66 Cameo PCGS. On the obverse, the head of Liberty wears a starless diadem with a plain ribbon encircling her hair. The reverse shows 10 CENTS in the center, surrounded by a thick wreath of oak and laurel. STANDARD SILVER is above at the rim, 1870 below. Struck in aluminum with a reeded edge. Fewer than a half dozen examples are known of this variant. This design was also struck in silver and copper along with the aluminum; all had plain and reeded edge pieces struck. Struck from highly polished dies, the devices show the deep mint frost usually seen on aluminum patterns. Very little is seen in the way of oxidation or other problems inherent in aluminum strikings. PCGS# 800020 Base PCGS# 61109

1870 Standard Silver Quarter in Silver
Judd-919, PR64
Possibly Ex: Farouk

- 4029 1870 Standard Silver Quarter Dollar, Judd-919, Pollock-1023, High R.7, PR64 PCGS. The obverse features the bust of Liberty wearing a coronet with LIBERTY inscribed in raised letters. The motto IN GOD WE TRUST is on a scroll below. The reverse has 25 CENTS inside a wreath of oak and laurel leaves with STANDARD SILVER above and 1870 below. Struck in silver with a plain edge. Less than a dozen examples are known of the silver, plain edge variety. Examples were also struck in silver with a reeded edge, as well as copper and aluminum pieces (both reeded and plain edge). This pattern comes with an old-time holder that identifies it as an AW-945 and states it is from the Farouk Collection. We have no definitive proof of this, but the piece was lightly cleaned and King Farouk did employ a conservator for his coins. PCGS# 61163

1870 Standard Silver Half in Copper
Judd-929, PR64 Brown

- 4030 1870 Standard Silver Half Dollar, Judd-929, Pollock-1034, High R.7, PR64 Brown PCGS. The obverse portrays a seated figure of Liberty with shield and olive branch. A scroll is draped over the shield with the word LIBERTY inscribed in raised letters; a Liberty pole is positioned behind the shield. Thirteen stars surround the central devices, with the date in the exergue. The reverse features the denomination 50 / CENTS encircled by an agricultural wreath, with the word STANDARD spelled out above. Struck in copper with a reeded edge. In spite of what earlier editions of Judd and Pollock indicate, this series was only produced with the letters in LIBERTY raised. According to USPatterns.com no pieces are known with the letters recessed. The surfaces of this piece are remarkably attractive. In great part this is due to the tremendous depth of reflectivity in the proof fields. That reflectivity greatly enhances the sea-green and light reddish-brown patina scattered across each side. Only the tiniest contact marks can be detected with a loupe, the PR64 grade is undoubtedly from a number of light specks of carbon. NGC ID# 29Y2, PCGS# 61174

1870 Standard Silver Half in Copper
Judd-959, PR65 Red
The Only Full Red Example Known

- 4031 1870 Standard Silver Half Dollar, Judd-959, Pollock-1110, R.7, PR65 Red PCGS. A bust of Liberty faces right, wearing a headband decorated with a star and inscribed LIBERTY. Her hair is tied up in a bun. IN GOD WE TRUST is emblazoned on a scroll below, and UNITED STATES OF AMERICA surrounds the portrait. The reverse has the familiar wreath of corn and cotton, with 50 / CENTS / 1870 centered. STANDARD is located at the top of the reverse. Struck in copper with a reeded edge. Fewer than a half dozen are known in copper and with a reeded edge. A similar number are known in copper with a plain edge. Examples were also struck in silver and are relatively common, and aluminum examples are equally rare to the copper pieces. The surfaces display rich, even, original red mint luster over each side. Very rare as such, this is the only Judd-959 certified as Red by either of the grading services. PCGS# 81205

1871 Indian Princess Quarter in Silver
Judd-1093, PR64

- 4032** 1871 Quarter Dollar, Judd-1093, Pollock-1229, High R.7, PR64 PCGS. CAC. Longacre's Indian Princess design, in a starless field with date 1871 in exergue, as reworked by William Barber posthumously after Longacre's death on January 1, 1869. The reverse is the regular die of the 1871 Seated quarter dollars. Struck in silver with a reeded edge. These pieces were sold as part of sets from half dime through the silver dollar. Approximately a half dozen are known in silver. A few pieces were also struck in copper and a couple in aluminum. This is a clean obverse design, one that is more suggestive of a medal than a coin. The fields are deeply reflective and the strike is complete throughout. A loupe reveals a few light hairlines, but their impact is so insignificant that the coin at first looks like there are none. PCGS# 61352

1871 Indian Princess Quarter in Aluminum
Judd-1101, PR64 Cameo
Only Two Pieces Known

- 4033** 1871 Seated Quarter, Judd-1101, Pollock-1237, R.8, PR64 Cameo PCGS. Longacre's Indian Princess design. Liberty is seated left, similar to the eventually adopted Trade dollar, but she is accompanied by different items, such as a Liberty cap and pole, two flags, and a globe. The reverse is that of the issued Seated Motto quarter. Struck in aluminum with a reeded edge. Examples were also struck (in very limited numbers) in copper and aluminum. USPatterns.com traces five pieces in silver, six in copper, but only two are known in aluminum. This example is completely brilliant throughout with the usual deep mirrors in the fields and noticeably contrasted frosted devices.

Ex: Public Auction Sale (Merkin, 9/1967), lot 523; June Sale (Stack's, 6/1986), lot 512; Early Spring ANA Auction (Heritage, 2/1991), lot 1392. PCGS# 623883 Base PCGS# 61360

1872 Amazonian Quarter in Copper
Judd-1196, PR66 Red and Brown

- 4034** 1872 Amazonian Quarter Dollar, Judd-1196, Pollock-1336, R.7, PR66 Red and Brown PCGS. William Barber's Amazonian design. Liberty is armed with a long sword and a Federal shield, and her hand touches a defiant eagle. The reverse again depicts an eagle and shield, with the eagle larger and the shield smaller than their obverse counterparts. The eagle clutches the arrows of war, but no olive branch or other peace symbol is present. Struck in copper with a reeded edge. According to USPatterns.com the Amazonian name dates to the 1890 Lorin Parmelee collection and was probably bestowed on the design by David Proskey. Eight pieces are listed on the website. This example displays rich reddish surfaces, not full red but just slightly and evenly mellowed. Identifiable by a carbon spot in the field between Liberty and the eagle and another, larger on the lower-left of the reverse shield. Extraordinary quality. Accompanied by an old flip that identifies the coin as an AW-1264 and states it is from the King Farouk Collection. NGC ID# 2A68, PCGS# 71467

1873 Barber Trade Dollar in Copper
Judd-1312, PR63 Brown

- 4035** 1873 Trade Dollar, Judd-1312, Pollock-1455, Low R.7, PR63 Brown PCGS. A Trade dollar design struck in the year of its regular issue debut that shows Liberty seated on the obverse wearing an Indian headdress, Liberty pole and cap in her right hand, left hand resting on a globe, and conjoined flags behind. The reverse has a small eagle in the upper half with the weight and fineness below and the statutory legends on scrolls both above and below. Struck in copper with a reeded edge. The surfaces are reddish-brown and appear to have been wiped long ago. The high points on the reverse are shiny. NGC ID# 2A8T, PCGS# 61598

1874 Half Eagle in Copper, Ex: Bass
Judd-1371, PR64 Red and Brown
Only Two or Three Examples Known

4036 1874 Five Dollar, Judd-1371, Pollock-1516, R.8, PR64 Red and Brown PCGS. Judd-1371 is regular dies trial striking in copper (from the regular proof dies) with reeded edge. This pattern was most likely distributed to friends and associates of Mint officials. The surfaces gleam with iridescent shades of aquamarine, cherry-red, and peach-orange and the devices show a full strike throughout. A small mark below star 3, another below Liberty's chin, and a die chip on Liberty's cheek serve as identifying marks for later attribution purposes.

It is estimated that only two or three examples exist. This coin was offered as part of the Harry W. Bass, Jr. Collection sale, previously purchased from Brinton T. Schorer. Another specimen, certified PR65 Red and Brown by NGC, was sold by Stack's during the sale of The Samuel J. Berngard Collection in July, 2008 — that coin is now in a PCGS PR65 Red and Brown holder. Pollock lists a third example, sold as part of the King Farouk Collection in 1954, although the Sotheby's catalog lists the coin as an eagle rather than a half eagle. Therefore, we cannot confirm the existence of a third specimen.

Purchased from Brinton T. Schorer (5/1973); Harry W. Bass, Jr. Collection (Bowers and Merena, 5/1999), lot 1359; ANA Signature (Heritage, 8/2014), lot 3713. PCGS# 71675

1875 'Sailor Head' Twenty Cent in Silver
Judd-1392, PR64 Cameo

4037 1875 Sailor Head Twenty Cents, Judd-1392, Pollock-1535, R.6, PR64 Cameo NGC. Designed by William Barber and nicknamed the Sailor Head design, it is nearly identical to the design of certain 1875 half eagle and eagle patterns. A coronet inscribed LIBERTY adorns a head of Liberty, her hair tied back with a ribbon. The reverse has a shield with 20 recessed and the word CENTS at the lower border. Arrows, leaves, and a glory of rays embellishes the shield with UNITED STATES OF AMERICA around. Struck in silver with a plain edge. The 'Sailor Head' design was a popular one and used on a wide variety of pattern denominations over a three-year period. USPatterns.com only traces six examples in silver and four in nickel. This is a distinctive obverse / reverse pairing as the recessed denomination is equally unusual. The surfaces are lightly hairlined and mostly brilliant with a faint ring of peripheral color around each side. There is considerable contrast between the fields and devices, as indicated by the Cameo designation. PCGS# 400347 Base PCGS# 61699

1875 Commercial Dollar in Aluminum
Judd-1425, PR66 Cameo
Only Two Examples Known

- 4038** 1875 Commercial Dollar, Judd-1425, Pollock-1568, R.8, PR66 Cameo PCGS. A seated figure of Liberty faces left at the seashore, with 13 stars ringing the rim and the date 1875 below. She holds an olive branch and rests her left hand on a globe reading LIBERTY. Two flags and a sheaf of wheat flank her. A steamship with sails appears in the water, with sails billowing in one direction and steam blowing in the opposite direction. A scroll above the date reads IN GOD WE TRUST. On the reverse an olive wreath contains COMMERCIAL / (ornamental cornucopias) / DOLLAR / (ornaments) / 420 GRS / 900 FINE / (ornament), with UNITED STATES OF AMERICA at the rim. On the bow tying the wreath a second reference to the Deity appears, this time the outdated GOD OUR TRUST. Struck in aluminum with a reeded edge. Only two pieces are believed to have been struck in aluminum. Silver examples are not much more available with six examples reportedly minted, and eight copper pieces allegedly struck with seven traced today. This is a lovely example that shows bright, reflective fields and thick mint frost over the devices, creating the desirable cameo effect. Just the slightest signs of contact can be found with a loupe. PCGS# 624018 Base PCGS# 61732

1878 Barber Dollar in Copper
Judd-1554b, PR64 Brown
CoinFacts Example

- 4039** 1878 Silver Dollar, Judd-1554b, Pollock-1746, High R.7, PR64 Brown PCGS. A head of Liberty faces left, wearing a coronet inscribed LIBERTY. The motto IN GOD WE TRUST is above with the date below. The left obverse field has seven stars near the border with six more along the right border. The reverse has an eagle with wings spread, holding an olive branch and three arrows. The statutory legend is above and the denomination is below, with E PLURIBUS UNUM in the field above the eagle. Struck in copper with a reeded edge. Judd-1554 differs slightly from Judd-1554a and b in that the former shows two six-pointed stars on the reverse at 4 and 8 o'clock. Four examples of Judd-1554b have been traced, according to USPatterns.com. This is the same coin featured on the PCGS CoinFacts website. The Brown designation is correct, but there are still traces of original but subdued mint red surrounding the devices and just below the blue-brown obverse fields. *Probably Ex: A. Gerald Hull Collection (Scott Stamp & Coin, 11/21895), lot 811. PCGS# 12235 Base PCGS# 12236*

1878 Morgan Five Dollar in Copper
Judd-1578, PR66 Brown

- 4040** 1878 Five Dollar, Judd-1578, Pollock-1771, Low R.7, PR66 Brown NGC. The so-called Phrygian Head or Liberty Head obverse, attributed to George T. Morgan. Liberty wears a Phrygian cap, facing left, with LIBERTY incused on the band. E PLURIBUS is to the left, UNUM to the right, with date 1878 below. On the reverse an eagle is somewhat similar to the Morgan dollar reverse "except not as delicate" (Judd). IN GOD WE TRUST is in Gothic script over the eagle, with FIVE DOL. at the rim below. Struck on a regular-diameter planchet, in copper with a reeded edge. Of the dozen or so known in copper, several have been gilt. There are also two gold pieces known, each with long and distinguished pedigrees. This coin is called Brown, but those who see the piece in-person may question that designation. The obverse displays lovely sea-green, rose, and brown iridescence. The reverse is, well ... it's red. Some might say it's slightly mellowed, but even that seems harsh to us. This is a truly magnificent coin that should be carefully examined by pattern collectors. NGC ID# 2AG4, PCGS# 61942

1879 Washlady Quarter in Silver
Judd-1590, PR66 Cameo

- 4041** 1879 Washlady Quarter Dollar, Judd-1590, Pollock-1783, High R.6, PR66 Cameo NGC. The Washlady design is attributed to Charles Barber, with Liberty's hair bound behind the head. The obverse has UNITED STATES OF AMERICA around the border with the date below the bust. The reverse has an eagle clutching an olive branch and three arrows. The UNITED STATES OF AMERICA legend and E PLURIBUS UNUM motto follow inside the upper reverse border with the denomination expressed as QUAR. DOLLAR below. Struck in silver with a reeded edge. Today the Washlady design is one of the most desirable in the entire pattern series; however, at the time of issue it was not well received. Liberty's hair was perceived as "disheveled." The Washlady name dates to the April 1891 Doughty Collection, held by New York Coin and Stamp, and David Proskey is generally given credit for the name. Also known in copper and listed in white metal. This is an all-brilliant example with strong field-device contrast on each side. Slight strike softness is noted in the centers, undoubtedly from opposition of the design on each side. Nearly flawless. PCGS# 535323 Base PCGS# 61967

1879 Silver Dollar Pattern in Silver
Judd-1605, PR63 Cameo

1880 Metric Dollar in Silver or Goloid
Judd-1645, PR64+ Cameo

4042 1879 Silver Dollar, Judd-1605, Pollock-1801, Low R.7, PR63 Cameo PCGS. This design is similar to Charles Barber's "Washlady" design with Liberty facing left, her hair bound behind the head. IN GOD WE TRUST appears above the head with the date below, seven stars to the left, and six to the right. A spread wing eagle is in the center of the reverse with a laurel wreath around the eagle, E PLURIBUS UNUM above and ONE DOLLAR below. The statutory legend follows the upper border. Struck in silver with a reeded edge. More than a dozen pieces of this pattern are known in silver and copper, but only a single white metal is extant. The fields on this example are exceptionally deep with noticeably frosted devices on each side. Lightly hairlined, each side is brilliant except for the margins which show light russet toning. PCGS# 624016 Base PCGS# 61983

4043 1880 Metric Dollar, Judd-1645, Pollock-1845, High R.6, PR64+ Cameo NGC. On the obverse, the head of Liberty faces left and 13 stars encircle the rim with the motto above and date below the portrait. The reverse offers a wreath of cotton and wheat and an inner circle of dots enclosing the legends. Struck in goloid with a reeded edge. The High R.6 rarity rating makes this pattern, while nonetheless rare, among the more available goloid metric designs. Examples of this design were also struck in copper and aluminum. This is an especially attractive example whose fields are deeply reflective, setting off a cameo effect against the frosted design motifs. Milky brilliance is surrounded by a thin ring of russet around the denticles. Metric dollars are rarely found this fine, presenting quite an opportunity for the pattern collector. NGC ID# 2AJ3, PCGS# 62030

1880 Metric (Goloid) Dollar in Copper
Judd-1649, PR65 Red and Brown

- 4044** 1880 Metric Dollar, Judd-1649, Pollock-1849, R.7, PR65 Red and Brown PCGS. George T. Morgan's Liberty Head design as also on Judd-1622-1625. Liberty's hair is done up in a bun, with a ribbon inscribed LIBERTY in incuse letters, the Latin motto above, stars seven left, six right. The reverse offers a wreath of cotton and wheat, with inner circle of dots enclosing 895.8 S. / 4.2—G. / 100—C. / 25 GRAMS. DEO EST GLORIA ("God is glory / To God be the glory") appears in a cartouche, with UNITED STATES OF AMERICA and ONE DOLLAR at the rim. Struck in copper with a reeded edge. Designed to be a part of goloid compositional test coins, it is not known if any pieces actually exist in that alloy. This, of course, was never intended to even simulate goloid. The copper surfaces are called Red and Brown, but in reality the red luster is only slightly mellowed. This example should please collectors of both Red and Red and Brown copper patterns. No noticeable or mentionable contact marks are seen on either side. NGC ID# 2AJ7, PCGS# 72034

1880 Goloid Metric Dollar in Copper
Judd-1652, PR65 Red and Brown

- 4045** 1880 Goloid Metric Dollar, Judd-1652, Pollock-1852, R.6-7, PR65 Red and Brown PCGS. On the obverse the head of Liberty faces left with E PLURIBUS UNUM above and the date below. The reverse has the statutory requirements for a goloid dollar in the center, surrounded by a circle of 38 stars. Outside the circle of stars is GOLOID METRIC DOLLAR DEO EST GLORIA, which is in turn surrounded by UNITED STATES OF AMERICA 100 CENTS. Struck in silver or goloid, copper, and aluminum. The silver(goloid) and copper pieces are the most frequently encountered with an estimated dozen or so pieces believed extant. Half that number of aluminum examples are known. The surfaces on this piece show even, rich red color, evenly mellowed throughout with most of the original red still evident. Very little evidence of carbon is present on either side. An impressive copper pattern. NGC ID# 2AJA, PCGS# 72037

1885 Snowden Dollar in Aluminum
Judd-1749, PR65

- 4046** 1885 Snowden Dollar, Judd-1749, Pollock-1961, Low R.7, PR65 PCGS. The dies are from the regular-issue 1885 Morgan dollar dies, but there is experimental edge lettering as follows: * * * * * E * / PLURIBUS * / UNUM * * * * *. Struck in aluminum with a tripartite collar for the edge lettering. The following story of the Snowden dollars has been told before but it bears repeating because it explains so much about the production of these pieces:

“Snowden dollars were struck as an anti-counterfeiting measure. The edge was struck from a novel three-part collar that produced raised edge lettering on the coin. Considerable experimentation went into the production of these pieces, and on June 12, 1885 Snowden and his staff succeeded in getting the mechanism to work at normal production speeds of 80 to 100 coins per minute. Snowden retired at the end of the year, and left placement of the raised lettering to his successor. Director Burchard left office around the same time, and no one remained in the Mint who had Snowden’s insight, ability, or willingness to experiment to carry his project forward to completion. The tripartite collar was not used again until 1907 when Augustus Saint-Gaudens’ double eagles went into production.”

The bright aluminum surfaces are just a bit subdued by the passage of time. Notably, the reverse has a large Y-shaped crack in the aluminum planchet at the top of that side. Slight discoloration is seen occasionally along this unusual planchet crack. NGC ID# 2ALV, PCGS# 62191

1896 Shield Cent in Bronze
Judd-1768, PR64 Red and Brown

- 4047** 1896 One Cent, Judd-1768, Pollock-1983, R.5, PR64 Red and Brown PCGS. The obverse features a shield with thirteen stripes and a scroll inscribed LIBERTY that passes in front. Behind are two crossed poles, one bearing an eagle, the other a liberty cap. E PLURIBUS UNUM is above, 1896 is below. The reverse displays ONE CENT within a curved olive sprig with UNITED STATES OF AMERICA around. The border is beaded on both sides. Struck in bronze (several alloys) with a plain edge. These late-date patterns seem to us to be an understudied area of both patterns and late 19th-century numismatics. The various bronze alloys of this particular pattern are worthy of study. There are also two different die pairings known. This piece shows the head of the eagle on the staff pointing directly toward the S in PLURIBUS. This is an attractive piece with light reddish-tan surfaces. A number of tiny specks of carbon can be seen on each side. NGC ID# 2AM8, PCGS# 72222

CONFEDERATE STATES OF AMERICA

Confederate Cent Obverse Hub Impression
Gold, Uniface Bashlow Restrike

- 4048** (1961) Bashlow Restrike Confederate Cent Obverse Hub Impression, Gold. 22.9 gm, 32 mm. The central obverse exhibits an incused and reversed image of a Bashlow restrike Confederate cent obverse. The reverse is blank. We are unaware of the gold fineness. The impression is from a transfer hub made from the original defaced dies. Bashlow struck 20,000 bronze “restrike” Confederate cents, but examples in gold are extremely rare. A gold Bashlow restrike Confederate cent brought \$21,850 in lot 7745 of our 2011 Chicago Signature.

End of Session Two

SESSION THREE

EARLY HALF DOLLARS

1795/1795 O-111 Half Dollar, Fine 15
Unique 3 Leaves Type, Broad Overdate

- 4049** 1795/1795 3 Leaves, O-111, T-19, High R.4, Fine 15 PCGS. Tompkins Die Stage 1/3. The obverse is in a perfect state, while the reverse shows a bisecting die break that creates two distinct planes. The 1795/1795 O-111 half dollar is highly collectible as the only Flowing Hair, 3 Leaves type. The broadly doubled date only adds to its allure. The design elements are well-worn but retain considerable hair and feather detail. Mixed light and dark gray patina covers each side. A rare offering for the specialist. Population: 6 in 15, 13 finer (4/17). NGC ID# 24E7, PCGS# 39245 Base PCGS# 6053

- 4050** 1795 2 Leaves, Y Over Star, O-121, T-2, High R.4 — Cleaning — Fine Details. PCGS. The “Y Over Star” variety, showing remnants of an errant star beneath the Y in LIBERTY. This evenly worn example displays complete rims and sharply outlined devices with some interior detail. Deep gunmetal-gray toning blankets each side. Some minor planchet roughness appears in the upper-right obverse field, mostly hidden by the patina. NGC ID# 24E7, PCGS# 39256 Base PCGS# 6052

- 4051** 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3, VF35 PCGS. CAC. The Large 3 in the date and Large Stars on the reverse identify the O-103 variety. This Choice VF specimen shows some wear on the left side of the drapery, but the right side remains bold. The lightly abraded surfaces are blanketed in shades of lavender-gray and sea-green toning. NGC ID# 24EF, PCGS# 39273 Base PCGS# 6066

1805/4 O-101 Half Dollar, XF45
Sought-After *Guide Book* Listing

- 4052** 1805/4 O-101, T-4, R.3, XF45 NGC. Tompkins Die Stage 1/1. Olive and violet-gray toning covers this Choice XF 1805/4 half dollar, a popular variety listed in the annual *Guide Book* and widely sought-after as such. Despite flatness on the stars, Liberty's curls, and the eagle's neck and tailfeathers are relatively strong. Smooth with expected merging over the highest points. NGC ID# 24EH, PCGS# 39290 Base PCGS# 6070

1805 Half Dollar, VF30
Rare O-104, T-10 Die Pair

- 4053** 1805 O-104, T-10, Low R.5, VF30 PCGS. Tompkins Die Stage 3/3. Die cracks travel around much of the periphery on each side. The bases of stars 7 and 8 are close to L and Y, and the 5 in the date is close to the bust. O-104 is a rare die marriage, and this VF30 representative qualifies at the low end of Tompkins' Condition Census. The portrait shows good detail, while the eagle features an irregular strike. Steel-gray centers blend with golden accents near the rims. NGC ID# 24EG, PCGS# 39275 Base PCGS# 6069

- 4054** 1805 O-106, T-13, High R.3, XF40 PCGS. CAC. This is a sharply detailed O-106 example with strong rims and an even strike. Original gunmetal-blue and lavender-gray toning blankets the problem-free surfaces, giving the coin outstanding old-time appeal. Slight strike weakness on the stars above the eagle's head is an unimportant characteristic at the current grade level. NGC ID# 24EG, PCGS# 39279 Base PCGS# 6069

- 4055** 1805 O-111, T-3, R.2, XF40 NGC. The “triple collar” clash mark and extended stem on the olive branch identify the O-111 variety. The left side of the drapery is lightly worn, but much interior detail is still intact in the hair. The lightly abraded surfaces are blanketed in vivid shades of lavender-gray toning. NGC ID# 24EG, PCGS# 39285 Base PCGS# 6069

1806/5 Draped Bust Half Dollar, AU53
O-101 Overdate Variety

- 4056** 1806/5 O-101, T-6, R.3, AU53 NGC. The obverse die was initially prepared for 1805 but remained unused when the new year came and a 6 was punched over the 5. The break over ITE on this example appears more advanced than usual. Intermingled toning in shades of light gold, orange, and green-blue adds to the eye appeal of this piece. The wear is even and there are no contact marks worthy of individual mention. This is a pleasing representative. NGC ID# 24EK, PCGS# 39296 Base PCGS# 6077

- 4057** 1806 Pointed 6, No Stem, O-109, T-15, R.1, XF40 PCGS. CAC. This lightly circulated Draped Bust type coin displays lavender-gray interiors, blue-gray margins, and yellow-gold borders. The smooth surfaces are undeniably original and show no unsightly abrasions. The central devices are well-defined save for light wear, although the border dentils exhibit weakness on each side. NGC ID# 24EJ, PCGS# 39310 Base PCGS# 6073

- 4058 1806 Pointed 6, Stem, O-118, T-24, R.3, XF45 PCGS.** An earlier state of this scarce die pair, uncracked at the top of UNITED. Gold-to-gray surfaces remain subtly reflective near the devices despite appreciable wear across the high points. Small digs around the portrait and the presence of a few wispy lines contribute to the grade assigned.
Ex: *Fun Signature (Heritage, 1/2012)*, lot 3450. PCGS# 39321 Base PCGS# 6071

**1806 Draped Bust Half, XF45
O-120, Pointed 6, Stem Through Claw**

- 4059 1806 Pointed 6, Stem, O-120, T-28, R.3, XF45 PCGS. CAC.** Prime reverse die state, lacking the cud on the upper shield. Small die cracks attribute the obverse. Silver and charcoal-gray alternate on this Choice XF example, which shows some scattered, small marks consistent with the grade, none of them overt. NGC ID# 24EJ, PCGS# 39325 Base PCGS# 6071

- 4060 1807 Draped Bust, O-105, T-4, R.1, XF40 PCGS.** Tompkins Die State 4/3. Mint luster remains at the margins of this smoothly worn Draped Bust half. The obverse displays an even stone-gray patina that deepens at the borders, while the reverse adds reddish-gold and blue shades to the mix. We note a few faint swirling lines beneath the toning, but there are no distracting marks and nice definition remains on the devices for the assigned grade. NGC ID# 24EM, PCGS# 39343 Base PCGS# 6079

**1807 Draped Bust Half, O-110a, AU53
Deep, Variegated Toning; Late Die State**

- 4061 1807 Draped Bust, O-110a, T-3, R.2, AU53 PCGS.** Tompkins Die State 3/4. Deep powder-blue, autumn-brown, and plum-mauve toning envelops this lightly abraded, late die state half. The centers show slight wear, but luster glistens from the legends and devices. Both sides display several peripheral spindly die cracks, and the reverse is noticeably clashed at the top. The coin is prooflike at the margins. NGC ID# 24EM, PCGS# 39352 Base PCGS# 6079

BUST HALF DOLLARS

- 4062 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU50 PCGS.** The Large Stars obverse, with a full serif on the 1 in the date, and the blundered denomination on the reverse identify the popular O-112 die variety. This attractive AU specimen shows just a touch of actual wear on the well-detailed design elements, and the lightly abraded surfaces are blanketed in shades of lavender, slate-gray, and golden-brown toning. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

- 4063 1808 O-106, R.2 — Mint Error, Struck Off-Center — Fine 12 NGC.** Off-center strikes on Bust halves — particularly the early issues — have strong appeal to both series collectors and error specialists. This 1808 Capped Bust half is struck approximately 5% off-center to the southwest, with parts of star 1, the bust tip, and 18 in the date off the flan from the obverse, and upper portions of the reverse legend as well. Enough of the motifs remain to confirm the O-106 variety. Stone-gray surfaces display faint gold overtones.

- 4064 1808 O-106a, R.2, AU55 PCGS.** Stars 5 and 6 are closer than stars 6 and 7, the 1 is higher than 808, and the arrowheads touch. A die crack spans the obverse from the left of 1 in the date to form a semi-circle across the bust and through the hairline, emerging from the cap to the milling. Electric-blue, lavender, and orange shades gravitate to the margins of this sharply struck piece that retains considerable golden luster and offers fantastic overall eye appeal at the Choice About Uncirculated level.

Ex: *Sandia Sunset Collection/FUN Signature (Heritage, 1/2014)*, lot 4367. PCGS# 39369 Base PCGS# 6090

**1809 Half Dollar, AU58
Normal Edge, O-103**

- 4065 1809 Normal Edge, O-103, R.1, AU58 PCGS. CAC.** A fine off star 5 and a die line connecting the top of the M to the serif of the A in AMERICA serve as attribution markers for Overton-103. Each side displays a uniform overlay of warm, antique patina with glints of golden-gray. Friction is barely discernible, and strike softness is limited largely to the upper curls and the eagle's head. A totally original early Capped Bust half dollar. NGC ID# 24ES, PCGS# 39392 Base PCGS# 6092

- 4066 1809 III Edge, O-109, R.3, XF40 PCGS. CAC.** The irregular die break through AMERICA that is diagnostic of O-109a is just beginning on this late-state O-109 example. The strike is soft on the central hair curls but sharp elsewhere. Delicate powder-blue, lavender, and yellow-gold toning encompasses each side with hints of luster in the protected regions. NGC ID# 24ES, PCGS# 39386 Base PCGS# 6094

- 4067 1810 O-101, R.1, AU55 PCGS.** This sharp and attractive About Uncirculated example is a Choice representative of the O-101 variety. Gunmetal-blue and pale reddish-gold toning provide natural appeal, while the crisp strike is largely untouched by visible wear. The reverse is rotated 50° clockwise. A pair of spearlike tines extend downward from the back of the cap. NGC ID# 24ET, PCGS# 39404 Base PCGS# 6095

- 4068 1810 O-103, R.2, AU55 PCGS.** Sharing the same reverse as the 1809 O-107 and O-108 varieties, this 1810-dated Bust half still displays the diagnostic defect lump between O and C in the denomination. Bits of reddish-brown and blue toning at the margins give way to silver-gray centers with strong mint luster remaining across the Choice About Uncirculated surfaces. A bold die crack extends left and right beneath the date and the stars and legends are drawn toward the rims. NGC ID# 24ET, PCGS# 39408 Base PCGS# 6095

- 4069 1810 O-107a, R.3, AU55 PCGS.** The late die state of this scarce variety has extensive obverse and reverse cracks. Both sides are brilliant silver with no evidence of toning. A pleasing example despite minor obverse and reverse handling marks. NGC ID# 24ET, PCGS# 39415 Base PCGS# 6095

4070 1810 O-109, R.3, AU55 PCGS. Nice silver luster shines through an even mantle of powder-gray toning, while the finely textured surfaces seem to repel any abrasions or marks. The strike is a bit uneven — sharp on about half of the stars, but a trifle flat on others and at the high points of the cap and curls. The reverse is rotated 45° clockwise. Overall, a choice and appealing example of this somewhat scarce early date and variety in the Bust series. NGC ID# 24ET, PCGS# 39418 Base PCGS# 6095

**1810 Half Dollar, O-110, AU58
Pale Iridescent Accents**

4071 1810 O-110, R.2, AU58 PCGS. A simple diagnostic for O-110 shows AM in AMERICA touching, with the M positioned slightly higher. Examples from this die pairing usually show softness at the lower right reverse, as here. Otherwise, this borderline-Uncirculated half dollar is well-detailed with only minor high-point rub. Both sides are still lustrous with pale lilac, blue, and gold accents. NGC ID# 24ET, PCGS# 39420 Base PCGS# 6095

4072 1812 Large 8, O-109a, R.2, AU58 PCGS. A raised lump near the inside point of star 10 and the diagnostic “Mound In Shield” between shield stripes 2 and 3 identify the O-109 variety. Die defect lumps near the olive leaves and peripheral die erosion confirm the late state of the dies. Only slight wear from brief circulation exists. Attractive olive-gold surfaces with bluish-gray overtones make up the natural, still-lustrous patina of this near-Mint half. NGC ID# 24EW, PCGS# 39456 Base PCGS# 6100

4073 1814 E Over A in STATES, O-108, R.2, XF40 PCGS. The popular E Over A in STATES *Guide Book* variety. This piece is well-struck with smooth surfaces that show deep olive-gray toning. Light wear is seen on the eagle's head and the high points of Liberty's hair curls. PCGS# 39489 Base PCGS# 6107

4074 1818 O-111, R.1, AU55 PCGS. A spike off the top of Liberty's cap and the position of the I below the T on the reverse identify this plentiful Overton variety. Here offered is a Choice AU representative with bold design elements and complete border dentils. Deep olive-gray, gold, amber, and russet toning blankets each side with hints of luster in the margins. NGC ID# 24F9, PCGS# 39528 Base PCGS# 6113

4075 1819/8 Large 9, O-102, R.2, AU53 PCGS. Defects at the bases of the T's in STATES identify this collectible variety. The current coin displays an even strike with no immediately recognizable weakness. Light high-point wear on the devices is in contrast to remnants of luster in the fields. Light golden border toning surrounds silver-gray interiors. NGC ID# 24FC, PCGS# 39556 Base PCGS# 6119

4076 1819/8 Large 9, O-102, R.2, AU58 PCGS. Lovely dove-gray and dusky orange patina embraces this crisply struck near-Mint State Bust half dollar, which shows only a trace of wear on the bust truncation and the curl east of the ear. Minimally marked overall with a few flecks of deeper color, most notably at the A of STATES. For all Large 9 overdate varieties, Population: 29 in 58, 21 finer (4/17).
Ex: Palm Beach Signature (Heritage, 11/2004), lot 7380; Houston Signature (Heritage, 12/2008), lot 625. NGC ID# 24FC, PCGS# 39556 Base PCGS# 6119

4077 1819 O-114, R.3, AU58 PCGS. Iridescent rainbow colors at the border surround golden-gray central toning with deep-blue overtones on both sides of this scarcer 1819 variety. Luster glows softly beneath the attractive, natural patina. The surfaces are well-defined with only a few microscopic small marks and a touch of rub on the eagle's brow and talons. NGC ID# 24FB, PCGS# 39553 Base PCGS# 6117

4078 1821 O-105a, R.1, AU58 PCGS. A peripheral die crack nearly circumnavigates the reverse atop the border legend on this late die state coin. The strike is sharp, and only a slight brush of high-point friction is visible under a loupe. Brilliant interiors cede to vivid multicolor toning at the borders. NGC ID# 24FF, PCGS# 39583 Base PCGS# 6128

4079 1821 O-105a, R.1, AU58 PCGS. This amber-gold and gray piece is quite close to Mint State, with a sharp strike and essentially full luster remaining. The reverse adds notes of forest green. The later die state of O-105a shows a crack extending left and right on the reverse from TAT.
Ex: Summer FUN Signature (Heritage, 7/2012), lot 3685. NGC ID# 24FF, PCGS# 39583 Base PCGS# 6128

4080 1821 O-106a, R.2, AU58 PCGS. CAC. Cerulean-blue and amber-gold shades join rainbow iridescence at the borders of this colorful near-Mint Bust half. The top of N in UNITED is filled to confirm the scarcer late die state of Overton-106, which is among the more available varieties for the 1821 date. We note light high point wear and some scattered shallow lines that reside beneath the rich patina. Awarded CAC endorsement in large part for the outstanding eye appeal. NGC ID# 24FF, PCGS# 39585 Base PCGS# 6128

4081 1823 Broken 3, O-101, R.3, XF40 PCGS. The 3 in the date appears disconnected at the middle joint on this elusive early die state variety. The present coin is lightly circulated but with hints of luster remaining in the fields. Olive-gold border toning surrounds silvery-gray interiors. The strike is bold and even. NGC ID# 24FJ, PCGS# 39620 Base PCGS# 6132

4082 1823 O-106, R.3, AU58 PCGS. In later die states, the O-106 is known as the “Tampered 3” variety, but in this early die stage the 3 in the date is large and well-formed — awkward, but not repaired. The variety is slightly scarcer in the early state. Golden-gray toning deepens to bluish-gray around the stars, which are large and for the most part flat as usual for the die pair. Nearly full luster remains beneath the toning, while only faint wear and a few minor marks define the near-Mint grade. PCGS# 39609 Base PCGS# 6131

4083 1824/1 O-101, R.2, AU58 PCGS. Struck from an early state of the dies, with the flag of an underdigit 1 still visible beneath the primary 4 in the date. The reverse lacks any apparent die cracks. Sharply defined with crisp star centers and just a touch of rub on the central high points. Softly lustrous with silver-gray patina that deepens at the borders. Population: 11 in 58, 31 finer (4/17). NGC ID# 476E, PCGS# 39640 Base PCGS# 6139

4084 1824/4 O-109, R.2, AU58 PCGS. Lightly toned in pastel iridescent shades, this near-Mint example of the O-109 overdate is sharp and attractive. R and I in AMERICA are connected at the base while the C is recut on the low outer curve. Slight wear is visible on the cap and drapery folds as well as on the eagle's brow to justify the grade. Nearly full mint luster remains across both sides of this pleasing coin. Population (both 4/4 varieties): 16 in 58, 29 finer (4/17). NGC ID# 24FK, PCGS# 39643 Base PCGS# 6140

4085 1827 Square Base 2, O-120a, R.3, AU58 PCGS. A segmented die crack above UNITED STATES is characteristic of the late O-120a die state. Multiple horizontal lines beneath the bust are the unmistakable pick-up points for the variety in both its early and late die states. This is an essentially brilliant, near-Mint example with hints of pale, golden-gray patina over unmarked surfaces with nearly full mint luster. Crisply struck except at stars 6 through 13, which are seemingly always flat for the variety. NGC ID# 24FN, PCGS# 39718 Base PCGS# 6144

**1827 Half Dollar, Attractive MS64
Square Base 2, O-120a**

- 4086** 1827 Square Base 2, O-120a, R.3, MS64 PCGS. CAC. A series of horizontal die scratches to the left of the date beneath the bust identifies the obverse, while die cracks at the top of UNITED STATES confirms the late die state of O-120a. This variety is very scarce in an earlier die stage and moderately scarce in the present state of the reverse die. Slate-gray surfaces are nearly unmarked and glow with rose undertones accompanied by soft mint luster. The strike is razor-sharp except for a few right-side stars that lack their centers. This Choice Uncirculated example is tied at the low end of the Condition Census for the variety according to both the Donald Parsley and Stephen Herrman references (5/17). NGC ID# 24FN, PCGS# 39718 Base PCGS# 6144

**1831 Half Dollar, O-103, MS64
Fully Struck and Richly Toned**

- 4087** 1831 O-103, R.1, MS64 NGC. The 5 in the denomination is recut on the outside of the upright, the primary pick-up point for the O-103 variety. This richly toned Choice Uncirculated example displays a full strike and exceptional technical quality. Coppery-gold luster exists beneath gunmetal-gray toning that deepens to grayish-blue at the margins. It sits just outside the Condition Census for the variety according to Donald Parsley and Stephen Herrman references (5/17). NGC ID# 24FV, PCGS# 39839 Base PCGS# 6159

**1831 O-110 Half Dollar, MS64
Attractive Old-Silver Patina**

- 4088** 1831 O-110, R.2, MS64 PCGS. Pleasing lilac-gray toning displays faint golden accents and deep-gray overtones on the high points for an original old-silver look that never fails to attract seasoned Bust half collectors. Soft mint luster shines fully beneath the natural patina. The strike shows some peripheral softness at the cap and drapery folds, and especially at the scroll where LURIB of PLURIBUS and the A in STATES are incomplete. The eagle's plumage is sharp except for minor blending at the talons and the top of the denomination. Choice Uncirculated examples such as this one are tied at the low-end of the Condition Census for the O-110 variety (5/17). NGC ID# 24FV, PCGS# 39846 Base PCGS# 6159

**1833 O-109 Half Dollar, MS64
Condition Census Quality**

- 4089** 1833 O-109, R.3, MS64 NGC. CAC. A diagnostic die line extends from the I in AMERICA to the C. Overton-109 is a collectible variety in lower grades, but this Choice Mint State example qualifies for the Parsley Condition Census. Originality reigns supreme here, with radiantly lustrous, largely brilliant surfaces that show pale accents of gold and lilac coloration. A full strike rounds out the appeal. Census: 2 in 64, 0 finer (5/17). NGC ID# 24FX, PCGS# 39897 Base PCGS# 6163

**1834 O-102 Half Dollar, MS64
Large Date, Large Letters**

- 4090** 1834 Large Date, Large Letters, O-102, R.1, MS64 PCGS. The 3 in the date is sharply repunched below, similar to O-118 except that variety has a Small Date obverse. This lustrous Choice Mint State Capped Bust half dollar exhibits frosty surfaces beneath pleasing gold, champagne, and blue toning. NGC ID# 24FY, PCGS# 39906 Base PCGS# 6164

4091 1834 Small Date, Small Letters, O-117, R.2, MS62 NGC. A delightful Mint State example, this 1834 O-117 half dollar exhibits satin silver luster with brilliant light gray surfaces and attractive peripheral reddish-gold toning. NGC ID# 24FY, PCGS# 39922 Base PCGS# 6166

4092 1836 Lettered Edge, O-115, R.3, MS62 PCGS. The 8 in the date is recut on this Lettered Edge variety. A diagonal die line in the recesses of the shield confirms the attribution. The current coin displays sharp central detail with slight weakness on several stars and the RI in PLURIBUS. Champagne-tinted surfaces are lustrous and devoid of major abrasions. NGC ID# 24G2, PCGS# 39950 Base PCGS# 6169

REEDED EDGE HALF DOLLARS

4093 1837 GR-13, R.1, MS63 PCGS. The die markers for the GR-13 variety is plain on this Select Mint State 1837 Reeded Edge half dollar. The strike is sharp throughout the stars and central devices, while the fields display luminous satin luster. Champagne, lavender, and aquamarine toning blankets both sides. PCGS# 531059 Base PCGS# 6176

1839-O GR-1 Half Dollar, AU55 Lightly Toned, Silver Luster Remains

4094 1839-O GR-1, R.1, AU55 PCGS. The recut mintmark clues the GR-1 variety, as does its position above 83 in the date. Struck from an advanced die stage, with strong die cracks circumnavigating the borders on both sides and radial cracks extending to the central motifs. The 1839-O is a necessity for Southern type and a favorite among half dollar collectors for its obverse mintmark and series-ending date. Bright, silver-gray surfaces show only a few light abrasions and strong definition despite the late die state. Population (all varieties): 40 in 55, 60 finer (4/17). NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

SEATED HALF DOLLARS

1840 Seated Half Dollar, MS64+ Small Letters Reverse of 1839

4095 1840 Small Letters, Repunched Date, FS-301, WB-102, MS64+ NGC. Peach-to-orange peripheral toning gives way to pale silver and deeper medium-gray color in the centers. The surfaces are lustrous with light abrasions that dot the reverse, while the design elements are sharply defined. Despite a mintage of more than 1.4 million pieces, the 1840 Reverse of 1839 half dollar is somewhat scarcer in Mint State than is generally realized by nonspecialists. Select Mint State examples are seldom seen, and Gem-quality pieces are rare. Census: 10 in 64 (2 in 64+), 14 finer (5/17). Ex: *The Eugene H. Gardner Collection, Part IV* (Heritage, 10/2015, as MS63 PCGS with CAC), lot 9840; *Long Beach Signature* (Heritage, 2/2016), lot 3957. NGC ID# 24GM, PCGS# 392647 Base PCGS# 6234

4096 1846 Medium Date, WB-101, Die Pair 1, R.3, MS63 NGC. The reverse is lustrous and nearly brilliant, while the obverse displays russet-gold toning along the border. Crisply struck and nearly unabraded example with good luster and minor mint-made roller marks on the left obverse field. Struck from a very late die state, with interesting rim breaks and/or cuds noted at 2:30 on the obverse and at 2 and 11 o'clock on the reverse, plus an internal cud above A in STATES. The reverse is slightly rotated counterclockwise. Census (all Medium Date varieties): 10 in 63, 11 finer (5/17). NGC ID# 24H6, PCGS# 572041 Base PCGS# 6251

1846 Medium Date Half Dollar, MS64 Errant 6, Lustrous Golden-Gray Patina

4097 1846 Medium Date, Misplaced Date, WB-102, Die Pair 5, R.3, MS64 PCGS. CAC. The idea that certain lumps and artifacts in and around the 6 in the date represent an 1846/5 overdate is generally discounted according to the 2016 reference by Bill Bugert. He suggests a gathering of logotype remnants or perhaps a misplaced 6 between the 4 and 6 account for the anomalies. Variety aside, this near-Gem Medium Date example is scarce and appealing with lustrous, golden-gray surfaces and few marks to be seen. The strike is refreshingly crisp. CAC endorsed. Population: 19 in 64, 2 finer. CAC: 4 in 64, 1 finer (4/17). PCGS# 572042 Base PCGS# 6251

4098 1850-O WB-101, Die Pair 12, R.3, MS63 PCGS. This piece is in a later die state, with the diagnostic lumps and lines of the variety weak. Die cracks appear between Liberty's head, star 8, and the cap. The strike is bold throughout, and we find no major abrasions. Olive-green, gold, and russet toning attests to the originality of the surfaces. Population: 14 in 63, 27 finer (4/17). NGC ID# 24HH, PCGS# 572076 Base PCGS# 6265

**1851-O Half Dollar, Scarce MS64
Original Speckled Toning**

4099 1851-O WB-101, Die Pair 1, R.4, MS64 PCGS. The story of the 1851-O half is much the same as that for the other pre-1853 silver coins: The influx of gold from California drove the price of silver coins above face value. The result is many thousands were melted. Only five die combinations are known for this issue. This die pairing is recognizable by the unfinished area below the olive leaves, a tiny tine under the eagle's left (facing) wing, and several die lines within the lines of the lower portion of the shield. This is a richly lustrous coin. Much of the original mint brilliance remains, but significant areas on each side are also covered with speckled russet patina. Sharply struck throughout. For all 1851-O varieties. Population: 17 in 64, 5 finer (4/17). NGC ID# 24HK, PCGS# 572082 Base PCGS# 6267

4100 1854-O Arrows, WB-101, Die Pair 33, R.3, MS64 PCGS. A die break through star 11 and horizontal die lines in the lower part of the eagle's shield confirm the die marriage. This dove-gray half dollar is incredibly sharp for a New Orleans coin. Softly lustrous with scattered flecks of little import. Population: 76 in 64, 39 finer (4/17). NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

4101 1854-O Arrows, WB-101, Die Pair 5, R.3, MS64 NGC. A sharply defined example of the Arrows design sub-type with frosty luster and mint brilliance visible beneath thick gold and iridescent toning on both sides. Several die cracks are visible on both sides of this example, struck from a late state of the dies. Census: 66 in 64 (2 in 64+), 22 finer (4/17).
Ex: *Summer FUN Signature* (Heritage, 6/2008), lot 1023. NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

4102 1856-O WB-101, Die Pair 2, R.4, MS63+ PCGS. Bright silver luster shines through a mottled powder-gray patina on the obverse, while the reverse displays steel-blue toning at the rims and rose-gray shades at the center. A few light field abrasions in the obverse fields are hidden in the toning. The strike is pinpoint-sharp on both sides of this attractive, high-end Select Uncirculated example. A very scarce variety from a high-mintage New Orleans issue with more than 2.6 million pieces produced. Population: 2 in 63+, 68 finer (4/17). NGC ID# 24HP, PCGS# 572095 Base PCGS# 6288

4103 1861 WB-101 MS64 PCGS. A medley of electric-blue, golden-orange, and yellow-gold patina resides on the lustrous surfaces of this near-Gem. A solid strike imparts strong detail to the design elements. Relatively few Choice-or-finer examples survive from the large mintage of nearly 2.9 million pieces. Population: 72 in 64 (2 in 64+), 43 finer (4/17).
Ex: *FUN Signature* (Heritage, 1/2014), lot 4498. NGC ID# 24J7, PCGS# 572144 Base PCGS# 6302

4104 1861-O WB-101, Die Pair 6, R.3, MS62 PCGS. The obverse die was employed by the State of Louisiana (first use) and the Confederacy (second use). Strong dentils suggest an early use of the die, while a lump on the upright of R in AMERICA is also suggestive of an early die state for the marriage. Pale golden-gray color harbors scattered deep olive and grayish-blue accents. The strike is uniformly sharp on both sides. Housed in a prior generation green label holder. Population (all varieties): 43 in 62, 84 finer (4/17). NGC ID# 24J8, PCGS# 572146 Base PCGS# 6303

4105 1861-O CSA Obverse, FS-401, WB-102, Die Pair 11, R.3, VF25 PCGS. The diagnostic die crack from the rim near star 7 is most visible where it enters the bridge of the nose and exits below the chin on this middle grade Seated half, struck under the authority of the Confederacy. Always in demand because it shares the same obverse as the original and genuine Confederate half dollars (just four known), this moderately circulated example displays smooth, evenly toned dove-gray surfaces with nice definition for the grade. NGC ID# 24J8, PCGS# 390906 Base PCGS# 39968

4106 1873-CC Arrows, Small CC, WB-102, Die Pair 4, R.4, VF20 PCGS. A silver-gray Carson City type coin with substantial drapery and plumage detail. Five letters in LIBERTY are bold. All letters in IN GOD WE TRUST are readable. Smooth aside from minor marks near Liberty's raised elbow. PCGS# 572215 Base PCGS# 6344

**1876 Seated Half, MS65
WB-101, Open Bud Reverse**

4107 1876 Open Bud, WB-101, MS65 PCGS. Type One Reverse, Open Bud. The 1876 half dollar is fairly plentiful through MS64, but Gems are scarce. This MS65 coin features well-struck motifs with no singular areas of weakness. The frosty surfaces yield mint-green, sky-blue, russet, and olive-gold toning. There are no obtrusive abrasions. Population: 24 in 65 (3 in 65+), 14 finer (4/17). NGC ID# 645N, PCGS# 572234 Base PCGS# 6352

1879 Half Dollar, Attractively Toned MS65

4108 1879 Closed Bud, WB-102, MS65 NGC. A marvelous blend of cobalt-blue, gray-tan, and lavender patination takes on slightly deeper hues on the reverse of this attractive Gem. Sharply struck throughout. Partially prooflike fields offer moderate contrast with the motifs. A few obverse marks likely preclude an even higher grade. Census: 37 in 65, 46 finer (5/17). NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

PROOF SEATED HALF DOLLARS

4109 1860 PR64 PCGS. An attractive near-Gem proof with sharp devices and modest cameo contrast beneath the toning. Vivid electric-blue, violet, and sun-gold hues adorn each side, presenting outstanding visual appeal. Population: 40 in 64, 25 finer (4/17). NGC ID# 27TK, PCGS# 6414

4110 1862 PR64 PCGS. This gold-tinted Choice proof is modestly contrasted, although not quite to the extent preferred for a Cameo designation. The strike is needle-sharp, intricately defined. Scattered hairlines in the fields limit the numeric grade. Population: 50 in 64 (1 in 64+), 19 finer (4/17). NGC ID# 27TN, PCGS# 6416

1862 Seated Half, Nicely Toned PR64+

- 4111 1862 PR64+ NGC. WB-101.** This Civil War-era proof Seated half is seldom seen in Gem or finer grades. The present Plus-graded near-Gem boasts exceptional eye appeal with striking sharpness on the design elements and deep mirroring in the fields. Each side displays a blush of delicate champagne toning, although tinges of vivid blue and violet around the peripheries do wonders for the visual impact. Census: 62 in 64 (2 in 64+), 30 finer (4/17). NGC ID# 27TN, PCGS# 6416

**1863 Half Dollar, PR64
Beautiful Two-Sided Toning**

- 4112 1863 PR64 PCGS.** Only 460 proof half dollars were struck in 1863. This near-Gem survivor displays vivid multicolor toning around the borders with light champagne interiors. The strike is sharp throughout, save for the eagle's left (facing) talon which is slightly soft. The fields are deeply reflective. Finer examples are rarely encountered. Population: 45 in 64, 17 finer (4/17). NGC ID# 27TP, PCGS# 6417
- 4113 1866 Motto PR63 Cameo PCGS.** This pinpoint-sharp Select proof displays noticeable contrast between the flashy fields and the moderately frosted devices. The obverse is close to brilliant with a faint golden sheen, while the reverse offers light to medium caramel-gold patina. The right obverse field exhibits delicate hairlines. Population: 11 in 63 Cameo, 23 finer (4/17). Ex: *FUN Signature (Heritage, 1/2010), lot 3673*. NGC ID# 27TZ, PCGS# 86424
- 4114 1867 PR63 PCGS.** Deeply reflective fields are the chief visual attribute of this Select proof 1867 Seated half, cast in multicolor toning on both sides. Unusually prominent strike weakness occurs on Liberty's torso and lap, as well as the eagle's left (facing) leg and the fletchings. The right-hand stars are also incomplete. We find no mentionable marks or other distractions. Population: 39 in 63, 55 finer (4/17). NGC ID# 27U2, PCGS# 6425
- 4115 1870 PR63 PCGS.** A layer of dusky creamy-gray patina includes glints of powder-blue and green, but this Select Seated half dollar proof retains a significant degree of original brilliance. As expected, the strike is fully impressed. Wispy marks are scattered in the partly fields. This is one of 1,000 proofs struck in 1870. NGC ID# 27U5, PCGS# 6428

**1870 Seated Half Dollar, Sharp PR65
Lightly Toned, Attractive Surfaces**

- 4116 1870 PR65 PCGS.** Pale iridescence covers the mirrored obverse in shades of light blue, gold, green, and pale-yellow. The reverse displays orange-gold border toning around a silver center with slate-gray accents. Diagnostic circular die lines run through the recessed areas of the shield and Liberty's gown. The strike is needle-sharp on this Gem proof, one of 1,000 pieces struck. Population: 16 in 65 (1 in 65+), 5 finer (5/17). NGC ID# 27U5, PCGS# 6428

**1870 Half Dollar, PR65
Beautifully Toned**

- 4117 1870 PR65 PCGS. CAC.** A plentiful proof issue that is almost never seen in Cameo grades. This Gem CAC 1870 proof half dollar is too deeply toned to deliver field-motif contrast, but the vivid sun-orange, violet, and ocean-blue toning that blankets each side is visually pleasing. The strike is bold, and the fields display reflective mirroring. Population: 16 in 65 (1 in 65+), 5 finer. CAC: 4 in 65, 3 finer (5/17). NGC ID# 27U5, PCGS# 6428
- 4118 1878 PR63 PCGS.** This example represents the Type Two reverse, also known as the closed bud as there is no split in the berry below the olive branch. This pleasing Select proof exhibits antique silver, gold, and blue toning on its lightly contrasted surfaces. NGC ID# 27UD, PCGS# 6439
- 4119 1879 PR64 PCGS. CAC.** A lovely Choice proof, this Seated half dollar has hazy bluish toning over brilliant silver surfaces with excellent eye appeal. Deeply mirrored fields frame the satiny devices, imparting slight contrast. CAC: 6 in 64, 16 finer (4/17). NGC ID# 27UE, PCGS# 6440

**1885 Half Dollar, PR65
Low Total Mintage**

- 4120 1885 PR65 PCGS.** The 1885 half dollar, a desirable low total-mintage issue in the series, claims a production of just 5,200 circulation strikes supplemented by 930 proofs. The latter are always in-demand given the scarcity of high-grade Uncirculated examples. This richly toned specimen delivers the razor-sharp design detail one would expect. Original eye appeal. Population: 29 in 65, 16 finer (4/17). NGC ID# 27UL, PCGS# 6446

**1887 Seated Half, PR66
Spectacular Multicolor Toning**

- 4121 1887 PR66 NGC.** The decade of the 1880s has been one of significant interest to collectors for many years. Because of the low mintages seen in each year, most business strikes show remaining initial die polish, so much so that in the past many have been misidentified as proofs. This brightly mirrored proof has mirrored fields that flash strongly through the swirling iridescence seen across each side. The strike details are intricately defined. Census: 15 in 66, 5 finer (5/17). NGC ID# 27UN, PCGS# 6448

BARBER HALF DOLLARS

- 4122 1892 MS65 PCGS.** An impressive Gem from the first year of the Barber design, the well-detailed design elements show a touch of the usual softness at the juncture of the shield and right (facing) wing. Vibrant satiny mint luster shines through attractive shades of lavender-gray and golden-tan toning. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

**1892 Half Dollar, MS66
First-Generation Holder**

- 4123 1892 MS66 PCGS. CAC.** The 1892 Barber half was better-saved in high grade than most later dates in the series, but Premium Gems are nonetheless scarce, and finer coins are rare. This CAC-approved MS66 is housed in a first generation holder, and it displays nearly pristine, frosty mint luster. There are no abrasions on the reverse, and the obverse has only a single small tick below Liberty's eye that prevents a Superb Gem designation from PCGS. Original blue border toning cedes to lavender in the margins and delicate champagne in the centers. Eye appeal abounds. Population: 55 in 66 (6 in 66+), 13 finer. CAC: 24 in 66, 12 finer (4/17). NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

- 4124 1892-O MS64 PCGS.** A satiny cream-gray example of this low-mintage first-year New Orleans issue. The fletchings and right shield corner shows some softness, but the portrait and stars are bold. Population: 43 in 64 (2 in 64+), 24 finer (4/17). NGC ID# 27UW, PCGS# 6462

- 4125 1893-O MS64 PCGS.** Dusky, minimally toned surfaces show areas of golden color over the right obverse field and within parts of the legend, but each side remains largely brilliant. Strike characteristics are typical of the New Orleans Mint, which produced nearly 1.4 million half dollars in the second year of the Barber series. Population: 43 in 64 (1 in 64+), 9 finer (4/17). NGC ID# 24LL, PCGS# 6466

- 4126 1893-S XF45 NGC.** A scarcer, low-mintage issue with only 740,000 pieces struck. Rich, deep charcoal-golden toning covers each side and there are a number of small abrasions that can be seen beneath the patina. NGC ID# 24LM, PCGS# 6467

- 4127 1896 MS64 PCGS.** This MS64 Barber half dollar inarguably has the look of a better-graded coin. The fields and cheek are apparently unmarked, with just a few well-hidden ticks within the design areas. Each side is entirely brilliant and fully struck, including the shield corner, claws, and fletchings. Population: 33 in 64, 21 finer (4/17). NGC ID# 39RH, PCGS# 6474

- 4128 1902 MS65 PCGS.** Satiny mint luster shines through attractive shades of golden-brown, silver-gray, and magenta toning on this impressive Gem. The design elements are well-detailed and the surfaces are well-preserved throughout. Population: 26 in 65 (4 in 65+), 6 finer (4/17). NGC ID# 24MF, PCGS# 6492

- 4129 1902-O MS63 NGC.** The 1902-O is a challenging issue in Mint State, and particularly rare at the Gem level. This collectible Select representative offers original satin luster with blue-green border accents around primarily pale lavender interiors. The reverse eagle shows moderate strike weakness, as expected. Census: 19 in 63, 26 finer (4/17). NGC ID# 24MG, PCGS# 6493

**1902-S Barber Half, Elusive MS65
Underrated Condition Rarity**

4130 1902-S MS65 PCGS. The 1902-S Barber half dollar issue is an unheralded condition rarity within the series, likely overshadowed by its proximity to the even-more-elusive 1901-S and the fabled 1904-S. All of these difficult S-mint Barber halves seem to have inflated population numbers that thereby understate their true rarity in the higher Mint State levels. This Gem 1902-S offers powerful luster on ivory-gray surfaces laced with gold and cream patina. A few thin scrapes on Liberty's cheek and the wreath above define the grade. The strike is adequate, save for momentary weakness in the centers of stars 11 and 12 and trivial incompleteness at the upper-right corner of the shield on the reverse. Population: 7 in 65, 12 finer (4/17). NGC ID# 24MH, PCGS# 6494

4131 1905 MS63 PCGS. Sharp design elements and satiny luster adorn this Select 1905 Barber half dollar beneath a blanket of russet-gold toning. Some tiny sky-blue accents appear at the rims. Scattered light abrasions account for the grade. Population: 18 in 63 (1 in 63+), 56 finer (4/17). NGC ID# 28PX, PCGS# 6501

4132 1906-O MS63 PCGS. Golden-brown and blue-green peripheral toning testifies to the originality of this Select New Orleans half dollar. The obverse field and the reverse appear pristine, and the portrait shows only incidental contact. Certified in a first-generation holder. NGC ID# 24MW, PCGS# 6506

4133 1907-D MS65 NGC. Rich olive-green and amber-gold toning uniformly blankets each side of this Gem 1907-D Barber half dollar. Other than some slight weakness at the eagle's right (facing) wing junction and talons, the coin is sharp. Neither side exhibits mentionable abrasions. Census: 17 in 65, 7 finer (5/17). NGC ID# 24MZ, PCGS# 6509

4134 1908 MS65 NGC. A dip in the mintage of 1908 half dollars compared to the higher mintages of the 1907 and 1909 issues does not translate to any meaningful difference in market value, yet the scant population in Gem and finer condition suggests it should. This frosty example displays pale golden-gray toning and soft mint luster throughout. The shield corner is sharp, with only slight merging of the details on the eagle's talon and arrow fletchings. Census: 11 in 65, 4 finer (5/17). NGC ID# 24N4, PCGS# 6512

**1908-O Half Dollar, MS66
Luminous, Lightly Toned Surfaces**

4135 1908-O MS66 NGC. One of the more plentiful dates in the series in high grade, the 1908-O Barber half is popular as a type coin. This frosty example displays glimmering, unabraded surfaces with warm golden and lavender hues spread over each side. The eagle's right (facing) wing junction shows the only notable strike weakness, as usual. Finer examples of the date are rare. Census: 10 in 66, 5 finer (4/17). NGC ID# 24N6, PCGS# 6514

1910-S Barber Half, Toned MS65

4136 1910-S MS65 PCGS. Surviving Mint State 1910-S half dollars are dispersed throughout many grades, but those in Gem or better condition are scarcely seen. The present coin displays frosty mint luster beneath gold, olive-green, and lavender-gray toning. The eagle's right (facing) talons and the fletchings show the only mentionable strike weakness. There are no significant abrasions. Population: 10 in 65, 19 finer (5/17). NGC ID# 24NC, PCGS# 6520

4137 1915 AU55 NGC. Ample luster in the protected areas of this Choice AU Barber peeks through the veneer of light gray-tan color. The design elements are sharply defined save for the usual weakness on the upper-right shield corner. NGC ID# 24NR, PCGS# 6532

4138 1915-D MS65 NGC. Ex: Highland Collection. This boldly defined final-year Gem displays satiny luster that beams through its light champagne and gold toning. Finer 1915-D barber halves are rare. Census: 53 in 65 (1 in 65+), 11 finer (5/17). NGC ID# 24NS, PCGS# 6533

**1915-D Half Dollar, MS66+
Tied for Finest at PCGS**

4139 1915-D MS66+ PCGS. CAC. This conditionally rare final-year Barber half dollar is among the finest of the date at PCGS. Hints of champagne and ice-blue accent silvery brilliance, with no distracting abrasions seen. The usual strike weakness occurs on the eagle's right (facing) shoulder. Population: 23 in 66 (3 in 66+), 0 finer. CAC: 15 in 66, 0 finer (4/17). NGC ID# 24NS, PCGS# 6533

**1915-S Half Dollar, Vibrant MS65+
High-End Luster and Surfaces**

- 4140 1915-S MS65+ PCGS. CAC.** The frosted surfaces of this high-end Gem 1915-S at first appear wholly brilliant-white, but a closer examination reveals microscopic dapples of olive-gold toning that confirm the originality of the surfaces. Vibrant silver luster coruscates across both sides of this Plus-graded coin that also displays CAC endorsement. We note a minuscule reeding mark in the right field beneath stars 8 and 9 and a few tiny ticks, but no other imperfections and the strike is resolute. Population: 2 in 65+, 14 finer. CAC: 14 in 65, 6 finer (4/17). NGC ID# 24NT, PCGS# 6534

PROOF BARBER HALF DOLLARS

**1893 Barber Half Dollar, PR66
Rare Cameo Example**

- 4141 1893 PR66 Cameo NGC.** Razor-sharp definition is evident on all design elements of this spectacular Premium Gem, and the deeply reflective fields contrast boldly with the frosty devices to create a dramatic cameo effect. A few subtle highlights of greenish-gold and lavender toning color the well-preserved surfaces, adding to the outstanding eye appeal. Census: 19 in 66 Cameo (1 in 66★), 15 finer (5/17). NGC ID# 24NV, PCGS# 86540
- 4142 1906 PR64 PCGS.** The devices are boldly defined on this richly toned Choice proof Barber half dollar that exhibits reddish-gold, violet, and blue toning on each side. Faint hairlines in the fields are consistent with the grade. NGC ID# 24PA, PCGS# 6553
- 4143 1909 PR65 PCGS Secure.** This sharp Gem proof displays deep reflectivity in the fields with frosty luster on the devices. Mottled olive-gray, lavender, and gold toning appears on the obverse, while the reverse exhibits soft lavender hues beneath an olive-green patina. Population: 23 in 65, 42 finer (4/17). NGC ID# 24PD, PCGS# 6556
- 4144 1911 PR65 PCGS.** By 1911, the Barber design had lost favor with many collectors, numismatists, and politicians. Perhaps undermined by the excitement over the Saint-Gaudens gold issues and the Lincoln cent, the serviceable Barber Liberty Head motif hung on for another five years with declining mintages of both proofs and business strikes. Just 543 proofs were struck in 1911. This Gem survivor is nicely mirrored beneath thin olive-gray patina, with the reverse less toned than the obverse. A sharply struck proof, scarce in PR65 or finer. Population: 29 in 65, 26 finer (4/17). NGC ID# 24PF, PCGS# 6558

**1912 Barber Half, PR66
Attractive Multicolor Iridescence**

- 4145 1912 PR66 PCGS. CAC.** This delightful Premium Gem proof has deeply mirrored fields surrounding fully lustrous and frosty devices, creating excellent contrast. Both sides exhibit kaleidoscopic iridescence in multicolor shades plus a few cloudy overtones. The design elements are sharply impressed, with only a touch of blending below the eagle's right (facing) shoulder. A CAC-endorsed proof, one of the few so-honored at the PR66 level. Population: 20 in 66, 11 finer. CAC: 2 in 66, 5 finer (4/17). Ex: Long Beach Signature (Heritage, 9/2008), lot 2359; ANA Signature (Heritage, 8/2014), lot 4533. NGC ID# 24PG, PCGS# 6559

**1913 Half Dollar, PR66
Only 627 Proofs Manufactured**

- 4146 1913 PR66 NGC.** Of the 627 Barber half dollar proofs struck in 1913, it is believed that only 50 to 60 pieces survive in PR65 or finer. The low mintage and high-grade survival rate make this a difficult issue to acquire at this level. Both sides are brilliant and razor-sharp. The reverse is profoundly contrasted, but the obverse stands in the way of a formal Cameo designation. NGC ID# 24PH, PCGS# 6560
- 4147 1915 PR65 PCGS.** This low-mintage Barber half was the final year of production for proofs in the series; only 450 pieces were struck. This example shows brightly mirrored fields that flash strongly through the multiple layers of cobalt-blue and rose toning. Each side appears free from contact, but there is just a bit of high-point strike softness apparent on the reverse. Population: 16 in 65 (1 in 65+), 31 finer (4/17). NGC ID# 24PK, PCGS# 6562

WALKING LIBERTY HALF DOLLARS

- 4148 1916 MS65 PCGS.** This is a glittering Gem representative of the inaugural 1916 Walking Liberty half dollar (only 608,000 coins struck). A delicate overlay of golden patina lightly drapes mainly brilliant, marvelously preserved surfaces. Well-struck with only the most trivial flecks. Housed in an old green label holder. NGC ID# 24PL, PCGS# 6566

**1916 Walking Liberty Half Dollar, MS66
Eye-Appealing First-Year Example**

- 4149 1916 MS66 NGC.** The 1916 claims a low mintage of 608,000 coins, but thankfully many were saved in Uncirculated condition as souvenirs. Premium Gems like this razor-sharp example are very scarce and rarely surpassed at the leading grading services. A delicate blush of lilac-gold patina graces marvelously preserved surfaces. An extraordinarily eye-appealing first-year Walker. Census: 62 in 66 (2 in 66+, 1 in 66 ★), 11 finer (4/17). NGC ID# 24PL, PCGS# 6566

- 4150 1916-D MS64+ PCGS. CAC.** An exquisite near-Gem that boasts a crisp strike and smooth, lustrous surfaces. Generally cream-gray, although russet toning congregates in design crevices. A desirable representative of this first-year and low-mintage branch issue. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

**1916-D Half Dollar, MS65
Old Green Label Holder**

- 4151 1916-D MS65 PCGS. CAC.** Shimmering original mint luster adorns unabraded surfaces on this Gem 1916-D Walker. Liberty's head and branch hand are partially detailed, and slight weakness is seen on the eagle's trailing leg, as usual. The coin is essentially brilliant. Housed in an old two-piece green label holder, with a CAC green sticker. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

**1916-S Half Dollar, MS64
Favorite Obverse Mintmark Issue**

- 4152 1916-S MS64 PCGS.** Speckled gunmetal-blue and crimson patina clings to the peripheral areas, leaving the interior surfaces untuned and brilliant. Frosty luster issues from each well-preserved side. The strike is good, if a touch soft over the centers. The 1916-S is the first S-mint issue in the series, struck to the lowly extent of 508,000 coins. A favorite Obverse Mintmark emission. NGC ID# 24PN, PCGS# 6568

**1916-S Walking Liberty Half, MS64
Perennially Popular**

- 4153 1916-S MS64 PCGS.** This sought-after first-year issue enjoys status as one of four Walking Liberty half dollars with an obverse mintmark. Merely 508,000 examples were struck at the San Francisco Mint in 1916, contributing further to the issue's popularity. This Choice Uncirculated offering presents golden-russet and crimson border toning around largely brilliant centers. Softly frosted and well-defined without any overt imperfections. NGC ID# 24PN, PCGS# 6568

**1916-S Walking Liberty Half Dollar, MS64
Boldly Struck Semikey**

- 4154 1916-S MS64 PCGS.** The 1916-S is the first key date in the Walking Liberty series with a mintage of 508,000 coins. While most examples come softly struck, this near-Gem features full thumb separation on the branch hand, nicely delineated skirt lines, and strong detail on the eagle's breast feathers. Liberty's head and the eagle's leg are a touch soft, but that is to be expected of the issue. Each side is almost all-brilliant with areas of light golden patina. Carefully preserved with frosty luster. A difficult-to-improve-upon example. NGC ID# 24PN, PCGS# 6568

1916-S Walking Liberty Half, Appealing MS64

- 4155 1916-S MS64 PCGS. CAC.** Rose-gray and golden patina enlivens both sides of this attractive first-year S-mint Walking Liberty half, a nice, original near-Gem of this sought-after date. Traces of charcoal-gray patina outline the oak on the reverse and cluster near the obverse rim. Marks are few for the grade on this eye-appealing coin. CAC endorsed. Housed in an old second-generation PCGS two-piece, green label holder. NGC ID# 24PN, PCGS# 6568

- 4156 1917 MS65 NGC.** Uncommonly strong design detail and unusually vibrant mint luster are the outstanding visual attributes of this outstanding Gem. The silver-white surfaces are delightfully preserved and appealing.
Ex: Long Beach Signature (Heritage, 9/2007), lot 1677. NGC ID# 24PP, PCGS# 6569

4157 1917-D Reverse MS63 PCGS. The mintmark was moved to the reverse (as on this specimen) partway through the year in 1917. This well-detailed Select specimen offers lightly marked, lustrous surfaces, with subtle highlights of pale gold toning. NGC ID# 24PS, PCGS# 6571

4158 1917-S Reverse MS64 PCGS. An impressive Choice example, struck later in the year, after the mintmark was moved to the reverse. This piece shows well-detailed design elements and well-preserved lustrous surfaces with just a trace of pale gold toning. NGC ID# 24PU, PCGS# 6573

4159 1918 MS64 PCGS. Choice Uncirculated examples of the 1918 are decidedly scarce, despite what the 6.6 million-coin mintage might have one believe. This is a mint-fresh near-Gem with a nearly full strike and pale golden color over the reverse. A thin linear depression appears in the right obverse field. NGC ID# 24PV, PCGS# 6574

4160 1918 MS64 PCGS. CAC. This is a particularly frosty near-Gem with original "skin" and a dusting of golden-gray toning. Liberty's head and branch hand are well-defined. The 1918 Walker is usually available in this grade but is infrequently offered finer. NGC ID# 24PV, PCGS# 6574

1918 Walking Liberty Half, MS65 Scarce Early Philadelphia Issue

4161 1918 MS65 PCGS. The 1918 is much scarcer than might be imagined for an early P-mint Walker. Gems are especially scarce and may number only 175-225 coins. This softly lustrous example retains much original brilliance with occasional streaks of russet on the obverse and more uniform toning seen on the reverse. Sharply defined. NGC ID# 24PV, PCGS# 6574

4162 1918-S MS64 PCGS. Light caramel-gold toning adorns this lustrous and carefully preserved near-Gem. The strike shows inexactness in the usual places, though Liberty's head is bold. The 1918-S has a high mintage and is plentiful in well-worn grades, but becomes very scarce in Mint State. NGC ID# 24PX, PCGS# 6576

4163 1918-S MS64 PCGS. The 1918-S becomes a true condition rarity in MS65, but it remains moderately collectible in this grade. The centers are frosted and mostly brilliant, turning to golden shadings around the borders. Each side displays good detail with slight central softness. Marks are well-concealed within the design. NGC ID# 24PX, PCGS# 6576

4164 1918-S MS64 PCGS. This delicately toned, champagne-colored near-Gem could pass as an MS65 coin to the unaided eye, showing a few small grade-limiting marks only under magnification. The strike is bold and eye appeal excels. Only 35 finer examples exist at PCGS (5/17), including possible resubmissions. NGC ID# 24PX, PCGS# 6576

4165 1918-S MS64 PCGS. An impressive Choice example, with well-detailed design elements that show a touch of the usual softness on the eagle's leg. The lightly marked surfaces radiate vibrant mint luster, with a few hints of champagne-gold toning. PCGS has graded 35 numerically finer examples (5/17). NGC ID# 24PX, PCGS# 6576

1918-S Half Dollar, MS64+ High-End, Iridescent Example

4166 1918-S MS64+ NGC. Each side of this impressive high-end near-Gem Walker features appealing gold, blue, lavender, and sea-green iridescence with radiant San Francisco mint frost shining through the patina. The strike is well-impressed with minor softness limited to the extreme centers. The 1918-S is very scarce in MS64 and the population declines even further in MS65, with prices rising accordingly. NGC records 38 finer submissions (4/17). NGC ID# 24PX, PCGS# 6576

1918-S Half Dollar, MS64 A Challenge to Locate This Fine

4167 1918-S MS64 PCGS. CAC. Despite a mintage of 10.2 million coins, this early San Francisco issue is scarcely encountered in Choice Uncirculated condition, especially with CAC approval. Finer examples are truly rare. This frosted, largely brilliant Walker showcases wisps of golden color and speckled crimson patina above Liberty's head. The eagle, branch hand, and skirt lines are a trifle soft, but that has little effect on the overall appeal. NGC ID# 24PX, PCGS# 6576

4168 1919 AU55 PCGS. CAC. Attractive shades of golden-brown toning blanket the lightly abraded surfaces of this impressive Choice AU specimen, with well-detailed, lightly worn design elements and vibrant mint luster underneath. NGC ID# 24PY, PCGS# 6577

4169 1919-S AU53 PCGS. Peripheral russet tones around the obverse are the only indication of color throughout this bright San Francisco Walker. The sandal shows particularly strong detail, while the tops of the date digits, Liberty's head, and the eagle's breast and leg are a touch soft. Lightly abraded. NGC ID# 24R2, PCGS# 6579

4170 1920-D AU53 PCGS. The About Uncirculated grade is determined by wear on the central high points, because the fields show relatively few signs of circulation and mint luster remains in generous quantity across silver-gray surfaces with hints of golden-tan in the recesses. Tiny marks and lines exist, but they are well-distributed and require a loupe for viewing. A strong Denver Mint strike adds to the appeal. NGC ID# 24R4, PCGS# 6581

4171 1929-D MS63 PCGS. An attractive Select specimen, with a better-than-average strike that shows just a trace of softness on the eagle's leg, this coin offers lightly marked lustrous surfaces with a few hints of lavender-gray and golden-tan toning. NGC ID# 24RC, PCGS# 6589

**1929-S Walking Liberty Half, MS65
Excellent Mint Luster and Strike**

4172 1929-S MS65 PCGS. While plentiful in lower grades, Gems are seldom seen. This is an especially well-struck example that approaches the detail seen on S-mint halves from 10 years later. The surfaces display bright mint frost and the interior of each side is toned, but to a lesser degree than the periphery. NGC ID# 24RD, PCGS# 6590

4173 1933-S MS63 PCGS. No major abrasions are present, although this Select 1933-S Walker does exhibit light handling marks that define the grade. Liberty's branch hand and head show above-average definition. Each side is silvery-gray with no discernible toning. NGC ID# 24RE, PCGS# 6591

4174 1934 MS67 PCGS. CAC. Strength of overall strike is the primary calling card of this relatively common issue from the mid-series dates of Walkers. The mint luster is especially bright and vibrant with just the slightest specks of color evident. NGC ID# 24RF, PCGS# 6592

4175 1934-D MS65+ PCGS. CAC. Particularly vibrant, frosty mint luster enlivens the pastel-toned surfaces of this high-end Gem 1934-D Walking Liberty half dollar. A few tiny ticks seen under a loupe virtually vanish to the unaided eye. Many numerically finer 1934-D halves fail to surpass this coin in terms of visual appeal. NGC ID# 24RG, PCGS# 6593

4176 1934-S MS63 PCGS. This piece is sharply struck and lustrous with no obvious abrasions. Both sides show mottled russet and olive-gold toning, although the patina is deeper on the obverse. Eye appeal is pleasing for the grade. NGC ID# 24RH, PCGS# 6594

**1934-S Half Dollar, MS65
Bright Mint Luster**

4177 1934-S MS65 PCGS. The 1934-S is a scarcer issue from the Middle Series of Walkers. Nice, problem-free and well-struck examples are challenging to locate. This is a sharply struck, highly lustrous example. The surfaces are largely brilliant with just a bit of peripheral golden color present. Housed in a first-generation holder. NGC ID# 24RH, PCGS# 6594

4178 1935 MS67 NGC. The 1935 Walking Liberty half dollar is scarce in MS67, and there are only two coins finer at NGC and PCGS combined (5/17). This Superb Gem displays frosty luster and medium golden toning. The usual minor strike weakness is seen on the branch hand and eagle's leg. Census: 37 in 67 (8 in 67+, 1 in 67 ★), 1 finer (5/17). NGC ID# 24RJ, PCGS# 6595

4179 1935-D MS65 PCGS. CAC. Cream-gray and powder-blue hues color the central obverse of this satiny Denver half dollar, surrounded by shades of golden-russet and crimson patina. The other side is mainly brilliant. Typically struck for the issue. Housed in an old green label holder. CAC: 48 in 65, 14 finer (4/17). NGC ID# 24RK, PCGS# 6596

4180 1935-S MS66 PCGS. The strike is about 70% complete on the head, branch hand, and eagle's leg, yet there are few marks or abrasions on either side of this attractive Premium Gem 1935-S half. Silver luster beams from beneath a thin coating of powder-gray patina with glimpses of pale-gold at the borders. As a date, this San Francisco half is among the scarcest of the middle-date series. PCGS has seen just three numerically finer pieces (4/17). NGC ID# 24RL, PCGS# 6597

**1936-D Half Dollar, MS67
Among the Finest Certified**

4181 1936-D MS67 PCGS. A full strike on the branch hand and skirt lines is the first attention-grabbing attribute of this incredible Superb Gem Walking Liberty half dollar. The viewer then proceeds to take note of the satiny luster that radiates from largely brilliant, impeccably preserved surfaces showing daubs of crimson and gold patina. Population: 40 in 67 (2 in 67+), 0 finer (4/17). NGC ID# 24RN, PCGS# 6599 Base PCGS# 6599

4182 1937 MS67 PCGS. CAC. Although usually available in MS67, the 1937 Walker has a finer PCGS population of only five coins (5/17), putting collectible MS67s such as this in high demand. The strike is sharp on the head and branch hand, and each side displays yellow-gold toning over luminous surfaces. NGC ID# 256A, PCGS# 6601

4183 1938 MS67 PCGS. This outstanding Superb Gem Walker features fully struck design elements and light golden tones around the borders that lighten to brilliant, softly frosted centers on each side. This coin displays nearly unsurpassed preservation, with just single finer submission at PCGS (5/17). NGC ID# 24RU, PCGS# 6604

4184 1938-D MS66+ PCGS. CAC. A brightly lustrous example of this low-mintage key to the later series of Walkers. Less than a half-million pieces were struck. The mint luster is surprisingly bright for a Denver mint product and there are no visible abrasions on either side of this well-struck Plus-graded Premium Gem. NGC ID# 24RV, PCGS# 6605

**1939-D Walking Liberty Half, MS67+
Essentially Unobtainable in Higher Grades**

4185 1939-D MS67+ PCGS. CAC. This Denver half dollar issue can be obtained through grades as high as MS67, but seldom are Plus-designated Superb Gems offered. Only a couple of finer representatives are reported at each of the leading grading services. This fully struck, Registry-grade coin is virtually brilliant with specks of russet and fire-orange patina near the right obverse field and border. Close scrutiny fails to yield any important distractions. Population: 96 in 67 (6 in 67+), 2 finer. CAC: 58 in 67, 0 finer (4/17). NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

4186 1939-S MS67 PCGS. CAC. Although usually available in MS67, the 1939-S Walker is almost unknown finer, and is unknown finer at PCGS (1/17). This CAC-endorsed Superb Gem displays a bold strike and glowing, champagne-toned luster with no distracting abrasions. NGC ID# 24RY, PCGS# 6608

4187 1940-S MS66+ PCGS. CAC. Only 13 Superb Gems surpass this coin at PCGS (5/17). However, this high-end Premium Gem competes with many of them in terms of eye appeal. Sharp design elements and unabraded surfaces offer a delicate golden hue, while die polishing lines in the fields promote subtle reflectivity. NGC ID# 24S2, PCGS# 6610

4188 1942 MS67+ PCGS. CAC. 30th Anniversary Green Label Holder. Plus-graded and CAC-endorsed, this Superb Gem 1942 Walking Liberty half dollar is an ideal type coin. The obverse periphery displays vivid yellow-gold and orange toning, while the center and entire reverse show faintly iridescent silver luster. The strike is sharp, and eye appeal is outstanding. NGC ID# 24S6, PCGS# 6614 Base PCGS# 6614

4189 1943-S MS66+ PCGS. The Plus designation is well-deserved on this high-end Premium Gem 1943-S half dollar, which shows frosty original luster and bold design elements with no distracting abrasions. A hint of light champagne toning graces each side. PCGS reports 44 finer representatives (5/17). NGC ID# 24SB, PCGS# 6620

4190 1947 MS67 PCGS. Only a handful of 1947 Walking Liberty half dollars survive in this unsurpassed state of preservation. Cream-gray centers turn to pale golden hues near the borders. The interior motifs exhibit a strong impression, and the fields are practically unmarked. Population: 79 in 67 (4 in 67+), 0 finer (4/17). NGC ID# 24SM, PCGS# 6630

PROOF WALKING LIBERTY HALF DOLLARS

4191 1936 PR64 PCGS. This sharply detailed Choice specimen represents the first year of the Mint's renewed proof coinage program. The lightly marked surfaces show the all-brilliant finish used for proofs of this era, with a few highlights of emerald-green and cerulean-blue toning. NGC ID# 27V4, PCGS# 6636

4192 1936 PR64 PCGS. The resumption of proof coinage in 1936 marked a comeback of the extra-brilliant proof finish that found favor with the Mint shortly after the turn of the century. This glittering example is indeed brilliant except for a few bits of russet-brown toning that dot the obverse. A sharp and nicely mirrored near-Gem to represent the inaugural year of Walking Liberty proofs, always in demand. NGC ID# 27V4, PCGS# 6636

1936 Half Dollar, Toned PR66

4193 1936 PR66 PCGS. Mottled olive-gold toning over each side of this Premium Gem example shows tinges of violet and forest-green in the reverse recesses. The fields are deeply mirrored, and the motifs display full definition. The debut proof Walking Liberty half dollar is scarce any finer, with PCGS reporting only 47 such submissions (5/17). NGC ID# 27V4, PCGS# 6636

**1936 Walking Liberty Half, PR66
First Proof Issue**

4194 1936 PR66 PCGS. Housed in a first-generation PCGS holder, this Gem proof 1936 Walking Liberty half dollar mottled champagne toning over its brilliant silver surfaces with fully mirrored fields and sharp design motifs. An exceptional example, this Gem will appeal to proof set collectors, type collectors, and series specialists. NGC ID# 27V4, PCGS# 6636

4195 1937 PR67+ PCGS. CAC. Hints of iridescence at the borders complement warm yellow-gold toning overall. The strike is full, and we are hard-pressed to discern any grade-limiting surface flaws. PCGS has seen only 11 finer representatives (5/17). NGC ID# 5ESS, PCGS# 6637

4196 1938 PR67+ PCGS. CAC. This Plus-graded Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces feature deeply reflective fields, with delicate shades of pale gold toning. Eye appeal is terrific. PCGS has graded 18 numerically finer examples (5/17). NGC ID# 27V6, PCGS# 6638

4197 1941 PR67+ PCGS. CAC. Razor-sharp detail and glimmering fields present this high-end Superb Gem with remarkable eye appeal, aided by a swath of vivid multicolor toning around the borders. The interiors are brilliant by comparison. PCGS has seen only 25 finer proof 1941 Walkers (4/17). NGC ID# 24SP, PCGS# 6641

FRANKLIN HALF DOLLARS

4198 1948 MS66+ Full Bell Lines PCGS. CAC. The first-year issue in the Franklin half dollar series is one of the most sought-after in high grade. This Plus-designated, CAC-approved Premium Gem Full Bell Lines coin offers sharp detail and well-preserved, frosty luster. Light golden toning deepens at the borders. PCGS has seen 15 finer Full Bell Lines examples (5/17). NGC ID# 24SR, PCGS# 86651

- 4199 1962-D MS66+ PCGS.** This is the single finest non-Full Bell Lines 1962-D Franklin half dollar at PCGS by the margin of the Plus designation. It should be of considerable interest to Registry Set builders. Each side is radiantly brilliant and devoid of mentionable ticks, though the portrait is not entirely mark-free. A touch of softness occurs on the legends and lower bell lines. Population: 26 in 66 (1 in 66+), 0 finer (4/17). NGC ID# 24TS, PCGS# 6683

PROOF FRANKLIN HALF DOLLARS

- 4200 1950 PR67 PCGS.** This was the first year Franklin halves were struck in proof format. The fields are seemingly pristine on each side of this immaculate Superb Gem. The surfaces are entirely brilliant, devoid of even the slightest suggestion of color. From a mintage of 51,386 specimens, PCGS reports a single finer example (5/17). NGC ID# 27VA, PCGS# 6691
- 4201 1950 PR67 PCGS.** This impressive Superb Gem exhibits sharply detailed design elements and hazily reflective fields, under delicate shades of champagne-gold toning. The surfaces are impeccably preserved. Population: 92 in 67 (2 in 67+), 1 finer (5/17). NGC ID# 27VA, PCGS# 6691
- 4202 1952 PR67 Cameo PCGS. CAC.** This spectacular Superb Gem displays sharply detailed, richly frosted design elements that contrast boldly with the deeply mirrored fields. The impeccably preserved surfaces are visited by delicate hints of pale gold toning. Population: 71 in 67 (5 in 67+) Cameo, 5 finer. CAC: 48 in 67, 5 finer (4/17). NGC ID# 27VC, PCGS# 86693
- 4203 1954 PR68 Cameo PCGS. CAC.** Among the finest Cameos at PCGS and conditionally scarce as such, this CAC-approved Superb Gem 1954 proof displays nearly flawless surfaces and appreciable field-device contrast. Neither side exhibits mentionable toning. Population: 69 in 68 (1 in 68+) Cameo, 0 finer. CAC: 40 in 68, 0 finer (4/17). NGC ID# 27VE, PCGS# 86695
- 4204 1954 PR68 Cameo PCGS. CAC.** A magnificent PR68 example of this popular Franklin half dollar, with sharply detailed, frosty design elements that contrast boldly with the deeply mirrored fields. The brilliant surfaces are impeccably preserved. Population: 68 in 68 (1 in 68+) Cameo, 0 finer. CAC: 41 in 68, 0 finer (4/17). NGC ID# 27VE, PCGS# 86695
- 4205 1954 PR68 Cameo PCGS. CAC.** A collection of Cameo proof Franklin half dollars poses quite a challenge for the advanced collector. This piece is tied for the finest that PCGS has certified. Both sides are brilliant and untuned with satin devices over mirrored fields. Population: 68 in 68 (1 in 68+) Cameo, 0 finer. CAC: 41 in 68, 0 finer (4/17). NGC ID# 27VE, PCGS# 86695
- 4206 1954 PR68 Cameo PCGS. CAC.** A delightful PR68 specimen of this popular date, with razor-sharp definition on the design elements and deeply reflective fields that contrast boldly with the frosty devices. Overall eye appeal is terrific. Population: 68 in 68 (1 in 68+) Cameo, 0 finer. CAC: 41 in 68, 0 finer (5/17). NGC ID# 27VE, PCGS# 86695
- 4207 1956 Type One PR68 Cameo PCGS.** A fully struck, brilliant Superb Gem example of the challenging Type One 1956 proof, showing low relief feathers on the reverse eagle. This piece is among the finest Cameos seen by PCGS. Population: 58 in 68 Cameo, 0 finer (4/17). NGC ID# 24TV, PCGS# 86686
- 4208 1956 Type Two PR69 Deep Cameo PCGS.** A Registry-grade coin, among the finest 1956 Franklin half dollars certified by either service. PCGS has not seen any Type One Deep Cameos this well-preserved. This example displays fully struck, frost-white design elements against seemingly immeasurable depth of mirroring in the fields. Population: 74 in 69 Deep Cameo, 0 finer (4/17). NGC ID# 24TW, PCGS# 96697
- 4209 1956 Type Two PR69 Deep Cameo PCGS.** This top-graded Franklin half exhibits razor-sharp definition and deeply mirrored fields throughout, with dramatic field/device contrast. This coin is impeccably preserved and virtually untuned, with terrific eye appeal. Population: 75 in 69 Deep Cameo, 0 finer (5/17). NGC ID# 24TW, PCGS# 96697

1959 Half Dollar, PR69 Cameo Finest We Have Handled

- 4210 1959 PR69 Cameo NGC.** This is the single finest 1959 Cameo proof Franklin half dollar we have handled, going back to the establishment of our Permanent Auction Archives in 1993. It is one of the few top-graded examples at NGC and PCGS combined. Black-and-white surfaces are utterly pristine with glassy fields and frosty, fully struck devices. Census: 9 in 69 Cameo (1 in 69★), 0 finer (5/17). NGC ID# 27VJ, PCGS# 86700
- 4211 1960 PR68+ Ultra Cameo NGC. CAC.** Thick mint frost covers the obverse and reverse design motifs of this gorgeous Superb Gem Ultra Cameo proof. Both sides are brilliant and untuned with deeply mirrored fields and exceptional, highly appealing contrast. Census: 75 in 68 Ultra Cameo (3 in 68+, 1 in 68★), 6 finer. CAC: 28 in 68, 0 finer (5/17). NGC ID# 24TY, PCGS# 96701
- 4212 1961 PR68 Ultra Cameo NGC. CAC.** A lovely black and white specimen, with unimaginably deep reflectivity in the jet-black fields and richly frosted, snow-white devices. Sharply struck and pristine, with faint die polish lines (as struck) across the Liberty Bell. CAC: 23 in 68, 1 finer (4/17). NGC ID# 24TZ, PCGS# 96702

SMS KENNEDY HALF DOLLAR

- 4213 1966 SMS SP68 Cameo PCGS.** Although this piece is virtually identical in appearance to a Superb Gem proof, it is designated as a Specimen since no proof sets were issued in 1965, 1966, or 1967. This brilliant and untuned example has excellent contrast and borders on the Deep Cameo designation. Population: 18 in 68 Cameo, 0 finer (4/17). NGC ID# 24WH, PCGS# 86846

PROOF KENNEDY HALF DOLLARS

- 4214 1964 PR69 Deep Cameo PCGS.** An exquisite Superb Gem Deep Cameo proof, this flawless piece has brilliant and untuned silver surfaces with outstanding contrast between the deeply mirrored fields and lustrous devices. NGC ID# 24WF, PCGS# 96800
- 4215 1964 PR69 Deep Cameo PCGS.** Type Two Reverse. Icy motifs rise in full detail above the mirrored fields. Brilliant aside from a few pinpoint tan flecks on the cheek and the field near the chin. Population: 93 in 69 Deep Cameo, 0 finer (4/17). NGC ID# 24WF, PCGS# 96800

EARLY DOLLARS

- 4216 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Obverse Damage — NGC Details. VG.** Deep lavender borders and golden-brown fields surround stone-white motifs. A semicircular mark on the central obverse should not be confused with a silver plug. B-5 is the best known 1795 Flowing Hair dollar variety, identified by the straight, slender line behind the uppermost curl.

**1795 Flowing Hair Dollar, Fine 15
B-5, BB-27, Three Leaves Reverse**

- 4217** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 15 PCGS. Bowers Die State II. This lovely circulation cameo shows bold detail for the grade with tan-gray relief elements and deep gunmetal-gray fields. There are no adjustment marks or environmental impairments. A few small areas of planchet porosity on the lower-left obverse are from a defective flan and thus mint-made. This is an outstanding Three Leaves, Flowing Hair type coin. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1795 Flowing Hair Dollar, VF25
B-5, BB-27, Three Leaves**

- 4218** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF25 PCGS. Bowers Die State II, as usual. From a bold, even strike, this midgrade Flowing Hair dollar type coin displays complete dentils around each side and no discernible adjustment marks. The central devices exhibit light wear but better definition than expected for the grade. Mottled olive-gray and russet toning blankets each side. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**1797 9x7 Stars Bust Dollar, Fine Details
Small Letters, B-2, BB-72**

- 4219** 1797 9x7 Stars, Small Letters, B-2, BB-72, R.4 — Repaired — NGC Details. Fine. Bowers Die State I. Although not as rare as once believed, the BB-72 Small Letters reverse is by far the scarcest of three varieties that comprise the entire mintage of this early Small Eagle issue. The NGC holder suggests a repair is the reason for the lack of a numeric grade, although the exact nature and area of the handwork is neither disclosed nor obvious. We note some microscopic porosity beneath deep-bronze toning and a vertical strike-through at the date and shoulder. As always for the variety, the obverse is quite sharper than the reverse.

- 4220** 1798 Large Eagle, Pointed 9, 5 Vertical Lines, 10 Arrows, B-17, BB-101, R.5 — Edge Repair — PCGS Genuine. XF Details. Light silver surfaces are indicative of improper cleaning on this piece, with a minor edge scrape near the D of UNITED. Any other edge repair, as noted on the holder, is not immediately evident. The obverse of this late state piece has prominent die cracks outside the stars near the border at the left.

**1798 Large Eagle Dollar, VF30
B-22, BB-104, Pointed 9
Exceptional Original Coloration**

- 4221** 1798 Large Eagle, Pointed 9, Wide Date, B-22, BB-104, R.4, VF30 NGC. Bowers Die State IV. Sharp, complete dentils show no adjustment marks at either periphery, and neither do the central devices. This high-end VF coin displays exceptional steel-gray color and smooth, problem-free surfaces. The strike is a trifle soft on the central high points, although wear is very light. Close study of the reverse shows a few mint-made, wire-shaped strike-throughs, primarily above the eagle's head amid the stars. NGC ID# 24X6, PCGS# 40021 Base PCGS# 40018

- 4222** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, VF30 NGC. Lightly luminous, silver-gray toning with golden overtones cover smooth, unabraded surfaces. A couple of pinpricks are seen under Liberty's chin. Moderate wear is most noticeable on the upper hair strands and the draping over Liberty's bust, which is smoothly worn. This is the Pointed 9, Heraldic Eagle design from a common die pairing, featuring the date close and the 8 much too high. The reverse shows a couple of small rim bumps and scrapes near the eagle's tail, but overall it is a pleasing mid-grade example. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

**1798 Large Eagle Dollar, VF35
B-24, BB-124, Pointed 9
Great Color and Surfaces**

- 4223** 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2, VF35 PCGS. Bowers Die State IV, obverse cracked in multiple places. Gold, amber, blue, and green toning paints the margins on this Choice VF BB-124 dollar. The remainder of each side is a pleasing pewter-gray color with subtle iridescence. The old-time look complements a lack of adjustment marks or other surface interruptions. As usual, the strike is weak above the to the right of the eagle's head. NGC ID# 24X6, PCGS# 40041 Base PCGS# 40018

4224 1799/8 15 Stars Reverse, B-3, BB-141, R.3 — Cleaning — PCGS Genuine. XF Details. The extra large clouds on both ends cover most of the extra two stars on the reverse, with just a few star points sticking out. In addition to the famous overdate, the dentils on the lower right obverse of this lightly worn specimen show dramatic clashing, making the coin doubly interesting to series specialists. No large or distracting abrasions are present and the overall presentation is quite attractive, despite the noted cleaning. NGC ID# 24X8, PCGS# 40064 Base PCGS# 6883

4225 1799 7x6 Stars, B-11, BB-161, R.3 — Cleaning — PCGS Genuine. XF Details. Bowers Die State III. The obverse is sharply struck with minimal wear on the highest strands of Liberty's hair, although a blue sheen covers the obverse fields around the portrait from improper cleaning. A glass reveals a few scattered small marks. The reverse shows a bold die crack from the edge past D in UNITED, branching into three parts at the eagle's wing.

4226 1801 B-1, BB-211, R.3 — Damaged — NGC Details. VF. A prominent scrape crosses Liberty's upper head detail on the obverse, and two heavy gouges are evident on the reverse. Pale lavender and gold toning enhances the eye appeal of this light silver example. Traces of luster remain on the satin surfaces.

SEATED DOLLARS

1841 Seated Dollar, MS62 Variegated Toning

4227 1841 MS62 PCGS. OC-3, R.2. Die lines above the leg left of the pole base, and extensions of the shield lines above and below attribute the variety. The 1841 is regarded as an available date, but comparable Mint State survivors are rare. Softness usually occurs over Liberty's head, which is better-defined than average on this MS62 example. The sandal and eagle also show good detail. Variegated lavender and gold patina covers much of each side. Population: 24 in 62, 26 finer (5/17). NGC ID# 24YB, PCGS# 6927

4228 1843 AU58 NGC. OC-2, R.1. Die lines in the upper-left quadrant of the reverse identify this plentiful die variety. The coin displays sharp detail and bright surfaces. Brilliant interiors cede to light golden peripheral toning. Scattered abrasions are consistent with the grade. NGC ID# 24YD, PCGS# 6929

4229 1853 AU50 PCGS. OC-1, R.2. The "Chin Whiskers" variety, which constitutes all business strikes for the date. A briefly circulated caramel-gold representative with scattered small field marks and a slight edge nick on the reverse at 9 o'clock. NGC ID# 24YS, PCGS# 6941

4230 1859-O MS60 ANACS. OC-2. A blush of golden toning appears at the borders but leaves the interiors brilliant. The fields are deeply reflective on the reverse and satiny on the obverse. Scattered abrasions affect both sides. The strike is weak around the stars and on Liberty's head. NGC ID# 24YY, PCGS# 6947

1859-O Silver Dollar, MS62 In a Green Label Holder

4231 1859-O MS62 PCGS. OC-2. This undeniably Mint State example retains its cartwheel luster in almost full brilliance. The strike is sharp, and grade-limiting abrasions present themselves in a scattered fashion with no individual distractions. The 1859-O is one of only a few choices for the budget-conscious type collector seeking a No Motto coin in Mint State. Housed in a green label holder. NGC ID# 24YY, PCGS# 6947

4232 1860-O AU58 PCGS. Hints of reddish-tan gravitate to the margins of this near-Mint dollar, more so on the obverse. Traces of luster reside in the protected areas. A pleasing Seated dollar. NGC ID# 24Z3, PCGS# 6950

4233 1865 AU53 PCGS. OC-3, High R.5. The 1865 is a better date in high grade. This About Uncirculated example has bold detail with scattered handling marks. Deep olive-gray and gunmetal-blue toning blankets each side, attesting to the originality of the surfaces. This die variety shows multiple repunchings of the 5 in the date. Population: 17 in 53, 61 finer (4/17). NGC ID# 24Z8, PCGS# 6955

4234 1869 AU55 NGC. Traces of luster reside in the recessed areas of this Choice AU dollar. High-point wear is minimal on the well-struck design features. There are no significant abrasions to report. Census: 16 in 55, 58 finer (5/17). NGC ID# 24ZC, PCGS# 6962

4235 1869 MS61 PCGS. The 1869 Seated dollar is usually seen in the VF to AU range. Mint condition survivors are rare. This lightly toned example shows untuned centers with gold, purple, and blue coloration around the borders. The effect is more dappled on the reverse. Three small pin scratches in the right obverse field serve as identifying markers. Population: 10 in 61, 36 finer (5/17). NGC ID# 24ZC, PCGS# 6962

4236 1872-CC — Cleaning — PCGS Genuine. VF Details. OC-1, High R.3. From a low mintage of 3,150 pieces, this lightly circulated 1872-CC Seated dollar displays deep olive-green and gray toning that completely conceals an old cleaning to the untrained eye. The surfaces are generally smooth and still appealing for collectors who recognize the rarity of this issue with pleasing visual characteristics. The chief attribute of the present coin is its unusually strong detail — designated VF Details by PCGS, this coin would have easily received a VF35 grade were it not cleaned in the distant past.

4237 1872-S XF40 PCGS. OC-1, Low R.3. An original and highly appealing Seated dollar with natural, problem-free surfaces. This 1872-S example shows smooth wear on the high points but notably few marks and attractive, silver-gray surfaces. Just 9,000 pieces were struck for this scarce and elusive branch mint issue. The lower-left quadrant of the reverse is boldly strike doubled, visible on the olive leaves, wing, legend, and denomination. NGC ID# 24ZL, PCGS# 6970

PROOF SEATED DOLLARS

1845 Seated Dollar, PR53 Only 16 Proofs Traced

- 4238 1845 PR53 PCGS. OC-P1.** Original proof dies, repunched date. The number of 1845 proof Seated dollars struck is unknown, although our research identifies only 16 survivors, several of which show light high-point wear. This is among the more affordable examples of this rare early proof issue. The coin is sharply struck and shows remnants of deep reflectivity in the protected regions of the fields. Lavender-gray and olive-gold toning appears on each side along with scattered handling marks. This is a newly discovered proof that will appeal to the Seated dollar specialist. Population: 1 in 53, 11 finer (4/17). NGC ID# 24ZV, PCGS# 6986

1860 Seated Dollar, PR63 A Collector-Grade No Motto Proof

- 4239 1860 PR63 ANACS. OC-P1, R.2.** Dusky light golden toning blankets each side of this Select proof, while tinges of green, amber, and russet-gray appear at the borders. Several obverse stars are incomplete, and there is minor strike softness on the upper edge of the eagle's left (facing) wing. Any minor hairlines are hidden by the patina. NGC ID# 252E, PCGS# 7003

1861 Seated Dollar, PR61 Razor-Sharp Strike, Even Gray Patina

- 4240 1861 PR61 NGC. OC-P1, High R.3.** The 1861 issue shows a deceptively high mintage of proofs. Mint records show that 1,000 proofs were struck, but we suspect many pieces were melted at year's end as unsold. Microscopic swirling lines on the present coin have dulled the proof flash in the fields, but the devices display pinpoint striking definition and the surfaces are otherwise mark-free. Light silver-gray patina with glints of gold evenly covers each side. Census: 7 in 61, 77 finer (4/17). NGC ID# 252F, PCGS# 7004

- 4241 1866 Motto — Improperly Cleaned — NGC Details. Proof. OC-P2, High R.3.** The strike is razor-sharp, and each side exhibits lovely lavender-blue, pale violet, and yellow-gold toning. The mirrored fields are slightly muted by a light cleaning, which leaves hairlines faintly discernible under magnification. As a first-year With Motto proof type coin, this piece has significant appeal for the budget-conscious collector.

- 4242 1870 PR62 PCGS. OC-P1, Low R.3.** Bluish-violet and golden iridescence appears mottled over this PR62 Seated dollar. The rich coloration masks most grade-limiting contact marks. The only one of note occurs over the torso. A full strike is unsurprising. This is one of 1,000 proofs manufactured in 1870. NGC ID# 252S, PCGS# 7018

- 4243 1873 PR58 NGC. OC-P1, R.3.** A glimmering proof with scattered handling marks in the fields that prevent a "mint condition" grade from NGC. Other than a hint of light golden rim toning, the coin is brilliant. Sharp design elements attractively accent deeply reflective fields, although cameo contrast is not immediately apparent. NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

- 4244 1873 MS62 PCGS.** Design detail is generally strong throughout this Uncirculated first-year Trade dollar. Limited softness occurs on Liberty's head and the eagle's right (facing) talon. Brilliant surfaces are highly lustrous with areas of pale toning above stars 5 and 6. NGC ID# 252W, PCGS# 7031

- 4245 1873 MS62 PCGS.** The lightly marked surfaces of this MS62 Trade dollar are blanketed in rich shades of slate-gray and greenish-gold toning, with satiny mint luster underneath. The design elements are well-detailed, with a touch of flatness on the stars and Liberty's head. NGC ID# 252W, PCGS# 7031

- 4246 1874-CC MS61 NGC.** Tall CC. Period after FINE. Although the 1874-CC has a higher mintage than its Philadelphia counterpart (1.3 million coins versus 987,100 coins), it is the most elusive of the three Trade dollar issues from that year. This is a well-struck Uncirculated example with bold detail on Liberty's head, foot, and the stars. Light antique-gray patina with myriad wispy abrasions. NGC ID# 2532, PCGS# 7035

- 4247 1875-S/CC FS-501 AU55 NGC.** Type One Reverse. Large S. A partly lustrous straw-gold and stone-gray example. Marks are chiefly absent but we note a vertical retained lamination through star 9. The very late die state of FS-501 with distinctive die cracks throughout the reverse periphery. NGC ID# 2536, PCGS# 145813 Base PCGS# 7040

- 4248 1876 Type One Obverse, Type Two Reverse, MS63 PCGS. CAC.** Dusky walnut-brown and dove-gray shades embrace this satiny and sharply defined Centennial-year Trade dollar. Abrasions are virtually absent, although the right obverse field shows faint diagonal lines well hidden by the rich patina. Golden luster peaks through from deep beneath the comprehensive toning. CAC endorsement accompanies the Select Uncirculated designation. NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

**1876-CC Trade Dollar, AU58
Multiply Chop-Marked Example**

- 4249 1876-CC Chop Mark AU58 PCGS.** Type One Obverse. Type Two Reverse. Tall CC. The still-lustrous, near-Mint obverse of this attractive Carson City Trade dollar had its ticket punched to many destinations according to the large number of chop marks that congregate at the coin's center. A few standalone marks are spaced farther apart from the rest, where they are more easily viewed for their distinctive style of punch. A faint golden hue deepens at the border of this sharp and interesting, well-traveled dollar. PCGS# 87042 Base PCGS# 7042

**1876-CC Trade Dollar, AU58
Scarce Issue, Always In Demand**

- 4250 1876-CC Type Two Reverse AU58 PCGS.** A thin golden-gray sheen is barely perceptible over partially reflective, silver-white surfaces of this near-Mint Carson City Trade dollar. Numerous faint lines and tiny ticks limit the prooflike nature of the fields, while the central motifs are lightly frosted and sharply struck. Very scarce-to-rare any finer. Population: 33 in 58, 35 finer (4/17). NGC ID# 4EML, PCGS# 40113 Base PCGS# 7042
- 4251 1877 MS62 PCGS.** Silver-gray surfaces display strike weakness in Liberty's head and the stars, as well as a few scattered stains. The remaining devices are relatively well-impressed. NGC ID# 253C, PCGS# 7044
- 4252 1877 MS63 PCGS. CAC.** This Select Trade dollar displays intermingled shades of champagne-gold and lavender toning over deeply reflective prooflike surfaces. The design elements are well-detailed and no mentionable distractions are noted.
Ex: Philadelphia Signature (Heritage, 8/2012), lot 3547. NGC ID# 253C, PCGS# 7044
- 4253 1877-CC XF40 PCGS.** Tall CC. Pleasing olive-gray surfaces are problem-free, and the design elements are well-detailed. There may not exist a finer Trade dollar type coin in this grade with the Carson City mintmark. NGC ID# 253D, PCGS# 7045
- 4254 1877-CC — Cleaning — PCGS Genuine. Unc Details.** Tall CC, closely spaced beneath the S in GRAINS. This unworn 1877-CC Trade dollar is sharp throughout the stars, head, and olive branch, and it also shows good definition on the eagle's feathers and talons. Satiny luster is slightly muted from a light cleaning, although each side displays delicate champagne toning. A loupe reveals a short die crack on the obverse from the rim through star 2. This is a challenging date to acquire in Mint State.

**1878-CC Trade Dollar, XF45
Low-Mintage Key Issue**

- 4255 1878-CC XF45 NGC.** Only 97,000 Trade dollars were struck at the Carson City Mint in 1878, making the issue elusive in all grades. This attractive Choice XF example shows light wear on the design elements, but the mottos and LIBERTY remain sharp. Pleasing shades of lavender-gray and champagne-gold toning blanket the lightly abraded surface. Census: 16 in 45, 48 finer (4/17).
Ex: ANA Signature (Heritage, 2/2014), lot 3670. NGC ID# 253M, PCGS# 7047

PROOF TRADE DOLLAR

**1880 Trade Dollar, PR64+
Attractive Patination**

- 4256 1880 PR64+ PCGS.** Violet-gray patina covers most of the surface area of this near-Gem proof. Rotation under a light source brings out lovely shades of gold, blue, and magenta. The strike is expectedly pinpoint-sharp, and there are remarkably few signs of contact for the assessment, hence the Plus designation. Only 1,987 Trade dollars were manufactured in 1880 — all in proof format. NGC ID# 27YS, PCGS# 7060

MORGAN DOLLARS

**1878 8TF VAM-2 Morgan Dollar
MS64 Deep Mirror Prooflike**

- 4257 1878 8TF Lines in LIB, VAM-2, MS64 Deep Mirror Prooflike PCGS.** The remarkably reflective fields contrast with the frosty devices. A brilliant example of this popular and briefly issued subtype. The left obverse exhibits scattered minor contact, and the remainder of the coin is well preserved. Both sides exhibit die doubling, usual for 8TF Morgans. Population (all varieties): 38 in 64 (3 in 64+) Deep Mirror Prooflike, 4 finer (5/17). NGC ID# 253H, PCGS# 40120 Base PCGS# 97073

- 4258 1878 8TF Notched Star, VAM-12, MS65 PCGS.** Recutting on several stars and doubled bottom serifs of E, PL-RIB-S plus a strong die polishing line in the curl of Liberty's cap identify this scarcer VAM variety. Attractive lilac, pale-blue, and orange-gold toning blankets both sides of this lustrous Gem example. Sharply struck with just minor blending over the ear. Population for the variety: 3 in 65, 0 finer (4/17). NGC ID# 253H, PCGS# 133794 Base PCGS# 7072
- 4259 1878 8TF Alligator Eye, VAM-14.1A, MS65 NGC.** This is a late die state with a crack from the rim to star 5 and clash marks throughout. This strongly defined, inaugural-year Gem is frosty and brilliant with an area of attractive sunset coloration near the right obverse border. NGC ID# 253H, PCGS# 133796 Base PCGS# 7072
- 4260 1878 8TF Tripled Stars, VAM-16, MS65 PCGS.** The left-side stars are tripled, and wide doubling on LIBERTY provides a secondary pick-up point. The lower left reverse is also strongly doubled. Scarcer than VAM-17, which shares the same reverse die. A lustrous and practically brilliant Gem. NGC ID# 253H, PCGS# 133817 Base PCGS# 7072
- 4261 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS.** An 8TF, Blunt Beak variety with light die doubling on LIBERTY. This Gem is frosty and radiant with no visible toning. The strike is sharp, and only a few light grazes on Liberty's cheek limit the grade. Population of attributed VAM-17 coins: 18 in 65 (1 in 65+), 2 finer (5/17). NGC ID# 253H, PCGS# 133818 Base PCGS# 7072
- 4262 1878 7/8TF 7/4 Weak, VAM-34, MS65 NGC.** A Hot 50 Variety. Diagonal die lines through the tail feathers and ribbon loop provide identifiers for the scarce VAM-34 variety. This lustrous pearl-white Gem is well struck and has a smooth cheek. The fields exhibit only minor contact. NGC ID# 2TY3, PCGS# 133971 Base PCGS# 7074
- 4263 1878 7/8TF 7/4 Strong, VAM-37, MS65 PCGS.** Attractive autumn-brown, sea-green, and cobalt-blue toning enriches the borders of this first-year Morgan dollar. The lustrous surfaces are exceptionally free from contact, though a narrow strike-through (as made) appears to give the eagle a beard. NGC ID# 2TXZ, PCGS# 134034 Base PCGS# 7078
- 4264 1878 7/8TF Strong, VAM-38, MS65 PCGS.** Extremely wide doubling on LIBERTY identifies the popular VAM-38, and the remnants of five tail feathers are visible beneath the primary seven on this well-detailed Gem. The well-preserved, lustrous surfaces are lightly toned in shades of champagne-gold and lavender. Population: 14 in 65, 1 finer (4/17). NGC ID# 2TXZ, PCGS# 134035 Base PCGS# 7078

**1878 7TF Morgan Dollar, MS66
Reverse of 1878, Tied for Finest at PCGS**

- 4265 1878 7TF Reverse of 1878 MS66 PCGS.** This offering should entice Registry builders and Morgan dollar specialists. It is a brilliant, thickly frosted Premium Gem, that the Reverse of 1878 and 7 Tailfeathers, and ranks among the finest examples at PCGS. The strike is fully rendered, and each side is devoid of mentionable marks. Population: 50 in 66 (7 in 66+), 0 finer (4/17). NGC ID# 2TY3, PCGS# 7074

- 4266 1878 7TF Reverse of 1878 MS64 Deep Mirror Prooflike PCGS.** The parallel top arrow feather identifies the Reverse of 1878. The design elements of this impressive Choice example are sharply detailed and the well-preserved surfaces show deeply reflective fields that contrast boldly with the frosty devices. Population: 83 in 64 (4 in 64+) Deep Mirror Prooflike, 17 finer (4/17). NGC ID# 253K, PCGS# 97075
- 4267 1878 7TF Reverse of 1878, VAM-100, MS65 ANACS.** A Top 100 Variety. The Type One Obverse with a short nock and an incused Morgan initial on the bust truncation. Rich golden-brown and ocean-blue toning endows the borders, while the remainder of this lustrous Gem is cream-gray. In a small-sized holder. NGC ID# 253K, PCGS# 133832 Base PCGS# 7074
- 4268 1878 7TF Reverse of 1879 MS65 PCGS.** A fully brilliant Gem representative of the elusive variety from the Reverse of 1879 hub. This example has satiny silver luster and hints of peripheral gold toning. PCGS has only certified 26 finer examples (4/17). NGC ID# 253L, PCGS# 7076
- 4269 1878 7TF Reverse of 1879 MS65+ PCGS.** The 7TF, Reverse of 1879 is one of the scarcer 1878 Morgan dollar types. This high-end Gem example is fully struck and thickly lustrous with original, untoned surfaces. Only a few tiny grazes in the left obverse field prevent an even finer grade. PCGS has seen 26 coins finer in MS66 (4/17). NGC ID# 253L, PCGS# 7076
- 4270 1878 7TF Reverse of 1879 MS65+ PCGS.** Potent luster, a good strike, and exceptionally smooth surfaces are the significant attributes of this first-year Gem. Both sides show only a whisper of golden toning. As of (4/17), PCGS has certified just 37 pieces as MS65+, with only 26 finer. NGC ID# 253L, PCGS# 7076
- 4271 1878 Reverse of 1879, VAM-203, Short Leaf MS65 PCGS.** A Top 100 Variety. This Gem will find considerable interest among variety specialists who seek a high-grade example. Both sides are fully lustrous with frosty, untuned silver surfaces. Population for VAM-203: 13 in 65, 1 finer (5/17). NGC ID# 253L, PCGS# 133838 Base PCGS# 7076
- 4272 1878 Reverse of 1879, 168 Reeds, VAM-224, MS65 PCGS.** The Reverse of 1879 variant is somewhat scarcer overall than the Reverse of 1878, and is rarely encountered above the Gem grade level. This piece displays frosty, well-preserved surfaces and bold design elements. A few faint traces of light golden color are seen when turned in-hand, though the overall eye appeal imparts the impression of full brilliance. PCGS# 412580 Base PCGS# 7076
- 4273 1878-CC MS65 PCGS.** A delightful Gem from the first year of the Morgan dollar design, this issue is always in demand from branch mint type collectors. Razor-sharp definition is evident on all design elements and the well-preserved surfaces radiate vibrant mint luster on both sides. Overall eye appeal is outstanding. This coin should find a home in a fine collection of Morgan dollars. NGC ID# 253M, PCGS# 7080
- 4274 1878-CC MS65 NGC.** This Gem Carson City issue displays pleasing luster emanating from silver-gray surfaces. The design elements are sharply struck, including the hair over Liberty's ear and the eagle's breast feathers. The few minute marks are in concert with the grade designation. NGC ID# 253M, PCGS# 7080
- 4275 1878-CC MS65 PCGS. VAM-9, CC Tilted Right.** Curious die lines in the fields around the mintmark are the pick-up point for this lesser VAM variety. The current coin displays sharp detail and frosty original mint luster with no mentionable toning. A few faint grazes on Liberty's cheek are minor but determine the grade. NGC ID# 253M, PCGS# 7080
- 4276 1878-CC MS65+ PCGS.** A total of 47,567 Uncirculated 1878-CC Morgan dollars were distributed as part of the GSA release of the 1970s, but the average certified grade for the issue is right around MS60. This Gem is frosty and brilliant with bold detail over the ear and breast feathers. The lower obverse is slightly soft. Carefully preserved. NGC ID# 253M, PCGS# 7080

- 4277 1878-CC MS65 Prooflike PCGS.** A brilliant, cameo-contrasted Gem, this high-end 1878-CC Morgan dollar is struck from freshly polished dies that still show polishing lines in the fields. A few light grazes on Liberty's cheek and in the adjacent field prevent a finer grade. PCGS has seen eight Prooflike coins in superior condition (4/17). NGC ID# 253M, PCGS# 7081
- 4278 1879 MS66 PCGS.** This smooth and appealing Premium Gem example is brilliant-white and visually impressive. Only the most minor grazes interrupt the frosted surfaces, which display a razor-sharp strike and minor repunching on 879 of the date. PCGS reports just five numerically finer coins (4/17). NGC ID# 253S, PCGS# 7084
- 4279 1879 MS66 PCGS. CAC.** The 1879 Morgan dollar is a scarce issue at the MS66 grade level, and finer coins are very rare. This spectacular Premium Gem is sharply detailed and impeccably preserved, with vibrant mint luster throughout. PCGS has graded five numerically finer examples (5/17). NGC ID# 253S, PCGS# 7084
- 4280 1879-CC AU50 NGC.** An attractive AU example represents the Normal Mintmark variety, here exhibiting light pewter-gray surfaces with delicate gold toning and traces of luster on each side. NGC ID# 253U, PCGS# 7086
- 4281 1879-S Reverse of 1878 MS64 PCGS.** The Reverse of 1878 variant is scarce in high grade. This near-Gem offers frosty original luster with dusky lavender-gold toning over each side. A few abrasions that determine the grade are well-hidden by the patina. NGC ID# 253W, PCGS# 7094
- 4282 1879-S Reverse of 1878, VAM-51, MS63 PCGS.** A Top 100 Variety. Numerous die markers appear on this variety, including light doubling of the 9 in the date and distinctive die lines in the eagle's wings. This Select Mint State example exhibits the expected smattering of light abrasions for the grade with sharp devices and brilliant surfaces. The obverse is nearly worthy of a Deep Mirror Prooflike designation, although the reverse has a few too many die polishing striations to allow the coin to garner even a Prooflike grade from PCGS. This is a coin that will fit in well with an otherwise Prooflike or Deep Mirror Prooflike Morgan dollar collection. NGC ID# 253W, PCGS# 133867 Base PCGS# 7094
- 4283 1879-S MS67+ PCGS. CAC.** This sharp, brilliant Superb Gem 1879-S Morgan dollar enjoys heightened visual appeal from its semiprooflike fields. No distracting abrasions are noted. The CAC green label gives this piece strong type coin appeal. NGC ID# 253X, PCGS# 7092
- 4284 1880 MS66 PCGS.** This Premium Gem appears freshly struck with eye-catching cartwheel luster and uninhibited mint brilliance. The centers are strongly detailed, and few marks are apparent on either side. This piece ranks among the finest examples at both services (5/17). NGC ID# 253Y, PCGS# 7096
- 4285 1880/79-CC Reverse of 1878, VAM-4, Top 100, MS65 PCGS.** A Top 100 Variety. The parallel top arrow feather identifies the Reverse of 1878 and the remnants of an undertype 79 below the last two primary digits in the date confirm the popular VAM-4 variety. This impressive Gem is sharply detailed and lustrous, with well-preserved, lightly toned surfaces. Population: 13 in 65, 4 finer (4/17). NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108
- 4286 1880-CC 8 Over High 7, VAM-5, MS66 PCGS.** A Top 100 Variety. The overdate and is listed on the insert but the VAM number is not. The modestly frosted motifs exhibit some contrast with the fields. Untoned and sharply struck with no marks of mention. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102
- 4287 1880-CC 8 Over High 7, VAM-5, MS66 NGC. CAC.** A Top 100 Variety. The remains of the undertype 7 can be seen below the second 8 in the date, with the points of the top of the 7 visible above the top of the 8. This lustrous silver-gray Morgan exhibits strong definition in the hair above Liberty's ear. The surfaces on both sides have been well-cared for. NGC ID# 2542, PCGS# 133877 Base PCGS# 7102
- 4288 1880-CC 8/7, Reverse of 1878, VAM-7A, MS65 PCGS.** A Hit List 40 Variety. Double die clashing is visible on the obverse and reverse of VAM-7A, although the Reverse of 1878 with parallel arrow feathers and the clear remnant from the upright of a 7 beneath the second 8 in the date are the primary interests for collectors. A touch of gold at the rims adds appeal to this frosted, brilliant-white Carson City Gem. Sharply struck with only a few light grazes. NGC ID# AP7P, PCGS# 134049 Base PCGS# 7110
- 4289 1880-O 8 Over 7 Ear, VAM-6A, MS64 NGC.** A Top 100 Variety. Small or Micro O. Jade-green and lilac-red toning graces the upper obverse border, while the remainder of this lustrous Choice New Orleans dollar is close to brilliant. VAM-6A shows an "ear" above the second 8 in the date, along with a die line through a berry near the N in UNITED.
Ex: Exclusive Internet #22092 (Heritage, 5/2002), lot 13351; New York Signature (Heritage, 7/2002), lot 6758. NGC ID# 2543, PCGS# 133883 Base PCGS# 7114
- 4290 1880-S MS67+ PCGS. CAC.** 30th Anniversary Green Label Holder. This magnificent Morgan dollar is a high-end Superb Gem, with sharply detailed design elements and impeccably preserved surfaces that show some prooflike reflectivity on the reverse. Eye appeal is tremendous. NGC ID# 2544, PCGS# 7118
- 4291 1880/9-S VAM-11, Medium S, Hot 50, MS67+ PCGS.** A Hot 50 Variety. Some die polishing marks inside the loop of the 0 in the date are the main pickup points for this popular *Guide Book* variety. This Plus-graded Superb Gem exhibits sharply detailed design elements and impeccably preserved brilliant surfaces, with vibrant mint luster and terrific eye appeal. Population: 61 in 67 (7 in 67+), 3 finer (4/17). NGC ID# 2544, PCGS# 133988 Base PCGS# 7122
- 4292 1881 MS66 NGC.** A boldly lustrous and attractively toned Premium Gem example of this popular Philadelphia, very scarce at the MS66 level and flat-out rare any finer. Windows of silver color appear at the left obverse and right reverse, while the rest of the coin is covered in bold gold, orange, and blue-violet patina with rose accents. Census: 56 in 66 (1 in 66+, 2 in 66★), 3 finer (4/17).
Ex: Stamford Coinfest Signature (Heritage, 10/2010), lot 4210, where it brought \$1,840. NGC ID# 2546, PCGS# 7124
- 4293 1881-CC MS66+ PCGS.** Vibrantly frosty and unabraded, this high-end Premium Gem 1881-CC dollar displays sharp detail and impressive eye appeal. Finer examples are occasionally seen for a price, but the present coin lacks nothing as a Carson City type coin or date representative. NGC ID# 2549, PCGS# 7126
- 4294 1881-O MS64 Deep Mirror Prooflike PCGS. CAC.** Dramatic contrast, the result of thickly frosted, fully struck motifs set against profoundly reflective fields, produces the amazing eye appeal for which CAC has awarded a desirable green approval sticker. All-brilliant with a single mark below the chin. There are just 18 finer Deep Mirror Prooflike examples at PCGS and five finer at CAC (5/17). NGC ID# 2548, PCGS# 97129
- 4295 1881-S MS67+ PCGS. CAC.** This high-end Superb Gem is sharply struck and radiantly lustrous. A hint of yellow-gold border toning accents brilliant interiors. A loupe, used at the proper angle, reveals a few faint grazes in the obverse field that prevent an MS68 designation. Liberty's cheek is pristine. NGC ID# 2549, PCGS# 7130

**1881-S Morgan Dollar, MS68 ★
Only One Finer Coin at NGC**

- 4296 1881-S MS68 ★ NGC.** NGC has rightly mounted this coin back-to-front inside the encapsulation to stress the incredible iridescent rainbow toning on the reverse, which includes bands of canary-yellow, ice-blue, cherry-red, and aqua. The obverse is completely color-free, providing a startling contrast, and both sides are remarkably free of observable contact. NGC has graded one numerically finer example (4/17).
Ex: Central States Signature (Heritage, 4-5/2009), lot 2995; Chicago Signature (8/2011), lot 4517. NGC ID# 2549, PCGS# 7130

- 4297 1882 MS66 PCGS.** Frosty, vibrant mint luster is brilliant and largely unabraded on this Premium Gem 1882 Morgan dollar. Although collectible in the current grade, this early Philadelphia Morgan is rare any finer. PCGS has seen only 10 Superb Gems finer (5/17). NGC ID# 254A, PCGS# 7132
- 4298 1882 MS66 PCGS. CAC.** This Premium Gem Morgan possesses brilliant surfaces and sharply struck design elements, including the hair above Liberty's ear and the eagle's breast. Both sides have been well-cared for. NGC ID# 254A, PCGS# 7132

**1882 Morgan Dollar, MS65
Deep Mirror Prooflike**

- 4299 1882 MS65 Deep Mirror Prooflike PCGS.** The total number of Deep Mirror Prooflike 1882 Morgan dollars is small in the absolute sense, but is especially impressive considering the issue's mintage of more than 11 million coins. This Gem is all-brilliant with deeply reflective fields and a delicate layer of frost over fully struck devices. Population: 29 in 65 (4 in 65+) Deep Mirror Prooflike, 1 finer (4/17). NGC ID# 254A, PCGS# 97133

- 4300 1882-CC MS66+ PCGS.** Brilliant, frosty mint luster gives this high-end Premium Gem the typical — but highly appealing — look of a Carson City dollar of this date. A loupe reveals a few tiny ticks on the cheek that prevent an MS67 designation. Finer coins are infrequently accessible. NGC ID# 254S, PCGS# 7134
- 4301 1882-CC MS66+ PCGS.** Radiant, frosty mint luster is untuned as it rolls around nearly pristine surfaces on this high-end Premium Gem 1882-CC Morgan dollar. The design elements are fully struck, and eye appeal excels. Finer 1882-CC dollars are elusive for many collectors. NGC ID# 254S, PCGS# 7134
- 4302 1882-CC MS66+ PCGS.** Silver-white luster issues from both sides of this high-end Premium Gem Morgan. A good amount of detail is apparent in the hair above Liberty's ear. This piece has been well-cared for. NGC ID# 254S, PCGS# 7134

- 4303 1882-CC MS66+ PCGS.** Nearly prooflike fields heighten the visual appeal of this high-end Premium Gem example, while sharp, frosty design elements are more traditional for high-grade Carson City Morgan dollars. A hint of light golden toning appears around the borders. Finer 1882-CC dollars are scarce. NGC ID# 254S, PCGS# 7134

- 4304 1882-CC MS66+ PCGS. CAC.** Light straw-gold and pearl-gray toning visits this thoroughly lustrous and precisely struck Carson City type coin. A costly acquisition any finer but highly appealing in this grade with the Plus designation and CAC endorsement.
Ex: ANA Signature (Heritage, 2/2014), lot 4763. NGC ID# 254S, PCGS# 7134

**1882-CC Morgan Dollar, MS67
None Numerically Finer at NGC**

- 4305 1882-CC MS67 NGC.** Among Carson City Mint Morgan dollars, this issue is one of three common dates, being present in great quantities among coins distributed by the GSA in the 1970s. This Superb Gem specimen is fully brilliant and sharply struck with excellent contrast between lustrous devices and mirrored fields. No numerically finer examples of this issue have been graded by NGC. Census: 57 in 67 (1 in 67+, 4 in 67★), 0 finer (4/17). NGC ID# 254S, PCGS# 7134

- 4306 1882-O MS65+ PCGS. CAC.** A Plus-graded Gem representative of this popular date, with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved surfaces show some subtle hints of greenish-gold and lavender-gray toning. The 1882-O is very scarce in finer grades. NGC ID# 254C, PCGS# 7136

**1882-O Dollar, Brilliant MS66
Very Rare Any Finer**

- 4307 1882-O MS66 PCGS.** Examples of this New Orleans dollar are almost always seen in MS62 to MS64 condition. Gems are moderately available, while comparable Premium Gems are decidedly rare. The surfaces are frosty and unmarked with just a trace of golden color near the rims. Otherwise, each side is brilliant. Strike detail is characteristic for the facility. Population: 69 in 66 (4 in 66+), 6 finer (4/17). NGC ID# 254C, PCGS# 7136
- 4308 1882-O/O VAM-7 MS65 PCGS.** A Top 100 Variety. The original impression of the O mintmark is clear within the loop and below. Brilliant with radiant luster, this New Orleans Gem features crisp detail over Liberty's ear and the eagle's breast. Diagonal roller marks occur on the chin. Population: 12 in 65, 1 finer (4/17). NGC ID# 254C, PCGS# 133895 Base PCGS# 7136

- 4309 1882-S MS66 ★ NGC.** Exceptional bands of powder-blue, lemon-gold, and cherry-red patina endow the reverse. The obverse is brilliant save for an arc of peach toning along the upper margin. Well struck and lustrous with smooth fields. NGC ID# 254F, PCGS# 7140
- 4310 1882-S MS66+ PCGS. CAC.** This Plus-graded Premium Gem displays razor-sharp definition on all design elements and the impeccably preserved surfaces show a few subtle highlights of lavender and pale gold toning. Vibrant mint luster adds to the outstanding eye appeal. NGC ID# 254F, PCGS# 7140
- 4311 1883 MS67 PCGS.** A boldly struck and exceptionally well-preserved Superb Gem with warm golden toning over frosty surfaces. Liberty's cheek is free of abrasions but shows light die rust as is occasionally seen on this issue. PCGS has certified only four numerically finer coins (5/17). NGC ID# 254G, PCGS# 7142
- 4312 1883 MS67 PCGS.** This Superb Gem Morgan is awash in beautiful silver-white luster. The surfaces have been well cared for and the design elements are relatively well-impressed. NGC ID# 254G, PCGS# 7142

1883-CC Morgan Dollar, MS67 Semiprooflike Fields

- 4313 1883-CC MS67 NGC.** Fortunately for present-day collectors, the 1883-CC Morgan dollar was well-represented in the GSA sales of the 1970's. This delightful Superb Gem exhibits sharply detailed design elements throughout. The impeccably preserved surfaces show a mix of vibrant, satiny mint luster and prooflike reflectivity. NGC has graded no numerically finer examples (4/17). NGC ID# 254J, PCGS# 7144
- 4314 1883-CC MS65 Deep Mirror Prooflike PCGS.** This Carson City issue ranks among the most accessible Morgan dollars from the facility, but comparable Deep Mirror Prooflike coins are very scarce. Each side is totally brilliant with frosted motifs and flashy, reflective fields. Razor-sharp with a few ticks on the cheek. NGC ID# 254H, PCGS# 97145
- 4315 1883-CC MS65+ Deep Mirror Prooflike PCGS. CAC. VAM-4.** An essentially brilliant Gem that boasts prominently reflective fields and a crisp strike. The reverse is close to pristine. All four date digits are repunched, though the VAM variety does not command a premium at this time. NGC ID# 254H, PCGS# 97145
- 4316 1883-O MS66 ★ NGC.** Vivid shades of magenta, cobalt-blue, and emerald-green toning blanket the obverse of this magnificent Premium Gem, while the reverse remains essentially brilliant. The design elements are well-detailed and vibrant mint luster radiates from both sides. The spectacular visual appeal is attested by the Star designation. NGC ID# 254J, PCGS# 7146
- 4317 1883-S MS62 PCGS.** An impressive MS62 specimen of this popular branch mint issue, with sharply detailed design elements and vibrant mint luster on both sides. The brilliant surfaces show some scattered, minor signs of contact, mostly on the left obverse field. NGC ID# 254K, PCGS# 7148
- 4318 1883-S MS62 PCGS.** Despite a generous mintage, the 1883-S is surprisingly scarce in Mint State, especially when compared with its '78-S through '82-S predecessors. This highly lustrous and typically abraded example is mostly brilliant but displays golden-brown, lavender, and forest-green toning near PLURIBUS and ONE DOLLAR. NGC ID# 254K, PCGS# 7148

- 4319 1883-S MS63 PCGS.** The 1883-S is famously a better date in Uncirculated condition, and Choice-Gem examples are frequently out of reach for the budget-restricted collecting majority. This Select coin may be more obtainable. The strike is sharp, and each side yields vibrant cartwheel luster. Scattered light abrasions come along with the grade but are not severely obtrusive as they might be on lower-grade Uncirculated coins. NGC ID# 254K, PCGS# 7148
- 4320 1884 MS66+ PCGS. CAC.** This softly frosted, high-end Premium Gem 1884 dollar shows virtually no toning and has sharp design elements. The coin appears flawless to the unaided eye, with only a few faint grazes discernible under a loupe. Finer 1884 dollars will be out of reach for most collectors. NGC ID# 254L, PCGS# 7150

1884 Dollar, MS65 Deep Mirror Prooflike Eye-Catching Contrast

- 4321 1884 MS65 Deep Mirror Prooflike PCGS.** Prooflike examples of the 1884 Morgan dollar are, in the words of Dave Bowers, "in the distinct minority." Deep Mirror Prooflike dollars become truly rare at the Gem grade level. This is an all-brilliant representative with profound depth in the fields and a blanket of frost over needle-sharp devices. The effect is eye-catching. Population: 35 in 65 (1 in 65+) Deep Mirror Prooflike, 8 finer (5/17). NGC ID# 254L, PCGS# 97151
- 4322 1884-CC MS66 PCGS. VAM-2.** The tops of the 1 and 8 are doubled on this variety, with the doubling most prominent on the top of the 1. This Premium Gem has extraordinary eye appeal with brilliant and untuned silver surfaces and satin luster. A lovely example for the specialist. NGC ID# 8BBF, PCGS# 7152
- 4323 1884-CC MS66+ PCGS. CAC.** This high-end Premium Gem Carson City dollar displays incredibly frosty, original mint luster with no distracting abrasions. The strike is a trifle soft on the hair above Liberty's ear and the eagle's breast. Finer 1884-CC Morgans are elusive in comparison to the demand for them, causing high-end MS66 coins such as this to appear in the collections of budget-minded collectors. NGC ID# 8BBF, PCGS# 7152

1884-CC Morgan Dollar, MS67 Only One Finer Coin at NGC

- 4324 1884-CC MS67 NGC.** A spectacular band of multicolor iridescence blankets the left obverse and lower-left reverse of this immaculately preserved Superb Gem representative. The devices are generally sharp with minimal softness in the centers. A large number of 1884-CC dollars were stored in vaults and made available during the Treasury release of the early 1960s, making the date suitable for type purposes. Still, NGC has certified only a single coin numerically finer (4/17). NGC ID# 8BBF, PCGS# 7152

**1884-CC Morgan Dollar, MS67
Lightly Toned, Lustrous Example**

- 4325 1884-CC MS67 PCGS.** Ex: New York City Set. Sharply detailed in most areas, this delightful Superb Gem shows just the slightest touch of softness on the hair strands above Liberty's ear. The impeccably preserved surfaces radiate vibrant mint luster throughout and eye appeal is terrific. PCGS has graded three numerically finer examples (4/17). NGC ID# 8BBF, PCGS# 7152
- 4326 1884-CC MS65 Deep Mirror Prooflike PCGS.** This prominently reflective Gem is well struck and impressively devoid of abrasions. Light straw-gold toning is principally confined to the margins. Excellent eye appeal for the popular Carson City type.
Ex: *Long Beach Signature* (Heritage, 9/2012), lot 4132. NGC ID# 254M, PCGS# 97153
- 4327 1884-S AU58 NGC.** This lovely, lightly circulated example portrays silver-gray surfaces with nice remaining luster and some golden-brown peripheral color on the obverse. Well-impressed, with just a touch of softness in the hair over Liberty's ear. This specimen has remarkably clean surfaces, showing just a few small, trivial marks. NGC ID# 254P, PCGS# 7156
- 4328 1884-S AU58 PCGS.** This near-Mint Morgan displays ample luster in the recessed areas of the silvery surfaces. The hair over Liberty's ear yields some detail. Light circulation marks are visible on the cheek. NGC ID# 254P, PCGS# 7156
- 4329 1884-S AU58 PCGS.** The 1884-S is a recognized condition key in Mint State, and there is significant spill over of collector demand at the AU58 level. This brilliant, satiny coin displays sharp detail and lustrous fields. Two small points of high-point rub appear on the eagle's breast and the hair above Liberty's ear, respectively, denoting the grade. NGC ID# 254P, PCGS# 7156
- 4330 1884-S AU58 PCGS.** The elusiveness of the 1884-S Morgan in Mint State heightens demand for high-end AU coins. This near-Mint representative displays rather substantial original luster and untuned surfaces. The obverse fields have a hint of semiprooflike reflectivity in the protected regions. Sharp design elements show only slight friction on the highest points. NGC ID# 254P, PCGS# 7156
- 4331 1884-S AU58 PCGS.** Subtle iridescent colors join auburn-brown and reddish-gold shades across both sides of this richly toned 1884-S dollar. Nearly full mint luster remains beneath the patina. We seldom see this semikey issue with such attractive, natural color. A sharp strike adds to the eye appeal, and a glass reveals only a few small marks beneath the toning. A prize for the collector of toned Morgan dollars, suitable for either a circulated or Mint State set. NGC ID# 254P, PCGS# 7156
- 4332 1884-S AU58+ PCGS.** Truly a "slider," this high-end near-Mint 1884-S dollar shows now wear other than faint slide marks on Liberty's cheek and the eagle's breast. The fields are radiantly lustrous and brilliant. The strike is sharp. This San Francisco issue is a conditional key date in finer grades. NGC ID# 254P, PCGS# 7156
- 4333 1885 MS65+ Deep Mirror Prooflike PCGS.** Cameo contrast on each side gives a good representation of the depth of prooflike mirroring in the fields on this high-end Gem 1885 Morgan dollar. The design elements are sharp, and neither side is noticeably toned. Finer Deep Mirror Prooflike coins are scarce. NGC ID# 45WM, PCGS# 97159

- 4334 1885-CC MS64 PCGS. CAC.** A delightful Choice specimen of this popular Carson City type issue, with sharply detailed design elements and well-preserved surfaces with vibrant mint luster on both sides. Overall eye appeal is outstanding. NGC ID# 254S, PCGS# 7160
- 4335 1885-CC MS65 PCGS.** Razor-sharp definition is evident on all design elements of this delightful Gem, and the well-preserved surfaces radiate vibrant mint luster throughout. From a small mintage of 228,000 pieces, the 1885-CC is always in demand. NGC ID# 254S, PCGS# 7160
- 4336 1885-CC MS66 PCGS.** Variegated bluish-green and grayish-violet toning adheres to the obverse of this Premium Gem Morgan while the reverse displays just a sliver of gold-brown color at the margin. The design elements are well-defined and there are no significant marks to report. NGC ID# 254S, PCGS# 7160
- 4337 1885-CC MS66 PCGS.** The impeccably preserved brilliant surfaces of this spectacular Premium Gem radiate vibrant mint luster on both sides and the design elements are sharply detailed throughout. Overall eye appeal is terrific. NGC ID# 254S, PCGS# 7160
- 4338 1885-CC MS66+ PCGS.** The small, 228,000 coin-mintage and CC mintmark ensure the enduring popularity of this issue. Unfortunately, demand for comparable high-grade coins vastly outpaces supply. Each side displays needle-sharp detail and exceptional preservation. Ice-blue, violet, and peach-gold colors coalesce over the obverse. The other side is totally brilliant. NGC ID# 254S, PCGS# 7160
- 4339 1885-CC Doubled Dash, VAM-4, MS66 PCGS.** A Hot 50 Variety. A clash mark near the neck and a line under the second 8 in the date confirm the popular VAM-4 variety. This spectacular Premium Gem is sharply detailed and impeccably preserved, with vibrant mint luster and vivid sea-green toning on the reverse. Population: 15 in 66 (2 in 66+), 0 finer (4/17). NGC ID# 254S, PCGS# 133999 Base PCGS# 7160
- 4340 1885-O MS66 ★ NGC.** Spectacular shades of violet, lavender, and sea-green toning enhance the well-preserved surfaces of this delightful Premium Gem, with most of the color on the obverse. The design elements are sharply detailed and vibrant mint luster radiates from both sides. The outstanding eye appeal is attested by the Star designation. NGC ID# 254T, PCGS# 7162
- 4341 1885-S MS65 PCGS.** Thick mint frost blankets Liberty's hair strands, surrounded by smooth and partially reflective fields that show only tiny imperfections. A sharp strike confirms the mint-fresh Gem condition of this well-preserved and brilliant-white San Francisco dollar. Finer examples are scarce, with just 45 pieces at PCGS reported in a higher grade (4/17). NGC ID# 254U, PCGS# 7164
- 4342 1885-S MS65 PCGS.** A delightful Gem Morgan dollar, with sharply detailed design elements and well-preserved brilliant surfaces that show a few subtle hints of pale gold toning. Vibrant mint luster adds to the outstanding eye appeal. PCGS has graded 45 numerically finer examples (4/17). NGC ID# 254U, PCGS# 7164

**1886 Morgan, MS66 Deep Mirror Prooflike
Among the Finest at PCGS**

- 4343 1886 MS66 Deep Mirror Prooflike PCGS. CAC.** This is a beautiful Premium Gem dollar. Deeply mirrored fields grace both sides of this seemingly distraction-free exemplar. The obverse displays an even champagne hue, whereas the reverse is richly toned throughout — fiery sunset-orange iridescence occupies the upper and lower quadrants, with intense electric-blue and lavender coloration elsewhere. Housed in an old green label holder. Population: 34 in 66 (2 in 66+) Deep Mirror Prooflike, 0 finer. CAC: 7 in 66, 0 finer (4/17). NGC ID# 254V, PCGS# 97167

- 4344 1886-O MS62 PCGS.** It is likely that several million 1886-O Morgan dollars entered into circulation, and that the remaining coins were subject to mass melting. Mint State examples are far more elusive than the 10 million coin-mintage suggests. Radiant luster cartwheels over this lightly toned, well-defined MS62 example. The fields are notably smooth for the grade. NGC ID# 254W, PCGS# 7168

- 4345 1886-O MS63 PCGS.** The 1886-O is a better date in Uncirculated condition. This Select representative shows moderately well-struck design elements and a glaze of pale champagne toning. A few light marks on the cheek limit the grade, but the overall preservation surpasses expectations for the MS63 level. NGC ID# 254W, PCGS# 7168

1886-O Dollar, Radiant MS63

- 4346 1886-O MS63 PCGS. CAC.** With a mean grade of AU55 awarded by the leading certification services, this Select Uncirculated, CAC-endorsed 1886-O dollar is well above-average for the issue. A touch of reddish patina above UNUM complements brilliant, lightly abraded surfaces aglow in surprisingly radiant luster. NGC ID# 254W, PCGS# 7168

- 4347 1886-S MS64 PCGS.** Vibrant cartwheel luster engulfs this near-Gem 1886-S Morgan dollar, revealing only a few minor abrasions as it rolls around each side. The obverse is brilliant, the reverse shows light golden toning. Sharp design elements complete the appeal. NGC ID# 254X, PCGS# 7170

- 4348 1886-S MS65 PCGS.** A smallish mintage of 750,000 coins explains the popularity of the 1886-S, which can be found through MS65 but is exceedingly rare any finer. Gorgeous violet and blue toning shrouds the obverse. The reverse is frosty and largely brilliant. This Gem features a bold strike and is certified in an old green label holder. PCGS shows 47 finer submissions (5/17). NGC ID# 254X, PCGS# 7170

**1887/6 VAM-2 Dollar, MS65+
Dramatic Color, Top 100 Variety**

- 4349 1887/6 VAM-2, Top 100, MS65+ PCGS.** A Top 100 Variety. The bottom loop of a 6 is plain under the 7. Dramatic obverse toning includes elements of violet, blue, magenta, and gold. Conversely, the reverse is largely brilliant with wisps of golden color around the periphery. The lower stars are a touch soft, as is the hair over Liberty's ear, but this amazing Gem is otherwise crisply defined. Rarely seen finer. NGC ID# 2552, PCGS# 133908 Base PCGS# 7174

- 4350 1887 MS67 NGC.** In MS67, the 1887 Morgan dollar is challenging but still collectible for the budget-restricted enthusiast. Finer examples are rare. This piece displays frosty brilliant luster and a clean cheek. The strike is well-executed. NGC lists three finer coins, PCGS one (5/17). NGC ID# 27Y3, PCGS# 7172

- 4351 1887 Donkey Tail, VAM-25A (formerly VAM-1A), Top 100, MS61 NGC.** A Top 100 Variety. The die break through the peripheral devices on the reverse broadens out in the shape of a donkey's tail at the bottom of the D in DOLLAR, creating this extremely popular VAM. This attractive Mint State example offers well-detailed design elements and lustrous surfaces that show the minimum number of minor contact marks for the grade. Census: 4 in 61, 1 finer (5/17). NGC ID# 254Y, PCGS# 133907 Base PCGS# 7172

- 4352 1887/6-O VAM-3 MS63 PCGS.** A Top 100 Variety. The underdigit 6 is clear below the 7. Each side is fully brilliant with typical strike softness. Peppered abrasions are in accordance with the MS63 assessment. Highly sought-after as one of the few overdates in the series, but a prohibitive rarity in finer condition. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

- 4353 1887/6-O VAM-3 MS63 PCGS. CAC.** A Top 100 Variety, showing the lower loop of a 6 to the right of the 7 in the date. This variety is elusive above MS63. The current coin displays frosty original luster with brilliant interiors that cede to subtle yellow-gold rim toning. The eagle's breast and the hair above Liberty's ear show the usual strike softness but there are no major abrasions. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

- 4354 1887-O MS65 PCGS.** Luster is frostier than usual on this Gem 1887-O Morgan, and abrasions are at a strict minimum, as is dictated by the grade. The usual strike weakness occurs on the central high points. PCGS has seen only a dozen numerically finer representatives (5/17). NGC ID# 2547, PCGS# 7176

**1887-O Dollar, MS65 Prooflike
Nicely Mirrored, Evenly Toned**

- 4355 1887-O MS65 Prooflike PCGS.** The 1887-O had a high mintage of 11.3 million pieces. Prooflike coins can be found, especially in lower grades, but there is significant variation in the degree of reflectivity from one piece to another. This example shows uniform mirroring on each side, and both obverse and reverse also display even light golden toning. Just a tad softly struck in the centers. Population: 18 in 65 Prooflike, 2 finer (4/17). NGC ID# 2552, PCGS# 7177

- 4356 1887-S MS65 PCGS.** This spectacular Gem displays sharply detailed design elements throughout, with well-preserved surfaces that radiate vibrant mint luster on both sides. Delicate hints of pale gold toning add to the outstanding eye appeal. PCGS has graded 34 numerically finer examples (4/17). NGC ID# 2554, PCGS# 7180

- 4357 1887-S/S VAM-2 MS64 Prooflike PCGS.** A Top 100 Variety. Undesignated as such on the PCGS insert, but the mintmark is obviously strongly repunched within its upper loop. A lovely near-Gem with dazzling luster, brilliant surfaces, a bold strike, and smooth surfaces. NGC ID# 2554, PCGS# 42940 Base PCGS# 7181

- 4358 1888 MS66+ PCGS. CAC.** Cartwheel luster swirls over all-brilliant, exquisitely preserved surfaces, delivering unimprovable visual quality to this technically impressive Philadelphia dollar. Boldly struck with a hint of softness on the date. Very scarce in better condition despite the 19.1 million coin-mintage. NGC ID# 26KE, PCGS# 7182

**1888 Silver Dollar, Brilliant MS67
Among the Few Finest Certified**

- 4359 1888 MS67 NGC.** Both the 1887 and 1888 issues were struck in huge quantities at the Philadelphia Mint, yet neither date provides a proportionately large number of Superb Gem coins. Dies were pushed past their limits, and few outstanding examples were ever produced (much less survived). This brilliant 1888 example is nearly mark-free and sharply struck to earn its well-deserved MS67 grade. NGC and PCGS combined have certified a mere 126 coins at the Superb Gem level, which includes only a single numerically finer piece. NGC Census: 89 in 67 (2 in 67+, 3 in 67★), 1 finer (5/17). NGC ID# 26KE, PCGS# 7182

- 4360 1888-O MS66 NGC.** Iridescent toning yields shades of rose, ice-blue, violet, and golden-brown across the obverse. Similar hues occur peripherally around the reverse, leaving the centers brilliant. The eagle's breast feathers show good detail, and the surfaces are exceptionally clean and frosty. Census: 44 in 66 (1 in 66+, 1 in 66★), 2 finer (5/17). NGC ID# 2556, PCGS# 7184

- 4361 1888-O MS66 PCGS.** This spectacular Premium Gem offers sharply detailed design elements and vibrant mint luster, with well-preserved brilliant surfaces. PCGS has graded no coins in higher numeric grades (5/17).
Ex: ANA Signature (Heritage, 2/2014), lot 4825. NGC ID# 2556, PCGS# 7184

**1888-O 'Hot Lips' Dollar, AU58
Doubled Die Obverse, VAM-4**

- 4362 1888-O Hot Lips, Doubled Die Obverse, VAM-4, Top 100, AU58 NGC.** Top 100 Variety. The 'Hot Lips' variety, which shows clear die doubling on Liberty's mouth and nose. The bases of ERT in LIBERTY are absent, as made because of a lapped die. Lightly toned with extensive luster and attractive surfaces. Possibly a Condition Census example of this popular variety, which is virtually unknown in Mint State. Census: 19 in 58, 7 finer (4/17).
Ex: Long Beach Signature (Heritage, 5/2003), lot 7566. NGC ID# 2556, PCGS# 133919 Base PCGS# 7308

- 4363 1888-S MS65 NGC. CAC.** The 1888-S has one of the lower mintages in the Morgan dollar series (657,000 coins). Examples can be obtained through MS65 but are largely out of reach in higher grades. This CAC-approved Gem is wholly untuned and thickly frosted. Minor central softness is characteristic, but the preservation is extraordinary. NGC reports 13 higher grading events. CAC: 30 in 65, 10 finer (5/17). NGC ID# 2557, PCGS# 7186

**1889 Silver Dollar, MS66+
Beautiful Frosty Luster**

- 4364 1889 MS66+ PCGS. CAC.** The 1889 Morgan is occasionally seen in MS66, but Superb Gems are extremely rare. This Plus-graded Premium Gem offers exceptional quality and eye appeal. The frosty surfaces are brilliant and show no distracting abrasions. We note only minor strike softness on the eagle's breast and the hair above Liberty's ear. PCGS and NGC combined list a half dozen coins finer (4/17). NGC ID# 2558, PCGS# 7188

**1889 Dollar, MS65 Deep Mirror Prooflike
Scarce as Such**

4365 1889 MS65 Deep Mirror Prooflike PCGS. A spectacular Gem Morgan dollar, with sharply detailed design elements and deeply reflective prooflike fields that show only a few minor contact marks and hairlines. A few hints of lime-green and cobalt-blue toning enhance the outstanding eye appeal. Population: 38 in 65 Deep Mirror Prooflike, 4 finer (4/17). NGC ID# 3VWX, PCGS# 97189

4366 1889-CC VF30 PCGS. Natural old silver-gray patina deepens at the borders and lightens at the high points of this solid midgrade circulated dollar. The undeniable key to the Carson City Morgan series, few problem-free and attractive 1889-CC pieces remain at the VF30 level. A few light abrasions are minimized by wear and all of the devices retain detail suggestive of a finer grade. NGC ID# 2559, PCGS# 7190

4367 1889-CC — Cleaning — PCGS Genuine. XF Details. The key to the Carson City short set, the 1889-CC is always in demand at any grade level. This lightly circulated coin is well-detailed, although hairlined fields and rounded wear points on each side betray an old cleaning. The coin is entirely toned over in deep olive-gray and underlying gold toning, masking much of these surface characteristics to the unaided eye.

4368 1889-CC — Improperly Cleaned — NGC Details. XF. The 1889-CC is the rarest Carson City Morgan issue, and is widely pursued in all grades. This moderately hairlined representative has a mostly stone-white obverse, though the reverse displays splashes of wheat-gold patina. Marks are chiefly confined to ticks near Liberty's eye and chin.

**1889-CC Dollar, Choice XF
Elusive Carson City Key Issue**

4369 1889-CC XF45 NGC. Traces of luster remain at the borders of this stone-gray example of the scarcest Carson City Morgan dollar. The moderately worn surfaces show numerous fine lines and tiny marks and the strike is typically weak over the ear, yet strong definition remains elsewhere and this Choice XF example will appeal to many collectors. NGC ID# 2559, PCGS# 7190

4370 1889-O MS62 Deep Mirror Prooflike PCGS. The 1889-O is elusive with Deep Mirror Prooflike fields. This MS62 coin is moderately abraded, although it lacks nothing in mirrorlike reflectivity. The surfaces are brilliant and modestly contrasted. Design elements exhibit good sharpness. Population: 24 in 62 Deep Mirror Prooflike, 64 finer (4/17). NGC ID# 45YN, PCGS# 97193

4371 1889-S MS64 PCGS. CAC. This attractive Choice Morgan dollar exhibits sharply detailed design elements and well-preserved, brilliant surfaces with two small amber spots near the rim on the reverse. Vibrant mint luster adds to the outstanding visual appeal. NGC ID# 255B, PCGS# 7194

4372 1889-S MS65 PCGS. Whispers of light tan make occasional visits to the lustrous surfaces of this. A modicum of detail is apparent on the devices in the central areas. NGC ID# 255B, PCGS# 7194

4373 1889-S MS65 PCGS. This untoned Gem 1889-S Morgan dollar displays radiant cartwheel luster with only a few small grazes apparent on Liberty's cheek. The '89-S is usually available for a price in this grade, but finer examples are universally scarce. NGC ID# 255B, PCGS# 7194

4374 1890 MS65 PCGS. This well-struck Gem is brilliant on the reverse and awash in various pastel hues on the obverse. A loupe reveals a couple of tiny marks on Liberty's chin that decide the grade. Only a dozen numerically finer representatives are reported by PCGS (five) and NGC (seven) combined (4/17). NGC ID# 255C, PCGS# 7196

4375 1890-CC MS64 PCGS. A well-struck Choice example with vibrant cartwheel luster and minimal abrasions. The obverse displays ocean-blue, violet, and golden-orange toning, while the reverse is brilliant. The 1890-CC becomes a better date just one grade point finer. NGC ID# 255D, PCGS# 7198

4376 1890-CC MS64+ PCGS. This high-end Choice 1890-CC silver dollar is devoid of heavy abrasions, and it must be studied at careful angles beneath a loupe to discern a few light surface grazes that prevent a Gem designation from PCGS. The coin is brilliant and satiny with excellent visual appeal. NGC ID# 255D, PCGS# 7198

**1890-CC Morgan Dollar, MS65
Condition Rarity in Finer Grades**

4377 1890-CC MS65 PCGS. On the whole, this CC-mint issue was produced with great care, and a high grade example is a pleasure to behold. The problem, at least as far as advanced collectors are concerned, is that this issue is not at all common as a Gem. We are pleased to be offering this frosty example, which is certainly among the highlights of the present auction. The sharp strike is free of criticism, as are the smooth, carefully preserved surfaces. Both sides are minimally patinated with no mentionable blemishes. Housed in a green label holder. PCGS has graded 16 numerically finer examples (4/17). NGC ID# 255D, PCGS# 7198

1890-CC Dollar, MS65

Rarely Seen Finer

- 4378 1890-CC MS65 PCGS.** Dappled crimson, gold, and violet patina around the borders lightens to brilliant centers, with the effect more pronounced on the obverse. The strike shows minor incompleteness over the hair and breast feathers, but the overall impression is crisp. The 1890-CC was struck to the considerable extent of 2.3 million coins, but few were saved in high grades. There are only 16 finer representatives at PCGS (5/17). NGC ID# 255D, PCGS# 7198

1890-CC Morgan Dollar, MS65

Dramatic Tail Bar, VAM-4 Specimen

- 4379 1890-CC Tail Bar, VAM-4, Top 100, MS65 PCGS.** A Top 100 Variety. Ex: Jack Lee. An impressive Gem representative, with well-detailed design elements and well-preserved surfaces that radiate vibrant mint luster on both sides. The popular VAM-4 is identified by the dramatic die gouge from the tail feathers to the wreath. Housed in a green label holder. PCGS has graded 16 numerically finer examples (4/17). NGC ID# 255D, PCGS# 133934 Base PCGS# 87198

1890-CC Morgan Dollar, MS63

Deep Mirror Prooflike VAM-4

- 4380 1890-CC Tailbar, VAM-4, MS63 Deep Mirror Prooflike NGC.** CAC. A Top 100 Variety. A spectacular die gouge connects the tail feathers and the wreath on the reverse of this charming Select specimen, identifying the popular VAM-4 variety. The sharply detailed, frosty design elements contrast boldly with the deeply reflective fields, and vivid rings of cerulean-blue and emerald-green toning visit the peripheries. Census: 4 in 63 Deep Mirror Prooflike, 2 finer (4/17). NGC ID# 255D, PCGS# 43339 Base PCGS# 987199

- 4381 1890-O MS65 PCGS.** Liberty's cheek is devoid of marks on this Gem New Orleans dollar, one of 10.7 million examples struck in 1890. Although the issue is accessible in this grade, finer coins are truly rare. Typically struck with incompleteness over the centers and obverse stars. Flecks of golden color appear throughout virtually brilliant surfaces. NGC ID# 255E, PCGS# 7200

- 4382 1890-O MS65 PCGS.** Pleasing golden-brown and aquamarine toning ensures the eye appeal of this lustrous, nicely preserved, and moderately well-struck New Orleans Gem. A high mintage but conditionally elusive issue. PCGS has seen only 29 numerically finer representatives (4/17). NGC ID# 255E, PCGS# 7200

- 4383 1890-O MS65 PCGS.** This delightful Gem exhibits a better-than-average strike for a New Orleans issue, with just a touch of the usual softness on the hair above the ear. The well-preserved Brilliant surfaces radiate vibrant mint luster. PCGS has graded 29 numerically finer examples (4/17). NGC ID# 255E, PCGS# 7200

- 4384 1890-O MS65 PCGS.** Out of more than 10 million business strikes, this is an exceptional example with a bold strike — only the slightest softness appears over Liberty's ear and the eagle is sharp. The luster is frosty and attractive over brilliant, untuned surfaces. Only minimal abrasions are seen on the clean fields and devices. This coin's eye appeal is suggestive of an even higher grade. PCGS has certified a mere 29 pieces numerically finer (5/17).

Ex: *New York Signature (Heritage, 2/2014)*, lot 4209. NGC ID# 255E, PCGS# 7200

- 4385 1890-O MS65+ PCGS.** The 1890-O Morgan dollar is an elusive issue in grades above the MS65 level. This Plus-graded Gem exhibits well-detailed design elements and well-preserved, lustrous surfaces, under delicate shades of golden-tan and lavender-gray toning. PCGS has graded 29 numerically finer examples (5/17). NGC ID# 255E, PCGS# 7200

- 4386 1890-O MS65 Prooflike PCGS.** The well-detailed, frosty design elements of this delightful Gem contrast boldly with the reflective prooflike fields and the well-preserved, essentially brilliant surfaces show a few subtle hints of pale gold toning. Population: 34 in 65 (2 in 65+) Prooflike, 3 finer (5/17). NGC ID# 2XU9, PCGS# 7201

- 4387 1891 MS64+ PCGS. CAC.** Beautiful toning encompasses much of the obverse, save for a window of brilliance below the chin. Shades include gold, russet, violet, and cobalt-blue. The other side is virtually untuned with a pale ring of peripheral gold. A touch incomplete over the centers, but the fields and cheek are undeniably clean for the grade. NGC ID# 255G, PCGS# 7204

- 4388 1891-CC MS64 NGC.** Golden-brown and purple toning gravitate to the reverse margin of this near-Gem Morgan. Partial detail is present in the hair over Liberty's ear. Light grazes preclude Gem classification. NGC ID# 255H, PCGS# 7206

- 4389 1891-CC MS64+ PCGS.** This Plus-graded Choice example exhibits sharply detailed design elements and well-preserved surfaces, under shades of sea-green and silver-gray toning. Vibrant mint luster adds to the considerable visual appeal. NGC ID# 255H, PCGS# 7206

- 4390 1891-CC MS64+ PCGS.** The 1891-CC Morgan dollar is an available issue in most grades. This Plus-graded Choice example exhibits sharply detailed design elements and well-preserved, lustrous surfaces. Shades of emerald-green and lavender toning blanket the reverse, while the obverse remains mostly brilliant. NGC ID# 255H, PCGS# 7206

1891-CC Morgan Dollar, MS65
Seldom Encountered Any Finer

- 4391 1891-CC MS65 PCGS.** The 1891-CC Morgan dollar claims a mintage of 1.6 million pieces, fairly generous for a Carson City issue. The 1891-CC can be found in MS65 condition without much difficulty, but finer coins are surprisingly elusive. This sharply detailed Gem exhibits well-preserved surfaces with vibrant mint luster on both sides. PCGS has graded 36 numerically finer examples (4/17).. NGC ID# 255H, PCGS# 7206

1891-CC Morgan Dollar, MS65
Better Carson City Date

- 4392 1891-CC MS65 PCGS.** Vibrant, frosty luster attends the brilliant and smooth surfaces of this Gem Carson City dollar. The limited number of coins representing the 1891-CC in the GSA releases (just 5,687 pieces) compounds the scarcity of the issue in high grades. A strong strike shows only nominal blending of the hair over the ear, yet it is the minimally marked and blaze-white surfaces that stand above other MS65 examples in quality and eye appeal. Just 36 pieces are certified in a numerically finer grade at PCGS (5/17). NGC ID# 255H, PCGS# 7206

1892 Morgan Dollar, Frosty Gem

- 4393 1892 MS65 PCGS.** The 1892 was generally kept out of circulation, explaining its former status as a rarity in the series. Bags were released during the middle part of the 20th century, but the issue remains scarce at the Gem level and is essentially unobtainable in higher grades. Smooth, frosty surfaces are brilliant with a hint of reddish-gold color near the left-hand stars. The centers show minor softness, as often encountered. PCGS reports five finer submissions (5/17). NGC ID# 255L, PCGS# 7212

1892 Dollar, Brilliant MS65
Bright, Satiny Mint Luster

- 4394 1892 MS65 PCGS.** The 1892 is a challenging issue to locate in better grades, and strike is a constant problem. This is a brilliant example whose radiant, satiny luster is virtually unmarked by coin-to-coin contact. The strike is as expected with slight softness seen over the ear of Liberty. NGC ID# 255L, PCGS# 7212

- 4395 1892-CC MS62 NGC.** A lustrous example of this more challenging Carson City date. The strike is soft in the center on both sides and the surfaces are moderately abraded. A die crack appears on the obverse.

Ex: Long Beach (Heritage, 9/2010), lot 4605; Fall ANA Signature (Heritage, 10/2012), lot 4896. NGC ID# 255M, PCGS# 7214

- 4396 1892-CC MS63 NGC.** This is a well-struck example with satiny mint luster and mostly brilliant surfaces. Lavender and blue toning appears along the upper obverse border. Only minimal abrasions are present for the grade. NGC ID# 255M, PCGS# 7214

- 4397 1892-CC MS64 PCGS.** Silver-white luster emanates from both sides of this near-Gem Morgan. The central areas show some design detail, including a modicum of such in the hair over Liberty's ear. Light grazes preclude Gem status. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, MS64
Old Green Label Holder with CAC

- 4398 1892-CC MS64 PCGS. CAC.** Hints of tan toning visit the lustrous and well preserved fields. The strike is good, although the breast feathers show minor incompleteness. The 89 in the date exhibit minor die fill and small, superficial facial grazes determine the grade. Still, this is a solid, better-date Carson City issue in Choice Uncirculated condition. Encapsulated in an old green label holder with CAC endorsement.

Ex: PNG Dallas Signature (Heritage, 2/2015), lot 4025. NGC ID# 255M, PCGS# 7214

1892-S Dollar, AU55
Untoned Conditional Semikey

- 4399 1892-S AU55 PCGS.** Morgan dollar output on the West Coast reached 1.2 million coins in 1892. The issue was largely put into circulation, explaining the dearth of high-grade examples today. Choice AU is about the highest many collectors can hope to obtain. This lightly circulated conditional semikey is untoned with partial luster. Peppered marks occur over each side. NGC ID# 255P, PCGS# 7218

1892-S Dollar, Choice AU
Remaining Luster

- 4400 1892-S AU55 NGC.** The vast majority of 1892-S dollars survive in XF45 or lower. Comparable Choice AU representatives are scarce and always in-demand given the issue's rarity in Mint State. Each side is brightly untoned with remaining luster within the legends. Pedigree markers occur under Liberty's eye and on the neck, but abrasions are otherwise minimal. NGC ID# 255P, PCGS# 7218

- 4401 1893-S Good 6 NGC.** The 1893-S Morgan dollar is the rarest business-strike issue of the series and collectors prize examples in all grades and conditions. This well-worn example offers lightly abraded lavender-gray surfaces with a couple of minor obverse rim dings. NGC ID# 255U, PCGS# 7226

- 4402 1893-S Good 6 PCGS.** A well-worn, but problem-free, representative of the most sought-after issue of the Morgan dollar series, this coin offers pleasing dove-gray surfaces with no large or distracting abrasions. The major design elements are all intact in outline, rims are complete, and all lettering and the date remain legible. NGC ID# 255U, PCGS# 7226

1893-S Dollar, VG10
Original Surfaces

- 4403 1893-S VG10 PCGS.** An attractive example of this key Morgan dollar issue, one that is in constant demand by collectors. Unlike many of the known examples in this grade, this piece is original and uncleaned. The high points of the devices and fields are silvery-brilliant, while the recesses and fields surrounding the lettering are charcoal-gray. We see no mentionable abrasions. NGC ID# 255U, PCGS# 7226

1893-S Dollar, XF Details
Affordable Key

- 4404 1893-S — Scratched, Corroded, Cleaned — ANACS.** XF Details, Net VF20. This is an affordable opportunity to secure an example of the famed 1893-S Morgan dollar, the heralded key to the set. As noted, a thin scrape traverses Liberty's cheek, and the silver-gray surfaces show evidence of corrosion and cleaning. Housed in a small-sized ANACS holder.

1893-S Dollar, XF Details
Pleasing Rose-Gray Patina

- 4405 1893-S — Damage — PCGS Genuine.** XF Details. This famous S-mint dollar is instantly recognizable as the most sought-after issue in the entire Morgan series. Here is a lightly circulated example for the collector with limited resources. Attractive rose-gray and golden surfaces feature an area of damage over the eagle's right (facing) wing. Otherwise, this is a pleasing representative with natural skin. From a tiny mintage of 100,000 coins.

- 4406 1894 AU58 PCGS.** The 1894 ranks among the lowest mintage issues of the Morgan dollar series, and problem-free near-Mint examples are desirable. The present minimally marked example exhibits sweeping luster but shows a whisper of wear on the breast feathers. NGC ID# 255V, PCGS# 7228

4407 1894-S MS63 PCGS. Only a hint of straw-gold toning visits this lustrous better-date silver dollar. The strike is good despite minor blending at the centers, and marks are inoffensive for the Select level. NGC ID# 255X, PCGS# 7232

4408 1894-S MS63+ NGC. Subdued mint frost glimmers from beneath a veil of primarily golden-lavender patina interspersed with daubs of blue coloration. Each side is well-struck, save for softness over the ear, with nicely preserved surfaces considering the Select assessment. NGC ID# 255X, PCGS# 7232

4409 1894-S MS64+ NGC. A Plus-graded Choice example of this popular issue, with vibrant, frosty mint luster and well-preserved brilliant surfaces. The design elements are sharply detailed and eye appeal is outstanding. NGC has graded 54 numerically finer examples (5/17). NGC ID# 255X, PCGS# 7232

**1894-S Dollar, MS64+
Near-Gem Example of This Lower-Mintage Issue**

4410 1894-S MS64+ PCGS. CAC. A ring of orange-gold toning visits the border of the obverse, yet otherwise this Plus-designated Choice BU 1894-S is brilliant and frosty. The strike is crisp throughout. The 1894-S is a better date in the series with a lower mintage of just over 1.2 million pieces. It is generally not considered a hoard coin. The Mint-fresh eye appeal confirms that assessment for this near-Gem example. A few light field abrasions on the obverse join only minor high point grazes. NGC ID# 255X, PCGS# 7232

4411 1895-O AU55 PCGS. VAM-3A. A WOW! Morgan VAM. The "Bearded Eagle" variety with clustered die lumps below the eagle's beak. This key-date New Orleans dollar displays substantial luster across the borders and devices. The nearly brilliant surfaces are lightly abraded and show minor high-point wear. NGC ID# 255Y, PCGS# 7236

4412 1895-O AU55 PCGS. This challenging Louisiana semikey was struck to the meager extent of 450,000 coins. Aside from blushes of almond-gold patina, this Choice AU dollar is brilliant with areas of luster within the recesses of the design. Bold despite a trace a high-point rub. NGC ID# 255Y, PCGS# 7236

**1895-O Dollar, AU58
Challenging Date in the Set**

4413 1895-O AU58 PCGS. This is a challenging date to fill in the Morgan dollar set, with just 450,000 pieces struck at New Orleans and 400,000 coins minted in San Francisco. No circulation-strike Philadelphia coins are known, heightening pressure on the branch mint issues. The 1895-O is somewhat accessible in AU58, but Mint State examples are rarities. This near-Mint offering is brilliant and softly frosted with good design detail. The extreme centers are incompletely defined. NGC ID# 255Y, PCGS# 7236

**1895-O Morgan Dollar, AU58
Low-Mintage Issue, Strong Luster Remains**

4414 1895-O AU58 PCGS. Translucent champagne toning enhances the brilliant satin luster of this key-date Morgan dollar. A small bagmark appears on Liberty's cheek. The reverse displays the same faint-gold patina as the obverse, but with areas of field reflectivity. Full Mint State examples are rare and expensive, making this near-Mint lot an ideal selection for a high-end circulated set that is equally at home among Uncirculated coins. NGC ID# 255Y, PCGS# 7236

4415 1895-S AU53 PCGS. The San Francisco Morgan dollar of 1895 is the proper candidate for one-a-year collectors. The 1895 was only struck in proof, and the 1895-O is conditionally rare in AU and finer grades. This S-mint piece has dappled gold toning over both sides with considerable underlying luster. NGC ID# 255Z, PCGS# 7238

4416 1895-S AU58 PCGS. The 1895-S Morgan dollar is a better date, from a mintage of 400,000 pieces. Just a trace of wear is evident on the well-detailed design elements of this attractive near-Mint specimen, and the lightly abraded surfaces are visited by shades of lavender-gray and sea-green toning. NGC ID# 255Z, PCGS# 7238

4417 1896-O MS62 PCGS. From a mintage of 4.9 million pieces, the 1896-O Morgan dollar is a surprisingly challenging issue in high grade. This MS62 example offers well-detailed design elements and lustrous, lightly marked surfaces, under shades of lavender-gray and golden-tan toning, with most of the color on the obverse. NGC ID# 27ZU, PCGS# 7242

**1896-S Morgan Dollar, MS65
Conditionally Scarce Example**

4418 1896-S MS65 PCGS. The 6 in the date is faintly doubled at the top of the upper loop. Like many Morgans, the 1896-S is plentiful in Uncirculated condition but becomes challenging in Gem and above. Treasury releases ensured an ample supply of survivors, but few match the quality of this Gem example. This coin exhibits especially clean fields with only a minor abrasion above the cap and below B of PLURIBUS. The strike at the center of the obverse is a touch soft with roller marks evident on the hair and temple. Both sides are largely brilliant but display russet and blue-green at the rims. The reverse reveals light chatter above the motto, and there is a light die crack joining the peripheral letters. This issue is scarce at the MS65 level, and the populations of finer examples are all in the single digits. NGC ID# 2564, PCGS# 7244

4419 1897-O MS62 PCGS. Autumn-brown toning accompanies the borders, along with a narrow arc of forest-green near PLURIBUS. This lustrous New Orleans dollar shows minor incompleteness at the centers, but lacks any singularly relevant marks. NGC ID# 2565, PCGS# 7248

4420 1897-O MS62 PCGS. The 1897-O dollar is most often seen in XF to AU condition, becoming a serious challenge in lower Mint State grades and downright rare in MS64. This well-struck MS62 representative boasts complete brilliance and vibrant frost. Scattered marks define the grade. NGC ID# 2565, PCGS# 7248

4421 1897-O MS62 PCGS. Although scattered bagmarks are evident on both sides of this elusive New Orleans Mint dollar, the surfaces are brilliant with frosty silver luster and delicate peripheral gold toning. NGC ID# 2565, PCGS# 7248

4422 1897-S MS66 PCGS. This well-struck Premium Gem exhibits the barest trace of light golden toning at the rims with brilliant interiors. The fields are satiny and nearly semiprooflike, while the devices show softly frosted luster. PCGS has seen 29 Superb Gems finer (5/17). NGC ID# 2567, PCGS# 7250

4423 1897-S MS66 PCGS. Except for a few stray bagmarks on the reverse, this well struck Gem displays stellar preservation, and superb eye appeal. The coin is fully brilliant, with splendid cartwheel effects in evidence, and the obverse is essentially pristine, with just a few tiny ticks. There are wispy die polish lines, as struck, on each side, but these are probably too faint to be seen with the naked eye. Conditionally scarce and highly desirable.
Ex: Long Beach Signature (Heritage, 10.2001), lot 7614; Long Beach Signature (Heritage, 2/2002), lot 6046; Long Beach Signature (Heritage, 5/2006), lot 7690. NGC ID# 2567, PCGS# 7250

4424 1897-S MS66 PCGS. Glints of golden-orange toning occur within the denticles and peripheral elements, but this Premium Gem is overwhelmingly frosty and brilliant. Each side is marvelously preserved with a single minute tick on the chin. The 1897-S is a rarity in higher grades. NGC ID# 2567, PCGS# 7250

**1897-S Silver Dollar, MS66+
Few Available Finer**

4425 1897-S MS66+ PCGS. The 1897-S Morgan is scarce in MS66 and rare in MS67. This MS66+ coin strikes a balance between the two grades that will appeal to the quality-conscious budget collector. The strike is sharp and the luster is frosty. Neither side exhibits notable toning or any distracting abrasions. NGC ID# 2567, PCGS# 7250

4426 1897-S MS65+ Prooflike PCGS. CAC. Prooflike 1897-S dollars are elusive in high grade. This piece is one of seven Plus-graded Gems at PCGS, with 48 Prooflike coins finer (5/17). The surfaces are brilliant and reflective with modest cameo contrast. No major abrasions are seen. NGC ID# 267S, PCGS# 7251

4427 1897-S MS65 Deep Mirror Prooflike NGC. VAM-4. The flag of the 1 is repunched south, and the 7 is lightly repunched north. This sharply struck Gem is brilliant aside from minor peripheral russet freckles. Both sides are uncommonly devoid of marks. Census: 38 in 65 Deep Mirror Prooflike, 5 finer (4/17). NGC ID# 2567, PCGS# 97251

4428 1898 MS67 PCGS. Frosty and brilliant, this Superb Gem 1898 Morgan silver dollar displays tremendous visual appeal and clean surfaces. The strike is well-executed. Examples are scarce in this grade and unknown numerically finer (5/17). NGC ID# 2568, PCGS# 7252

4429 1898-O MS66+ PCGS. CAC. The creamy surfaces of this delightful Plus-graded Premium Gem are impeccably preserved and vibrant mint luster radiates from both sides. The design elements are well-detailed, with just a touch of the usual softness on the hair above the ear. Overall eye appeal is outstanding. NGC ID# 2569, PCGS# 7254

4430 1898-O MS67 NGC. An extraordinary Superb Gem, this 1898-O ranks high among survivors of the issue. NGC has only certified one finer piece (5/17). Both sides have frosty mint luster and brilliant silver surfaces with faint champagne toning. NGC ID# 2569, PCGS# 7254

- 4431 1898-O MS67 PCGS.** This well-struck Superb Gem offering is fully brilliant. Some light grazes are within the parameters of the designated grade. PCGS has seen none finer (4/17) NGC ID# 2569, PCGS# 7254
- 4432 1898-S MS65 PCGS.** Lustrous, light grayish surfaces have been well-cared for on this Gem Morgan. The central areas are better struck than ordinarily seen for an S-Mint issue. NGC ID# 256A, PCGS# 7256
- 4433 1898-S MS65 PCGS.** A few hints of greenish-gold toning visit the well-preserved surfaces of this impressive Gem, with vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is quite strong. NGC ID# 256A, PCGS# 7256
- 4434 1898-S MS65 PCGS.** The lustrous surfaces of this Gem reveal just a few minor grazes that are within the parameters of the grade designation. The design elements are generally well-impressed. NGC ID# 256A, PCGS# 7256
- 4435 1898-S MS64 Deep Mirror Prooflike PCGS.** The 1898-S Morgan dollar is not as rare as many of the other issues in the series, but DMPL examples are seldom seen. The present lightly toned near-Gem has impressively flashy fields, and the reverse is beautifully preserved. The few minor obverse marks cannot deny the eye appeal. Population: 35 in 64 (3 in 64+) Deep Mirror Prooflike, 7 finer (4/17). NGC ID# 256A, PCGS# 97257
- 4436 1899 MS66 PCGS.** Soft grayish-green patina covers lustrous, well-cared for surfaces. The design elements, though not fully struck, still yield adequate detail. PCGS has seen only 23 pieces finer (5/17). NGC ID# 256C, PCGS# 7258
- 4437 1899 MS66 PCGS.** A small business-strike mintage of 330,000 Morgan dollars was accomplished at the Philadelphia Mint in 1899. This attractive Premium Gem offers sharply detailed design elements and well-preserved lustrous surfaces, with outstanding eye appeal. PCGS has graded 23 numerically finer examples (5/17). NGC ID# 256C, PCGS# 7258

**1899-S Silver Dollar, MS66+
Reflective Fields, Few Coins Finer**

- 4438 1899-S MS66+ PCGS. CAC.** Ex: California. The 1899-S is a challenging acquisition in MS66 and distinctly rare any finer. This Plus-graded coin offers a bold strike and remarkably clean surfaces. The devices are satiny, and near-prooflike reflectivity is seen in the fields. A thin line near star 3 is all that prevents a full MS67 grade. PCGS has seen 11 finer representatives. CAC: 28 in 66, 3 finer (4/17). NGC ID# 256D, PCGS# 7262
- 4439 1899-S Doubled Date, VAM-7, MS64 PCGS.** A Top 100 Variety. Wisps of golden-brown color visit this suitably struck and lustrous Choice Silver Dollar. The reverse is beautifully preserved, and the obverse is also attractive. Housed in a green label holder. Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 9946, which realized \$718.75. NGC ID# 256D, PCGS# 133952 Base PCGS# 7262

**1900-O Silver Dollar, MS67
Among the Finest Certified**

- 4440 1900-O MS67 PCGS.** The availability of this issue declines significantly in MS67, and it is unknown numerically finer. This top-grade Superb Gem displays an above-average strike for the issue but with slight weakness still evident on the eagle's breast feathers. The surfaces are frosty and brilliant. Population: 80 in 67 (5 in 67+), 0 finer (4/17). NGC ID# 256F, PCGS# 7266
- 4441 1900-O/CC VAM-8, Top 100, MS65 PCGS.** The impressive overmintmarked Gem has exceptionally clean surfaces and a bold strike. The obverse displays attractive peach and stone-gray toning while the reverse offers lovely golden-brown, navy-blue, and plum-red patina. Ex: *Dallas ANA Signature* (Heritage, 10/2012), lot 4987, where it realized \$1,351.25. NGC ID# 256G, PCGS# 133960 Base PCGS# 7268
- 4442 1900-O/CC VAM-11, Top 100, MS65 PCGS.** A Top 100 Variety. The primary mintmark is centered and punched over the undertype CC. This sharply detailed Gem offers well-preserved brilliant surfaces with vibrant mint luster throughout. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268
- 4443 1900-O/CC VAM-12, Top 100, MS65 PCGS.** A Top 100 Variety. The diagonal crack through Liberty's cap helps to attribute this variety. The second C shows as two horns to the upper and lower right. Lustrous silvery surfaces exhibit well-struck design elements, including some delineation in the hair over Liberty's ear. The few scattered light marks are within the parameters of the grade designation. Housed in an old green label holder. NGC ID# 256G, PCGS# 133964 Base PCGS# 7268

**1900-O/CC Morgan Dollar, MS66
Popular VAM-12 Example**

- 4444 1900-O/CC VAM-12, Top 100, MS66 PCGS.** A Top 100 Variety. Heavy die polishing is visible above the mintmark, through the ribbon bow. A frosty Premium Gem with brilliant, untuned silver surfaces. The obverse and reverse design motifs are boldly rendered, with only slight merging of the hair strands over Liberty's ear. VAM-8 and VAM-12 each have an interest factor of "I-5" per the VAM reference, the highest interest factor of any O over CC variety. PCGS has graded two numerically finer examples (4/17). NGC ID# 256G, PCGS# 133964 Base PCGS# 7268
- 4445 1900-S MS65 PCGS.** Silver-white luster emanates from both sides of this Gem. A few light obverse field grazes do not distract. The centers exhibit the usual softness. NGC ID# 256H, PCGS# 7270

4446 1900-S MS65 PCGS. A lustrous Gem that has a brilliant obverse and light chestnut-gold toning on the reverse. The hair above the ear is incomplete, but the reverse is close to pristine, and the obverse shows only delicate marks. Housed in an old green label holder. NGC ID# 256H, PCGS# 7270

4447 1900-S MS65 PCGS. This well-detailed Gem exhibits just a touch of softness on the centers, with intense satiny mint luster under attractive shades of bluish-gray and green patina. Few signs of contact are evident.

Ex: Philadelphia Signature (Heritage, 8/2012), lot 4200, where it brought \$1,116.25. NGC ID# 256H, PCGS# 7270

4448 1901 AU58 NGC. CAC. CAC has appropriately awarded a green sticker for quality within the grade for this conditionally rare, near-Mint dollar. The surfaces display glimpses of golden color and partial luster, but are mostly brilliant. Merging is evident over the central design areas. NGC ID# 256J, PCGS# 7272

1901 Dollar, MS61 Scarce in All Uncirculated Grades

4449 1901 MS61 PCGS. The 1901 is well-known as the most challenging Morgan dollar in mint condition. This piece shows complete mint luster, but its grade is derived from numerous small to mid-sized abrasions scattered across each side. Light, even blue-lilac toning covers both obverse and reverse. Well, but not quite completely struck up. NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS61 Better Date in High Grade

4450 1901 MS61 PCGS. The 1901 Morgan dollar is known as a prime condition rarity in high grade. This impressive MS61 specimen offers well-detailed design elements, but shows a touch of the usual softness on the stars and the hair above the ear. The lightly marked surfaces are visited by shades of lavender-gray and sea-green toning, with satiny luster underneath. NGC ID# 256J, PCGS# 7272

1901-O Morgan Dollar, MS66+ Seldom Seen Any Finer

4451 1901-O MS66+ NGC. CAC. The New Orleans Mint is often viewed askance when describing the quality of its work, but the 1901-O issue was one of its high points for at least a portion of the 13 million-piece mintage. Those high-grade coins show satiny brilliance with attractive surfaces and great eye appeal. This Plus-graded example ranks near among the best of the issue — vibrant and sharply struck, with few marks blazing white silver luster. Census: 17 in 66+, 4 in 66★, 16 finer. CAC: 130 in 66, 2 finer (5/17). NGC ID# 256K, PCGS# 7274

4452 1901-S MS64 PCGS. An impressive Choice example of this late-series branch mint issue, with well-detailed design elements that show a touch of softness on the usual trouble spots in the hair above the ear and the eagle's breast. The well-preserved surfaces are lightly toned, with slightly subdued mint luster. NGC ID# 256L, PCGS# 7276

4453 1901-S MS65 PCGS. The reverse remains mostly brilliant with a touch of champagne border toning, but the obverse is richly patinated with golden-brown around the edges, ceding to steel-blue and rose over the centers. Frosty luster shines through the colorful blanket. A strongly defined Gem that would be exceedingly difficult to upgrade. NGC ID# 256L, PCGS# 7276

4454 1901-S MS65 PCGS. Golden-gray patina reveals colorful splashes of green, blue, magenta, and russet over the obverse. Frosty luster percolates through the thin blanket of toning. Strike softness occurs at the extreme centers on each side. The 1901-S is very scarce in Gem condition and rare any finer. NGC ID# 256L, PCGS# 7276

4455 1901-S MS65 PCGS. An impressive Gem, with well-detailed design elements that show just a touch of softness on the hair strands above Liberty's ear. The brilliant surfaces are remarkably well-preserved and both sides radiate vibrant mint luster. PCGS has graded 41 numerically finer examples (4/17). NGC ID# 256L, PCGS# 7276

4456 1902-O MS66+ PCGS. CAC. Frosty luster is original on this high-end Premium Gem, and each side exhibits a few wisps of light golden toning, primarily at the rims. The design elements are sharp, and we observe no mentionable abrasions. PCGS has seen 27 finer submissions (5/17). NGC ID# 256N, PCGS# 7280

4457 1902-S MS65 PCGS. The design elements of this spectacular Gem are well-detailed, with just a touch of the usual softness on the hair above Liberty's ear. The lustrous surfaces are well-preserved, with attractive highlights of sea-green, lavender, and turquoise toning. NGC ID# 256P, PCGS# 7282

4458 1903-O MS65 PCGS. The 1903-O Morgan dollar was a great rarity before a large number of coins surfaced in the Treasury releases of the 1960's. This attractive Gem displays well-detailed design elements and well-preserved surfaces with vibrant mint luster throughout. NGC ID# 256S, PCGS# 7286

4459 1904-O MS66+ PCGS. CAC. This frosty, brilliant coin is almost entirely unmarked, showing smooth, luminous surfaces. The usual strike weakness is seen on the central high points. The faint silhouette of a mint-made planchet void is barely discernible on Liberty's jaw with a loupe. Finer 1904-O dollars are scarce in a PCGS holder. NGC ID# 256V, PCGS# 7292

PROOF MORGAN DOLLARS

1879 Morgan Dollar, PR64 Cameo Original Toning, Stark Contrast

- 4460 1879 PR64 Cameo PCGS.** Broad, square rims, full strike definition, reflective fields, and a thick layer of frost over fully struck devices help confirm the proof origin of this amazing near-Gem Morgan dollar. Dusky powder-blue, mint-green, and gold color appears centrally, while the rims tend more toward reddish-violet. Two ticks near the chin with help in future attribution. NGC ID# 27Z2, PCGS# 87314

- 4461 1882 PR61 PCGS Secure. VAM-10.** A brilliant and precisely struck specimen. Careful rotation reveals delicate hairlines. The eagle and wreath are frosty, though the portrait falls just short of exhibiting contrast sufficient for a Cameo designation. NGC ID# 27Z6, PCGS# 7317

1882 Morgan Dollar, PR64 Cameo Strongly Contrasted

- 4462 1882 PR64 Cameo PCGS.** This is a beautiful, highly reflective proof, white with just the slightest hint of gold toning at the peripheries. The contrast between the mirrored fields and frosted devices is full, although apparently just short of meriting a Deep Cameo designation. Surface marks are of only minor importance, as is a planchet impurity near Liberty's mouth.
Ex: FUN Signature (Heritage, 1/2009), lot 4843. NGC ID# 27Z6, PCGS# 87317

1884 Morgan Dollar, PR64 Dusky Golden-Violet Toning

- 4463 1884 PR64 PCGS.** A layer of dusky golden-violet patina prevents a formal Prooflike designation from PCGS, but it does not entirely mask the contrast between moderately reflective fields and fully struck relief elements. Grade-limiting contact is largely unseen. From a production of 875 proofs. NGC ID# 27ZB, PCGS# 7319

1884 Morgan Dollar, PR63 Cameo Pronounced Contrast

- 4464 1884 PR63 Cameo PCGS.** Pronounced field-motif contrast explains the well-deserved Cameo designation from PCGS. Each side features reflective, jet-black fields and frosted, fully raised design elements that one should expect of a proof strike. Brilliant with a faint trace of gold around the edges. The Mint struck 875 proof Morgan dollars in 1884, down from 1,039 the year before. NGC ID# 27ZB, PCGS# 87319

- 4465 1886 PR61 PCGS.** Though toning has dimmed the mirrors somewhat, the periphery is as reflective as ever. Shades of blue, red, and gold appear in measure on a gunmetal backdrop. Hairlines appear in the fields in harmony with the grade. Housed in a green label holder.
Ex: Denver Signature (Heritage, 8/2006), lot 3202. NGC ID# 27ZF, PCGS# 7321

- 4466 1889 PR61 NGC.** A deeply mirrored and appealing lower-end proof Morgan dollar, showing modest contrast on the reverse and light golden toning overall. Hairlines in the fields limit the grade but are mostly unnoticed by the naked eye. NGC ID# 27ZJ, PCGS# 7324

1896 Dollar, PR64 Mintage of 762 Proofs

- 4467 1896 PR64 PCGS.** The surfaces are primarily brilliant with a thin overlay of ivory and powder-blue color, while golden patina encircles the rims. Bold cameo contrast is apparent on the reverse, but the obverse lacks reflectivity in the fields. Both sides feature predictably full design detail. One of 762 proofs manufactured in 1896. NGC ID# 27ZT, PCGS# 7331

**1901 Dollar, Richly Toned PR64
Popular Issue in Proof Format**

- 4468 1901 PR64 PCGS.** The 1901 is an important date in the series, extremely difficult to find in high-grade circulation-strike format. For that reason, collectors often opt for an attractive proof like the one offered here. A splendid array of rainbow tones covers each side, including blue, green, violet, and gold. The toning effectively conceals the few signs of contact. NGC ID# 27ZZ, PCGS# 7336

**1904 Dollar, PR64
Among 650 Proofs Struck**

- 4469 1904 PR64 PCGS.** Mixed golden-brown and violet patina blankets the surfaces of this proof Morgan dollar. Intermittent accents of powder-blue color appear throughout. The rich toning subdued field-device contrast, but also serves to minimize the few signs of contact. Only 650 Morgan dollar proofs were manufactured in 1904. NGC ID# 2824, PCGS# 7339

PEACE DOLLARS

- 4470 1921 MS65 PCGS.** Almond-gold and lilac patina thinly covers this frosty Gem Peace dollar, featuring the single-year High Relief design. The date is bold for an issue known with strike difficulties, but the extreme centers exhibit the usual touch of softness. Smooth and eye-appealing with a pleasing original skin. NGC ID# 2U4E, PCGS# 7356
- 4471 1921 MS65 PCGS. CAC.** Frosty original luster illuminates this Gem High Relief Peace dollar. The usual strike weakness is seen on the central high points, although the overall visual appeal is excellent. Liberty's cheek and the adjacent field are particularly clean. NGC ID# 2U4E, PCGS# 7356
- 4472 1922 MS66+ PCGS. CAC.** This Plus-graded Premium Gem represents the second year of the Peace dollar series, with sharply detailed design elements and well-preserved, lustrous surfaces that show delicate shades of golden-tan toning. PCGS has graded 29 numerically finer examples (5/17). NGC ID# 257C, PCGS# 7357

1922 Peace Dollar, Outstanding MS67

- 4473 1922 MS67 NGC.** Even though the 1922 is a common date in lower grades, no Peace dollar is common in MS67. This is a radiantly lustrous example that is nearly abrasion-free and the strike is complete in all areas. Most of each side retains original mint brilliance, but there is a thin ring of pale russet patina that encircles the rim of each side. Outstanding quality and visual appeal. NGC ID# 257C, PCGS# 7357
- 4474 1922 Earring, VAM-2A, MS64 NGC.** A Top 50 Variety. The die break near Liberty's ear resembles an earring that slants down on her neck above the date. VAM-2A is one of the "crown jewels" of the series, according to Jeff Oxman and Dr. David Close. This well-detailed Choice specimen offers lightly marked, lustrous surfaces, under shades of lavender-gray and sea-green toning. NGC ID# 257C, PCGS# 133737 Base PCGS# 7357
- 4475 1922-S MS65 PCGS.** This West Coast Peace dollar is surprisingly scarce in Gem condition and a major rarity in higher grades. Strike softness is an issue for the 1922-S, as seen here over the extreme centers. Brilliant with cartwheel luster and minimal grazes. PCGS reports 12 finer submissions (5/17). NGC ID# 257E, PCGS# 7359
- 4476 1922-S MS65 PCGS.** Autumn-brown toning adorns the left obverse, but the rest of this lustrous Gem is brilliant. The strike is good and the fields are well-preserved. The portrait displays minor contact. Despite a considerable mintage, the 1922-S becomes rare any finer. NGC ID# 257E, PCGS# 7359
- 4477 1922-S MS65 PCGS Secure.** Medium blue-gray is the dominant color of this luminous Gem, though gold and reddish-brown elements are also visible at the margins. Attractively detailed and pleasingly preserved with just 12 numerically finer examples at PCGS (4/17). NGC ID# 257E, PCGS# 7359
- 4478 1923-S MS65 PCGS.** Mottled gunmetal and champagne-gold patina swathes much of this Gem San Francisco Peace dollar, leaving areas of brilliance on each side. The underlying surfaces are frosty and well-preserved with two ticks on the tip of Liberty's bust. There are merely three finer submissions at PCGS (5/17). NGC ID# 257H, PCGS# 7362
- 4479 1924-S MS64+ NGC.** This brilliant Choice Mint State Peace dollar is extremely close to the elusive MS65 grade where few have been certified. Both sides are lustrous and untuned, with beveled rims typical of the issue. NGC has only certified 79 finer examples (5/17). NGC ID# 257K, PCGS# 7364
- 4480 1925-S MS64 PCGS.** Sharp design elements and frosty original luster are the hallmarks of this near-Gem 1925-S Peace dollar. A few light marks are seen but none are severe. Delicate champagne toning warms each side. PCGS has seen 41 numerically finer representatives (5/17). NGC ID# 257M, PCGS# 7366
- 4481 1925-S MS64+ PCGS. CAC.** Mottled lavender-gray toning masks any minor grade-limiting abrasions on this high-end Choice example. The strike is sharply rendered. The 1925-S Peace dollar is elusive in Gem condition, with PCGS having certified only 41 coins finer than the present (5/17). NGC ID# 257M, PCGS# 7366
- 4482 1926 MS66 PCGS.** A spectacular Premium Gem, with sharply detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces are visited by delicate shades of champagne-gold toning. PCGS has graded no coins in higher numeric grades (4/17). NGC ID# 257N, PCGS# 7367

- 4483 1926 MS66 PCGS.** Although not particularly rare in MS66, the 1926 Peace dollar is prohibitively rare any finer. In fact, no Superb Gems are reported at PCGS (5/17). This Premium Gem displays frosty original luster and light golden toning. The strike is sharp, and Liberty's cheek is pristine. NGC ID# 257N, PCGS# 7367
- 4484 1926-D MS66 PCGS.** This frosty, lustrous Premium Gem is well-struck and essentially brilliant. A few light grazes on Liberty's cheek determine the grade but are not distracting. The 1926-D is occasionally available in this grade, but PCGS lists only eight finer coins (5/17). NGC ID# 257P, PCGS# 7368
- 4485 1926-D MS66 PCGS. CAC.** Ex: California. This is a glimmering, mint-fresh dollar with remarkably clean, brilliant luster and sharp motifs. There are no mentionable abrasions on either side, although we must disclose that the only thing keeping this coin from an even finer grade is a single, faint graze in the left obverse field that appears at a certain angle beneath a light. Liberty's cheek is essentially flawless. Only eight Superb Gems are finer at PCGS (4/17). NGC ID# 257P, PCGS# 7368
- 4486 1926-S MS65 PCGS.** 30th Anniversary Green Label Holder. Brilliant silver luster radiates from both sides of this Gem San Francisco coin. As one of the few branch mint Peace dollars that are normally well-produced, this example dazzles the eye with intense frost-white surfaces and razor-sharp devices. Only a few tiny marks exist across the vibrant fields and motifs. PCGS reports just 90 pieces in a numerically finer grade (5/17). NGC ID# 257R, PCGS# 7369
- 4487 1927 MS64+ PCGS.** The 1927 Philadelphia issue is one of the unsung scarcities of the Peace dollar series in grades exceeding MS64. This Plus-graded example approaches full Gem condition with a sharp strike and brilliant, minimally marked centers. Attractive gold and reddish-tan toning visits the fields where the deepest shades gather at the borders. The eye appeal is terrific. NGC ID# 257S, PCGS# 7370
- 4488 1927 MS65 PCGS.** From a low mintage of 848,000 pieces, the 1927 Peace dollar is an elusive issue in grades above MS65. This spectacular Gem exhibits sharply detailed design elements and vibrant mint luster throughout. The lightly toned surfaces are impeccably preserved. PCGS has graded 16 numerically finer examples (4/17). NGC ID# 257S, PCGS# 7370

**1927-D Peace Dollar, MS65
Rarely Encountered Finer**

- 4489 1927-D MS65 PCGS.** The 1927-D Peace dollar is an important condition rarity that is elusive in MS65 and nearly impossible in any finer grades. PCGS has certified only 14 numerically finer examples, and NGC has graded just three finer pieces (5/17). This Gem has brilliant and frosty silver luster with delicate gold toning on the obverse. The reverse is brilliant and untoned. NGC ID# 257T, PCGS# 7371
- 4490 1927-S MS64 PCGS. CAC.** Vibrant satin luster illuminates mostly unabraded surfaces on this near-Gem 1927-S Peace dollar. There is no disastrous weakness in the strike, and eye appeal excels. A major contributing factor to the latter is the vivid cobalt-blue and amber border toning that surrounds brilliant interiors on each side. Finer 1927-S silver dollars are scarce. NGC ID# 26J6, PCGS# 7372
- 4491 1928 MS64+ PCGS. CAC.** This late-date emission lays claim to the lowest mintage in the Peace dollar series (360,649 coins). Survivors are scarcely found finer than this high-end near-Gem. Lightly toned in chestnut-gold hues, each side remains largely brilliant and frosty. Typically struck with minor reeding marks on the reverse. NGC ID# 257V, PCGS# 7373
- 4492 1928-S MS64+ PCGS.** The 1928-S is a key date in Gem condition. This near-Gem example is a cut above its peers with a coveted Plus designation and comparably strong luster and eye appeal. The coin is brilliant and well-struck, and the grade-limiting surface grazes on the obverse are so shallow that they disappear at certain angles of view. NGC ID# 257W, PCGS# 7374
- 4493 1934-D MS65 PCGS.** Vivid shades of golden-brown and lavender-gray toning blanket the obverse of this impressive Gem, while the reverse remains mostly brilliant. The design elements are well-detailed and the lustrous surfaces are well-preserved. NGC ID# 257Y, PCGS# 7376
- 4494 1934-D MS65 PCGS.** The 1934-D Peace dollar is an elusive issue in grades above MS65. This attractive Gem offers well-detailed design elements and satiny surfaces with no mentionable distractions. Delicate shades of golden-tan toning visit both sides. NGC ID# 257Y, PCGS# 7376
- 4495 1934-D MS65 PCGS. CAC.** Every bit the Gem that PCGS and CAC determine it to be, this high-end 1934-D Peace dollar displays particularly vibrant, frosty mint luster with only the faintest of surface grazes to limit the numeric classification. The strike is sharp, and at certain angles the surface marks disappear from view to make the coin look a grade point finer. Housed in an old green label holder. NGC ID# 257Y, PCGS# 7376
- 4496 1934-S AU58+ PCGS. CAC.** A Plus-graded near-Mint example of this key issue, with just a trace of wear on the well-detailed design elements and smooth, satiny surfaces, under shades of golden-brown, lavender-gray, and amber toning. NGC ID# 257Z, PCGS# 7377

EISENHOWER DOLLARS

- 4497 1971-D MS67 NGC.** Type One Reverse. The 1971-D Eisenhower dollar represents the first year of the design, and examples in MS67 condition are very scarce. This incredible Superb Gem offers sharply detailed design elements, aside from the always weak globe on the reverse. The virtually flawless, lustrous surfaces are enhanced by highlights of golden-tan and lavender toning. Census: 48 in 67 (1 in 67+), 0 finer (5/17). NGC ID# 2585, PCGS# 7407
- 4498 1976 Type Two MS67 PCGS.** Type Two coins have thin letters, and the U in UNUM is centered under the I in PLURIBUS. Examples of this quality are very rare and seldom offered. The fields are marvelously preserved with just a bit of chatter near the date. Satiny and brilliant. Population: 14 in 67, 0 finer (4/17). NGC ID# B76M, PCGS# 7419

PROOF EISENHOWER DOLLAR

- 4499 1971-S Silver PR70 Deep Cameo PCGS.** An amazing first-year Eisenhower dollar, this perfect silver proof is brilliant and untoned with exquisite field-to-device contrast. Population: 100 in 70 Deep Cameo (4/17). NGC ID# 258S, PCGS# 97428

COMMEMORATIVE SILVER

- 4500 1893 Isabella Quarter MS65 PCGS. CAC.** Ex: Troy Wiseman Collection. A fully struck example, well-preserved, with alternating shades of rose, gold, and aquamarine across smoothly frosted surfaces. Isabella's intricate crown, hair, and regalia are sharply defined, as are the distaff, spindle, and strand of wool. This Gem example is CAC-endorsed for quality — brightly lustrous with strong eye appeal throughout both sides. NGC ID# BYJ9, PCGS# 9220

- 4501 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B.** The A in DOLLAR leans left and sits lower than the adjacent L, which also has a slight leftward lean to confirm this readily available DuVall die pair. Faint golden-gray patina embraces the margins of this otherwise brilliant example, with sharply defined and minimally marked central motifs. Nice for the grade, housed in an old green label holder. NGC ID# BYKW, PCGS# 9222
- 4502 1921 Alabama 2x2 MS66 PCGS.** The 2x2 Alabama half dollars claim a reported distribution of 6,000 coins, 10,000 fewer pieces than the later issue without 2x2 in the right obverse field. This Premium Gem is brilliant with three spots of gunmetal color near Governor Bibb's forehead, AM in AMERICA, and the middle part of the eagle. Only eight finer submissions at PCGS (5/17). NGC ID# BYEZ, PCGS# 9225
- 4503 1921 Alabama 2x2 MS66 PCGS.** Governors Kilby and Bibb avoid most of the Mint-related nicks and ticks that characterize the issue, while the dynamic eagle that is the focal point of the design displays a razor-sharp strike including its forward leg and talons. Only minor softness on the trailing talons is noted. Lavish silver luster glows from every view of this Premium Gem coin. Brilliant with faint tan-gold patina at the borders. Population: 131 in 66 (9 in 66+), 8 finer (5/17). NGC ID# BYEZ, PCGS# 9225
- 4504 1935-S Arkansas MS67 PCGS. CAC.** The impeccably preserved champagne-silver surfaces of this delightful Superb Gem are highlighted by hints of golden-brown and amber toning at the borders, with well-detailed design elements and satiny mint luster throughout. Population: 24 in 67 (3 in 67+), 0 finer. CAC: 11 in 67, 0 finer (4/17). NGC ID# BYF7, PCGS# 9235
- 4505 1936 Arkansas MS67 PCGS.** Whispers of soft violet visit the lustrous surfaces of this Superb Gem commemorative. This is a well-struck and nicely preserved specimen. Among the finest seen at either PCGS or NGC (4/17). Population: 17 in 67 (3 in 67+), 0 finer (4/17). NGC ID# BYHX, PCGS# 9237
- 4506 1938 Arkansas MS66 PCGS. CAC.** This CAC-endorsed Arkansas Centennial half is satiny with primarily silver-gray patina, imbued with elements of sage and orange near the rims. Both obverse and reverse are well-struck with smooth, carefully preserved surfaces and very few marks for the issue, which is often vulnerable to handling marks. A delightful Premium Gem. Population: 122 in 66 (20 in 66+), 17 finer. CAC: 30 in 66, 6 finer (5/17). NGC ID# BYFE, PCGS# 9245
- 4507 1939 Arkansas MS66 PCGS.** The majority of this 1939 Arkansas half dollar remains brilliant, though specks of almond-gold patina appear peripherally. A couple of marks above and to the right of the date define the grade. Population: 69 in 66 (12 in 66+), 3 finer (4/17). NGC ID# BYFJ, PCGS# 9249
- 4508 1939-D Arkansas MS66 PCGS. CAC.** The 1939-D Arkansas Centennial half dollar comes from a distribution of only 2,104 coins, including assay pieces. This Premium Gem survivor displays bold detail and satiny luster with light golden toning. A halo of deep sun-yellow color surrounds the outer peripheries. PCGS reports 14 numerically finer examples. CAC: 33 in 66, 6 finer (4/17). NGC ID# BYFK, PCGS# 9250

1939-S Arkansas Half Dollar, MS67 Among the Finest Known

- 4509 1939-S Arkansas MS67 PCGS. CAC.** A particularly well-struck Superb Gem example with frosty, luminous mint luster. Silvery surfaces show traces of champagne toning at the borders with no distracting contact marks. The 1939-S Arkansas Centennial half dollar is rare this fine and unknown finer. The CAC endorsement sets this piece apart from most of its peers. Population: 15 in 67 (1 in 67+), 0 finer. CAC: 8 in 67, 0 finer (4/17). NGC ID# BYFL, PCGS# 9251
- 4510 1935 Boone MS67+ NGC.** A Plus-graded Superb Gem, from a distribution of 10,000 pieces, this coin offers well-detailed design elements and well-preserved lustrous surfaces, under vivid shades of greenish-gold and lavender-gray toning. Census: 39 in 67 (4 in 67+, 10 in 67★), 3 finer (5/17). NGC ID# BYFR, PCGS# 9258
- 4511 1935 Boone MS67+ NGC.** Vivid shades of sea-green and magenta toning enhance the impeccably preserved surfaces of this Plus-graded Superb Gem, with vibrant mint luster underneath. The design elements are sharply detailed and overall visual appeal is outstanding. Census: 39 in 67 (4 in 67+, 10 in 67★), 3 finer (5/17). NGC ID# BYFR, PCGS# 9258
- 4512 1936-S Boone MS67 PCGS. CAC.** Reddish-gold toning clings to the rims of this Superb Gem, more so on the reverse. Both sides display pleasing luster and are minimally marked. Housed in a first generation holder. NGC ID# BYG2, PCGS# 9268
- 4513 1936 Cincinnati MS66+ PCGS. CAC.** A stunning Premium Gem, this half dollar is fully brilliant with satin luster and lightly mirrored fields beneath champagne toning with peripheral iridescence. The design elements are well-impressed. PCGS and NGC have certified 32 finer (5/17).
Ex: Central States Signature (Heritage, 4/2012), lot 7073. NGC ID# BYCJ, PCGS# 9283
- 4514 1936 PDS Columbia MS67 PCGS. CAC.** All three issues have identical grades, are quite well matched, and endorsed by CAC. The lustrous surfaces of each display a hint of peripheral brown color, and all three coins are well-struck and have impeccably preserved surfaces. A really pleasing Columbia set. (Total: 3 coins) NGC ID# BYGE, PCGS# 9294
- 4515 1936 Gettysburg MS67 PCGS.** The Gettysburg commemorative half dollar ranks among the most elusive issues in the Classic series to locate in high grades. The Superb Gem here-offered showcases radiant, untuned centers with tan-gold coloration around the peripheries. Fully struck with only microscopic marks. PCGS reports three submissions finer (5/17). NGC ID# BYGM, PCGS# 9305
- 4516 1922 Grant With Star MS62 PCGS.** Silver-gray surfaces exhibit well-struck motifs and a good amount of luster. Scattered light marks limit the grade. NGC ID# BYPP, PCGS# 9307
- 4517 1928 Hawaiian — Cleaning — PCGS Genuine. Unc Details.** A technically Uncirculated example of the always-popular Hawaiian half, with sharply defined devices and very few marks visible even under magnification. We note a tiny contact on the chin and a few stray, delicate lines on each side. A subtle cleaning has removed most of the natural patina and the coin is now largely brilliant, but few hairlines intrude and a fair amount of mint luster remains.

- 4518 1928 Hawaiian MS64 PCGS.** Strong mint luster accompanies a freckling of colorful, iridescent toning that gathers at the margins of this satin-smooth Hawaiian half dollar. The strike is sharp throughout, with only a few small obverse marks that determine the near-Gem grade. NGC ID# BYGR, PCGS# 9309

**1928 Hawaiian Half Dollar, MS65
Satin, Lightly Patinated Key**

- 4519 1928 Hawaiian MS65 PCGS.** Crimson and olive-gold patina occurs around the borders of this key date commemorative half dollar. The interiors feature a thin layer of dusky, cream-gray toning. Fully struck with broad rims and excellent definition on the design elements. Hawaiian halves are famous for the issue's paltry distribution of 10,000 coins. NGC ID# BYGR, PCGS# 9309

**1925 Lexington-Concord Half, MS67
Only One Coin Known Finer**

- 4520 1925 Lexington MS67 PCGS.** Glistening mint luster shows delicate iridescence throughout the interiors with olive-gold rims. The strike is bold, and only a couple of tiny ticks in the fields are discerned with a loupe. The Lexington-Concord Sesquicentennial half dollar is rare in this condition and nearly unknown finer. Population: 27 in 67 (3 in 67+), 1 finer (4/17). NGC ID# BYGW, PCGS# 9318

- 4521 1918 Lincoln MS67 PCGS.** A beardless Abraham Lincoln faces to the right on this Illinois Centennial commemorative half dollar. Various names are associated with this issue: Lincoln, Illinois, or Lincoln-Illinois. Both sides have bold design elements with satiny silver luster and splashes of light gold toning.
Ex: Long Beach Signature (Heritage, 6/2005), lot 7120; Summer FUN Signature (Heritage, 7/2009), lot 928; FUN Signature (Heritage, 1/2011), lot 6326. NGC ID# BYGU, PCGS# 9320

- 4522 1918 Lincoln MS67 PCGS. CAC.** A spectacular Superb Gem, with sharply detailed design elements and virtually pristine surfaces that radiate vibrant mint luster throughout. Vivid shades of sea-green and magenta toning enhance the exceptional eye appeal. PCGS has graded three numerically finer examples (5/17). NGC ID# BYGU, PCGS# 9320

- 4523 1921 Missouri 2x4 MS65 PCGS.** This satiny Gem 1921 Missouri Centennial half dollar displays a sharp strike and shows no distracting abrasions. Each side is cast in blended lavender-gray, gold, and russet toning. PCGS reports only 42 numerically finer coins (4/17). NGC ID# 2FE9, PCGS# 9331

- 4524 1923-S Monroe MS66 PCGS.** A nicely balanced Premium Gem coin, strongly lustrous with flashy silver surfaces overlaid by areas of faint iridescence and dappled golden-gray nuances. Attractive and sharp for the issue, which is seldom found with impressive eye appeal. Few examples are finer. Population: 103 in 66 (10 in 66+), 7 finer (4/17). NGC ID# BYH4, PCGS# 9333

- 4525 1938 New Rochelle MS67+ PCGS.** Spectacular iridescent colors shimmer from the smooth and lustrous reverse, holdered by PCGS to showcase its colorful display. The obverse exhibits tab toning with with auburn-brown, forest-green, and amber-gold tones around a frostlike silver center. Plus-graded for exceptional eye appeal — a sharply struck Superb Gem with nearly mark-free surfaces. Population: 40 in 67+, 6 finer (4/17). NGC ID# BYDX, PCGS# 9335

- 4526 1925 Norse, Thick Planchet, MS66 PCGS. CAC.** Lovely lemon-gold, powder-blue, jade-green, and lilac patina adorns the margins of this coruscating Norse medal. The Viking's shield and the reverse field exhibit unobtrusive contact. Population: 48 in 66 (4 in 66+), 1 finer. CAC: 26 in 66, 1 finer (4/17). NGC ID# 2WHM, PCGS# 9450

- 4527 1915-S Panama-Pacific MS66 PCGS. CAC.** The splendor of the 1915 Panama-Pacific Exposition is mirrored by the outstanding quality and elegant eye appeal of this violet-gray Premium Gem. Elements of blue and sea-green appear marginally on each side. Boldly impressed without any singular marks to report. NGC ID# BYHR, PCGS# 9357

- 4528 1920 Pilgrim MS67 PCGS.** The thoughtful countenance of Governor William Bradford stands in stark contrast to the windswept rigging of the *Mayflower* in full sail on this sharply rendered Pilgrim Tercentenary half. A dusting of pale-blue and golden-tan toning enriches the bold silver luster that shines through on both sides. Deeply struck and attractive. Population: 60 in 67 (8 in 67+), 2 finer (4/17). NGC ID# BYHR, PCGS# 9359

- 4529 1936 Robinson MS67 PCGS. CAC.** A lovely champagne-toned Superb Gem, this 1936 Robinson half dollar features the profile of George T. Robinson, one of few living individuals to have a portrait on an official U.S. government issue. However, we are not sure why Robinson appeared on this piece. He served as governor of Arkansas for 55 days in 1913, and as an Arkansas senator from 1913 until his death in 1937. Population: 84 in 67 (3 in 67+), 2 finer. CAC: 21 in 67, 0 finer (4/17). NGC ID# BYHX, PCGS# 9369

- 4530 1935 Spanish Trail MS65 PCGS.** An impressive Gem representative of this popular silver commemorative, with sharply detailed design elements and well-preserved surfaces that radiate satiny mint luster, under subtle shades of golden-tan and lavender-gray toning. NGC ID# BYJ5, PCGS# 9376

- 4531 1935 Spanish Trail MS66 PCGS.** A typical example with regards to its satiny luster and light golden toning, this Premium Gem Spanish Trail half dollar is above average with regards to its strike, which shows El Paso fully defined. Finer examples of this popular commemorative are elusive. Housed in a green label holder. NGC ID# BYJ5, PCGS# 9376

- 4532 1935 Spanish Trail MS66 NGC.** Frosty luster jumps out at the viewer of this attractive Premium Gem. Untoned surfaces exhibit sharply struck design features, and a handful of grade-consistent obverse marks do not take away from the exquisite eye appeal.
Ex: ANA Signature (Heritage, 3/2008), lot 1955. NGC ID# BYJ5, PCGS# 9376

- 4533 1938-D Texas MS67+ PCGS.** Satiny, luminous surfaces are reminiscent of fresh dies on this high-end Superb Gem 1938-D Texas Independence Centennial half dollar. The strike is bold and abrasions are virtually nonexistent. Each side has a hint of iridescence over otherwise silver-white surfaces. NGC ID# BYJM, PCGS# 9395

- 4534 1938-S Texas MS67 PCGS. CAC.** Lustrous silver-gray surfaces display light tan patina at the margins, more so on the reverse. The sharply defined devices and impeccably preserved surfaces confirm the CAC endorsement. NGC ID# BYJN, PCGS# 9396

- 4535 1950-D Booker T. Washington MS67 PCGS. CAC.** Only 6,004 Booker T. Washington half dollars were distributed from the Denver Mint production in 1950, and few of those remain in top grades. This Superb Gem has wisps of champagne toning on its brilliant and lustrous silver surfaces. Population: 23 in 67 (1 in 67+), 0 finer. CAC: 14 in 67, 0 finer (5/17). NGC ID# BYK7, PCGS# 9421

- 4536 1951-D Booker T. Washington MS67 PCGS Secure. CAC.** Housed in a PCGS Secure holder, this Superb Gem Booker T. Washington is alive with silver luster and virtually brilliant-white. Pale wisps of fleeting gold hues appear intermittently when rotated in light. Marks are a non-issue on this remarkably clean and attractive MS67 coin, tied for numerical finest at either grading service. Population: 49 in 67 (1 in 67+), 0 finer. CAC: 32 in 67, 0 finer (5/17). NGC ID# BYKA, PCGS# 9425

1936 Wisconsin Half, Colorful MS68

- 4537 1936 Wisconsin MS68 PCGS. CAC.** Pale gold and ice-blue toning contributes to the immense eye appeal of this remarkable Wisconsin half dollar. The devices are well-impressed and neither side shows any signs of contact. This lustrous example would be a worthy addition to an advanced Registry Set. Population: 37 in 68 (6 in 68+), 0 finer. CAC: 20 in 68, 0 finer (4/17).
Ex: *Central States Signature* (Heritage, 4/2012), lot 7183. NGC ID# BYKU, PCGS# 9447

COMMEMORATIVE GOLD

- 4538 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 PCGS.** Brilliant and frosted surfaces display strong mint luster throughout the pristine yellow-gold surfaces — a sharply struck example with wide, square rims and bold design motifs. A few copper toning splashes appear on the obverse as often encountered on the issue, with fine granularity at the borders but abundant eye appeal. NGC ID# BYLD, PCGS# 7443

1904 Lewis & Clark Gold Dollar, MS64 Prooflike Very Rare With Such Contrast

- 4539 1904 Lewis & Clark MS64 Prooflike NGC.** The 1904 Lewis and Clark gold dollar is very rare with Prooflike surfaces. NGC reports 20 submissions in all, most in MS63 and MS64. This is a rich, orange-gold near-Gem with reflective, jet-black fields and a bold impression on the devices. A few stray wisps define the grade. Census: 7 in 64 Prooflike, 1 finer (4/17). NGC ID# BYLF, PCGS# 77447
- 4540 1905 Lewis and Clark Gold Dollar MS63 NGC.** The 1905 Lewis and Clark gold dollar is more elusive than its 1904 counterpart. This attractive Select specimen displays well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster on both sides. NGC ID# BYLG, PCGS# 7448

1922 No Star Grant Gold Dollar, MS66+ Attractive Coloration

- 4541 1922 Grant Gold Dollar, No Star, MS66+ PCGS.** Lovely lavender and bluish hues adorn the central reverse of this high-end Premium Gem, while the obverse and reverse borders show the traditional blend of various golden colors. The strike is bold, and we observe no mentionable abrasions. Finer No Star Grant Memorial gold dollars are elusive. NGC ID# BYLN, PCGS# 7458
- 4542 1922 Grant Gold Dollar, With Star, MS63 PCGS.** This is a boldly defined Select example of the Grant With Star gold dollar. Rich honey-gold surfaces show two alloy spots behind the portrait and over the R in Grant. Only 5,016 coins were distributed, contributing to the issue's popularity. Housed in an old green label holder. NGC ID# BYPS, PCGS# 7459
- 4543 1922 Grant Gold Dollar, With Star, MS66 PCGS.** A delightful Premium Gem representative of the popular With Star variant, with sharply detailed design elements and impeccably preserved orange-gold surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is outstanding. NGC ID# BYPS, PCGS# 7459
- 4544 1922 Grant Gold Dollar, With Star, MS66+ PCGS. CAC.** Attractive greenish-gold color combines with a sharp strike that provides crisp definition on Grant's hair strands and the finer details of the cabin with its leafy canopy. Even at the Premium Gem level, both the With Star and No Star variants are readily available, but few coins receive the PCGS Plus designation as well as CAC endorsement such as this lustrous and well-preserved example. NGC ID# BYPS, PCGS# 7459

1922 Grant With Star Gold Dollar, MS67 Near-Flawless Surfaces

- 4545 1922 Grant Gold Dollar, With Star, MS67 PCGS.** The Grant gold dollars are among the more obtainable issues in the gold commemorative series; and yet examples in MS67 are difficult to locate. This is a nearly flawless example. The surfaces display even orange-gold color, bright mint luster, and remarkably strong strike details. NGC ID# BYPS, PCGS# 7459
- 4546 1926 Sesquicentennial Quarter Eagle MS65 PCGS.** Clearly worthy of its Gem designation, this Sesquicentennial quarter eagle displays frosty wheat-gold luster and a good strike with only a few tiny ticks as allowed by the grade. This final gold classic commemorative is collectible in the current grade but becomes elusive just one point finer. NGC ID# 2FE9, PCGS# 7466
- 4547 1926 Sesquicentennial Quarter Eagle MS65+ PCGS.** Only a few trivial marks are present on this Gem 1926 Sesquicentennial gold quarter eagle that features frosty mint luster and brilliant yellow surfaces. NGC ID# 2FE9, PCGS# 7466

MODERN ISSUES

- 4548 2000-W Library of Congress Bimetallic Ten Dollar, Moy Signature, MS70 PCGS.** Here is a flawlessly preserved and fully struck example of this popular bimetallic commemorative. The Library of Congress Bicentennial ten dollar issue is usually available in MS70, but this piece is one of only three such coins in a Moy signature holder (4/17). PCGS# 612567 Base PCGS# 9784
- 4549 2014-W Eleanor Roosevelt Half-Ounce Gold Ten Dollar, First Strike MS70 PCGS.** The “First-Spouse” gold bullion coins are each one-half ounce, and recognize each of the Presidential first ladies. The series began in 2007 with Martha Washington, and recognized four or five first ladies each year. Eleanor Roosevelt appears on this perfect Mint State piece that exhibits brilliant light yellow surfaces and frosty mint luster. NGC ID# CP5R, PCGS# 531591 Base PCGS# 531590

MODERN BULLION COINS

- 4550 30-Piece 1986-2015 Silver Eagle Date Set, MS70 ANACS.** The set includes 30 business-strike Silver Eagles in consecutive date order, individually certified in flawless MS70 condition by ANACS and housed in matching blue-label holders. Each coin is fully struck, frosty, and untoned, with no discernible blemishes. (Total: 30 coins)
- 4551 1986 Half-Ounce Gold Eagle MS70 NGC.** Nearly 600,000 pieces were struck of the first-year half-ounce gold eagles — by far the largest mintage of the \$25 denomination, yet demand remains strong for examples in the ultimate MS70 grade. This is a blond-gold representative, with satin-smooth surfaces and nice eye appeal. NGC ID# 28Y8, PCGS# 9805
- 4552 1986 Half-Ounce Gold Eagle MS70 PCGS.** A perfect Mint State specimen, this brilliant yellow-gold half-ounce Gold Eagle has satiny surfaces with deeper honey-gold toning about the borders. Scarce this fine in a PCGS holder. Population: 67 in 70 (4/17). Ex: *Central States Signature (Heritage, 4/2013)*, lot 5168. NGC ID# 28Y8, PCGS# 9805
- 4553 1988 Gold Eagle Proof Set PR70 Deep Cameo PCGS.** The fractional gold pieces each bear the P-mintmark of Philadelphia while the one-ounce coin exhibits the W-mintmark of West Point. Each of the four coins are flawless examples with perfect yellow surfaces and excellent cameo contrast. (Total: 4 coins) NGC ID# 28X4, PCGS# 9819

1992 Quarter-Ounce Gold Eagle, MS70
Rare This Fine at PCGS

- 4554 1992 Quarter-Ounce Gold Eagle MS70 PCGS.** Several quarter-ounce Gold Eagle issues are rare in top condition, particularly at PCGS. The 1992 is among them. Here offered is one of only 15 MS70-graded 1992 quarter ounce Gold Eagles reported by PCGS (4/17). The strike is full, and the surfaces are flawlessly preserved with strong eye appeal. NGC ID# 26M8, PCGS# 9860
- 4555 1993-P Silver Eagle PR70 Deep Cameo PCGS.** A stunning, perfect proof, this PR70 Deep Cameo American Eagle one-ounce silver piece has brilliant surfaces with exquisite field-to-device contrast. NGC ID# 26JK, PCGS# 9867

- 4556 1993 Quarter-Ounce Gold Eagle MS70 NGC.** Increasing interest in Registry-quality modern coinage should spur spirited bidding when this flawless, lemon-gold quarter-ounce Gold Eagle crosses the block. Of the 71,864 pieces struck, few can match the unimprovable technical quality seen here. NGC ID# 26M9, PCGS# 9870
- 4557 1995-W Gold Eagle Proof Set PR70 Deep Cameo PCGS.** This four-piece gold proof set includes each of the West Point American Eagle gold coins (there is no silver Eagle in this lot) in perfect PR70 Deep Cameo quality with brilliant yellow surfaces and impressive field-to-device contrast. (Total: 4 coins) NGC ID# 28XB, PCGS# 9889
- 4558 1997-W Statue Of Liberty, One-Ounce Platinum Eagle PR69 Deep Cameo PCGS.** The platinum bullion coins debuted in 1997, and the West Point Mint coined 20,851 one-ounce pieces that first year. This nicely contrasted example is virtually perfect, with brilliant light gray surfaces, exhibiting deeply mirrored fields and lustrous devices. NGC ID# 293M, PCGS# 9751
- 4559 1998 Quarter-Ounce Platinum Eagle MS70 PCGS.** One of only 44 1998 quarter-ounce Platinum Eagles known in perfect condition at PCGS (4/17). The coin is fully struck and beautifully preserved with stark contrast between the frosted and mirrored portions of the design. NGC ID# 26SS, PCGS# 9766
- 4560 1998 Quarter-Ounce Platinum Eagle MS70 PCGS.** A flawlessly preserved and starkly contrasted example of the second issue in the quarter-ounce Platinum Eagle series. PCGS has certified 44 examples in this finest grade (4/17), making the 1998 more plentiful than the earlier issue in the series. NGC ID# 26SS, PCGS# 9766
- 4561 1998-W Statue Of Liberty, One-Ounce Platinum Eagle PR70 Deep Cameo PCGS.** Just 14,912 of these proof one-ounce platinum Eagles were minted at West Point in 1998, and this example has achieved the ultimate PR70 Deep Cameo grade at PCGS. A lovely example featuring light gray surfaces and outstanding field-to-device contrast. NGC ID# 293N, PCGS# 99768
- 4562 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS70 NGC.** Inadvertently struck from unpolished proof dies, the Mint created a sought-after *Guide Book* variety with the W mintmark confirming its intended proof status. Vibrant orange accents add eye appeal to this technically perfect example of the tenth-ounce, five dollar gold eagle. NGC ID# 26LB, PCGS# 511606 Base PCGS# 99940
- 4563 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS68 PCGS.** “This is a Red Book variety of very high interest,” in the words of the *Cherry-pickers’* reference. FS-401 was struck with unfinished proof dies bearing the West Point mintmark. On this piece, a couple of microscopic ticks at the base of the branch stem are the only discernible surface flaws. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942
- 4564 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** In 1999, the West Point Mint was striking only proof quarter-ounce gold eagles. FS-401 was produced when unfinished West Point proof dies were inadvertently used to strike a small number of regular issue coins. This piece is almost flawlessly preserved and shows full detail. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942
- 4565 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS.** An almost flawlessly preserved example with full detail and mint-fresh golden luster. The W mintmark should be absent from regular issue quarter-ounce gold eagles of this date; the present variety was struck in small numbers from an unfinished West Point proof die pair, and it is highly popular among collectors. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

4566 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS. This is a nearly flawless example with a full strike and satiny luster. The W mintmark was reserved for proof quarter-ounce Gold Eagle dies in 1999, although the present variety was struck in small numbers from an unfinished West Point proof die pair, and it is highly popular among collectors. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

4567 2000-W Statue Of Liberty, One-Ounce Platinum Eagle PR69 Deep Cameo PCGS. An attractive and nearly perfect example that is visually flawless with brilliant light gray surfaces and outstanding eye appeal. NGC ID# 293R, PCGS# 99782

4568 2001-W Statue Of Liberty, One-Ounce Platinum Eagle PR69 Deep Cameo PCGS. Both sides of this lovely light gray Superb Gem Deep Cameo proof exhibit outstanding field-to-device contrast. Only 8,969 one-ounce proofs were distributed from the West Point Mint in 2001. NGC ID# 293S, PCGS# 99789

2004-W One-Ounce Platinum American Eagle PR70 Deep Cameo

4569 2004-W Statue Of Liberty, One-Ounce Platinum American Eagle PR70 Deep Cameo PCGS. The 2004-W one-ounce American Platinum Eagle claims a low proof mintage of 6,007 pieces. This magnificent PR70 specimen offers fully struck design elements throughout, with deeply mirrored fields that contrast dramatically with the richly frosted devices. The brilliant surfaces are technically perfect and eye appeal is terrific. NGC ID# 293U, PCGS# 921107

4570 2006-W Statue Of Liberty, Quarter-Ounce Platinum Eagle PR70 Deep Cameo PCGS. This quarter-ounce platinum Eagle combines deeply mirrored fields and lustrous light gray devices to present an outstanding black-and-white appearance. Only 7,813 proofs were minted at West Point in 2006. NGC ID# 26T5, PCGS# 921117

4571 2008-W Silver Eagle, Reverse of 2007, Burnished, Moy Signature SP70 PCGS. The Reverse of '07 is far scarcer in perfect SP70 condition than the normal Reverse of '08. The most noticeable identifier of this reverse is the lack of a spur on the bottom of the U in UNITED. *Cherrypickers'* states that 47,000 pieces were minted, according to a Mint spokesman. This example is one of just 45 in a Moy signature holder in SP70 (4/17). PCGS# 544754 Base PCGS# 396411

4572 Four-Piece 2008-W Gold Buffalo Proof Set, .9999 Fine, PR70 Ultra Cameo NGC. Includes: \$5 tenth-ounce; \$10 quarter-ounce; \$25 half-ounce; and a \$50 one-ounce gold American Buffalo bullion coins. The lower three denominations were struck only in 2008. The coins are flawless from a technical perspective, showing deeply mirrored fields and thickly frosted devices. (Total: 4 coins) NGC ID# 26RE, PCGS# 399932

2008-W One-Ounce Gold Buffalo, MS70 Fraser's Classic Design

4573 2008-W One-Ounce Gold Buffalo MS70 NGC. A modern rendering of James Earl Fraser's classic design for the Buffalo nickel, this magnificent 2008-W Gold Buffalo contains one ounce of .9999 fine gold. The design elements are fully struck and the impeccably preserved, textured surfaces radiate strong matte luster on both sides. Eye appeal is terrific. NGC ID# 26RS, PCGS# 400037

2008-W Gold Buffalos, MS70 Four-Piece Denominational Set

4574 Four-Piece 2008-W Gold Buffalo Set, MS70 PCGS. From James Earl Fraser's iconic design, the denominational set includes the tenth-ounce gold \$5, quarter-ounce gold \$10, half-ounce gold \$25, and one-ounce gold \$50, all graded MS70 by PCGS. All coins are fully struck, with textured, technically perfect orange-gold surfaces that radiate strong matte luster. Overall visual appeal is terrific. (Total: 4 coins)

4575 2008-W Half-Ounce Platinum Eagle, Burnished, MS70 NGC. Just 2,253 pieces were struck at the West Point Mint for the 2008-W Platinum eagles with Specimen-quality burnished finish. This flawlessly preserved example displays a hint of lilac across the impeccably struck, satinlike platinum surfaces. NGC ID# BNKZ, PCGS# 393082

4576 2008-W One-Ounce Gold Buffalo, Fraser Signature, .9999 Fine, PR70 Deep Cameo PCGS. Only 56 2008-W one-ounce Gold Buffalos at PCGS feature the Fraser signature holder in PR70 Deep Cameo (4/17), a collectible and elusive holder/grade combination. This example is fully struck and flawlessly preserved. NGC ID# 26N7, PCGS# 91012 Base PCGS# 393329

4577 2008-W Statue Of Liberty, Half-Ounce Platinum Eagle PR70 Deep Cameo PCGS. Just 4,020 of these proofs were minted in the final year of fractional platinum Eagle production. A perfect Deep Cameo proof example of this half-ounce issue with deeply mirrored fields and frosty light gray devices. NGC ID# 26TX, PCGS# 393090

4578 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS69 PCGS. Featuring the date in Roman numerals, this small diameter one-ounce gold issue is an extraordinary representative of Augustus Saint-Gaudens' design that was created just over a century earlier. Although no mintmark is present, these pieces were coined at West Point. This virtually perfect example features the bold design and reflective surfaces of the two original small diameter examples that are held in the Smithsonian Institution. NGC ID# 26S4, PCGS# 407404

4579 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. A perfect prooflike Mint State example of this popular modern issue that depicts the Saint-Gaudens double eagle design in miniature. Despite the small diameter, these 4 mm. thick pieces contain a full ounce of gold. The few scratches visible in the images are on the holder and not on the coin. NGC ID# 26S4, PCGS# 407404

4580 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. This popular modern gold bullion issue repeats Saint-Gaudens's majestic Walking Liberty design. Flawless surfaces yield fully struck devices and imposing yellow-gold luster. NGC ID# 26S4, PCGS# 407404

4581 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. Master sculptor Augustus Saint-Gaudens' double eagle design is flawlessly executed in Ultra High Relief for this ever-popular modern emission. Two blows at 65 tons per strike were required to bring up the devices. Perfectly preserved MS70 examples are highly sought-after, and this magnificent sun-gold coin should have no trouble finding a good home. NGC ID# 26S4, PCGS# 407404

4582 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 PCGS. Fully struck and nearly prooflike, this flawlessly preserved Ultra High Relief one-ounce gold twenty dollar piece displays seemingly unsurpassable eye appeal. The issue was a quick sell-out at the Mint in 2009, and it remains popular today. NGC ID# 26S4, PCGS# 407404

4583 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, Mercanti Signature, MS70 PCGS. Flawlessly struck and unblemished in any way. The coin displays rich, satiny luster and remarkable eye appeal. Includes original Mint packaging, wooden box, and COA, along with the booklet from the Mint exploring the design and production of the original 1907 Ultra High Relief twenty and its 2009 counterpart. PCGS# 519412 Base PCGS# 407404

4584 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, David Hall Signature, MS70 PCGS. An incredible, absolutely perfect example of this famous and highly popular design, featuring brilliant yellow-gold surfaces and prooflike surfaces. The PCGS label is signed by the founder of the grading service, David Hall. PCGS# 596036 Base PCGS# 407404

MMIX Ultra High Relief Twenty, MS70 Prooflike One-Ounce .999 Fine Gold

4585 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. Struck on a 4 mm thick planchet comprising one Troy ounce of 0.999 fine gold, this immaculate Ultra High Relief twenty dollar gold piece has pronounced mirroring in the fields and eye-catching, honey-gold coloration. The combination of a full strike, flawless preservation, and Prooflike reflectivity generates superb eye appeal. NGC ID# 26S4, PCGS# 506602

2009 One-Ounce Gold Double Eagle Ultra High Relief, MS70 Prooflike

4586 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. One-ounce gold Ultra High Relief double eagles certified MS70 Prooflike are among the most consistently sought-after coins in the modern American series. This is one such example with deep, watery fields that show impeccable preservation. The striding figure of Liberty and soaring eagle are fully brought-up, as expected. NGC ID# 26S4, PCGS# 506602

2009 Ultra High Relief Twenty Dollar MS70 Prooflike

4587 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. The 2009 Ultra High Relief double eagle took home honors as *Coin World's* top numismatic story of the year. The issue continues to make waves eight years later as one of the most important modern issues ever produced. This is a flawless, orange-gold representative with impeccable Prooflike surfaces. NGC ID# 26S4, PCGS# 506602

MMIX One-Ounce Gold Twenty Dollar Ultra High Relief, MS70 Prooflike

4588 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. January 22, 2009 was the first day of sales for the MMIX Ultra High Relief one-ounce gold coins. Revenue totaled \$33.7 million on that day alone. In all, 114,427 pieces were distributed. This is a technically unimprovable example with reflective fields and warm, honey-gold coloration. A magnificent recreation of Saint-Gaudens' widely heralded design. NGC ID# 26S4, PCGS# 506602

**2009 Ultra High Relief Twenty Dollar,
Always In-Demand, MS70 Prooflike**

- 4589 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS.** Where certain modern issues sometimes lose their luster after their initial release, the 2009 Ultra High Relief double eagle has sustained widespread collector demand. The famous design and double-thick planchet are undoubtedly among this coin's best attributes. Here is a completely mark-free, fully struck representative. Deep orange-gold surfaces display the reflectivity and contrast necessary for a formal Prooflike designation. NGC ID# 26S4, PCGS# 506602

**2009 One-Ounce Gold Twenty Dollar
Ultra High Relief, First Strike, MS70 Prooflike**

- 4590 2009 One-Ounce Ultra High Relief, First Strike MS70 Prooflike PCGS.** This double-thick MMIX Ultra High Relief double eagle boasts profoundly reflective, orange-gold surfaces free from any contact whatsoever. The design elements are fully raised, allowing for a complete appreciation of Saint-Gaudens' masterful design. Certified as a First Strike, having been received within the first 30 days of issue. NGC ID# 26S4, PCGS# 506614 Base PCGS# 506602
- 4591 2009-W One-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** The iconic Native American design on the obverse is combined with the bison design on the reverse, created by sculptor James Earle Fraser for its debut a little over 100 years ago in 1913. The reproduced design in gold is a treasure, featuring highly lustrous light yellow design elements. The design was introduced in 2006 and continues today. NGC ID# 26RU, PCGS# 414465 Base PCGS# 414463
- 4592 2009-W One-Ounce Gold Buffalo, First Strike, PR70 Deep Cameo PCGS.** This one-ounce gold piece is struck in .9999 fine gold and reproduces James Earle Fraser's classic design. Proof examples were struck at the West Point Mint, with the W-mintmark below the bottom feather on the obverse. First Strike examples were received at PCGS within 30 days of the release date. This brilliant yellow example has excellent contrast with fully mirrored fields and lustrous devices. NGC ID# 26RU, PCGS# 414465 Base PCGS# 414463
- 4593 Four-Piece 2010-W Gold Eagle Proof Set, Michael Reagan, PR69 Deep Cameo PCGS.** Includes the \$5 tenth-ounce, \$10 quarter-ounce, \$25 half-ounce, and \$50 one-ounce proof Gold Eagles. Individually housed in Reagan Legacy Series signature holders with a common numeric grade of PR69 Deep Cameo. (Total: 4 coins)

- 4594 2010 One-Ounce Gold Buffalo, First Strike MS70 PCGS.** The Mint State version of the one-ounce gold Buffalo, struck at the Philadelphia Mint. This perfect Superb Gem has brilliant yellow luster and bold design motifs. A lovely example for the connoisseur. NGC ID# 26RV, PCGS# 418864 Base PCGS# 418863

- 4595 2010-W One-Ounce Gold Buffalo, .9999 Fine Gold PR70 Deep Cameo PCGS.** A stunning West Point Mint example, this perfect proof has deeply mirrored fields behind frosty and highly lustrous design motifs, all struck in pure gold with brilliant and beautiful yellow-gold surfaces. NGC ID# 26RW, PCGS# 418865

- 4596 2012-W Silver Eagle Limited Edition Proof Set PR70 Deep Cameo PCGS.** A perfect Superb Gem Deep Cameo proof from the Limited Edition proof set. This brilliant piece has amazing contrast and extraordinary eye appeal. Population: 64 in 70 Deep Cameo (4/17). PCGS# 517077

- 4597 2012-W Silver Eagle Limited Edition Proof Set PR70 Deep Cameo PCGS.** From the Limited Edition proof set, this impeccable proof American Eagle silver piece has black-and-white contrast with deeply mirrored fields and frosty, fully lustrous, and boldly defined devices. Population: 64 in 70 Deep Cameo (4/17). PCGS# 517077

- 4598 2012-W One-Ounce Platinum Eagle, David Hall Signature, PR70 Deep Cameo PCGS.** This lovely one-ounce platinum Eagle bears the Minuteman design with impressive contrast. PCGS found David Hall signed the label for this example. PCGS# 612730 Base PCGS# 515152

- 4599 2013-W Silver Eagle, Limited Edition Proof Set, First Strike, PR70 Deep Cameo PCGS.** The Limited Edition proof sets included five America the Beautiful silver quarters, alongside a Roosevelt dime, Kennedy half dollar, and silver Eagle. As the title suggests, these sets were made in limited quantities. This one-ounce silver Eagle is a perfect and flawless representative with outstanding eye appeal. Population: 65 in 70 Deep Cameo (4/17). PCGS# 526483 Base PCGS# 526482

- 4600 2013-W Statue Of Liberty, One-Ounce Platinum American Eagle PR70 Deep Cameo PCGS.** An extremely small mintage of 5,745 one-ounce proof platinum Eagles were produced at West Point in 2013. This perfect example has exceptional contrast between its deeply mirrored fields and satiny light gray devices. Population: 54 in 70 Deep Cameo, (4/17). NGC ID# 2U7B, PCGS# 518216

- 4601 2013-W One-Ounce Gold Buffalo, First Strike PR70 Deep Cameo PCGS.** The Mint released the 2013-W one-ounce Gold Buffalo proofs on May 23, but the announcement that a Reverse proof would be issued later that year kept demand at bay. Only 18,594 pieces were distributed in all. Jet-black fields surround frosted, yellow-gold motifs that are fully struck. An absolutely flawless key date proof. NGC ID# 2U7A, PCGS# 518206 Base PCGS# 518205

- 4602 2013-W One-Ounce Gold Buffalo, First Strike PR70 Deep Cameo PCGS.** The 2013-W proof Gold Buffalo quietly claims the second-lowest mintage in the entire series. Most collectors opted for the Reverse Proof issued that year to commemorate the centennial of the Buffalo nickel. Each side is absolutely pristine, featuring a thick layer of frost over fully struck motifs and watery, deeply mirrored fields. NGC ID# 2U7A, PCGS# 518206 Base PCGS# 518205

- 4603 2013-W One-Ounce Gold Buffalo, Reverse Proof, Chicago ANA, PR70 NGC.** The 2013-W Reverse Proof one-ounce Gold Buffalo is extremely popular among modern collectors, especially in unimprovable PR70 condition. Frosted, matte-like fields and brilliant devices are readily appealing. NGC ID# 2W2C, PCGS# 520265 Base PCGS# 521909

4604 2013-W One-Ounce Gold Buffalo, Reverse Proof, Chicago ANA, PR70 NGC. Reverse Proof Gold Buffalos were available from the Mint between August 8 and September 5, 2013. During that short period, sales reached 47,836 pieces. This is the only Reverse Proof in the series, explaining its popularity. As expected, each side is technically pristine with the unusual effect of frosty fields set against brilliant devices. NGC ID# 2W2C, PCGS# 520265 Base PCGS# 521909

4605 2013-W One-Ounce Gold Buffalo, Reverse Proof, Chicago ANA, PR70 NGC. The issuance of a Reverse Proof Gold Buffalo in 2013 celebrated the 100th anniversary of James Earle Fraser's Buffalo nickel design. Excitement generated by this new format resulted in a strong sales (47,836 coins sold). This fields are frosted, while the fully struck motifs are brilliant. NGC ID# 2W2C, PCGS# 520265 Base PCGS# 521909

4606 2014-W Statue Of Liberty, One-Ounce American Platinum Eagle, David Hall Signature, PR70 Deep Cameo PCGS. PCGS founder David Hall signed the label for this one-ounce platinum Eagle. Both sides define perfection with impressive field-to-device contrast on this lovely light gray specimen. PCGS# 612731 Base PCGS# 528085

4607 2015-W One-Ounce Gold Buffalo, .9999 Fine Gold PR70 Deep Cameo PCGS. Mintage figures in the newly released 71st edition of the *Guide Book* show that the 2015-W proof Buffalo gold piece had the lowest mintage of any issue up to that date, with a production of 16,591 examples. This piece is a perfect representative from that low mintage with brilliant yellow surfaces and excellent field-to-device contrast. PCGS# 541973

4608 2015-W One-Ounce Gold Buffalo, First Strike, David Hall Signature, PR70 Deep Cameo PCGS. The holder that contains this impressive and perfect one-ounce American Buffalo gold piece bears the signature of PCGS founder David Hall. This lovely yellow-gold example has lovely contrast between the deeply mirrored fields and frosty devices. PCGS# 612572 Base PCGS# 541973

4609 2015-W High Relief One-Ounce Gold, First Strike, MS70 PCGS. Struck in pure (.9999 fine) gold, this one-ounce piece presents a new design that was issued for the first time in 2015. These pieces were struck at the West Point Mint. This perfect Mint State piece exhibits satin yellow-gold luster, bold design motifs, and incredible eye appeal. NGC ID# BY88, PCGS# 545533 Base PCGS# 545532

4610 2016-W Gold Mercury Dime, Standing Liberty Quarter, Walking Liberty Half Three-Coin Set, First Strike, SP70 PCGS. The trio is housed in a single large-sized PCGS holder noting the 100th anniversary of the introduction of the classic silver types. All three pieces are immaculate and intricately impressed. (Total: 3 coins) PCGS# 617611 Base PCGS# 620793

4611 2016-W Walking Liberty, Half-Ounce Gold, First Strike, SP70 PCGS. Struck in 24K gold, this half-ounce piece is flawless with brilliant yellow surfaces and exceptional eye appeal. The W-mintmark is below the motto on the obverse, in the same position as the earliest branch-mint issues of the Walking Liberty half dollar. PCGS# 598606 Base PCGS# 598605

4612 2016-W One-Ounce Platinum Eagle, Statue of Liberty, First Strike, PR70 Deep Cameo PCGS. The First Strike pieces are those that arrived at PCGS within 30 days of issue. This perfect example has brilliant light gray surfaces with impressive contrast between the mirrored fields and lustrous devices. PCGS# 608522 Base PCGS# 608499

COINS OF HAWAII

4613 1847 Hawaii Cent MS62 Brown NGC. Medcalf 2CC-3. Plain 4, 17 Berries, the third rarest variety. This Uncirculated example displays original auburn-brown patina with subtle hints of green and pink visible under a loupe. Scattered light handling marks limit the grade but none are individually obtrusive. The design elements show an excellent strike. NGC ID# 2C52, PCGS# 10965

4614 1847 Hawaii Cent MS63 Red and Brown PCGS. M. 2CC-2. Crosslet 4, 15 berries. Peach-red and gunmetal-gray compete for territory across this well struck and virtually unabraded example. A blush of russet patina is noted at 9 o'clock on the obverse. Certified in a first generation holder. Listed on page 424 of the 2018 *Guide Book*. NGC ID# 2C52, PCGS# 10966

GSA DOLLARS

4615 1878-CC GSA MS64 Prooflike NGC. CAC. Brilliant, flashy fields contrast with moderately luminous motifs. This first-year Carson City silver dollar shows fewer marks than anticipated for the MS64 level, and the field reflectivity further confirms the eye appeal. NGC ID# 253M, PCGS# 518846 Base PCGS# 7081

1880-CC GSA Dollar, MS65 Second Reverse, VAM-7A

4616 1880-CC Reverse of 1878, 8 Over 7, VAM-7A, GSA, MS65 NGC. CAC. A Hit List 40 Variety. The later, clashed die state of the popular Second Reverse VAM-7. Only a hint of tan toning visits this boldly struck and highly lustrous Carson City Gem. The fields are smooth and the cheek shows only unimportant contact. NGC ID# AP7P, PCGS# 518860 Base PCGS# 7110

4617 1881-CC GSA MS66 NGC. VAM-3. VAM-3 is attributed by a "long interrupted horizontal die gouge" near the bow knot, as described by VAMworld.com. The present high grade GSA silver dollar is thoroughly lustrous and shows only a whisper of golden toning. Well struck and pleasing. A GSA certificate is included, along with a GSA box with detached halves. NGC ID# 2547, PCGS# 518863 Base PCGS# 7126

4618 1881-CC GSA MS64 Deep Mirror Prooflike NGC. VAM-4. The mirrored fields and frosty motifs are brilliant except for a glimpse of lemon-gold patina near IBUS. The strike is full, and the preservation is exceptional for the MS64 level. A desirable example of this low mintage Carson City issue. NGC ID# 2547, PCGS# 518865 Base PCGS# 97127

4619 1883-CC GSA MS66+ NGC. CAC. VAM-4. The date is repunched, most noticeably within the upper loop of the first 8. This lustrous Carson City has a brilliant reverse, while the obverse displays autumn-gold, lime-green, and pearl-gray toning. The fields are uncommonly void of contact. NGC ID# 254S, PCGS# 518869 Base PCGS# 7144

4620 1884-CC GSA MS65+ NGC. VAM-3A. The obverse is unusually colorful for a GSA dollar, and features golden-brown, navy-blue, and apple-green toning with an arc of brilliance on the upper right. The reverse is white except for a hint of wheat-gold toning near OF AME. A lustrous and minimally abraded Carson City Gem. NGC ID# 254L, PCGS# 518872 Base PCGS# 7152

4621 1884-CC GSA MS65 Deep Mirror Prooflike NGC. VAM-3. VAMworld.com states that "branch mint proofs were struck with these dies," but the present Gem was likely among the first pieces struck with commercial intent. The fields are prominently reflective, and brilliant save for golden toning near OF AMERICA. The motifs are frosty, and show occasional traces of mint-made roller marks. A GSA box and certificate are included in the lot. NGC ID# 254M, PCGS# 518874 Base PCGS# 97153

4622 1885-CC GSA MS65+ NGC. CAC. VAM-3. A lightly toned better-grade example of the low mintage and perennially popular '85-CC. Booming luster and a bold strike combine with unmarked fields. The cheek shows only unobtrusive contact. NGC ID# 254M, PCGS# 518875 Base PCGS# 7160

4623 1891-CC Spitting Eagle, VAM-3, GSA, MS62 NGC. A Top 100 Variety. The small die lump below the beak explains the "Spitting Eagle" nickname. Perhaps of greater numismatic interest, the first in the mintmark is repunched north. This brilliant and lustrous better-date Carson City dollar has a good strike and the expected number of minor obverse marks. NGC ID# 255H, PCGS# 518881 Base PCGS# 7206

ERRORS

1952-D Cent, MS63 Brown Rotated in Collar Double Strike Small Indent Reverse

4624 1952-D Lincoln Cent — Double Struck and Rotated in Collar, Small Indent Reverse — MS63 Brown PCGS. The first strike was normal, but the coin failed to eject. Instead, it rotated approximately 30 degrees counter-clockwise, and was struck a second time. For the second strike, a planchet (not included) was fed in, between the reverse die and the reverse of the present coin, but it was far off center and overlapped only about 3% of the reverse, near 9 o'clock. Due to the rotated double strike, the legends are jumbled, most prominently on the central reverse. The mint error also results in a strange appearance of Lincoln's portrait. Glimpses of orange-red emerge from minimally marked olive-brown surfaces.

4625 1974-D Cent, Struck on a Clad Dime Planchet, AU58 PCGS. Satiny luster and bright nickel-gray surfaces show no distracting abrasions. The strike is sharp save for on STA of STATES, which is weak at the bottom. Much of GOD WE TRUST and AMERICA are off of the flan, but the date is fully present.

198? Lincoln Cent, MS65 Overstruck on a 1967 Dime Cent Strike 20% Off Center

4626 198? Lincoln Cent — Struck 20% Off Center on a 1967 Dime, Double Denomination — MS65 PCGS. Many years after the present lot was struck as a clad Roosevelt dime, it had a second encounter with the U.S. Mint. It was fed between cent dies, 20% off center toward 3 o'clock. The wartime Presidential portraits overlap, with Roosevelt gazing north relative to Lincoln. The dime date is complete and bold. The cent date shows the 19 and the left portion of the 8, with the latter partially obscured by a tab on the plastic holder.

1995 Lincoln Cent, MS66 Struck Over a 1991-P Dime

4627 1995 Lincoln Cent — Overstruck on a 1991-P Dime, Double Denomination — MS66 NGC. The cent strike was inverted and flipped relative to the dime strike. Portions of ONE DIME overlap Lincoln's forehead, and Roosevelt's portrait is upside-down in relation with the Lincoln Memorial. The dime date and mintmark are bold. The cent date is partial, but the 1 and 5 are complete, along with the right curve of the second 9. Lustrous and untuned. The four-year gap between strikes is highly unusual.

1936-? Buffalo Nickel, Choice AU Struck on a Cent Planchet

4628 1936-? Buffalo Nickel — Struck on a Cent Planchet — AU55 PCGS. A lightly circulated example of a wrong planchet error on a popular obsolete type. Aligned with the collar at 5:30, but most of the design is present except for the mintmark area. The peripheral legends LIBERTY and FIVE CENTS are stretched toward the rim, characteristic of the error category. The golden-brown and apple-green surfaces are impressively unabraded aside from a few ticks on the reverse rim near 12 o'clock.

4629 1964-D Nickel, Struck on a Silver Dime Planchet, MS62 PCGS. Poorly detailed on the central devices due to the wide spacing of Jefferson nickel dies compared to the thickness of a silver dime planchet. Light golden toning appears on each side. LIBERTY, the date, AMERICA, and the mintmark are all clear, although the remaining peripheral legends are nearly or completely off of the flan.

4630 1964 Quarter, Struck on a Copper Cent Planchet, MS65 Brown PCGS. Beautiful, glistening surfaces yield violet, blue, and burgundy hues. The design is sharply defined and free of abrasions. LIBERTY, the denomination, and much of AMERICA are off of the flan. The lower edge (relative to the obverse) has sharp reeding from the collar.

**1973-S Quarter Mated Pair
PR65 and PR66**

- 4631 1973-S Washington Quarter — Mated Pair — PR65-PR66 PCGS.** Coin #1 is graded PR65 and is struck 15% off center toward 12 o'clock with a uniface obverse. Coin #2 is graded PR66 and has a nearly complete reverse design while the obverse has an 85% indent. Both pieces were fed between the dies and struck simultaneously, with the reverse of Coin #1 indenting the obverse of Coin #2. Both coins have a large arc of unstruck surface. (Total: 2 coins)

**1942 Walking Liberty Half Dollar, XF45
Double Struck in Collar**

- 4632 1942 Walking Liberty Half — Double Struck in Collar, Close Overlap — XF45 PCGS.** This dusky golden-brown and silver-gray mint error was struck twice by the dies, without the addition of a newly fed planchet between strikes. The piece was nearly stationary between the two blows, but evidence of the double strike is present beneath the date, which shows remnants of the date from the first strike. The T's in STATES are also doubled toward the rim. The reverse has a wire rim between 7 and 11 o'clock. The lower third of the obverse is striated and recessed, caused by a lamination or a mint-made strike-through.

**Double Struck 1964 Half Dollar, MS63
Rotated 180 Degrees in Collar**

- 4633 1964 Kennedy Half Dollar — Double Struck, Rotated 180 Degrees in Collar — MS63 NGC.** Type Two Reverse. The first strike was normal, but the coin rotated 180 degrees and was struck a second time, without a newly fed planchet. From the initial impression, the tops of BERTY are apparent on the lower obverse margin, and the 4 in the date and the second T in TRUST are near the I in LIBERTY. The OD in GOD emerges from Kennedy's hair. On the reverse, portions of AMERICA and HALF DOLLAR from the first strike linger near the rims. Lustrous and brilliant with a narrow scratch noted near the R in LIBERTY.

- 4634 A 25-Piece Lot of "Golden Dollar" Planchets.** These plain-edge planchets have an individual weight of 8.0 gm, and were intended to be struck by Sacagawea, Native American, or Presidential dollar dies. The planchets have a raised rim and luminous, moderately marked fields. (Total: 25 pieces)

**2000-P Sacagawea Dollar, MS64
Struck on a Maryland Quarter**

- 4635 2000-P \$1 Sacagawea Dollar — Overstruck on a 2000-P Maryland Quarter — MS64 NGC.** Light straw-gold toning adorns this lustrous and well-preserved double denomination error. The color and reeded edge provide the initial indications of its error status. On the obverse, QUARTER DOLLAR, STATES, and IN GOD WE TRUST from the quarter under-type are readable, along with the P mintmark below the baby and the profile of Washington on Sacagawea's forehead. The reverse of the dollar shows a faint but legible THE OLD LINE STATE, along with MARY near the left wingtip and the 2000 date below AMERICA.

- 4636 1924 Obverse Struck Through, MS66 NGC.** Struck through a patch of grease or other substance at 10 o'clock on the obverse margin, obscuring several stars. The coin is sharply defined otherwise and vibrantly lustrous with yellow-gold surfaces. No obtrusive abrasions are seen.

**1999 One-Ounce Gold Eagle, MS67
Struck-Through Obverse**

- 4637** 1999 One-Ounce Gold Eagle — Mint Error, Struck-Through Obverse — MS67 PCGS. A fully defined and glistening Superb Gem with exceptional yellow-gold mint luster. A thick, rather lengthy threadlike strike-through on the obverse was caused by a piece of coiled up thread stuck to the die face when the coin was struck. Striking anomalies this noticeable are rare on modern bullion coinage.

WESTERN SOUVENIR GOLD

- 4638** 1911 Alaska Parka Head Gold Quarter Dollar Token, MS66 NGC. Gould-Bressett 177. 0.33 gm. Parka Head series of 1911. This quarter dollar piece has a good strike save for the lower wreath on the reverse. The lettering is bold, and the olive-gold surfaces show no distracting marks. NGC ID# AL86, PCGS# 661000

**1911 Alaska Parka Head Gold Half Dollar
Gould-Bressett 176, MS67**

- 4639** 1911 Alaska Parka Head Gold Half Dollar Token, MS67 NGC. Gould-Bressett 176. 10.7 mm, 0.50 gm. M.E. Hart's Coins of the Golden West. Made for the M.E. Hart Company in San Francisco. Obverse with 10 stars surrounding portrait. Reverse lettering bold but the wreath weak on the bottom. This bright yellow-gold example is nearly pristine. Visual appeal is excellent. The variety is elusive in this condition. NGC ID# AL86, PCGS# 661000

- 4640** 1898-Dated Alaska Gold One Pinch, MS67 NGC. HK-843, R.6. Gould-Bressett 134. An Indian head faces left with 13 stars around. Octagonal planchet. Brilliant green surfaces exhibit heavy obverse clash marks.
Ex: *Long Beach Signature* (Heritage, 6/2010), lot 2016. NGC ID# AL86, PCGS# 661000

- 4641** 1915-Dated California Gold "1/4," Minerva, Bear, Round, MS68 NGC. M.E. Hart's Coins of the Golden West. Bright yellow-gold luster has no discernible abrasions. The strike lacks sharpness on Minerva's helmet and the bear's body, although the peripheral details are well brought up.
Ex: *FUN Signature* (Heritage, 1/2016), lot 9743. NGC ID# AL86, PCGS# 661000

WASHINGTONIA

- 4642** 1872 California Gold 1/4 Charm, Washington Head, MS65 NGC. BG-504A, Musante GW-819. The obverse shows only slight differences from BG-724, but the reverse legend substitutes CHARM for DOLLAR. A radiant sun-gold Gem. The strike is consistently crisp, and there are no flan imperfections.

U.S. MINT MEDAL

- 4643** "1882" Great Seal Centennial MS65 Brown NGC. Julian-CM-20. Bronze, 63 mm. According to R.W. Julian, the Philadelphia Mint struck only 104 of these medals in bronze composition. This piece has extraordinary mahogany surfaces with reflective fields and traces of faded mint color.

SO-CALLED DOLLAR

**1904 Louisiana Purchase Expo, HK-308
Roosevelt So-Called Dollar, PR64**

- 4644** 1904 Louisiana Purchase Exposition President Roosevelt Dollar PR64 NGC. HK-308, R.7. This is only the seventh appearance in our auctions of the Theodore Roosevelt so-called dollar issued for the Louisiana Purchase Exposition that was held in St. Louis in 1904, and this Choice example is the finest of any we have handled. Four years have passed since we last offered an example, and that offering in 2013 was the first we had offered since 2008. This gold-toned example has excellent contrast with blue peripheral toning.

EXPOSITIONS AND FAIRS

**Gilt 1893 Columbian Exposition Medal
Eglit-101, MS65 Prooflike**

- 4645** 1893 World's Columbian Exposition, High Relief Liberty Head, MS65 Prooflike NGC. Eglit-101. Gilt, 90 mm. This extraordinary large-format medal is strike in bold high relief with gilt surfaces exhibiting mirrored fields and satiny design motifs. These medals are commonly encountered in white metal or aluminum, and are rarely seen with gilt surfaces, especially when the gilding is so well preserved as on this example.

- 4646** 1901 Pan-American Exposition, Buffalo, Lavin-TM103, MS63 NGC. Silver, 64 mm. The edge is marked GORHAM CO. on this impressive Hermon MacNeil designed medal that was presented to William W. Hart, who exhibited fur skins and rugs in the annex of the Manufactures and Liberal Arts Building at the exposition. This impressive medal has original antique-silver surfaces with splendid gold and blue toning.

MILITARY MEDAL

1861-Dated Fort Sumter Bronze Medal Issued by the New York Chamber of Commerce

- 4647 (1881) Fort Sumter Commemorative Medal, Bronze, Uncertified.** Dies by Müller. Executed by order of the New York Chamber of Commerce to commemorate the 1861 Civil War Battle of Fort Sumter. Major Robert Anderson, the commanding officer of the Union forces at Fort Sumter, is depicted on the obverse. The reverse shows a Union soldier raising an American flag atop a building with the inscription: THE CHAMBER OF COMMERCE, NEW YORK, HONORS THE DEFENDERS OF FORT SUMTER, FIRST TO WITHSTAND TREASON. The medal has unblemished reddish-brown surfaces with smooth satin luster. Housed in original velvet-lined presentation box. The box is intact but shows wear.

ALASKA TOKENS

- 4648 (1935) Alaska Rural Rehabilitation Corporation Set of Eight NGC Certified.** This is a complete set of the eight tokens issued in 1935 for the Alaska Rural Rehabilitation Corporation. The cent through dollar tokens are aluminum, and the five and 10-dollar tokens are brass. Each is NGC certified, and the lot includes: one cent **MS63**; five cents **MS63 Prooflike**; 10 cents **MS64 Prooflike**; 25 cents **MS62**; 50 cents **MS63 Prooflike**; one dollar **MS60**; five dollars — **Environmental Damage** — **NGC Details. Unc.**; and 10 dollars **MS62**. (Total: 8 coins)

PROOF SETS

- 4649 Five-Piece 1937 Proof Set, PR66-PR67 PCGS.** The set includes:

Cent PR66 Red. Housed in a green label holder. This fully struck, flashy copper-orange Premium Gem lacks nothing in terms of eye appeal when compared to the higher-graded coins in this set.

Nickel PR67. This fully struck and reflective Superb Gem proof is brilliant on both sides and in about the same condition as it was when it was removed from the coining press in 1937.

Dime PR67. A fully struck, reflective proof cast in a delicate champagne glow. This Superb Gem is every bit the technical equal of its counterparts in this set.

Quarter PR67. A hint of dusky champagne toning on this Superb Gem proof reveals subtle iridescence in the fields when tilted beneath a light.

Half Dollar PR67. A sharp, glimmering proof, this high-end 1937 Walker is mostly brilliant in the centers with golden border toning surrounding each side. (Total: 5 coins)

- 4650 Five-Piece 1937 Proof Set, PR66-PR67 PCGS.** The set includes:

Cent PR66 Red. This glimmering copper-orange Premium Gem is the lowest-graded coin in the set, and yet it displays exceptional visual appeal and carbon-free surfaces. The strike is full throughout.

Nickel PR67. Delicately toned in champagne and ice-blue hues, this fully struck Superb Gem proof displays deeply reflective fields and remarkable aesthetics.

Dime PR67. Multicolor rim toning quickly transitions to sun-gold at the margins on this piece. The interiors are light golden and ice-blue with fully struck devices.

Quarter PR67. This glimmering Superb Gem proof is almost identical to the dime in this set with regards to toning, although it carries its own brand of eye-catching flash and superb quality.

Half Dollar PR67. A well-struck, high-end proof with deeply mirrored fields and only a hint of light champagne color, the latter mostly on the reverse. (Total: 5 coins)

MINT SET

- 4651 Uncertified 1948 Double Mint Set.** The set contains 28 coins in the original cardboard holders, with the still-sealed outer envelope postmarked March 1949 and addressed to Bryan, Texas. (Total: 28 coins)

WORLD

- 4652 1906 Philippines Centavo PR65 Red PCGS Secure.** Three successive years (1903 through 1905) of relatively high centavo production at Philadelphia was followed by a miserly proof-only 1906 mintage of 500 pieces. The present satiny Gem has an intricate strike and lovely apricot-gold and chestnut color. Imperfections are confined to a fleck near the O in ONE and a narrow tick on the field above the eagle. Population: 5 in 65 Red, 1 finer (4/17). PCGS# 90158

1904 Philippines 50 Centavos, PR67 Extraordinary Toning

- 4653 1904 Philippines 50 Centavos PR67 PCGS Secure.** Iridescent apple-green, butter-gold, and violet-red toning endows this satiny and pristine Superb Gem. The eye appeal is remarkable. The 1904 50 centavos mintage at Philadelphia included 10,000 business strikes and 1,355 proofs. Population: 8 in 67 (2 in 67+), 3 finer (4/17). NGC ID# 2C9U, PCGS# 90368

1906 Philippines 50 Centavos, PR67
Proof-Only Issue

4654 1906 Philippines 50 Centavos PR67 PCGS. Gorgeously patinated in ocean-blue, sun-gold, rose-red, and lilac shades, leaving an area of brilliance on the upper right reverse quadrant. The strike is sharp except on the eagle's right (facing) claw. The 1906 is an elusive proof-only issue with a mintage of 500 pieces. Population: 10 in 67 (3 in 67+), 4 finer (4/17). PCGS# 90370

(1947) Saudi Arabia Gold Pound, MS62
Philadelphia Mint, KM-35

4655 (1947) Gold One Pound, KM-35, MS62 PCGS. This is the famous gold pound used for oil payments to Saudi Arabia. The gold weight is the same as found in the British sovereign. The obverse features a Heraldic Eagle design, inscribed U.S. MINT above, and PHILADELPHIA - U.S.A. below. The reverse has the three line inscription CONTAINS .2354 TROY OZS. FINE GOLD. An attractive example with fully lustrous yellow-gold surfaces. NGC ID# 4XTG, PCGS# 557991

End of Session Three

SESSION FOUR

PATTERNS

1836 Restrike Two Cent in Copper
Judd-54, PR63 Brown

- 4656** 1836 Two Cents, Judd-54, Pollock-57, Low R.6 PR63 Brown PCGS. The obverse features a small eagle on a cloud, reminiscent of the Draped Bust silver dollar reverse design. The reverse has TWO CENTS in the center surrounded by a laurel wreath. Struck in copper with a plain edge. Undoubtedly a restrike made in the late-1850s, as characterized by the heavily die-cracked obverse. About two dozen copper pieces are believed known, but some are silver-plated or pickled (mercury plated or dipped). It is not known just how many restrikes were made, but a wide variety of compositions exist of the originals, including billon, copper, copper-nickel, and white metal. This is an attractive example whose obverse retains a fair amount of underlying red beneath the brown, while the reverse is more uniformly brown. There are no observable flaws on the piece, leaving us to wonder what the grade is about. NGC ID# 2968, PCGS# 11198

1850 Cent Pattern in Copper
Judd-124h, PR63 Red and Brown
Struck on Only One Side

- 4657** 1850 Judd-124h, Pollock-146, High R.7, PR63 Red and Brown PCGS. Struck on only one side, the struck side is from the cent patterns of 1850 with CENT above / 1850 below / a rosette on each side. The center is unperforated. Struck in copper with a plain edge. This piece and its nickel or copper-nickel counterparts were Appendix A pieces in editions 1 through 7 of the Judd reference. The Judd-124g piece that sold in the ANR 1/2004 auction mentions a die crack through the top of the T in CENT. We do not see a crack in that area of this piece, suggesting this copper piece was struck before the nickel or copper-nickel ones. This example was believed by Pollock to be unique, but the 10th edition of Judd lists it as High R.7. The surfaces are bright red with swirls of blue and yellow interspersed over each side. Unlisted in Adams-Woodin, believed to be ex: Farouk. PCGS# 62314

1854 One Cent Electrotpe in Copper
Judd-159a, PR64 Red and Brown
Created by a Portrait Lathe From a Seated Dollar

- 4658** 1854 One Cent, Judd-159a Electrotpe, Pollock-186, High R.6, PR64 Red and Brown PCGS. Pollock states that the obverse die was created from a crudely reduced 1851 Seated dollar die using the portrait lathe. The reverse features a prominent 1 CENT denominational legend within a wreath of oak leaves and acorns. Struck in copper with a plain edge. The 4 was so weakly reproduced from the dollar die that it appears to be a 1. Numerous alloys were used to strike these crude patterns, including a wide variety of German silver compositions. This composition is straightforward: Struck in copper with a plain edge. However, it is a Mint-made electrotpe with an obvious seam around the edge. The obverse is almost completely red with only a patch of brown seen on the left side, while the reverse is more evenly mellowed with a significant presence of brown over that side. NGC ID# 299Z, PCGS# 11655

1858 Flying Eagle Cent Pattern in Copper-Nickel
Judd-192, PR63

- 4659** 1858 Flying Eagle Cent, Judd-192, Pollock-235, Snow-PT13, R.5, PR63 PCGS. The obverse is the familiar Small Letters 1858 cent. The pattern reverse generally resembles the 1860 regular issue reverse, but there is no shield at the top and the wreath is closed. Struck in copper-nickel with a plain edge. This is one of the more frequently encountered early patterns. The tan-gold surfaces show only slight reflectivity in the fields, and there are minimal specks of carbon present. NGC ID# 29BC, PCGS# 11842

1859 'French Head of Liberty' Half in Copper
Judd-238, PR65 Brown

- 4660** 1859 Half Dollar, Judd-238, Pollock-294, R.5, PR65 Brown PCGS. Longacre's so-called "French Head" of Liberty, which faces right, draped with a ribbon inscribed LIBERTY and a wide wreath of oak and vine on her head. The reverse has HALF DOLLAR in the center, surrounded by a wreath identical except for scale to that seen on the Legend Obverse Seated dime. Struck in copper with a reeded edge. Saul Teichman expresses doubt on USPatterns.com whether this design was actually designed by James Longacre or by Anthony Paquet. The reason for the uncertainty stems from the punches used in UNITED STATES OF AMERICA were those of Paquet. This is an interesting example of this popular pattern. The obverse is uniformly muted by brown patina, while still showing slight traces of red around the devices. The reverse, on the other hand, is more red than brown and quite vibrant. NGC ID# 29CJ, PCGS# 11968

1859 Half Dollar in Silver
Judd-239, Deeply Toned PR64

- 4661** 1859 Half Dollar, Judd-239, Pollock-295, R.4, PR64 PCGS. Longacre's "French Head" design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse features the wreath of the issued 1860 Seated dime, though larger in scale commensurate with the diameter. The denomination is expressed as 1/2 DOLLAR within the wreath. Struck in silver with a reeded edge. This obverse / reverse design combination was generous numbers (for a pattern) in both silver (est. 50 pieces) and copper (est. 30 pieces). The turquoise, yellow, and gray toning is deep enough to partially subdue the reflective mirrors in the fields on each side. Fully struck throughout. NGC ID# 26VE, PCGS# 11972

1859 Longacre Half Dollar in Silver
Judd-241, Lightly Toned PR62

- 4662** 1859 Half Dollar, Judd-241, Pollock-297, R.4, PR62 PCGS. The Longacre Liberty Head design for the half dollar, often called the "French Head of Liberty." The letters in LIBERTY are ribbed, unusual within the pattern series. The reverse has 50 CENTS in the center bounded by a cereal wreath similar to that of the issued 1860 half dime and dime. Struck in silver with a reeded edge. The fields on each side are shallowly mirrored, yet striations are clearly present in an attempt by the Mint to produce a brightly mirrored product. Only slight golden toning is visible on each side. NGC ID# 29CM, PCGS# 11978

1861 GOD OUR TRUST Half in Copper
Judd-280, PR64 Brown

- 4663** 1861 Half Dollar, Judd-280, Pollock-331, Low R.7, PR64 Brown PCGS. A regular dies obverse is paired with a reverse the same as the regular issue, except that the motto GOD OUR TRUST is set directly onto the upper field. Struck in copper with a reeded edge. This motto variation is a precursor to the familiar IN GOD WE TRUST and is referred to in an undated letter from James Longacre where he laid out the logistics for the motto on various denominations and the "appropriateness of a motto expressive of National reliance upon Divine support ... " This is a richly toned example with significant mirroring in the fields with layers of bluish-yellow patina over each side and occasional glimpses of original red on the reverse. NGC ID# 29DP, PCGS# 12108

**1862 Bronzed High Date Half Dollar
Judd-298, Pollock-358, PR64 Brown**

- 4664 1862 Ten Dollar, Judd-298, Pollock-358, Low R.6, PR64 Brown PCGS.** The obverse is identical to the regular issue ten dollar dies for 1862. The reverse is similar to the adopted design, with the addition of the motto GOD OUR TRUST set directly into the field above the eagle. Struck in copper with a reeded edge. This high date variety (Pollock-358) has surfaces that were obviously bronzed, as often seen, and as a result the fields do not show the reflectivity one would expect from a proof. Nevertheless, the surfaces are attractive with even reddish-brown patina and no mentionable contact marks. NGC ID# 2VRB, PCGS# 60448

**1863 Washington Two Cents in Copper
Judd-305, PR63 Brown**

- 4665 1863 Two Cents, Judd-305, Pollock-370, R.4, PR63 Brown PCGS.** The obverse displays a portrait of Washington facing right, GOD AND OUR COUNTRY around, date and two stars below. The reverse expresses the denomination 2 CENTS within a wheat wreath, UNITED STATES OF AMERICA around. CENTS is curved dramatically. Struck in copper with a plain edge. This pattern was struck in a surprising variety of compositions: copper / bronze, copper-nickel, orioide, and aluminum. The creation of this pattern obviously was a reflection of the popularity of all manner of Washingtonia in the late-1850s and early-1860s. This piece shows evidence of cleaning from its overly bright surfaces. The reverse fields show three shallow areas of planchet granularity, but there is only slight evidence of coin-to-coin contact. NGC ID# 29EK, PCGS# 60460

**1863 Two Cent in Copper
Judd-305, PR63 Brown
Popular Washington Design**

- 4666 1863 Two Cents, Judd-305, Pollock-370, R.4, PR63 Brown PCGS.** The obverse displays a portrait of Washington facing right, GOD AND OUR COUNTRY around, date and two stars below. The reverse expresses the denomination 2 CENTS within a wheat wreath, UNITED STATES OF AMERICA around. CENTS is curved dramatically. Struck in copper with a plain edge. Examples are known with thin and thick planchets. This appears to be a thick planchet variant. Examples were also struck in copper-nickel, orioide, and aluminum. Lovely olive-brown surfaces exhibit traces of pale blue toning with golden-tan splashes on the obverse. NGC ID# 29EK, PCGS# 60460

**1863 Postage Currency Ten Cents in Aluminum
Judd-328, PR64+ Cameo**

- 4667 1863 Ten Cents, Judd-328, Pollock-398, Cassel-67, High R.7, PR64+ Cameo PCGS.** The obverse features the usual heraldic shield with arrows, surrounded by an inverted laurel wreath, with the inscription EXCHANGED FOR U.S. NOTES around. The reverse shows the denomination 10 CENTS in two lines above the date, with the inscriptions POSTAGE CURRENCY and ACT JULY 1862 around. Struck in aluminum with a reeded edge. Various aluminum and copper compositions have been found and some pieces weigh 8 grains while others weigh 11 grains. Recent versions of Judd have simply divided the aluminum pieces into reeded and plain edge versions. This is an exceptionally bright aluminum piece with deeply mirrored fields and heavily frosted devices. Die cracks and planchet irregularities are seen on each side. PCGS# 535040 Base PCGS# 60487

1867 Longacre Five Cent in Aluminum
Judd-561, PR64

- 4668 1867 Five Cents, Judd-561, Pollock-622, R.5, PR64 PCGS.** The central obverse device is a head of Liberty facing left, wearing a headdress of four large feathers and a ribbon with the inscription UNION AND LIBERTY. Resting in the hair in front of the ribbon are four large stars. The Chief Engraver's name LONGACRE F. is stylishly displayed at the truncation of the neck. The legend UNITED STATES OF AMERICA around, with the date in the exergue. The reverse features a Roman numeral V over an ornate shield, with IN GOD WE TRUST at the top. Struck in aluminum with a plain edge. Struck in aluminum and copper, plain and reeded edges, the aluminum pieces with plain edge are by far the most frequently encountered. J. Colvin Randall believed 100 examples were struck of this variant. Oxidation surrounds the devices on each side, subduing the bright flash of this aluminum proof. Fully struck. NGC ID# 29M4, PCGS# 60771

1867 Five Cent Pattern in Nickel
Judd-566, Toned PR63

- 4669 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR63 PCGS.** The obverse resembles the issued three cent nickel. Liberty is wearing a coronet inscribed LIBERTY. Around, the legend UNITED STATES OF AMERICA and below, the date. On the reverse, the denomination 5 CENTS is enclosed within a laurel wreath, with the motto IN GOD WE TRUST above. Struck in nickel with a plain edge. Two to three dozen examples are believed known of this nickel pattern. A very small number of copper strikes are also known of this design. Each side displays a significant amount of gray-golden toning, of sufficient depth to subdue the brightness of the nickel alloy and the proof finish in the fields. NGC ID# 29M9, PCGS# 60776

1867 Shield Nickel in Copper
Judd-573, Pollock-649, Reverse of 1866
MS63 Brown

- 4670 1867 Shield Nickel, Judd-573, Pollock-649, Low R.6, MS63 Brown PCGS.** Similar to the regular issue 1867 No Rays nickel, but struck in copper (instead of copper-nickel) with a plain edge. Judd-573 has two variants, which slightly differ in the arrangement of the stars on the reverse. Pollock-649 shows the star above CENTS pointing between the E and N and between the T and S; while on Pollock-650 the stars above CENTS point to the E and T in CENTS. This is the Reverse of 1866 and the scarcer of the two variants. Of special note, this is one of the few patterns struck in business strike format. Nevertheless, the fields are bright and semiprooflike with rich sea-green and reddish-brown toning over each side and a number of carbon spots scattered about. PCGS# 60884

1868 Cent, Struck in Nickel
Judd-605, PR66

- 4671 1868 One Cent, Judd-605, Pollock-670, R.5, PR66 PCGS.** The design closely resembles the contemporary three cent nickel, but only a single pillar represents the denomination within the laurel wreath. Struck in nickel with a plain edge. This design was struck in nickel, copper, and aluminum. The nickel impressions are by far the most frequently encountered (in aluminum it is unique). The planchet for this piece shows differing degrees of preparation in the Mint. The obverse is bright with nicely reflective fields, while the reverse is less polished with horizontal streaks of granularity across that side. An untoned example. NGC ID# 29UU, PCGS# 60817

1868 Three Cent Nickel Design in Copper
Judd-616, PR64 Red and Brown

- 4672 1868 Three Cent Nickel, Judd-616, Pollock-682, High R.6, PR64 Red and Brown PCGS.** The obverse and reverse designs are similar to the contemporary three cent nickel, but the denomination is not ribbed and the obverse rim is unusually wide. Struck in copper with a plain edge. As noted on USPatterns.com, Tom Delorey observed that the obverse design is a regular 17.9 mm three cent obverse set in a small cent 19.1 mm die blank, leaving a wide border around that side; while the reverse is sized as a normal small cent. Examples were struck in copper (relatively common), copper-nickel (thick and thin planchets and scarce), and aluminum (unique). Each side displays significant portions of bright mint red with blue-brown mellowed color elsewhere. PCGS# 70829

1868 Five Cent Pattern in Nickel
Judd-633, Remarkable PR66 Deep Cameo

- 4673 1868 Five Cents, Judd-633, Pollock-704, R.4, PR66 Deep Cameo PCGS.** The obverse is a larger variant of the three cent nickel design, while the reverse has a large V in the center surrounded by a laurel wreath and a small Maltese cross at the top. IN GOD WE TRUST is on a ribbon around the cross. Struck in nickel with a plain edge. Struck with a low and high date, this is the low-date variant and is scarcer as such. This is an amazingly attractive nickel product. In fact, it looks more like silver it is so bright and the fields so deeply reflective with frosted devices. The only giveaway is slight strike softness, common to nickel products, over the high points of Liberty's hair, which is opposite from the V on the reverse. PCGS# 960851

1869 One Cent in Nickel
Judd-666, Unlisted in Pollock, PR65

- 4674 1869 One Cent, Judd-666, Unlisted in Pollock, R.5, PR65 PCGS.** The obverse exhibits a bust of Liberty facing left with the legend UNITED STATES OF AMERICA around the periphery and the date below the bust. Liberty wears a coronet inscribed LIBERTY. A Roman numeral I is centered in a laurel wreath on the reverse. Struck in nickel with a plain edge. Several obverse / reverse variations are known of this pattern. This appears to be a previously unrecorded one. The 9 in the date is noticeably left of the usual position beneath the hair curl. The reverse is the often-seen one (A) with thick ribbon ends. Most curious is the nearly rim-to-rim obverse die crack that extends from 11 o'clock to the field just above the 5 o'clock position. Muted gray patina covers each side, but fails to subdue the brightly mirrored fields. NGC ID# 29PM, PCGS# 60890

1869 Three Cent Nickel in Nickel
Judd-676, PR64 Cameo

- 4675 1869 Three Cent Nickel, Judd-676, Pollock-753, R.4, PR64 Cameo PCGS.** Similar to the adopted dies, except the Roman numeral on the reverse lacks ribbing. Two variants are known of this pattern, this is the more available one with normal dentils on the reverse and the wreath slightly low of center (easiest seen by looking at the top of the wreath). Struck in nickel with a plain edge. Only these two nickel variants are available of this pattern. A copper piece hasn't been seen since 1957. The surfaces are muted pearl-gray but still show bright mirroring in the fields. NGC ID# 29PV, PCGS# 388660

1869 Three Cent Pattern in Nickel
Judd-676, PR66+ Cameo

- 4676** 1869 Three Cent Nickel, Judd-676, Pollock-753, 755, R.4, PR66+ Cameo NGC. Ex: Eric P. Newman Collection. The design resembles the regular dies, with Liberty wearing a coronet on the obverse, surrounded by UNITED STATES OF AMERICA, and the date below. The reverse is known in two varieties; this coin represents the more common one, with a low laurel wreath surrounding the denomination III, and short dentils. Struck in nickel with a plain edge. Several dozen examples of this plentiful pattern variety are known with just over 100 examples certified by NGC and PCGS. These patterns were issued in cents with similar design one cent and five cents patterns. This pleasing Premium Gem proof exhibits soft central details and natural planchet marks that remain from a less than full strike. The nickel-gray surfaces have fully mirrored fields and satiny devices. NGC ID# 29PV, PCGS# 388660

1869 Standard Silver Ten Cent in Copper
Judd-710, PR65 Brown

- 4677** 1869 Standard Silver Ten Cents, Judd-710, Pollock-789, Low R.7, PR65 Brown PCGS Secure. Ex: Simpson. Standard Silver issue with only one star at the front of Liberty's head on the obverse. The reverse has 10 CENTS in the center, surrounded by a wreath of oak and laurel with STANDARD SILVER 1869 around the margin. Struck in copper with a reeded edge. Copper strikings of this obverse / reverse die pairing are rare with only a dozen or so pieces known. Deep blue, green, and rose toning covers each side with nicely reflective mirrors that shine through the multiple layers of color. NGC ID# 29RR, PCGS# 60935

1869 Ten Cents in Copper
Judd-715, PR61 Red and Brown

- 4678** 1869 Ten Cents, Judd-715, Pollock-794, R.7, PR61 Red and Brown PCGS. This is the regular issue design of the Seated Liberty dime obverse, except with no date. The composition is expressed on the reverse as SIL. 9 / NIC. 1 with the date below. Struck in copper with a reeded edge. This design was also produced in a nickel composition. Copper strikings are roughly half as scarce as those in nickel with only a half dozen known. Obviously cleaned, the surfaces are bright red with slightly subdued variations in hue. PCGS# 70940

1869 Standard Silver Quarter in Silver
Judd-722, PR63

- 4679** 1869 Standard Silver Quarter Dollar, Judd-722, Pollock-803, High R.6, PR63 NGC. On the obverse a right-facing Liberty wears a Phrygian cap decorated with three stars at the front. A ribbon bearing the word LIBERTY flows from the base of the cap to Liberty's shoulder. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. The reverse shows STANDARD SILVER around the upper edge, with 25 / CENTS in an open oak and laurel wreath. The date, 1869, is at the lower periphery. Struck in silver with a plain edge. The silver strikings and the reeded edge copper pieces of this obverse / reverse design are fairly common, but the plain edge copper and both types of aluminum strikings are rare. This is a mostly brilliant coin that displays deeply mirrored fields. Light russet patina encircles the margins on each side. NGC ID# 29S6, PCGS# 60949

1869 Standard Silver Half in Silver
Judd-742A, PR60
No Initial 'B' at Back of Cap

- 4680 1869 Standard Silver Half Dollar, Judd-742A, Pollock-830, R.8, PR60 PCGS. A bust of Liberty faces right with UNITED STATES OF AMERICA around and a scroll with IN GOD WE TRUST below. Liberty wears a cap ornamented with two large stars. William Barber's initial "B" is **not** seen within the folds of the ribbon at the back of the cap. The reverse has 50 CENTS centered within a wreath of oak and laurel leaves with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. This rare variety was apparently first discovered in the Morris Evans Collection in 1998. So far it is only known in silver and with a reeded edge. Deep freckled gray-blue toning covers most of each side. The fields are only moderately reflective, but there are no obvious contact marks present. PCGS# 60970

1869 Standard Silver Half in Silver
Judd-754, Deeply Toned PR65

- 4681 1869 Standard Silver Half Dollar, Judd-754, Pollock-838, R.5, PR65 PCGS. A bust of Liberty faces right and wears a headband inscribed LIBERTY. The headband is ornamented with a star. The legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse has 50 CENTS centered in a wreath of oak and laurel with STANDARD SILVER above and the date 1869 below. Struck in silver with a reeded edge. Reeded edge silver examples are fairly common, but plain edge examples are seldom seen, as are the pieces struck in copper and aluminum. The obverse is covered in cobalt-blue and the reverse shows a rose-colored center with the same cobalt-blue around the margins. Still brightly reflective in the fields in spite of the considerable patina. NGC ID# 29T5, PCGS# 60984

1870 Standard Silver Ten Cent in Silver
Popular William Barber Design
Judd-826, Richly Toned PR64

- 4682 1870 Standard Silver Ten Cents, Judd-826, Pollock-916, High R.6, PR64 PCGS. William Barber's Seated Liberty design. A seated representation of Liberty faces left. Behind is a free-standing pole topped with a Liberty cap. Liberty's right hand rests upon a shield with a scroll inscribed LIBERTY. The statutory legend follows the border, and the date is below. The reverse has the denomination, 10 CENTS, inside a wreath composed of corn and cotton. Above is the word STANDARD. The reverse rim is much wider than the obverse rim. Struck in silver with a plain edge. Examples with this obverse / reverse combination were struck in silver, copper, and aluminum, each in both reeded and plain edge formats. Only a dozen or so pieces are known in silver with a plain edge and a similar number with a reeded edge. Rich turquoise and gray-blue toning covers each side with bright underlying mirrors in the fields. The most obvious pedigree identifier on this example is a spot of lighter color at 10 o'clock on the obverse. NGC ID# 29V3, PCGS# 61070

1870 Standard Silver Ten Cents in Copper
Judd-827, PR64 Red and Brown

- 4683 1870 Standard Silver Ten Cents, Judd-827, Pollock-917, R.7-8, PR64 Red and Brown PCGS. A William Barber design, the obverse depicts a seated figure of Liberty facing left and supporting a shield in her right hand, an olive branch in her left. A free-standing liberty pole is present behind the shield. On the reverse, 10 CENTS is within a wreath of cotton and corn, and the inscription STANDARD is above. Struck in copper with a reeded edge. A moderately scarce design combination that was struck in silver, copper, and aluminum, both reeded and plain edge variants of each. The reverse design is smaller than the obverse, creating a wider margin between the denticles and edge. This piece displays generous portions of bright mint red, while the fields show subdued brown. Light specks of carbon are scattered throughout. PCGS# 71071

**1870 Ten Cent Pattern in Silver
Judd-837, Toned PR63**

- 4684** 1870 Standard Silver Ten Cents, Judd-837, Pollock-928, R.5, PR63 PCGS. This Standard Silver design depicts a small bust of Liberty facing right. Her cap shows three stars. The reverse exhibits a corn and cotton wreath with the denomination and date inside. The remaining statutory legends occupy the obverse margin and upper reverse border. Struck in silver with a reeded edge. This is a fairly common pattern and the plain edge silver strikings are also frequently seen. The less-common variants are those struck in copper and aluminum. A number of small scuffs and contact marks are seen on each side, accounting for the grade. Deep rose colored centers are surrounded by cobalt-blue margins. An affordable entry coin for the pattern collector. NGC ID# 94FK, PCGS# 61081

**1870 Standard Silver Ten Cent in Copper
Judd-846, PR64 Red and Brown**

- 4685** 1870 Standard Silver Ten Cents, Judd-846, Pollock-945, Low R.7, PR64 Red and Brown PCGS. The obverse features a head of Liberty with no stars on the tiara, UNITED STATES OF AMERICA above, and the motto on a scroll below. The reverse has the date and denomination encircled by an open agricultural wreath, with STANDARD above. Struck in copper with a plain edge. The silver strikings are the commonly encountered examples of this pattern, while the copper and aluminum pieces are scarce. Only a half dozen are believed extant of each of these types — in both metals and in reeded edge and plain edge formats. The Red and Brown designation is correct, but what needs to be noted is each side is uniform in color with even mellowing. The reverse is a couple of shades deeper in color than the obverse. Few surface imperfections are seen. NGC ID# 29VN, PCGS# 71090

**1870 Standard Silver Ten Cent in Silver
Judd-850, Richly Toned PR64**

- 4686** 1870 Standard Silver Ten Cents, Judd-850, Pollock-957, High R.6, PR64 PCGS Secure. Ex: Simpson. A Standard Silver design that shows a bust of Liberty facing right with UNITED STATES OF AMERICA above and IN GOD WE TRUST on a scroll below. Liberty wears a plain headband ornamented with a single star. The reverse has 10 CENTS and the date in the center of a wreath of cotton and corn with STANDARD above. Struck in silver with a plain edge. Both edge variants in silver are fairly common, but copper and aluminum examples are rare. Both sides display deep blue-gray patina with a slight rose undertone. PCGS# 61094

**1870 Standard Silver Quarter in Copper
Judd-878, PR62 Red and Brown**

- 4687** 1870 Standard Silver Quarter Dollar, Judd-878, Pollock-975, R.7, PR62 Red and Brown PCGS. William Barber's Seated Liberty design with a Liberty Pole behind with a Phrygian cap atop and 13 stars around the margin. The reverse has 25 CENTS in the center and is surrounded by a thick agricultural wreath with STANDARD in small letters at the top. Struck in silver, copper, and aluminum — each metal produced in reeded edge and plain edge formats. Only a dozen or so examples are believed known in copper and with a reeded edge. Each side of this piece was vigorously cleaned and an oval-shaped dark stain of unknown origin is located in the center of the reverse. PCGS# 71122

**1870 Standard Silver Quarter in Silver
Judd-888, Beautifully Toned PR66**

- 4688** 1870 Standard Silver Quarter Dollar, Judd-888, Pollock-987, R.5, PR66 PCGS Secure. CAC. Ex: Simpson. A bust of Liberty wearing a cap ornamented with three stars faces right, the legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse reads 25 CENTS 1870 in the center and is surrounded by a wreath of cotton and corn. Struck in silver with a reeded edge. This reeded edge variant is fairly common and examples are known on 77-grain and 84-grain planchets. No weight is stated on the insert of this piece, but it does appear slightly thinner than a usual quarter, so perhaps this is a lighter weight piece. (It is not known which is scarcer.) This is a pattern of great visual interest. The surfaces are sea-green and purplish-rose with brightly reflective mirrors on each side. A couple of squiggly lint marks were struck into the surface on both obverse and reverse. NGC ID# 29WW, PCGS# 61132

**1870 Standard Silver Quarter in Copper
Judd-903, PR61 Red and Brown**

- 4689** 1870 Standard Silver Quarter Dollar, Judd-903, Pollock-1018, R.7, PR61 Red and Brown PCGS. The bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 25 CENTS and date 1870 are in a wreath of cotton and corn with the inscription STANDARD above. Struck in copper with a plain edge. Like most Standard Silver patterns, this obverse / reverse combination was struck in silver, copper, and aluminum, in both reeded edge and plain edge variants. The common pieces of this type are the silver, reeded edge examples. The copper, plain edge pieces are much scarcer with less than a dozen coins known. This piece was heavily cleaned and displays the resultant bright red color one would expect. What is unexpected, though, are heavy die clash marks on each side, something often seen on regular issue coins but rarely encountered on patterns. PCGS# 71147

**1870 Standard Silver Half in Silver
Judd-952, Toned PR64**

- 4690** 1870 Standard Silver Half Dollar, Judd-952, Pollock-1095, Low R.7, PR64 PCGS. The bust of Liberty faces right on the obverse, with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 / CENTS and date 1870 are in an agricultural wreath of cotton and corn, with the inscription STANDARD above. Struck in silver with a plain edge. As usually seen in the Standard Silver series, the silver strikings are the most frequently encountered. Copper and aluminum pieces were also produced (all in reeded and plain edge format). As such, this would be an excellent opportunity for the collector to acquire an attractive, well-preserved Standard Silver half. Light rose centers are surrounded by sea-green margins. The obverse is several shades lighter than the reverse and the obverse displays considerable reflectivity in the fields. NGC ID# 29YL, PCGS# 61198

**1870 Copper Standard Silver Half
Judd-977, PR61 Brown**

- 4691** 1870 Standard Silver Half Dollar, Judd-977, Pollock-1089, Low R.7, PR61 Brown PCGS. A bust of Liberty faces right on the obverse with the motto IN GOD WE TRUST on a scroll below. Liberty wears a cap that is ornamented with two stars, and a ribbon that crosses her shoulder is inscribed with LIBERTY in raised letters. The initial B is seen within the folds of the ribbon behind Liberty's cap, distinguishing this as the Obverse of 1869. The legend UNITED STATES OF AMERICA is at the upper periphery. On the reverse, the denomination 50 CENTS is expressed within a wreath of oak and laurel. The date 1870 is below, the word STANDARD is above. Struck in copper with a reeded edge. As usual, examples were struck in silver, copper, and aluminum with both edge treatments. There are no common type coins in this series however; each issue is rated R.7, meaning half a dozen or fewer pieces are known. This piece was vigorously cleaned and now shows bright yellow-red and deeper red color on each side. NGC ID# 29Z2, PCGS# 61223

**1871 Three Cent Nickel in Copper
Judd-1045, PR61 Brown**

- 4692 1871 Three Cent Nickel, Judd-1045, High R.7, PR61 Brown PCGS.** Regular dies trial for the three cent nickel. Struck in copper with a plain edge. USPatterns.com notes: "Although described as a regular dies trials piece in aluminum [and copper], these were actually struck for sale to collectors as part of complete sets." Irrespective of the intention of these strikings, these are exceptionally rare pieces. Our records indicate we have never handled one. Indeed, no major auction company has since 1993. The only record of sale is noted in the Judd book by State Rare Coin Auctions in January 1981. While fewer than a half dozen are estimated to exist, we have to wonder if there are even fewer; perhaps the copper strikings are actually R.8, like the aluminum pieces. The surfaces of this piece are bright from cleaning with some darker patina surrounding the obverse periphery and within the reverse devices. A very rare opportunity. PCGS# 61304

**1871 Indian Princess Ten Cent in Copper
Judd-1081, PR65 Red**

- 4693 1871 Standard Silver Ten Cents, Judd-1081, Pollock-1217, R.7, PR65 Red NGC.** The Longacre Indian Princess design is surrounded by stars on the obverse, and paired with a reverse that features 10 CENTS in the center, surrounded by a wreath of cotton and corn, and the word STANDARD along the top border. Struck in copper with a reeded edge. Only a half dozen or so pieces are known of this obverse / reverse combination in copper. The only other alternative are aluminum strikings, and only three of those are believed known. This example presents one of the rarest pursuits in pattern collecting: pieces that exist today with full red color. Very few copper patterns remain today with their original mint luster fully intact. Curiously, the NGC Census Report shows three such pieces. Given the rarity of Red patterns we have to wonder if that number actually represents the resubmission of this piece two more times in hopes of attaining a higher grade. The red color is even over each side and there are no mentionable contact marks and little in the way of carbon flecking. A few die striations can be seen to the right of the figure of Liberty. NGC ID# 2A3J, PCGS# 81340

**1871 Indian Princess Ten Cent in Copper
Judd-1085, PR64 Brown**

- 4694 1871 Ten Cents, Judd-1085, Pollock-1221, High R.6, PR64 Brown PCGS.** The Longacre Indian Princess design on the obverse features Liberty seated with left hand resting on a globe, right hand holding a pole with cap on top, and conjoined flags behind. The reverse is from the regular issue dies. Struck in copper with a reeded edge. This design on the obverse, paired with the regular reverse gives the idea what an alternative Seated Liberty dime would have looked like; although why it would have been struck in copper is a mystery. A dozen or so copper examples are believed known. The surfaces are muted brown with occasional glimpses of underlying red. NGC ID# 6SS3, PCGS# 61344

**1872 Half Dime in Copper
Judd-1191, PR65 Red
Finest Known**

- 4695 1872 Half Dime, Judd-1191, Pollock-1331, R.7, PR65 Red PCGS.** Dies trial piece of the 1872 half dime. Struck in copper with a reeded edge. Examples were struck in copper and aluminum. Both compositions are rare. Fewer than four copper impressions are believed known and fewer than three in aluminum, according to USPatterns.com. The mint red luster shows very little variation in hue on either side. It is especially noteworthy that the reverse is several shades brighter even than the obverse. A remarkably preserved copper pattern. Sharply defined. NGC ID# 35LN, PCGS# 81462

1879 Metric Dollar in Silver or Goloid
Judd-1617, PR62

- 4696** 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR62 NGC. William Barber's Metric dollar with Liberty wearing a coronet with a border of pearls, similar in design to the half union patterns from 1877. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in goloid or silver with a reeded edge. Also struck in copper, aluminum, and two unique pieces in white metal and lead. Like many goloid patterns, most examples have not undergone metallurgical testing to determine if they really are goloid or regular coin silver planchets. In spite of numerous small contact marks and planchet flakes on each side, the fields still show deep mirroring. Brilliant. NGC ID# 2AH8, PCGS# 61995

1879 Metric Dollar in Silver or Goloid
Judd-1617, Brilliant PR65

- 4697** 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR65 NGC. William Barber's Metric dollar with Liberty wearing a coronet with a border of pearls. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in goloid or silver with a reeded edge. Without metallurgical testing it is impossible to know what composition these pieces were struck in. This is a splendid, bright, deeply reflective example whose surfaces are mostly brilliant, showing just a bit of occasional haziness here and there. Ex: FUN Signature (Heritage, 1/2010), lot 3770. NGC ID# 2AH8, PCGS# 61995

1879 Metric Dollar in Silver
Judd-1618, PR58

- 4698** 1879 Metric Dollar, Judd-1618, Pollock-1813, R.5, PR58 PCGS. William Barber's Metric dollar pattern with an obverse that is similar to the one used on the 1877 half union patterns. Liberty wears a coronet with a border of pearls. The reverse shows a partial wreath of cotton and corn tied at the base, a ribbon, and inscriptions that include DEO EST GLORIA and the elemental composition of goloid. Struck in silver with a reeded edge. Several hundred of these pieces are known. The reverse states goloid composition, but to our knowledge none have ever undergone elemental analysis and it is just assumed these pieces were struck from coin silver. As frequently as these silver pieces are seen, others are known in copper and aluminum but are much scarcer. Then there are two "fancy" pieces, one in white metal and one in lead, both are unique. This example shows slight evidence of high point friction. Each side retains significant silver-gray with accents of dark-gray / russet around the outer devices on the obverse and throughout the reverse. NGC ID# 2AH9, PCGS# 61996

1879 Goloid Metric Dollar in Goloid (or Silver)
Judd-1626, PR58

- 4699** 1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4, PR58 PCGS. William Barber's design for the Goloid Metric dollar with a capped head of Liberty on the obverse, paired with a reverse that carries the statutory as well as elemental inscriptions. A circle of stars about the central inscriptions breaks the otherwise continuous wording. Allegedly struck in goloid (a silver alloy that includes a small portion of gold) with a reeded edge. We say "allegedly" because to our knowledge, none have undergone elemental testing. These are the common composition for this obverse / reverse pairing. Copper and aluminum examples are much rarer. Slight friction is seen over each side, and the interiors are mostly untuned with russet-golden color surrounding the devices. NGC ID# 2AHE, PCGS# 62004

**1879 William Barber Metric Dollar
Allegedly Struck in Goloid
Judd-1626, PR64**

- 4700** 1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4, PR64 NGC. The William Barber Goloid Metric dollar designs pairs a capped Liberty Head with a reverse carrying the statutory as well as elemental inscriptions. A circle of stars about the central text breaks the otherwise continuous wording. Purportedly struck in goloid (a silver alloy that includes a small portion of gold) with a reeded edge. These were issued in three-piece sets that also included the 1879 Flowing Hair stella in gold (Judd-1635) and the 1879 silver Metric dollar design (Judd-1617), which had an obverse similar to that used on the famous fifty dollar (half union) gold patterns of 1877 (Judd-1546). Light golden-rose toning is seen over each side with strong mirrored reflectivity in the fields with no obvious problems other than a few light hairlines. NGC ID# 2AHE, PCGS# 62004

**1881 Liberty Head Cent in Copper
Judd-1666, PR65 Red and Brown**

- 4701** 1881 Liberty Head One Cent, Judd-1666, Pollock-1866, R.6-7, PR65 Red and Brown PCGS. Charles Barber's Liberty nickel obverse is seen here on a diminutive one cent pattern. This same obverse was also used on three cent and five cent patterns from this year. The reverse is simply laid out with a Roman numeral I in the center, surrounded by a wreath of wheat and cotton. Struck in copper with a plain edge. The common examples of this design are those struck in nickel. Only a dozen or so copper examples are believed known. The interesting sidenote about the copper pieces (on USPatterns.com) is that Virgil Brand bought an astonishing hoard of six copper pieces in 1916 for \$35. A half dozen aluminum pieces are also traced. The reverse is completely red, mostly a deeper cherry-red, while the obverse displays deeper blue-brown color in the center. No carbon is apparent. NGC ID# 2AJR, PCGS# 72062

**1881 Liberty Head Three Cents in Nickel
Judd-1668, PR64**

- 4702** 1881 Liberty Head Three Cents, Judd-1668, Pollock-1869, High R.6, PR64 PCGS. The Charles Barber Liberty Head obverse. Head facing left, similar to the adopted Liberty Head nickel design, but UNITED STATES OF AMERICA rings the obverse in thick, widely spaced letters, with date 1881 below. On the reverse a Roman numeral III is flanked by an agricultural wreath, again similar to the 1883 regular-issue nickel design. Struck in nickel with a plain edge. Nickel strikings, such as this one, are relatively common. The copper and aluminum pieces are much scarcer with a dozen and half dozen known respectively. The obverse fields are bright and much brighter than the reverse. The reverse is subdued with noticeably deeper gray patina than seen on the obverse. NGC ID# 2AJT, PCGS# 62064

**1883 Liberty Nickel Variant in Aluminum
Judd-1711, PR65**

- 4703** 1883 Liberty Head Five Cents, Judd-1711, Pollock-1915, Low R.7, PR65 PCGS. The obverse die is similar to the regular-issue Liberty nickel, but UNITED STATES OF AMERICA replaces stars around the peripheries. Peripheral stars appear on the reverse, with FIVE above and CENTS below, with a wreath — again similar to the regular issue — containing 50 N. / 50 C. on two lines, a reference to a 50:50 nickel / copper mix. Struck in aluminum with a plain edge. Two to three dozen nickel strikes were produced, but aluminum pieces are rare with only a half dozen or so known. The surfaces are bright and unoxidized with deeply reflective fields. There are a few contact marks and minor planchet flaws scattered across each side, but none are individually bothersome. PCGS# 62128

1884 Eastman Johnson 'Holey' Cent in Nickel
Judd-1721, PR65

- 4704** 1884 One Cent, Judd-1721, Pollock-1929, R.5, PR65 PCGS. Eastman Johnson's "holey" design for the cent with the center perforated with an irregular circumference. The obverse bears the legend UNITED STATES OF AMERICA about the upper rim and the date at the bottom. The reverse shows the denomination ONE CENT at the top with an inverted shield and two laurel sprigs below. Struck in nickel with a plain edge. These pieces were struck in nickel, aluminum and white metal. Two variations exist of the nickel strikes, thin and thick. This appears to be a thick planchet piece. The fields are only moderately reflective and each side displays dove-gray patina. Lightly spotted through the legends. NGC ID# 2AL9, PCGS# 62150

1884 Eastman Johnson Perforated Five Cent in Nickel
Judd-1724, PR64

- 4705** 1884 Five Cents, Judd-1724, Pollock-1934, Low R.6, PR64 PCGS. The Eastman Johnson "holey five cent" design. The obverse shows FIVE above and CENTS below an octagonal opening, undoubtedly handcut, with shields on either side. The reverse shows UNITED STATES OF AMERICA at the outer rim, with an inner circle of 13 stars and date 1884 below. Struck in nickel with a plain edge. Like the nickel cents of the same design, these pieces were also struck on thick and thin planchets. This appears to be a thick planchet variant. Examples were also struck in aluminum. Lightly and evenly toned over each side, the patina is not sufficient to subdue the mirrored flash in the fields. A carbon spot is noted by the reverse rim below the C in CENTS. NGC ID# 2ALB, PCGS# 62154

1896 Five Cent Pattern in Nickel
Judd-1771, PR63

- 4706** 1896 Five Cents, Judd-1771, Pollock-1986, Low R.6, PR63 PCGS. Charles Barber's design features a shield at the center obverse with LIBERTY incused. Crossed poles behind support a Liberty cap and a tiny eagle. E PLURIBUS UNUM is at the top rim, with stars seven left, six right. On the reverse a large 5 occupies the center with a small CENTS below, an open olive sprig surrounding and UNITED STATES OF AMERICA at the rim. Struck in nickel with a plain edge. Judd-1771 is stated as struck in pure nickel, which is magnetic. This piece is slightly magnetic, so we assume (absent metallurgical analysis) that this piece is not 100% nickel. The fields are bright and there are a number of small contact marks scattered across each side. NGC ID# 2AMC, PCGS# 62225

GOLD DOLLARS

- 4707** 1849 Open Wreath, D-4, Close Stars, MS64 PCGS. Breen-6004, Thin Numerals. A combination of prooflikeness around the central motifs and frosted raised elements provide extra visual appeal across the sharply struck surfaces of this Choice first-year gold dollar. Die polish lines and spindly stars at the upper obverse suggest freshly lapped dies. Attractive orange and lime-green accents add eye appeal. NGC ID# 25B9, PCGS# 521671 Base PCGS# 7502
- 4708** 1849 Open Wreath, D-4, Close Stars, MS64+ PCGS. CAC. Thin date numerals. Frosty yellow-gold luster produces pleasing visual appeal on this high-end near-Gem, while sharp design elements further add to its type coin appeal. The first-year issue gold dollar is available in this grade but elusive just one numeric level finer. NGC ID# 25B9, PCGS# 521671 Base PCGS# 7502
- 4709** 1850-C AU50 ANACS. Variety 1. The Charlotte Mint produced the second-lowest gold dollar mintage in its history in 1850 (only 6,966 pieces). The issue is still slightly more available than the 1850-D. Reddish-gold surfaces house strong motifs with bold detail on the stars and wreath. Smooth for the grade. NGC ID# 25BG, PCGS# 7510
- 4710** 1850-D VF30 PCGS. Variety 2-C. The low mintage of just 8,832 pieces makes this Dahlonega gold dollar scarce in all grades and a much better branch mint issue in the Type One series. As always, the centers show a soft strike, yet the smooth surfaces and pleasing apricot-gold patina complement bold definition on the outer elements. Population: 5 in 30, 84 finer (4/17). NGC ID# 25BH, PCGS# 7511
- 4711** 1851-C AU55 NGC. Variety 3. Die polishing has removed much of the top curve of the second S in STATES as well as the adjacent die crack. The surfaces are attractive and original with considerable remaining mint luster. Lightly marked. NGC ID# 25BL, PCGS# 7514

1852 Gold Dollar, Bold MS65
Good Coin for Type Purposes

4712 1852 MS65 PCGS. The 1852 is a favorite among type collectors because of its availability in high grades. This Gem would be perfect for such purposes. Light yellow-gold hues are accompanied by accents of lavender and sun-gold. Glowing luster illuminates noticeably clean surfaces. Pinpoint-sharp. There are 22 finer submissions at PCGS (4/17). NGC ID# 25BP, PCGS# 7517

4713 1853 MS65 PCGS. The mintage of 4 million 1853 gold dollars assures availability of this issue in all grades up to and including Gem. The fields show evidence of striations but little brightness resulted, the striations were probably done to eliminate die cracks or other Mint-made imperfections. The strike is complete throughout. A few stray marks on the reverse are all that prevent an even higher grade. NGC ID# 25BU, PCGS# 7521

4714 1853 MS65 PCGS. Thickly frosted, radiant luster complements sharp design elements on this Gem Type One gold dollar. Yellow-gold and peach-orange hues spill over the beautifully preserved surfaces. Finer 1853 gold dollars may be out of reach for many collectors. NGC ID# 25BU, PCGS# 7521

4715 1853-O MS64 NGC. Variety 2. In addition to the centered date, this piece also shows the characteristic repunching on the left foot of the 1 and the base of the 3 in the date. The surfaces are smooth and satiny with a mild reddish patina. Remarkably strong detail is evident, especially so on the obverse. Census: 41 in 64 (2 in 64+), 9 finer (4/17). NGC ID# 25BX, PCGS# 7524

4716 1859-C VF30 PCGS. Variety 1. This olive-green gold dollar shows considerable signs of circulation, including significant blending over typically struck motifs and scattered wisps. The obverse is stronger than the reverse. Only 5,235 gold dollars were struck at Charlotte in 1859. CoinFacts estimates 125 pieces survive. NGC ID# 25CM, PCGS# 7552

1862 Gold Dollar, Gleaming Gem

4717 1862 MS65 NGC. CAC. Gleaming honey-gold color merges with frosty luster, delivering spectacular eye appeal for which CAC has awarded a coveted green sticker. This Gem gold dollar, one of 1.3 million examples struck in 1862, is boldly struck on the headdress, curls, and wreath elements. Few marks of note appear on either side. NGC ID# 25CW, PCGS# 7560

1874 Gold Dollar, Vibrant MS67
Undesignated Prooflike Fields

4718 1874 MS67 PCGS. While the 1874 is readily available as an issue from the large mintage of 198,800 pieces, Superb Gem examples are rare. Prooflike examples are also rare (as are the true proofs). The Bowers reference gives a brief comment in the Auction Information section: "A small percentage of listings note a prooflike surface." The fields of this example are blatantly prooflike on both sides. Variegated toning ranges from deep-orange to lemon-yellow, with frosted raised motifs and a razor-sharp strike. Population: 36 in 67 (2 in 67+), 2 finer (4/17). NGC ID# 25DC, PCGS# 7575

1877 Gold Dollar, MS65
Elusive, Low-Mintage Issue

4719 1877 MS65 PCGS. A familiar rarity in U.S. coinage that brings to mind the Indian cent and proof-only Shield Nickel issues from the same year. Just 3,920 pieces were produced and, like virtually all high grade survivors, the fields display glittering prooflike qualities. On this Gem specimen, there is also splendid field-to-device contrast and subtle reddish-golden color. Unlike other low-mintage Gold Dollar issues from the following decade, the 1877 does not appear to have been extensively hoarded and is not often available in any grade. Population: 11 in 65, 23 finer (4/17). NGC ID# 25DE, PCGS# 7578

4720 1881 MS66 PCGS. CAC. The 1881 gold dollar claims a mintage of just 7,620 pieces, but the issue was hoarded by collectors and coin dealers at the time of issue. As a result, the 1881 is a relatively available issue in high grade today. This impressive Premium Gem displays sharply detailed design elements and well-preserved yellow-gold surfaces that show prooflike reflectivity in most areas. Population: 85 in 66 (4 in 66+), 143 finer. CAC: 24 in 66, 53 finer (4/17).
Ex: Beverly Hills Signature (Heritage, 11/2014), lot 5041. NGC ID# 25DK, PCGS# 7582

1881 Gold Dollar, Dazzling MS67

4721 1881 MS67 PCGS. The 1881 gold dollar was made in strictly limited quantities (7,620 pieces) and never was intended to serve in commercial channels. Many coins were given as gifts and saved numismatically, explaining the healthy survivorship in the highest levels of Mint State. This pristine, fully struck Superb Gem has light orange-gold color and dazzling luster. NGC ID# 25DK, PCGS# 7582

4722 1883 MS66 PCGS. A delightful Premium Gem, with sharply detailed design elements and especially vibrant mint luster throughout. The orange-gold surfaces are virtually pristine and eye appeal is terrific. From a business-strike mintage of 10,800 pieces. NGC ID# 25DM, PCGS# 7584

4723 1888 MS66 PCGS. An affordable but eye-appealing Premium Gem type coin from near the end of the series, this 1888 gold dollar offers a bold strike and unabraded surfaces. Mint-gold, summer-wheat, and peach-orange hues are present on each side. NGC ID# 25DT, PCGS# 7589

4724 1889 MS65 PCGS. CAC. A sun-gold and lime-green Gem. The strike is bold, and both sides exhibit booming luster. The lower portion of the wreath is die doubled, usual for this final-year issue. Certified in an old green label holder. NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

4725 1836 Script 8 AU55 PCGS. Breen-6143, Variety 11, R.2. Traces of luster reside in the protected areas of this greenish-gold Choice AU quarter eagle. Well-struck design elements and minimal marks round out the coin's pleasing eye appeal. NGC ID# 25FU, PCGS# 7694

4726 1836 Script 8 AU58 NGC. Head of 1835, Breen-6143, Variety 11, R.2. Orange accents surround the raised devices on this olive-gold, near-Mint quarter eagle. Always in demand for type, this briefly circulated example shows moderate wear and marks for the assigned grade, yet traces of luster remain in protected areas. A bold die crack runs from star 6 into Liberty's hair. NGC ID# 25FU, PCGS# 7694

1836 Block 8 Quarter Eagle, MS62 Lustrous, Lemon-Gold Type Coin

4727 1836 Block 8 MS62 PCGS. Breen-6144, Variety 15, R.2., Second Head of 1837. A total of 547,986 Classic Head quarter eagles were produced in 1836. Block 8 and Script 8 coins are about equally available. The stars, wingtips, talons, and fletchings are razor-sharp on this lustrous, lemon-gold two and a half. Minor softness occurs centrally. A few thin, wispy marks define the grade. Population: 17 in 62, 27 finer (4/17). NGC ID# 25FU, PCGS# 97694

LIBERTY QUARTER EAGLES

4728 1840 XF45 PCGS. The 1840 quarter eagle is underappreciated in all grades. The first-year issue of the Liberty Head type, the date has a surviving population estimated at only about 100 coins in all grades. This Choice XF representative displays grade-consistent detail and medium olive-gold patina. A few minor marks are not unusual for the grade. Population: 16 in 45, 26 finer (4/17). NGC ID# 25GA, PCGS# 7717

4729 1843-C Large Date, Plain 4, Fine 15 PCGS. Variety 1. Housed in an old green label holder, this Large Date Charlotte quarter eagle is smoothly worn yet sharply defined for the issue and the assigned grade. The Plain 4 in the date confirms the Large Date type. Attractive olive-gold color deepens around the stars and raised devices, with a few scattered lines, striations, and small marks that do not interfere with the substantial eye appeal. Population: 5 in 15, 184 finer (4/17). NGC ID# 7HLG, PCGS# 7728

4730 1843-O Small Date, Crosslet 4 MS60 PCGS. Variety 7, a previously undocumented die marriage, pairing the obverse of Varieties 4-6 with the cracked reverse of Variety 3. The vertical shield stripes extend into the eagle's neck feathers and also far below the lower shield border. This piece shows considerable central strike weakness as is often seen, with satiny straw-gold luster. Light chatter on each side appears in the absence of significant abrasions. NGC ID# 25GR, PCGS# 7731

4731 1843-O Large Date, Plain 4 AU53 PCGS. Variety 1. The mintmark is recut at the bottom on this scarce variety. The Large Date 1843-O quarter eagle is seen less often in high grade than the Small Date variant. This About Uncirculated piece displays traditional yellow-gold patina with scattered handling marks. Slight weakness on the eagle's left (facing) leg is the only mentionable strike deficiency. Population: 9 in 53, 33 finer (4/17). NGC ID# 25GS, PCGS# 7732

1845 Quarter Eagle, MS62 Shattered Reverse Die

4732 1845 MS62 PCGS. The top of the 1 lightly touches the bust and a die crack connects stars 3 through 6. The reverse has heavy radial die cracks from the border through the N in UNITED to a leaf, the primary 2 in the denomination to the eagle's middle claw, and the period following the denomination to the tip of the branch stem. Other reverse cracks are also evident. This attractive Mint State example exhibits light greenish-gold surfaces with trivial marks that are consistent with the grade. Population: 15 in 62, 14 finer (5/17). NGC ID# 25GW, PCGS# 7737

4733 1846-C — Cleaning — PCGS Genuine. AU Details. Variety 1, as always. The lightly marked surfaces are unnaturally bright due to light cleaning, although the well-defined design elements balance the eye appeal. The 1846-C quarter eagle is scarce in all grades, coming from a mintage of only 4,808 pieces.

4734 1847-C VF35 PCGS. Variety 1. The 1847 Mexican-American War may be responsible for an increase in gold coin mintages that year. Nonetheless, the 1847-C quarter eagle has a production of only about one-fourth of its half-eagle counterpart, which in turn has a production of less than one-tenth of the 1847 eagle. This nicely defined sea-green representative lacks noticeable marks and is evenly microgranular. NGC ID# 25H6, PCGS# 7745

4735 1847-C XF45 PCGS. Variety 1. The 1847-C is plentiful in the context of Charlotte quarter eagles, making it ideal for the type collector seeking a single example from this mint. The current coin offers original coppery-orange and olive-gold hues with well-detailed design elements and generally smooth surfaces. Visual appeal is outstanding for a Charlotte quarter eagle. NGC ID# 25H6, PCGS# 7745

4736 1847-D — Bent — PCGS Genuine. AU Details. Variety 9-N. The 1847-D is a challenging branch mint quarter eagle issue. This AU-level coin is well-detailed and partially lustrous with occasional small marks and lines on the surfaces. There is a barely perceptible bend in the planchet from about 11 to 5 o'clock relative to the obverse. It is unnoticed unless studied closely from an angle.

**1848-D Two and a Half, Unc Details
Scarce in Uncirculated Condition**

4737 1848-D — Improperly Cleaned — NGC Details. Unc Details. Variety 10-N. While relatively available in lower grades, the 1848-D is quite scarce in better condition, especially Uncirculated grades. The mintage was relatively small with only 13,771 pieces struck, but there are an estimated 275-325 survivors in all grades. This example was lightly cleaned with the resultant hairlines barely visible over each side. Light yellow-gold color is seen throughout.

4738 1850-O AU58 PCGS. Variety 4. The flag of the 5 is recut. The 1850-O quarter eagle circulated extensively, making it scarcer in high grade than its mintage of 84,000 pieces would suggest. This near-Mint example has few superiors. Considerable strike weakness is seen on the central high points, but luster remains in the fields and there are no major abrasions. Population: 11 in 58, 20 finer (4/17). NGC ID# 25HK, PCGS# 7758

4739 1852-O AU58 PCGS. CAC. Variety Unlisted The obverse is a match for Variety 2, but the reverse does not correspond to either of the two known dies used to strike 1852-O quarter eagles. The mintmark shape and placement resemble the reverse die used for the 1851-O. Certainly, this is a rare and previously unknown variety that should be of interest to specialists. This original, honey-gold quarter remains lustrous and eye-appealing. The obverse is needle-sharp, while the reverse is more in line with the facility. Population: 30 in 58, 18 finer. CAC: 14 in 58, 8 finer (4/17). NGC ID# 7HX8, PCGS# 7766

4740 1853 MS64 PCGS. Quarter eagle output rose to 1.4 million pieces in 1853 as the quantity of California-mined ore continued to increase, making this a popular issue for type purposes. Pinpoint detail appears on the stars, while the eagle's right (facing) wing and claw display minor softness. A bold die break occurs above OF. Population: 83 in 64 (2 in 64+), 10 finer (5/17). NGC ID# 25HV, PCGS# 7767

4741 1859-S AU58 NGC. The San Francisco Mint struck 15,200 quarter eagles in its fifth year of operation. Liberty's hair curls, the stars, feathers, and olive leaves exhibit needle-sharp definition. Small, wispy marks are scattered over partly lustrous, straw-gold surfaces. Census: 26 in 58 (1 in 58+), 8 finer (5/17). NGC ID# 25JN, PCGS# 7790

**1860 Quarter Eagle, MS63
Type Two, New Reverse**

4742 1860 New Reverse, Type Two, MS63 PCGS. The long, slender arrowheads are well separated on the Type Two reverse hub, also known as the New Reverse. 1859 through 1861 were the transitional years at the Philadelphia Mint. The Type One or Old Reverse is scarcer in all three of those years, so the demand from date collectors is for this New Reverse issue. This Select Mint State piece has frosty and fully lustrous yellow-gold surfaces with minimal marks and maximum eye appeal. Population: 8 in 63, 25 finer (5/17). NGC ID# 25JS, PCGS# 7791

**1862 Quarter Eagle, AU58
Undesignated Prooflike Contrast**

4743 1862 AU58 PCGS. This impressive near-Mint quarter eagle has undesignated prooflike reflectivity and contrast, subdued slightly by scattered marks in the fields. The design elements are fully brought-up. Two and a half dollar gold coinage at the Philadelphia Mint amounted to 98,508 pieces in 1862, the same year specie payments were suspended. Population: 26 in 58 (1 in 58+), 38 finer (4/17). NGC ID# 25JZ, PCGS# 7796

4744 1876 AU55 PCGS. The peach-gold surfaces of this Choice AU display luster in the recessed areas and well-struck design features. Light circulation marks are not at all bothersome. Population: 11 in 55, 25 finer (4/17). NGC ID# 7JS6, PCGS# 7824

4745 1884 MS62 PCGS. The lustrous surfaces of this quarter eagle display yellow-gold color and sharply struck design elements. Some light scattered marks are fewer and less severe than what might be expected for the grade designation. Actually a nice looking piece overall. Population: 10 in 62, 19 finer (4/17). NGC ID# 25L8, PCGS# 7836

4746 1888 MS64 PCGS. CAC. Original frosty mint luster shows warm orange-gold hues with subtle lavender accents. The strike is weak in the centers, but a lack of serious abrasions balances the visual appeal. Population: 61 in 64 (3 in 64+), 33 finer. CAC: 19 in 64, 7 finer (5/17). NGC ID# 25LC, PCGS# 7840

4747 1897 MS63+ Prooflike NGC. This Select quarter eagle could easily be mistaken for a proof. Rich orange-gold color turns to jet-black in the mirrored fields, contrasting against fully struck, slightly frosted motifs. The rims are broad and razor-sharp. Minimal abrasions for the grade. NGC ID# 25LM, PCGS# 77849

4748 1897 MS64+ Prooflike NGC. CAC. The orange-gold surfaces of this gorgeous near-Gem display modest field-motif contrast over both sides. Sharply struck with just a few grade-determining marks. NGC ID# 25LM, PCGS# 77849

4749 1901 MS66 PCGS. Frosty wheat-gold luster illuminates beautifully preserved surfaces on this Premium Gem 1901 quarter eagle. The strike is sharp and eye appeal excels. PCGS reports only 21 numerically finer examples of this popular type coin issue (5/17). NGC ID# 25LS, PCGS# 7853

4750 1901 MS66 PCGS. This lovely Premium Gem quarter eagle emits yellow-gold luster from its well-preserved surfaces. The design features are well-defined throughout. NGC ID# 25LS, PCGS# 7853

1901 Two and a Half, MS67 Superior Type Coin

4751 1901 MS67 PCGS. While the 1901 can only be considered a common type coin in lower grades, it is surprisingly scarce in MS67. PCGS has only certified 19 other pieces in this grade with one coin finer (4/17). The original surfaces show a slight accent of reddish patina over the soft mint luster. Fully struck throughout and, of course, devoid of any noticeable abrasions. NGC ID# 25LS, PCGS# 7853

4752 1903 MS67 PCGS. An extraordinary Superb Gem, with razor-sharp definition on all design elements and virtually pristine orange-gold surfaces. Vibrant mint luster adds to the tremendous eye appeal. Population: 87 in 67 (5 in 67+), 1 finer (5/17). NGC ID# 2688, PCGS# 7855

4753 1905 MS66 PCGS. Eye appeal befits the grade on this radiant Premium Gem type coin. A couple of hazy alloy spots are seen in the right obverse field, but there are no mentionable abrasions. Frosty, mint-fresh yellow-gold luster illuminates each side. NGC ID# 267S, PCGS# 7857

4754 1906 MS66+ NGC. CAC. With a moderately small mintage of 176,300 coins, the 1906 is still collectible in MS66, though the issue has an average certified grade of MS63. Immaculate preservation combines with a full strike and lively peach-gold color, explaining the excellent technical quality and visual appeal. NGC ID# 7JW8, PCGS# 7858

4755 1907 MS66 PCGS. Liberty's portrait, the stars, and the eagle are all fully raised on this marvelous lemon-gold quarter eagle, a final-year type coin from a mintage of 336,200 pieces. Coruscating frost washes over surfaces that appear unmarked at first glance and show just a couple of tiny alloy spots on the obverse. NGC ID# 2688, PCGS# 7859

1907 Quarter Eagle, MS67 Exemplary in All Regards

4756 1907 MS67 PCGS. The combination of eye appeal and technical quality is practically unimprovable. Gorgeous sun-gold and lavender hues blanket absolutely pristine surfaces. Moreover, the design elements are fully struck. This is an exemplary final-year type coin, bested by a single example at PCGS (5/17). NGC ID# 2688, PCGS# 7859

PROOF LIBERTY QUARTER EAGLE

4757 1887 — Cleaned — ANACS. Proof, AU50 Details. Light yellow-gold, somewhat hairlined surfaces are still attractive, but there are contact marks that to us suggest this piece may have seen some light circulation. It was not unheard of for proof gold pieces of this period to be spent, particularly during the hard economic times of the mid-1890s. This coin retains the entirety of its proof sharpness. Ex: *Long Beach Signature (Heritage, 5/2008)*, lot 3062. NGC ID# 7KB6, PCGS# 7913

INDIAN QUARTER EAGLES

4758 1908 MS64 PCGS. A new sunken relief quarter eagle was introduced in 1908. The Mint struck more than half a million examples in the series' first year. This brightly lustrous, lemon-gold near-Gem has a typical strike for the date, but the preservation exceeds the average representative by more than two and a half grade points. NGC ID# 288Y, PCGS# 7939

4759 1908 MS64 PCGS. Luminous luster and straw-gold color meld over each side of this inaugural near-Gem representative of the Pratt quarter eagle. Strike softness is usually an issue for the 1908, but only the slightest bit of indistinctness occurs on the eagle's shoulder. NGC ID# 288Y, PCGS# 7939

4760 1908 MS64 PCGS. CAC. Warm, yellow-gold surfaces are wholly original and high-end for the Choice assessment, as affirmed by the green CAC approval sticker. Typically struck for the issue. Attractive first-year type coin. NGC ID# 288Y, PCGS# 7939

4761 1908 MS64+ PCGS. CAC. An exemplary strike and radiant olive-green surfaces confirm the eye appeal of this well-preserved first-year Indian two-and-a-half. A mint-made die scratch on the central obverse may be of interest to the specialist. NGC ID# 288Y, PCGS# 7939

4762 1908 MS65 PCGS. These first-year quarter eagles were saved as souvenirs by the public, accounting for the availability of the 1908 up to MS65. Frosty, yellow-gold surfaces displays a few greenish elements with minimal field marks and a good strike. Very scarce any finer. NGC ID# 288Y, PCGS# 7939

4763 1909 MS63 PCGS. The Philadelphia Mint managed an unremarkable production of 441,700 quarter eagles in 1909, yet this is a moderately better issue in MS63 and higher grades. The central design elements are strongly impressed. Mint luster glistens over yellow-gold surfaces with minimal abrasions. NGC ID# 288Z, PCGS# 7940

4764 1909 MS64 PCGS. Light straw-gold color, luminous luster, and a uniformly crisp impression are certain to please. The field above the eagle's head shows a few scattered marks, but the obverse is comparatively clean. This Choice Uncirculated 1909 quarter eagle grades a full three points higher than the typical example. NGC ID# 288Z, PCGS# 7940

4765 1909 MS64+ PCGS. CAC. From a mintage of 441,700 pieces, this Plus-graded Choice example displays sharply detailed design elements and vibrant mint luster throughout. The colorful orange-gold surfaces are well-preserved and attractive. NGC ID# 288Z, PCGS# 7940

4766 1910 MS64 PCGS. Rose-gold tones at the centers deepen ever so slightly around the rims. The Indian's headdress and eagle's feathers exhibit crisp detail. Light field chatter aside, the only mentionable mark is a tick adjacent to the left (facing) wingtip. NGC ID# 2892, PCGS# 7941

4767 1910 MS64 PCGS. This attractive Indian quarter eagle type coin is arguably a Gem if you only look at the obverse, however, the reverse shows faint lines in the fields that limit the grade. The strike is sharp and each side offers satiny straw-gold luster. NGC ID# 2892, PCGS# 7941

4768 1911-D Weak D AU53 PCGS. Unlike on other Weak D 1911-D quarter eagles that we have seen recently, this piece shows a faint but readily discernible mintmark. An almost full silhouette of the D is visible under a loupe with no special angles or lighting needed. The sharp wire rim also appears along the right-hand obverse border. This AU coin offers original olive-gold color and has minimal abrasions. NGC ID# 2895, PCGS# 7954

4769 1911-D — Ex-Jewelry — PCGS Genuine. AU Details. Strong D. This key-date Indian quarter eagle is sharply detailed with a clear mintmark. The surfaces are unnaturally bright and reflective from frequent cleanings as a jewelry piece. A loupe reveals several old, thin scratches in the fields. Suitable for the budget-restricted collector filling the 1911-D hole in their collection.

1912 Quarter Eagle, MS64+ Top Quality for the Grade

4770 1912 MS64+ PCGS. CAC. This is as close to a Gem as could one obtain without dispensing of the vast sums required to purchase an actual MS65 example. The Plus designation and CAC approval speak to its technical and visual quality for the grade. A bold impression, frosty luster, and eye-catching sun-gold color are hallmarks. The only visible tick occurs above the I in IN. NGC ID# 7KR8, PCGS# 7944

4771 1913 MS64 PCGS. CAC. The Philadelphia Mint manufactured 722,000 two and a half dollar gold coins. Examples are scarcely seen finer than this lustrous, orange-gold near-Gem. Fully struck with a single tick above IB in PLURIBUS. The CAC endorsement is well-deserved. NGC ID# 7KR9, PCGS# 7945

1913 Indian Quarter Eagle, MS65 Rare Issue in Finer Grades

4772 1913 MS65 PCGS. From a mintage of 722,000 pieces, the 1913 Indian quarter eagle is only somewhat scarce at the MS65 grade level, but the population drops off steeply in higher grades, and PCGS has certified only nine numerically finer examples (4/17). This sharply detailed Gem displays well-preserved orange-gold surfaces, with vibrant mint luster and extraordinary eye appeal. NGC ID# 7KR9, PCGS# 7945

4773 1914 MS63 PCGS. CAC. A conditional key date in MS65, the 1914 quarter eagle is affordable and accessible in MS63. This CAC-approved example offers frosty straw-gold luster and well-struck design elements. A loupe reveals a few tiny marks that limit the grade. NGC ID# 7KRA, PCGS# 7946

1914 Two and a Half Dollar, MS64 Philadelphia Semikey

4774 1914 MS64 NGC. A mintage of 240,000 coins makes up the 1914 quarter eagle, the secondmost challenging date in the set after the famous 1911-D. Each side of this near-Gem semikey offers a blend of honey-gold color and radiant luster that should appeal to the most discerning specialist. Bold at the centers with slight buckling around the borders. NGC ID# 7KRA, PCGS# 7946

4775 1914-D MS63+ PCGS. CAC. Few Pratt quarter eagles prove more elusive in high grades than the 1914-D (448,000 coins struck). This delightful lemon-gold representative approaches the quality of a near-Gem. The strike is crisp, and minimal field marks are seen. Rightfully endorsed by CAC. NGC ID# 2899, PCGS# 7947

4776 1914-D MS64 PCGS. The 1914-D quarter eagle is a fairly plentiful issue in lower Mint State grades, but its availability drops off dramatically at the Gem grade level, as such pieces are seldom seen. This satiny near-Gem exhibits remarkably clean fields for the grade, while the design definition is razor-sharp throughout (an elusive characteristic on this issue). Hints of coppery-orange accent mainly yellow-gold luster, adding to this coin's strong level of visual appeal. NGC ID# 2899, PCGS# 7947

4777 1914-D MS64 NGC. This Denver quarter eagle poses the third-greatest challenge in Mint State after the 1911-D and 1914. The eagle's feathers, arrows, and the mintmark are boldly impressed. A luminous semikey representative with peripheral die cracks. NGC reports 47 submissions in higher grades (5/17). NGC ID# 2899, PCGS# 7947

4778 1914-D MS64 PCGS. The strike is sharp on this near-Gem example, complementing satin luster and minimally marked yellow-gold surfaces. The 1914-D is a major series key just one grade point finer. PCGS reports 51 submissions in numerically finer grades (4/17). NGC ID# 2899, PCGS# 7947

**1914-D Quarter Eagle, MS64+
Fully Struck Semikey**

- 4779 1914-D MS64+ PCGS. CAC.** The 1914-D ranks third among the most elusive dates in the series, but it only really begins to pose a challenge in this grade. Gem condition is where the issue gains status as a conditional rarity, placing it out of reach for many collectors of Pratt quarter eagles. This is an undeniably high-end example with wheat-gold color, satiny luster, and full strike detail. NGC ID# 2899, PCGS# 7947

**1914-D Quarter Eagle, Sharp MS64+
Elusive Semikey Issue**

- 4780 1914-D MS64+ PCGS. CAC.** Attractive, medium coppery-gold color gives this high-end Choice Uncirculated 1914-D excellent visual appeal, while the strike is remarkably sharp for the issue, although the mintmark is filled (a D-shaped blob). As the third-rarest issue of the series in overall rarity and quite challenging to find in pleasing near-Gem or finer grades, this Plus-graded example with CAC endorsement will fit nicely into any Gem or finer set. Population: 83 in 64+, 51 finer. CAC: 138 in 64, 5 finer (5/17). NGC ID# 2899, PCGS# 7947
- 4781 1926 MS65 PCGS.** Frosty orange-gold luster is original and mostly undisturbed on this Gem 1926 Indian quarter eagle. The design elements are boldly rendered, and both sides offer outstanding visual appeal. PCGS reports 45 numerically finer representatives (5/17). NGC ID# 7KRE, PCGS# 7950
- 4782 1927 MS65+ PCGS.** The yellow-gold lustrous surfaces of this high-end Gem reveal none of the marks often seen in the raised, exposed fields of even Mint State specimens. Sharply struck, including the eagle's shoulder feathers. NGC ID# BUTL, PCGS# 7951
- 4783 1927 MS65+ PCGS. CAC.** Although a substantial number of MS65 examples reside in PCGS holders, few of those are certified as MS65+. This impressive piece has frosty luster, bold design motifs, and trivial marks. A single copper toning spot appears on the obverse. PCGS has certified 19 as MS65+ and 22 finer (5/17). NGC ID# BUTL, PCGS# 7951

THREE DOLLAR GOLD PIECES

**1854-O Gold Three Dollar, AU53
Late Die State**

- 4784 1854-O AU53 NGC. Variety 2.** This variety has the lapped reverse, and the present coin is in a late die state with a noticeable crack from the rim at 4 o'clock, through the ribbon ends and mintmark, into the left wreath branch. This About Uncirculated 1854-O three dollar gold piece is well-detailed and shows pleasing straw-gold coloration with smooth, problem-free surfaces. A collector-grade example of the only New Orleans issue in the series. NGC ID# 25M5, PCGS# 7971

**1855 Three Dollar, MS62
Frosty Second-Year Representative**

- 4785 1855 MS62 NGC.** The second-year 1855 ranks as one of the more accessible issues in the three dollar gold series. A total of 50,555 pieces were coined, but survivors are very scarce in Mint State. Vibrant frost combines with bright peach-gold coloration. The upper curls display a bit of softness, but the wreath leaves are strong. Scattered marks explain the grade. NGC ID# 25M6, PCGS# 7972
- 4786 1856 AU58 PCGS. CAC.** A brush of high-point friction subdues portions of the luster, although the protected regions remain frosty. The wreath bowknot is softly struck, but the obverse is well-defined. The 1856 is collectible in AU condition and a good type coin candidate. NGC ID# 25M8, PCGS# 7974
- 4787 1856-S XF40 NGC.** Medium S. A die break occurs below LL in DOLLAR. The 1856-S claims the fifth-highest mintage in the series (34,500 pieces) but is seldom offered in grades higher than XF. Partial luster remains within the recesses of this green and rose-gold example. Wispy marks and moderate friction are in line with the grade. NGC ID# 25M9, PCGS# 7975
- 4788 1857-S XF45 PCGS.** One of the few branch mint issues in the three dollar gold series. This Choice XF 1857-S displays medium yellow-gold surfaces and bold detail. Light handling marks and high-point wear are not obtrusive. Population: 34 in 45, 58 finer (5/17). NGC ID# 7K5H, PCGS# 7977

**1859 Gold Three Dollar, MS62
Attractively Lustrous and Original**

4789 1859 MS62 PCGS. The 1859 gold three dollar piece is scarce in Mint State, despite a fairly substantial mintage for the series of 15,558 coins. This example displays a sharp strike and frosty original luster in rich orange and peach-gold hues. Scattered light abrasions are not particularly bothersome. Population: 49 in 62, 54 finer (4/17). NGC ID# 7K5K, PCGS# 7979

**1862 Gold Three Dollar, AU53
Pleasing for the Grade**

4790 1862 AU53 PCGS. The 1862 three dollar gold piece is a better date in high grade, coming from a mintage of only 5,750 coins. The present AU example is well-struck from dies that show mint-made striations in the fields. Original straw-gold luster remains in the protected regions. A few marks near Liberty's chin are the only abrasions of note. NGC ID# 7K5P, PCGS# 7983

**1868 Three Dollar Gold, AU58
Partially Lustrous Surfaces**

4791 1868 AU58 PCGS. Moderate luster remains in the fields of this near-Mint coin, while a brush of high-point friction precludes a finer grade. The coin is problem-free and well-struck with pleasing visual appeal. The 1868 boasts a minimal mintage of 4,850 coins, and survivors grading finer than the present coin are scarce. NGC ID# 25MP, PCGS# 7989

**1868 Three Dollar, AU58
Semireflective Rose-Gold Surfaces**

4792 1868 AU58 PCGS. Boldly impressed design elements show a trace of nearly imperceptible friction upon close examination, barely preventing a full Uncirculated technical assessment. Semireflective orange and rose-gold surfaces are lightly marked. Only 4,850 three dollar gold circulation strikes were minted in 1868. NGC ID# 25MP, PCGS# 7989

4793 1874 MS63 PCGS. Traces of reddish-orange toning at the borders join areas of prooflike surface around the raised devices to give this Select 1874 three dollar gold piece extra eye appeal. Coruscating rich-gold luster shines from both sides, while the strike is suitably sharp everywhere except the bowknot at the base of the wreath. NGC ID# 7KDE, PCGS# 7998

4794 1878 MS62 PCGS. A highly lustrous example of this readily available three dollar gold issue, with nice eye appeal from variegated toning that ranges from shades of lilac to vibrant flame-orange. The strike is a bit soft on the highest hair strands. Small marks and abrasions account for the assigned grade. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS64
Great Color and Vibrant Mint Frost**

4795 1878 MS64 PCGS. Three dollar gold production jumped to 82,304 coins in 1878 with the expectation that demand for gold coinage would increase as paper money reached parity with the yellow metal. Rose-gold dominates this frosty Choice Uncirculated offering. Accents of green and a few coppery alloy spots provide additional color. Softness is limited to the cotton bolls and wreath. A lovely, minimally marked type coin. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64+
Excellent Value for the Collector**

- 4796 1878 MS64+ PCGS.** This highly lustrous example of this unusual denomination is an especially good value for the collector. With 80% of the appearance of a Gem, it represents as much as a \$10,000 savings over buying an MS65. The yellow-gold surfaces are slightly muted by the presence of light reddish patina, and there are few contact marks evident (none worthy of individual mention). NGC ID# 25MZ, PCGS# 8000

**1882 Three Dollar, AU58
Ultra-Low Mintage of 1,500 Coins**

- 4797 1882 AU58 PCGS. CAC.** Moderate prooflike reflectivity is unsurprising given the issue's ultra-low mintage of 1,500 pieces. This near-Mint 1882 three dollar gold coin features minimal marks over lavender and olive-gold surfaces. Strongly struck on the date, denomination, cotton bolls, and wreath bow, with minor rub on the upper curls. NGC ID# 25N5, PCGS# 8004

**1886 Three Dollar, AU55
Only 1,000 Coins Struck**

- 4798 1886 AU55 PCGS.** This is one of the 1,000 three dollar gold circulation strikes manufactured in 1886. Examples are scarce in all grades, circulated or not. A uniformly bold strike with minor high-point friction and noticeably semiprooflike fields are apparent on each side. Lavender-gold with reddish peripheral hues. NGC ID# 25N9, PCGS# 8008

- 4799 1888 AU53 PCGS. CAC.** Faint tinges of green add interest to the yellow-gold surfaces of this penultimate three dollar gold issue. Just 5,000 pieces were struck but they did not circulate to any great extent and apparently few pieces were melted at the Mint. Most survivors are in full Mint State, making this About Uncirculated example one of the few representatives of its grade. CAC-endorsed for quality. NGC ID# 25NB, PCGS# 8010

**1888 Three Dollar Gold, MS61
Slightly Better Selection for Type**

- 4800 1888 MS61 PCGS.** Prooflike in protected areas, the surfaces show light abrasions and tiny marks in the fields that limit the Mint State designation. Eye appeal is strong, with pleasing blond-gold color and gleaming mint luster that suggest a finer grade. The strike is bold throughout except for minor incompleteness at the eyebrow and nearby hairline. Just 5,000 pieces were struck. NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLE

**1804 Capped Bust Right Half Eagle, AU Details
Small Over Large 8, BD-7**

- 4801 1804 Small Over Large 8, BD-7, R.4 — Repaired, Whizzed — NGC Details. AU.** Bass-Dannreuther Die State c/c. From a very late state of the dies, an extensive network of die cracks and clash marks is evident on the reverse. The strongly impressed design elements show only a trace of actual wear, but the orange-gold surfaces display evidence of whizzing and smoothing in the form of numerous finely etched lines in the fields and somewhat muted mint luster. The BD-7 variety is popular with collectors because of the dramatic repunching on the first three numerals in the date.

CLASSIC HALF EAGLES

- 4802 1834 Plain 4 AU55 PCGS. Breen-6501, McCloskey 3-B, R.1.** Attribution markers include the Plain 4 spaced apart from the 3, the lack of a tongue in the eagle's mouth, and no reverse motto. This is an olive-gold Classic Head half eagle with partial glowing luster in the recesses. Well-detailed and minimally marked. NGC ID# 25RR, PCGS# 8171

**1834 Classic Five, MS61
Plain 4, Second Head**

4803 1834 Plain 4 MS61 NGC. Second Head, Breen-6502, McCloskey 4-C, R.2. A scarcer die variety with a Block 8 in the date and the 4 positioned very close to the bust. A sun-gold first-year gold type coin with pleasing sharpness and substantial luminous luster. A loupe reveals hair-thin marks at the base of the nose and a subdued abrasion beneath OF.

Ex: Baltimore ANA Signature (Heritage, 8/2008), lot 2973; FUN Signature (Heritage, 1/2012), lot 6328. NGC ID# 25RR, PCGS# 8171

4804 1835 AU53 NGC. Breen-6504, McCloskey 1-A, R.2. The 1835 is a collectible type coin, although it is scarcer in high grade than the 1834 Classic Head five. This AU coin displays strong detail and pleasantly smooth surfaces. Original olive-gold coloration yields remnants of luster in the protected areas. NGC ID# 25RV, PCGS# 8173

4805 1836 AU55 NGC. Breen-6509, McCloskey 2-A, R.4. Second Head, Large Date. Lengthy die cracks through the eagle's neck and the T in LIBERTY confirm this scarcer die pairing. A lightly abraded example with rich golden-brown toning in protected areas. The curls display light wear but the strike is generally sharp. Doubling on LIBERTY and repunching on the D in 5 D add interest to the variety.

Ex: Summer FUN Signature (Heritage, 7/2016), lot 4451. NGC ID# 25RY, PCGS# 8174

4806 1838 AU50 PCGS. Breen-6514, McCloskey 1-A, R.2. This is an example of the Large Arrows, Small 5 variety with bright surfaces that retain glimmers of luster within the protected areas of the design. The star centers are mostly visible, and the eagle's neck and claws are well-defined. Marks are scattered uniformly over each side. NGC ID# 25S4, PCGS# 8176

4807 1838 AU58 NGC. Breen-6514, McCloskey 1-A, R.2. The Philadelphia issue of this date is the ideal choice for date collectors, as the Southern branch mint issues are rare in high grade. This near-Mint 1838 Classic Head five displays bold detail and lightly abraded straw-gold surfaces. Remnants of luster are seen in the protected areas. NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

**1840-C Five Dollar, XF45
Among the Scarcest C-Mint Fives**

4808 1840-C XF45 NGC. Variety 2. An immensely popular issue among collectors, the 1840-C is the first half eagle produced with the mintmark on the reverse below the eagle. This is also a rare date, with only 125-150 coins believed extant from a total of 18,956 pieces delivered. In terms of overall rarity among C-mint half eagles, the 1840-C ranks fourth in the series. For a poorly produced Southern half eagle that has seen 15 points of wear, this coin is rather well-detailed. Typical softness of definition, nonetheless, is noted on the obverse hair curls, star centers, and reverse eagle. A few scattered hints of original luster are evident at direct angles, but rich copper-gold color dominates the outward appearance. Somewhat scuffy from circulation with a few moderate blemishes in the fields.

Ex: FUN Signature (Heritage, 1/2001), lot 8188; Central States Signature (Heritage, 4/2001), lot 7752; Long Beach Signature (Heritage, 9/2002), lot 8132. NGC ID# 25VD, PCGS# 8196

4809 1843 MS60 NGC. Beautiful fire-red and orange toning demonstrates the eye appeal of this well-struck and lightly abraded Mint State No Motto five. There are a few abrasions in harmony with the grade, although they fail to hinder the visual impact of the magnificent coloration. Housed in a former generation holder. Census: 11 in 60, 69 finer (4/17).

Ex: Central States Signature (Heritage, 4-5/2009), lot 3770. NGC ID# 94FD, PCGS# 8213

**1843-C Half Eagle, Choice XF
Rarely Offered With CAC Endorsement**

4810 1843-C XF45 PCGS. CAC. Variety 2. The mintmark is fractionally further left compared to Variety 1. Doug Winter writes: "This date seems to have been heavily used in local commerce and the typical surviving example is well circulated with numerous deep marks. ... Attractive lower priced specimens (in the VF and EF range) are extremely hard to find." This is one such example with recognition from CAC for its originality and eye appeal. Well-struck for the facility with light yellow-gold color and few significant abrasions. Population: 21 in 45, 52 finer. CAC: 4 in 45, 8 finer (4/17). NGC ID# 429H, PCGS# 8214

4811 1844 MS61 PCGS. Sharply struck with warm sun-yellow luster. Though a number of light to moderate abrasions are present in the fields, the eye appeal remains strong. Mint State 1844 half eagles are seldom seen at auction. Population: 9 in 61, 20 finer (4/17).

Ex: Long Beach Signature (Heritage, 5/2009), lot 1649. NGC ID# 25T7, PCGS# 8219

- 4812 1845 MS60 NGC.** The 1845 is an ideal candidate for the type collector seeking an 1840s half eagle in Mint State. Such coins are scarce but still collectible in the lower Uncirculated grades. This piece displays a sharp strike and satiny yellow-gold mint luster. Light, scattered marks account for the grade. Census: 7 in 60, 41 finer (4/17). NGC ID# 25TB, PCGS# 8223

**1846 Half Dollar, MS62
Large Date, Rare in Mint State**

- 4813 1846 Large Date MS62 PCGS. CAC.** The Large Date variant is the ideal choice for date collectors, although even this issue is rare in Mint State. Here offered is a bright yellow-gold example with excellent sharpness and minimal abrasions. A bisecting die crack stretches from the dentils below the D in FIVE D. to those near the first S in STATES. Population: 9 in 62, 4 finer. CAC: 5 in 62, 6 finer (4/17). NGC ID# 25TF, PCGS# 8226

- 4814 1846-D/D — Improperly Cleaned — NGC Details. XF. Variety 16-J.** The mintmark is dramatically repunched on this olive-green Dahlonga half eagle. The surfaces are muted from a cleaning, and the strike shows blending on the high points. The low date variant of the popular *Guide Book* variety.

- 4815 1846-D/D — Cleaning — PCGS Genuine. XF Details. Variety 16-J.** The dramatic repunched mintmark is the hallmark attribute of this variety. The present coin displays good detail and unnaturally bright color due to an old cleaning. Scattered surface marks are typical of this issue and grade level.

- 4816 1846-D/D — Improperly Cleaned — NGC Details. AU. Variety 16-J.** Peach-gold color runs over both sides of this D-mint half eagle. The devices are well-impressed throughout. Two varieties feature the Repunched Mintmark — paired with either a Low Date and a High Date obverse. This is an example of the Low Date variant.

**1847 Half Eagle, MS62
Excellent Original Luster**

- 4817 1847 MS62 PCGS.** Circulated 1847 half eagles are found with relative ease, but Mint State coins are somewhat scarce. This MS62 example displays sharply struck design elements and pleasing yellow-gold patination. Tiny marks scattered about result in occasional breaks in the luster flow. Population: 45 in 62, 27 finer (4/17). Ex: *FUN Signature* (Heritage, 1/2009), lot 5403. NGC ID# 25TL, PCGS# 8231

- 4818 1847-D — Bent — PCGS Genuine. AU Details. Variety 19-I.** The 1847-D is a scarce Dahlonga issue in all grades and rare in Mint State. This AU-level coin displays bright yellow-gold surfaces with hints of luster in the protected areas. Several minute rim nicks are present, but the design elements are well-detailed. The bent planchet noted by PCGS would be more accurately described as a faint warp, with the “crease” going from star 2 to star 10, relative to the obverse.

- 4819 1848 MS60 ANACS.** Uncirculated 1848 half eagles are scarce in any numeric grade. This ANACS coin displays sharp detail and satiny straw-gold surfaces. Surprisingly, we find no singular abrasions on the coin, only faint lines in the fields. A retained cud is seen near stars 1 and 2, with several other die cracks around the periphery. NGC ID# 42A7, PCGS# 8236

**1849 Half Eagle, MS61
Unusually Attractive Luster**

- 4820 1849 MS61 PCGS.** The mintage for the 1849 is high with 133,070 pieces produced. However, it is certainly not a common date as one might believe if only the mintage were used as an indicator of rarity. On this coin, the obverse details are well defined, but the reverse is somewhat soft on the eagle's plumage. The surfaces are a bright yellow-gold with occasional splashes of deeper orange-gold, and they display nearly unbroken luster. A few small marks, especially on the obverse, limit the grade. All in all, quite a decent coin for the grade. Population: 5 in 61, 5 finer (4/17).

Ex: *Long Beach Signature* (Heritage, 2/2006), lot 2888. NGC ID# C5XC, PCGS# 8240

- 4821 1850 AU58 NGC. CAC.** Both sides of this near-Mint specimen have nearly full satin luster with only a hint of high-point wear. An exceptional example that has original coloration. The 1850 half eagle is scarce in this grade and rare any finer. An undervalued Philadelphia issue. Census: 30 in 58 (1 in 58+), 6 finer. CAC: 6 in 58, 2 finer (4/17).

Ex: *New York Signature* (Heritage, 3/2012), lot 4055. NGC ID# 25TY, PCGS# 8243

- 4822 1850-C Weak C — Improperly Cleaned — NGC Details. AU. Variety 5.** Most Weak C examples are Variety 4. Variety 5 is a rare die pairing that shows the top of the 1 just touching the bust truncation. The mintmark was lightly entered into the working die, but its full outline is apparent. The green-gold surfaces are minimally marked, and more attractive than implied by the NGC designation.

- 4823 1851 MS61 PCGS. CAC.** This is an extremely important opportunity for the advanced specialist because the 1851 five dollar is quite scarce in Mint State grades. Mintage of 1851 half eagles in Philadelphia numbered 377,505 coins, but only about 100 have been graded Mint State by PCGS and NGC. This one is sharply struck with bright yellow-gold surfaces. Minute marks over each side limit the grade. Population: 13 in 61, 31 finer. CAC: 5 in 61, 3 finer (4/17).

Ex: *Long Beach Signature* (Heritage, 2/2005), lot 7812; *Dallas Signature* (Heritage, 10/2009), lot 1433. NGC ID# 25U5, PCGS# 8246

- 4824 1852 MS62 NGC.** The 1852 half eagle is far scarcer in Mint State than its mintage of more than 573,000 coins would suggest. This MS62 piece is sharply detailed and displays surprisingly smooth rose-gold surfaces with only light field marks to limit the grade. Finer representatives are rare. Census: 32 in 62, 27 finer (4/17). NGC ID# 2Y7R, PCGS# 8250

4825 1852-C XF45 PCGS. Variety 1. The 1852-C is a collectible Charlotte issue for the budget-conscious collector. This Choice XF representative displays bold detail and lightly marked green-gold surfaces. Doug Winter estimates that fewer than 350 pieces survive from a mintage of more than 72,000 coins. NGC ID# 25UB, PCGS# 8251

4826 1853 MS61 NGC. Highly lustrous surfaces display few marks and benefit from a bold strike. The color is a healthy orange-gold and the eye appeal, especially with regards to the obverse, is great. Like the 1852, the relatively high mintage 1853 half eagle is available in circulated grades, yet becomes noticeably scarce in Mint State. Census: 33 in 61, 41 finer (4/17).
Ex: *FUN Signature* (Heritage, 1/2008), lot 4246; *Summer FUN Signature* (Heritage, 7/2009), lot 1532. NGC ID# 25UD, PCGS# 8253

1855 Half Eagle, MS62
Excellent Luster and Eye Appeal
Misplaced 1 in Dentils

4827 1855 MS62 PCGS. Collectors seeking a luminous Mint State No Motto half eagle with original, frosty mint luster need look no further. This yellow-gold 1855 coin displays shimmering, lightly abraded surfaces with unusually strong eye appeal for the grade. The obverse hair curls below BER and the F in FIVE on the reverse show strike softness, but the remainder of each side is boldly rendered. The top of a misplaced 1 plainly protrudes from the dentils beneath the right foot of the primary 1 — this variety is unlisted in the *Cherry-pickers' Guide*. The 1855 half eagle as a whole is rare in Mint State and underrated as such. Population: 8 in 62, 9 finer (4/17). NGC ID# 42AP, PCGS# 8261

4828 1856 MS61 PCGS. As noted by Garrett and Guth, "The [1856] is usually found only in circulated condition, and Mint State examples are nearly as rare as some of the more readily available Charlotte and Dahlonega mint issues." This boldly impressed example has winning yellow-orange luster, though a number of pinpoint abrasions scattered in the fields preclude a finer designation. Population: 11 in 61, 22 finer (4/17).
Ex: *Long Beach Signature* (Heritage, 9/2009), lot 1583. NGC ID# 25UV, PCGS# 8266

4829 1857 MS61 NGC. Rich yellow-gold surfaces show glimpses of tan and orange. This is a well-defined survivor that is appealing despite the presence of several shallow abrasions. Uncirculated 1857 half eagles are scarce and underappreciated. Census: 19 in 61, 21 finer (4/17).
Ex: *Dallas Signature* (Heritage, 10/2008), lot 2111. NGC ID# 25V2, PCGS# 8271

1857 Five Dollar, MS62
Rare in Uncirculated Condition

4830 1857 MS62 PCGS. The Mint produced nearly 100,000 fewer half eagles in 1857 than it had in 1856. This issue is rare in all Uncirculated grades, but it remains the most accessible of the five half eagles produced across all U.S. mints that year. The pinpoint impression is probably the most apparent attribute, followed by the orange and reddish-gold color. Lustrous with lightly peppered marks. Population: 15 in 62, 17 finer (5/17). NGC ID# 25V2, PCGS# 8271

1857-S Five Dollar, AU58
Original Reddish-Tinted Surfaces

4831 1857-S AU58 NGC. Well struck for the No Motto type, and attractively toned orange-gold. Traces of verdigris in the recessed areas further confirm the originality. While thousands of 1857-S twenties were recovered from the *S.S. Central America*, lower denominations such as the half eagle barely appeared within the hoard. This better-date half eagle becomes rare at the Borderline Uncirculated level. NGC ID# CBE7, PCGS# 8275

1858 Five Dollar, MS60
Rare in Uncirculated Condition

4832 1858 MS60 NGC. A rare issue in all grades and the first year in a twenty year run of scarce, low-mintage half eagles from the Philadelphia Mint. The mintage was only 15,136 pieces, and the 1858 is very elusive in any condition better than XF. In Mint State, this piece is in good company with only 24 other coins certified by both services in the various MS grades (not accounting for resubmissions). This is a sharply struck piece with bright, satiny fields that show numerous die striations. The most distinctive surface imperfections are a couple of contact marks on Liberty's cheek and jaw. An attractive, worthwhile addition for the gold specialist. Census: 3 in 60, 10 finer (4/17).
Ex: *Dallas Signature* (Heritage, 12/2004), lot 6655; *Palm Beach Signature* (Heritage, 3/2005), lot 6954; *Long Beach Signature* (Heritage, 6/2005), lot 7786. NGC ID# 28BY, PCGS# 8276

1859 Half Eagle, AU58
A Lovely Mint State Alternative

- 4833 1859 AU58 PCGS.** This low-mintage issue is rarely encountered in any grade, and most collectors can abandon hopes of obtaining a full Mint State example, as only nine have been certified by PCGS and NGC combined (4/17). The alternative is a near-Mint specimen such as the coin offered here. Although a trace of wear is present, along with scattered marks of little consequence, both sides have virtually full luster with lovely greenish-gold surfaces. Population: 10 in 58 (2 in 58+), 2 finer (4/17).
Ex: New York Signature (Heritage, 2/2014), lot 4670. NGC ID# 25VB, PCGS# 8280

1860 Five Dollar, AU58
Underappreciated Condition Rarity

- 4834 1860 AU58 NGC.** The 1860 is among the more affordable half eagles of the period, although it is scarce and underrated as such. Uncirculated pieces are decidedly rare, and near-Mint coins are infrequently seen. This example of the latter grade displays sharp design elements and bright, satiny surfaces. Scattered abrasions are not unusual for pre-Civil War gold pieces. Census: 25 in 58, 7 finer (4/17). NGC ID# 25VF, PCGS# 8284
- 4835 1860-D Medium D — Cleaning — PCGS Genuine. AU Details. Variety 46-GG.** Most survivors from the low mintage of 14,635 pieces are the Medium D variety, although two rare die pairs feature a Large D. The present olive-gold Medium D example is hairlined but surprisingly free from any visible abrasions.
- 4836 1861 MS61 NGC.** The grade is limited only by scattered, tiny field chatter since the strike and luster could hardly be sharper. Bright, sun-gold color makes this coin appear mint-fresh and a great selection for No Motto type. NGC ID# 25VK, PCGS# 8288

1861 Half Eagle, MS62
Collectible No Motto Issue

- 4837 1861 MS62 NGC.** The 1861 half eagle is among the most plentiful No Motto issues of this denomination, making it popular for type purposes. The present coin is Uncirculated, although scattered abrasions limit the numeric designation. Softness is seen on stars 1 and 13, although the remainder of each side is well-defined. Original straw-gold surfaces yield hints of peach and orange coloration. NGC ID# 25VK, PCGS# 8288
- 4838 1873 Closed 3 MS62 NGC.** This copper-gold example has ample peripheral luster, a decent strike, and modest field marks for the grade. The 2017 *Guide Book* Closed 3 mintage of 112,480 pieces is incorrect, since the figure excludes the Open 3 production and quotes a separate mintage figure of 112,505 coins for the Open 3 variety. In reality, both date styles account for a portion of the total mintage of 112,480 pieces. Uncirculated Closed 3 examples are seldom seen. Census: 23 in 62, 12 finer (4/17).
Ex: Long Beach Signature (Heritage, 6/2006), lot 3346; Denver Signature (Heritage, 8/2006), lot 1881; Dallas Signature (Heritage, 4/2007), lot 1725; Summer FUN Signature (Heritage, 7/2009), lot 1600. NGC ID# 25WK, PCGS# 8329
- 4839 1876-CC Good 6 PCGS. CAC. Variety 1-A.** This well-circulated 1876-CC is a rare low-grade survivor of the Nevada Territory economy in the 1870s, where gold circulated extensively with a high attrition rate. The coin shows smooth olive-gold patina with only a few marks in the fields. The obverse rims are bold, while the lower reverse border legends merge with the rim in that area. This is the single lowest-grade 1876-CC five endorsed by CAC. Population: 2 in 6, 84 finer. CAC: 1 in 6, 9 finer (4/17). NGC ID# B5SN, PCGS# 8340
- 4840 1877-CC VG8 NGC. Variety 1-B.** A smoothly worn representative of this rare date Carson City five. The reverse shows a rim bump near 10 o'clock, and a pair of old pinscratches affect the shield and the right reverse field. Only 8,680 pieces were struck. Census: 2 in 8, 95 finer (4/17).
Ex: Central States Signature (Heritage, 5/2004), lot 9524. NGC ID# BT9Z, PCGS# 8343
- 4841 1878-S MS62 NGC.** This conditionally scarce S-mint half eagle shows sharp design elements and satiny yellow-gold mint luster. Other than a couple of tiny ticks near star 9, the only grade-limiting imperfections are some faint handling marks in the fields. The surfaces are generally smooth and appealing. Census: 18 in 62, 9 finer (4/17). NGC ID# 25X6, PCGS# 8347

**1880 Liberty Half Eagle, MS65
Outstanding Type Coin**

- 4842 1880 MS65 PCGS.** A delightful Gem specimen of this popular date, with well-preserved peach-gold surfaces that radiate vibrant mint luster on both sides. The design elements are sharply detailed throughout, with sharp star centers and fine detail on the eagle's claws. Eye appeal is outstanding. Population: 20 in 65 (2 in 65+), 4 finer (4/17). NGC ID# 25XA, PCGS# 8351

**1880 Half Eagle, MS65
Conditionally Rare P-Mint Issue**

- 4843 1880 MS65 PCGS.** Although the Philadelphia Mint coined more than 3 million half eagles in 1880, few have survived in high grade. This Gem, housed in a green-label PCGS holder, is an important condition rarity for the advanced collector. Both sides exhibit splendid orange toning on the brilliant yellow surfaces with full satin mint luster. Faint blue overtones add to the eye appeal. Population: 20 in 65 (2 in 65+), 4 finer (5/17). NGC ID# 25XA, PCGS# 8351

**1880-CC Five Dollar, AU55
Better Date in High Grade**

- 4844 1880-CC AU55 PCGS. Variety 2-C.** The 1880-CC half eagle is a major rarity in Mint State, making it more popular in the upper AU grades than its moderate availability at that level would otherwise generate. This Choice AU example has original bronze-gold color and some remnants of luster. The strike is good, and scattered abrasions are as expected for the issue and grade. Several small die chips below Liberty's eye are a distinctive die marker. Population: 46 in 55, 45 finer (4/17). NGC ID# 25XB, PCGS# 8352

- 4845 1889 MS61 PCGS.** This example survives from a low mintage of only 7,520 business strikes. It is a sharply detailed and fully lustrous Mint State piece with light yellow surfaces and considerable eye appeal for the grade. Population: 12 in 61, 25 finer (4/17). Ex: Long Beach Signature (Heritage, 9/2009), lot 1605. NGC ID# 25XZ, PCGS# 8374

- 4846 1890 MS61 NGC.** The 1890 half eagle is an important low-mintage issue from a time when minting efforts were geared toward silver dollars and double eagles. This light yellow piece has brilliant luster and scattered marks. An underrated condition rarity in the Liberty half eagle series. Census: 10 in 61, 8 finer (4/17). Ex: FUN Signature (Heritage, 1/2013), lot 7246. NGC ID# 25Y2, PCGS# 8375

- 4847 1890-CC MS61 PCGS. Variety 1-A,** an early die state with no reverse cracks. This is a nicely struck yellow-gold half eagle with fewer marks than usual for the MS61 level. Luster illuminates the borders and motifs. The 1890-CC is scarcer than its '91-CC successor but is nonetheless obtainable in Mint State. Ex: Long Beach Signature (Heritage, 9/2014), lot 4450. NGC ID# C5XF, PCGS# 8376

- 4848 1891-CC MS61 NGC. Variety 2-A,** recut at the top of the second 1 in the date and cracked around the reverse legends. This Mint State 1891-CC half eagle displays a bold strike and satiny wheat-gold mint luster. Scattered light abrasions account for the grade. NGC ID# 25Y5, PCGS# 8378

**1891-CC Half Eagle, MS62
Variety 1-A**

- 4849 1891-CC MS62 PCGS. CAC. Variety 1-A.** A die crack connects the bust to star 1, and continues intermittently through star 2 and on to star 6 on this attractive half eagle. This fully lustrous piece has good eye appeal with bold design definition and frosty yellow-gold surfaces. NGC ID# 25Y5, PCGS# 8378

- 4850 1892 MS65 NGC.** An important condition rarity in the Liberty half eagle series from a substantial mintage of 753,400 coins. NGC and PCGS have combined to certify 114 examples in Gem or finer grades. This impressive Gem exhibits orange overtones on its frosty yellow-gold surfaces with trivial marks and excellent eye appeal. Census: 29 in 65 (1 in 65+), 30 finer (5/17). NGC ID# C5XG, PCGS# 8379

- 4851 1892-CC AU58 PCGS. Variety 1-A.** Mint State examples of the 1892-CC five are elusive, although this near-Mint coin remains accessible for the budget-conscious collector. Both sides are well-struck and show original wheat-gold coloration with minimal surface marks. Some luster remains in the protected regions of the fields. NGC ID# 25Y7, PCGS# 8380

- 4852 1892-CC AU58 PCGS. CAC. Variety 1-A.** Satiny orange-gold luster gives this near-Mint 1892-CC half eagle pleasing visual appeal. Scattered light marks accompany the grade, but none are individually significant. This coin possesses an unusual amount of original luster for an AU-level gold piece. Mint State examples of the date are elusive with decent eye appeal. NGC ID# 25Y7, PCGS# 8380

**1893-CC Half Eagle, MS61
Better Carson City Issue**

- 4853 1893-CC MS61 PCGS. Variety 1-A.** The final Carson City half eagle has a low mintage of 60,000 pieces and is more often encountered in circulated grades than in Mint State. The present sharply struck canary-gold example is void of consequential contact. Luster is especially vibrant at the borders. Population: 37 in 61, 74 finer (4/17).

Ex: *Philadelphia Signature* (Heritage, 8/2012), lot 4623. NGC ID# 25YB, PCGS# 8384

- 4854 1893-O MS62 NGC. CAC. Variety 2,** with a retained cud atop the UNI in UNITED. A lustrous and evenly struck representative that has full luster and good eye appeal. The 1893-O is one of just three New Orleans Motto Liberty half eagle issues. Finer Uncirculated examples of the date are decidedly rare. Census: 66 in 62 (1 in 62+), 18 finer. CAC: 9 in 62, 3 finer (4/17).

Ex: *Central States Signature* (Heritage, 5/2007), lot 3676; *Summer FUN Signature* (Heritage, 7/2009), lot 1640. NGC ID# 25YC, PCGS# 8385

- 4855 1894-O MS60 NGC. Variety 2.** This bright greenish-yellow half eagle has semireflective fields around satiny devices. The surfaces are lightly abraded, as expected for the grade. Both sides have sharp design definition, and the overall appearance is excellent. The 1894-O half eagle is scarce, with a mintage of only 16,600 coins. Uncirculated examples are particularly elusive.

Ex: *Dallas Signature* (Heritage, 10/2009), lot 1465. NGC ID# 25YF, PCGS# 8388

**1894-S Half Eagle, MS62
Rare in Mint State**

- 4856 1894-S MS62 PCGS.** Half eagles struck at the San Francisco Mint in 1894 are very rarely found in Uncirculated grades, owing to their widespread use in Western commerce and the minimal interest in mintmark collecting, which had only begun to take hold a year earlier in 1893. This greenish-gold Liberty Head five has frosty luster and good detail, though the fields show scattered marks. Population: 10 in 62, 4 finer (4/17). NGC ID# 25YG, PCGS# 8389

- 4857 1895-S MS61 NGC.** Lovely orange- and green-gold shadings swirl on each side of this unworn S-mint half eagle. The strike is crisp, and the coin is attractive despite a number of wispy abrasions. Census: 18 in 61, 6 finer (4/17).

Ex: *Long Beach Signature* (Heritage, 9/2007), lot 3482; *Baltimore ANA* (Heritage, 8/2008), lot 9801; *Dallas Signature* (Heritage, 10/2008), lot 2143; *Philadelphia Signature* (Heritage, 8/2012), lot 4626. NGC ID# 25YJ, PCGS# 8391

- 4858 1900 MS65 NGC.** Finely textured rose and sun-gold surfaces are beautifully preserved. Unimportant chatter occurs in the field below the eagle's left (facing) wing. Die cracks are evident on each side, most notably through the E in UNITED. Gem examples of the 1905 are exceedingly difficult to upgrade. NGC records 31 finer grading events (5/17). NGC ID# 25YV, PCGS# 8400

- 4859 1903-S MS65 PCGS.** Sharply detailed in most areas, this impressive Gem shows just a touch of the usual softness on the stars. The well-preserved orange-gold surfaces radiate vibrant mint luster and eye appeal is terrific. PCGS has graded 22 numerically finer examples (4/17). NGC ID# 25Z3, PCGS# 8408

- 4860 1903-S MS65 NGC.** Struck in large quantity (more than 1.8 million pieces), the 1903-S half eagle is a go-to issue for collectors of Liberty Head gold type. Readily available even at the Gem level, this is an ideal example with strong mint luster and smoothly frosted rich-gold surfaces. The strike is first-rate. NGC ID# 25Z3, PCGS# 8408

- 4861 1904 MS65 PCGS.** Liberty's cheek and the adjacent fields are exceptionally clean. This is a light yellow-gold Gem with scintillating mint frost and complete definition on all elements of the design. Trivial luster grazes barely prevent an even higher numeric assessment. NGC ID# 25Z6, PCGS# 8409

**1904-S Liberty Five, MS63
Challenging Issue in Mint State**

- 4862 1904-S MS63 NGC.** An attractive Select example of this popular low-mintage San Francisco half eagle issue, crisply struck with powerful luster that enlivens the yellow-gold surfaces. Only a few wispy abrasions in the fields preclude a finer designation. The 1904-S issue was little saved at the time of release, and unworn examples are elusive today. Census: 11 in 63, 5 finer (4/17).

Ex: *Central States Signature* (Heritage, 4/2008), lot 3511. NGC ID# 25Z5, PCGS# 8410

1905 Liberty Half Eagle, Lustrous MS65

- 4863 1905 MS65 PCGS.** Gem Uncirculated 1905 Liberty Head half eagles are very scarce indeed. Delightful rose-gold surfaces enjoy exceptionally clean fields. Liberty's cheek is unmarked. Frosty luster washes over each side with razor-sharp definition throughout. A wonderful example that would be challenging to upgrade. NGC ID# 25Z6, PCGS# 8411

- 4864 1905-S MS63 PCGS.** A better date in Uncirculated grades, the 1905-S Liberty half eagle is particularly scarce above the MS63 grade level. This Select coin offers sharp detail and frosty wheat-gold luster. Abrasions are minimal for the grade. Population: 36 in 63 (1 in 63+), 36 finer (4/17). NGC ID# 25Z7, PCGS# 8412

4865 1906 MS65 PCGS. CAC. This CAC-approved Gem offers frosty original luster and beautiful yellow-gold coloration. The strike is sharp, and neither side exhibits noticeable abrasions. The 1906 half eagle is a popular type coin, but pieces grading finer than the present example are scarce. NGC ID# 25Z9, PCGS# 8413

4866 1906-D MS65 PCGS. Popular as the first-year D-Mint half eagle and one of only two representatives of the denomination coined in Denver, the 1906-D is scarce in Gem condition and rare any finer. The frosted surfaces are smooth and sharply defined on this appealing example, which displays olive shades over rich-gold patina. Population: 67 in 65 (3 in 65+), 8 finer (4/17). NGC ID# 25ZA, PCGS# 8414

4867 1906-S MS64+ PCGS. CAC. Ebullient yellow-gold luster radiates from each side of this high-end near-Gem. Just a few minute marks preclude Gen status. Population: 41 in 64 (4 in 64+), 18 finer. CAC: 7 in 64, 5 finer (4/17). NGC ID# 25ZB, PCGS# 8415

4868 1907 MS65 PCGS. The 1907 Liberty half eagle is an elusive issue in MS65 condition, and finer coins are very scarce. This well-detailed Gem exhibits well-preserved orange-gold surfaces with vibrant mint luster and outstanding eye appeal. PCGS has graded 28 numerically finer examples (5/17). NGC ID# 25ZC, PCGS# 8416

4869 1908 MS65 PCGS. Frosty yellow-gold luster is devoid of major abrasions on this Gem final-year Liberty Head half eagle. The strike is sharp, and eye appeal is compelling. PCGS has seen 50 finer coins (4/17), although many collectors will consider this piece fully satisfactory with regards to technical and aesthetic merit. NGC ID# 25ZE, PCGS# 8418

INDIAN HALF EAGLES

4870 1908 MS64 PCGS. This first-year type coin displays sharp detail and original yellow-gold luster. The obverse is nearly a full grade point finer by itself, although scattered light grazes on the reverse limit the numeric designation. NGC ID# 28DE, PCGS# 8510

4871 1908 MS64 PCGS. This is the first year of issue for Bela Lyon Pratt's iconic Indian head design that appears on quarter eagles and half eagles from 1908 to 1929. This sharply detailed Choice Mint State example has dusky steel toning on its brilliant yellow surfaces. NGC ID# 28DE, PCGS# 8510

4872 1908-D MS64 NGC. A strong strike and rose-gold color are typical characteristics of the 1908-D. The mintmark is especially well-defined. Luster is slightly subdued and satiny. This Choice first-year half eagle displays minor grazes but no major marks. Only five finer examples at NGC (5/17). NGC ID# 93KW, PCGS# 8511

4873 1909-D MS64 NGC. CAC. The 1909-D is a favorite type-coin issue. This CAC-approved near-Gem displays a bold strike and satiny orange-gold luster. Light, scattered marks in the fields determine the grade. NGC ID# 28DJ, PCGS# 8514

4874 1909-D MS64+ PCGS. CAC. Khaki-gold surfaces are largely unabraded for this Denver date and remarkably Choice as a result. Most examples even approaching the Gem level show bagmarks and other distractions from careless handling of the large mintage (more than 3.4 million pieces struck), yet this coin is smooth on both sides. A few small, blended areas are noted on the headdress and a tiny scrape on the jawline. An ideal type coin. NGC ID# 28DJ, PCGS# 8514

4875 1909-D MS64+ PCGS. CAC. A lovely Choice Mint State example of the popular Denver Mint issue, this piece displays satiny orange-gold luster with pleasing lilac overtones. Both sides exhibit sharply defined design motifs. Scarce with the twin awards of the PCGS Plus designation and CAC endorsement. NGC ID# 28DJ, PCGS# 8514

1910 Half Eagle, Bold MS64+

4876 1910 MS64+ PCGS. Radiant luster illuminates rich, wheat-gold surfaces that show even fewer ticks than the Choice assessment suggests. The headdress and wing feathers are boldly impressed, indicative of a strong strike throughout. The 1910 can be found with minimal searching in MS64, but Plus-graded near-Gems are very scarce. There are merely 26 finer examples at PCGS (4/17). NGC ID# 28DK, PCGS# 8517

4877 1911 MS64 PCGS. Half eagle production amounted to 915,000 coins in 1911. Survivors are surprisingly scant in full Gem condition, heightening demand for pleasing MS64 examples like this. Orange-gold color dominates, complemented with blushes of lavender. Well-struck centrally with soft mint luster. NGC ID# 28DP, PCGS# 8520

4878 1912 MS64 PCGS. According to Akers: "Almost without exception, the 1912 is very sharply struck with very good to excellent lustre, usually the latter." This near-Gem corresponds to that assessment. Light peach-gold surfaces display top-notch preservation. Lovely eye appeal. NGC ID# 28DS, PCGS# 8523

4879 1912 MS64 NGC. The accessibility of the 1912 becomes restricted in grades higher than MS63. Choice representatives are scarce, and Gems prove rare. This near-Gem is exceedingly strong with frosty peach-gold color and lively mint luster. Small grazes and a tick behind the eagle's head define the grade. NGC ID# 28DS, PCGS# 8523

4880 1913 MS64 PCGS. The rarity of Gem 1913 half eagles puts them out of reach for most collectors, who instead look for pleasing MS64 examples like this to fill their sets. Fully struck design elements appear on each side. Rich honey-gold colors softly lustrous surfaces. NGC ID# 28DT, PCGS# 8525

4881 1913 MS64+ PCGS. CAC. Apricot-gold color dominates this lovely MS64+ half eagle, undeniably at the upper end of the scale for quality within the grade. Each side boasts a bold impression, and the only overt marks pass through the I in IN and the T in TRUST. PCGS reports 55 finer grading events (5/17). NGC ID# 28DT, PCGS# 8525

4882 1913-S MS61 NGC. Deep violet spots run over the apricot-gold surfaces on both sides of this half eagle. The design elements are somewhat better defined than ordinarily seen, especially on the eagle's shoulder. The mintmark is barely visible, however, as is the usual case for this issue. Several marks are scattered about. NGC ID# 25ZP, PCGS# 8526

4883 1914 MS63 PCGS. The popular 1914 Indian half eagle was produced on the very brink of the First World War. This impressive Select specimen displays sharply detailed design elements and lustrous orange-gold surfaces with a few scattered, minor signs of contact. NGC ID# 28DU, PCGS# 8527

4884 1914-D MS63 PCGS. A pleasing Select example of the final half eagle issue struck at the Denver Mint, this coin exhibits sharply detailed design elements and lightly marked orange-gold surfaces with strong mint luster on both sides. NGC ID# 28DV, PCGS# 8528

4885 1915 MS64 PCGS. The 1915 issue becomes quite scarce at the Gem level, making MS64 coins such as this sharply struck example an optimal selection for date and mint collectors. Lilac overtones add natural appeal to the wheat-gold surfaces, which show fewer abrasions than often seen on the second-to-last Philadelphia Mint Indian half eagle. NGC ID# 28DX, PCGS# 8530

4886 1916-S MS62 NGC. A fairly low mintage of 240,000 Indian half eagles was accomplished at the San Francisco Mint in 1916. No half eagles were struck at the other mints that year and no more were struck at any mint until 1929. This well-detailed MS62 example displays lightly marked orange-gold surfaces with slightly subdued mint luster. NGC ID# 28DY, PCGS# 8532

1916-S Half Eagle, MS63 Last Issue of the Decade

4887 1916-S MS63 PCGS. As the United States entered World War I, regular issue gold coinage production was halted at all three mints, and only the San Francisco facility produced gold pieces in 1916. A small number of McKinley gold dollars were coined at Philadelphia in 1916 and 1917, but full scale production was halted. This pleasing piece exhibits light yellow-gold surfaces with hints of olive toning and scattered marks that prevent a higher grade. NGC ID# 28DY, PCGS# 8532

LIBERTY EAGLES

4888 1840 XF40 PCGS. The 1840 Liberty eagle is scarce in all grades but is at least collectible in XF and the lower AU ranges. Uncirculated coins are extremely rare. This XF representative displays strong detail and bright yellow-gold surfaces. Scattered surface chatter is typical of the issue and grade. NGC ID# 262G, PCGS# 8581

4889 1842 Large Date AU53 PCGS. CAC. Traces of luster reside in the protected areas of this yellow-gold eagle. Well-defined devices and minimally marked surfaces round out the coin's pleasing eye appeal. Population: 10 in 53, 27 finer. CAC: 1 in 53, 2 finer (4/17). NGC ID# 262M, PCGS# 8584

4890 1843 AU53 PCGS. Despite a fairly substantial mintage, the 1843 Liberty eagle is seldom encountered in high grade. This impressive AU53 specimen shows just a touch of wear on the design elements and the orange-gold surfaces are lightly abraded. Population: 7 in 53, 8 finer (5/17). NGC ID# 262P, PCGS# 8588

4891 1843-O AU55 NGC. Variety 3. This 1843-O is scarce both in an absolute sense and by condition. Like most New Orleans gold, the issue circulated heavily in the South and attrition was high regardless of the mintage. This attractive brassy-gold example shows remnants of prooflike surface and retains a moderate amount of orange-gold mint luster. Struck from lapped dies, which weakens the eagle's tailfeathers and the reverse lettering, yet the strike is otherwise sharp. Census: 67 in 55 (1 in 55+★), 62 finer (4/17). NGC ID# 262R, PCGS# 8589

1845-O Ten Dollar, AU53 Repunched Date

4892 1845-O Repunched Date AU53 NGC. Variety 2. The date is centered high and left with bold repunching on 84. The mintmark is over EN in TEN. Of the 47,500 ten dollar gold pieces struck at the New Orleans branch mint in 1845, Doug Winter estimates 175 to 225 examples survive, only 22 to 27 of which can be found across all AU grades. The central motifs are razor-sharp, softening slightly around the rims. An attractive orange-gold example with semiprooflike fields. NGC ID# 262V, PCGS# 88593 Base PCGS# 8593

4893 1848 XF40 NGC. Minimally abraded surfaces display greenish-gold patina. Both sides exhibit well-struck devices. A very nice coin for the grade. NGC ID# 2633, PCGS# 8599

4894 1849 AU55 PCGS. Breen-6886. The 1 in the date is widely repunched, with the base of a previous 1 far above the base of the primary upright. This example is well-struck except for centers on stars 1, 2, and 13. Luster remains across the somewhat prooflike surfaces, especially on the obverse. We note trivial contact marks and chatter over the bright-yellow fields.

Ex: Santa Clara Signature (Heritage, 11/2002), lot 7687; Long Beach Signature (Heritage, 9/2016), lot 8547. NGC ID# 2635, PCGS# 8601

4895 1850 Large Date AU55 PCGS. Soft greenish-gold patina imbues this Choice AU ten dollar that displays traces of luster in the recessed areas. Well-defined design features further enhance the coin's desirability. Population: 16 in 55, 21 finer (4/17). NGC ID# 2637, PCGS# 8603

4896 1850 Large Date — Cleaning — PCGS Genuine. Unc Details. At least three obverse dies are identified for the 1850 Large Date eagles. This die has the date set to the left, but has no repunching evident on the base of the 1. Minor die lines are visible outside the first two stars on the left, and delicate die cracks are observed on both sides. A sharply defined example, this piece has satiny luster, brilliant yellow surfaces, and faint greenish tendencies.

4897 1850 Large Date — Streak Removed — PCGS Genuine. Unc Details. No signs of wear appear on this eagle that exhibits a small streak on the bust that has been removed, with a spot inside the reverse rim that has also been removed. Both sides are sharply defined with satiny light yellow luster.

4898 1853/2' AU53 PCGS. Random die lines inside the lower loop of the 3, and below that digit, have been categorized as a "3 over 2," but careful examination leads to the conclusion that this is not an actual overdate. For that reason, PCGS describes this as an 1853/2' with the 2 in quotes. Noticeable luster remains in the protected areas on both sides of this splendid light yellow example. Population: 10 in 53, 23 finer (5/17). NGC ID# C82G, PCGS# 8611

4899 1860-O — Cleaning — PCGS Genuine. AU Details. Variety 2. The 1860-O was the final gold eagle struck at the New Orleans Mint prior to the Civil War. Production of the denomination did not resume at that facility until 1879. The 1860-O is scarce in high grade. This AU-level coin displays good detail but bright yellow-gold surfaces that reveal an old cleaning. Scattered abrasions are typical of the issue.

1861 Eagle, MS60
Popular No Motto Type Coin

- 4900 1861 MS60 PCGS.** A popular and available issue, considering its status as a first-year Civil War coinage. This piece offers semiprooflike yellow-gold surfaces with the light ticks and field chatter characteristic of so many large denomination gold coins from this era. Population: 7 in 60, 37 finer (4/17). NGC ID# 2647, PCGS# 8633

1866 With Motto Ten Dollar, XF45
Low-Mintage, First-Year Issue

- 4901 1866 XF45 PCGS.** Rich, orange-gold patina retains much mint luster as well as sharp definition on the motifs, seldom seen on a Motto ten dollar and therefore an ideal selection at the Choice XF level. Abrasions are tiny and inconspicuous. The mintage of just 3,750 pieces makes the 1866 scarce-to-rare in all grades, and the great eye appeal is sure to attract gold collectors of every ilk. Population: 11 in 45, 22 finer (5/17). NGC ID# 264J, PCGS# 8649

- 4902 1868 XF45 NGC.** The apricot-gold surfaces of this Choice XF 1868 eagle exhibit light circulation wear and a few scattered ticks, but much collector appeal remains on problem-free surfaces. The mintage was only 10,630 pieces, but this post-Civil War date had a good survival rate. NGC ID# 264N, PCGS# 8653

1874-S Eagle, Reddish-Gold AU50
Only 10,000 Coins Struck

- 4903 1874-S AU50 NGC.** The 1874-S is very scarce in all grades and unknown in Mint State, unsurprising given the issue's tiny mintage of 10,000 coins and widespread circulation in Western commerce. This is well-detailed, reddish-gold representative with scattered abrasions and minor friction from brief use. A pleasing, original eagle. NGC ID# 2659, PCGS# 8671

- 4904 1878-S AU50 PCGS.** Long regarded as an underrated issue, the 1878-S has a mintage of only 26,100 pieces, and few were exported to foreign bank holdings. This is a minimally marked green-gold representative with pleasing sharpness and noticeable pockets of luster. NGC ID# 265L, PCGS# 8682

- 4905 1880 MS63 PCGS.** A seldom offered Select Mint State example with frosty original luster and bright yellow-gold color. Only a few light abrasions are present as is consistent with the grade. Finer 1880 gold eagles are rarely offered. Population: 73 in 63 (3 in 63+), 23 finer (4/17). NGC ID# 265S, PCGS# 8687

1880-O Ten Dollar, AU53
Conditionally Better Issue

- 4906 1880-O AU53 PCGS. Variety 1.** The New Orleans issue of this date is rare in Uncirculated condition, although AU coins remain accessible for most Southern gold enthusiasts. Here offered is a well-detailed wheat-gold AU53 example with relatively smooth surfaces. The protected portions of the fields offer some remaining luster. Population: 26 in 53, 48 finer (4/17). NGC ID# 265U, PCGS# 8689

1881-O Liberty Eagle, AU53
Low Mintage, Conditionally Scarce

- 4907 1881-O AU53 PCGS. Variety 1.** Much like the previous issue from this mint, the 1881-O Liberty eagle is a rarity in Mint State and only marginally available in AU. A low mintage of 8,350 pieces contributes to this scarcity. The current AU coin offers original olive-gold coloration and well-detailed motifs. Scattered light abrasions are typical of the grade and issue. Population: 20 in 53, 36 finer (4/17). NGC ID# 265Y, PCGS# 8693

- 4908 1882 MS64 PCGS.** Scarce in Choice Mint State and rare any finer, the 1882 Liberty eagle was struck in plentiful quantity (2.2 million pieces) but remarkably few pieces were domestically preserved in high grades. Most of the mintage sat in European bank hoards, where the coins were counted and recounted over several decades. The present near-Gem example is lustrous and frosty with a few tiny marks. The strike is above-average for the issue, with nominal weakness at the back-of-neck curls. Just two examples are graded numerically finer at both services combined. PCGS population: 50 in 64 (2 in 64+), 1 finer (4/17). NGC ID# 2662, PCGS# 8695

- 4909 1883 MS63 NGC.** The wheat-gold surfaces of this Select ten dollar reveal just occasional breaks in the luster flow associated with scattered marks. The design features are well-impressed throughout. NGC ID# 2666, PCGS# 8699

4910 1889 MS60 NGC. A splendid light yellow-gold example that is above the average certified grade of AU58. Only 4,440 of these Liberty eagles were minted in Philadelphia in 1889, and few Mint State examples are known. This light yellow-gold example has reflective fields and a trace of contrast with minimal marks. Census: 24 in 60, 36 finer (5/17). NGC ID# 266N, PCGS# 8715

4911 1890-CC AU55 PCGS. Variety 1-A, showing IN GOD WE TRUST faintly die doubled north. This Choice AU 1890-CC ten displays partially lustrous surfaces and bronze-gold coloration. Trivial high-point friction comes with scattered handling marks, none particularly obtrusive. NGC ID# 266S, PCGS# 8718

**1890-CC Ten Dollar, AU58
Elusive in Finer Condition**

4912 1890-CC AU58 PCGS. CAC. Variety 1-A. A moderately low mintage of 17,500 coins ensures the scarcity of the 1890-CC ten in high grade. This CAC-approved near-Mint example will appeal to the budget-conscious collector seeking a sharp, high-quality coin. The strike is excellent, and moderate luster remains in the fields. Scattered abrasions reflect normal circulation abuse for gold pieces in the AU grade range. NGC ID# 266S, PCGS# 8718

4913 1891-CC AU58 PCGS. Variety 1-A. Considerable prooflike surface remains beneath lightly abraded fields of this well-defined, briefly circulated Carson City ten. The sharp strike is impressive, while the amount of surface chatter determines the near-Mint State grade. The 1891-CC is the sole readily obtainable Carson City ten, and accordingly popular as a result. NGC ID# 266U, PCGS# 8720

4914 1891-CC/CC FS-501 AU58+ PCGS. This is an interesting and little appreciated variety that clearly shows double punching on the mintmark. The golden-orange surfaces are bright with semireflective fields on each side. Fully struck, the fields show only the small abrasions that are consistent with the grade. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

4915 1891-CC/CC FS-501, Variety 3-C, MS60 PCGS. The mintmark is recut on this *Cherrypickers'* variety. As a Mint State 1891-CC eagle, this piece is lustrous and appealing despite the grade-appropriate abrasions. A sharp strike adds to the visual appeal. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

4916 1892-O MS61 PCGS. This surfaces of this scarce New Orleans date show remarkably few abrasions and the strike is unusually sharp for the issue. A pair of purplish alloy spots near the date are sole marks of note. Intense yellow-gold luster radiates edge-to-edge. NGC ID# 266X, PCGS# 8723

4917 1892-O MS62 NGC. An attractive light yellow-gold example of this conditionally rare New Orleans eagle. Although plentiful at this grade level, NCG has graded exactly one finer (5/17). Both sides of this piece have the usual scattered marks that are expected at this grade level. NGC ID# 266X, PCGS# 8723

4918 1892-O MS62 PCGS. This brilliant and lustrous New Orleans eagle survives from a mintage of only 28,688 coins. Both sides have frosty lemon-yellow surfaces with delicate peripheral blue toning. PCGS has only certified eight examples in higher grades (5/17). NGC ID# 266X, PCGS# 8723

4919 1893-CC XF40 PCGS. Variety 1-A. Bronze-colored surfaces show deeper coppery hues in the protected areas next to relief details, giving this lightly circulated 1893-CC ten old-time eye appeal. The design elements show good detail for the grade, and the surfaces are free of major abrasions. NGC ID# 2672, PCGS# 8726

4920 1893-O MS60 NGC. CAC. Variety 1. The only known die pair for the mintage of just 17,000 1893-O Liberty eagles. The yellow-gold surfaces display a bit more luster on the reverse than on the obverse. The design elements exhibit strong definition, and the light scattered marks are fewer and less severe than would be expected for the MS60 grade. Above-average eye appeal is affirmed by CAC. NGC ID# 2673, PCGS# 8727

4921 1893-O MS62+ PCGS. The PCGS Plus designation is an important attribute for this conditionally challenged, low-mintage New Orleans eagle, which is rare any finer. Flashy sun-gold luster radiates across both sides of this lightly abraded example. A sharp strike exceeds expectations for the issue. Population: 2 in 62+, 13 finer (4/17). NGC ID# 2673, PCGS# 8727

4922 1893-S MS63 PCGS. While the 1893-P ten dollar is readily available in MS63, its San Francisco counterpart is very scarce in this grade and extremely rare any finer. Peach and green-gold color covers each side, the frosted surfaces showing notably few marks on the obverse. Well-struck despite incompleteness on the stars and olive leaves. Population: 71 in 63 (1 in 63+), 4 finer (4/17). NGC ID# 2674, PCGS# 8728

4923 1897-O MS61 NGC. Variety 2. A die line through RT aids in attribution. Rose-gold surfaces have an undeniable semiprooflike quality about them with moderate field-device contrast evident on each side. This MS61 New Orleans eagle is well-struck with scattered abrasions. NGC ID# 7LHC, PCGS# 8738

4924 1898 MS64 PCGS. The 1898 Liberty eagle was produced in large numbers, but relatively few examples have survived in high grade. This well-detailed Choice specimen offers lustrous orange-gold surfaces with only minor signs of contact. Population: 85 in 64 (4 in 64+), 11 finer (5/17). NGC ID# 267G, PCGS# 8740

**1901-O Eagle, Lustrous MS63
Blazing Red-Orange Surfaces**

4925 1901-O MS63 NGC. The New Orleans Mint only struck 72,041 examples of this gold issue, one of few gold coin releases struck there in the 20th century. Fortunately, some Mint State examples survive today, including this gorgeous Select Mint State example, showing deeply lustrous surfaces with blazing reddish-orange color and excellent eye appeal. Census: 22 in 63, 10 finer (5/17). NGC ID# 267R, PCGS# 8748

4926 1901-S MS64+ PCGS. CAC. This well-struck S-mint eagle displays a degree of originality and quality within the grade that both PCGS and CAC have recognized. Series specialists are sure to reach the same conclusion. Each side features elegant rose and green-gold color. A few minor flecks prevent an even higher grade. NGC ID# 267S, PCGS# 8749

4927 1902 MS63 PCGS. Only 82,400 eagles were produced at the Mint in 1902. Select Uncirculated examples are very scarce in today's market and exceedingly rare any finer. Lively luster graces luminous, lemon-gold surfaces that show occasional greenish tinges. Boldly struck everywhere except the outer olive leaves. PCGS shows 24 higher grading events (5/17). NGC ID# 267T, PCGS# 8750

- 4928 1902-S MS64 NGC.** This West Coast ten dollar gold issue is more accessible in high grades than its East Coast counterpart thanks in part to a healthy mintage of 469,500 coins. The stars, feathers, fletchings, and talons exhibit a pinpoint impression. This glimmering rose-gold near-Gem is readily appealing without significant distractions. NGC ID# 267U, PCGS# 8751

**1904 Eagle, Choice Uncirculated
Lustrous Surfaces**

- 4929 1904 MS64 PCGS. CAC.** The wheat-gold surfaces brim with effulgent luster over this near-Gem 1904 eagle, a great choice for a type set. The well-struck surfaces show a couple of tiny ticks and small luster grazes, none of them overt. This issue is seldom seen any finer and usually appears in lower grades. Population: 52 in 64 (2 in 64+), 4 finer. CAC: 14 in 64, 2 finer (4/17). NGC ID# 267Y, PCGS# 8755

- 4930 1906 MS64 PCGS.** The 1906 eagle is scarce in Choice condition and rarely seen finer. This near-Gem has a sharp strike and frosty yellow-gold mint luster. A few minor abrasions in the left obverse field prevent a higher numeric designation. Population: 43 in 64 (2 in 64+), 12 finer (4/17). NGC ID# 7JHG, PCGS# 8759

- 4931 1906-D MS64 PCGS.** This is a particularly well-preserved gold eagle for the grade, showing only a few stray grazes under a loupe that prevent full Gem classification. The strike is sharp, and each side displays vibrant, frosty yellow-gold mint luster. There are 32 finer submissions reported by PCGS (4/17). NGC ID# 7JHG, PCGS# 8760

- 4932 1906-D MS64+ PCGS.** Lustrous yellow-gold surfaces display faint orange accents for nice eye appeal. As usual, this Denver Mint ten is sharply struck and the surfaces show only minimally abrasions. Rare in full Gem condition, this Plus-graded near-Gem is a high-end coin at just a fraction of the price. Population: 11 in 64+, 32 finer (4/17). NGC ID# 7JHG, PCGS# 8760

- 4933 1907 MS63 NGC.** This final-year Liberty Head type coin displays sharp design elements and frosty original luster. Light, scattered abrasions account for the grade but none are individually obtrusive. The 1907 makes frequent appearances in the holdings of gold investors as well as those of type and date collectors. NGC ID# 2688, PCGS# 8763

INDIAN EAGLES

- 4934 1907 No Motto MS62 PCGS.** Graded MS62 but with far fewer abrasions and far more eye appeal than is typically observed at this grade level. The strike is bold, but high-point slide marks on the eagle's shoulder and Liberty's cheek appear to be what limited the PCGS classification. The coin shows smooth straw-gold luster and is ideal for the type collector seeking a nice example in the lower Mint State grades. NGC ID# 28GF, PCGS# 8852

**1907 No Motto Indian Eagle, MS64
No Periods Issue, Nice Type Coin**

- 4935 1907 No Motto MS64 PCGS.** The No Periods 1907 Indian eagle is often chosen to represent the No Motto type in U.S. gold collections. While many collectors strive for pricey Gems, budget-conscious enthusiasts recognize the value that high-end Choice coins offer. The present example is well-struck and thoroughly lustrous with original yellow-gold surfaces. Only a trace of handling on Liberty's cheek limits the grade, leaving the fields virtually pristine. NGC ID# 28GF, PCGS# 8852

**1907 Indian Eagle, MS64+
No Motto Type**

- 4936 1907 No Motto MS64+ PCGS.** An important first-year issue representing a two-year design type. A single small copper toning spot is noted inside the obverse border at 8:30 on this lovely near-Gem No Motto Indian eagle. Both sides have grade-consistent marks of no consequence on the frosty and fully lustrous light yellow-gold surfaces. NGC ID# 28GF, PCGS# 8852

- 4937 1908 Motto MS64 NGC.** An attractive Choice specimen from the first year of the popular Motto design, this coin exhibits well-detailed design elements, with just a touch of the usual softness on the eagle's shoulder. The lightly marked orange-gold surfaces are lustrous and appealing. NGC ID# 28GJ, PCGS# 8859

**1908-S Ten Dollar, Unc Details
Merely 59,850 Coins Minted**

- 4938 1908-S — Cleaning — PCGS Genuine. Unc Details.** A paltry production total of 59,850 coins makes the 1908-S one of the more challenging issues in the Saint-Gaudens ten dollar set. This coin has Uncirculated sharpness, though the two lowest headdress feathers and the eagle's shoulder are typically defined. The noted cleaning is largely undistracting.

- 4939 1909 MS63 PCGS.** Lustrous with green and wheat-gold color, this Select Uncirculated eagle boasts excellent eye appeal and few overt distractions aside for superficial grazes. Two marks occur on the cheek. The strike is trivially soft on the forecurls and shoulder. NGC ID# 28GM, PCGS# 8862
- 4940 1909-S MS62 PCGS.** Wisps of dusky steel toning appear on the frosty and lustrous yellow-gold surfaces of this conditionally scarce S-Mint Indian eagle. The average certified grade of this issue is just below AU58. NGC ID# 28GP, PCGS# 8864
- 4941 1910-D MS64 PCGS.** The availability of the 1910-D makes it an ideal option for type collectors in search of a nice Saint-Gaudens eagle. This satiny near-Gem boasts eye-appealing rose and green-gold color. The fields and portrait are carefully preserved. NGC ID# 28GS, PCGS# 8866
- 4942 1911 MS64 NGC.** Frosty, sun-gold surfaces display notably few abrasions for the grade. The only noteworthy mark appears above the 9 in the date. This Choice Saint-Gaudens ten showcases a bold impression throughout, including the two lowest feathers on the headdress. The 1911 proves challenging in Gem condition. NGC ID# 28GT, PCGS# 8868
- 4943 1911 MS64 PCGS. CAC.** Attractive original luster offers a warm wheat-gold hue on each side of this near-Gem 1911 Indian eagle. The design elements are boldly defined, and grade-limiting abrasions are minor at the most. Finer 1911 eagles may be out of reach for some collectors. NGC ID# 28GT, PCGS# 8868

**1911-D Ten Dollar, AU53
Low-Mintage Issue**

- 4944 1911-D AU53 PCGS.** With a small mintage of only 30,100 coins, the 1911-D Indian eagle is a semikey date in all grades. This About Uncirculated example will appeal to budget-conscious collectors. Some luster remains in the fields, and the surfaces exhibit original straw-gold coloration. The devices are well-detailed amid only lightly marked fields. NGC ID# 28GU, PCGS# 8869

**1911-D Ten Dollar, AU53
Low Mintage of 30,100 Coins**

- 4945 1911-D AU53 NGC.** Although the 1911-D is not the rarest date in the Indian Head ten dollar series (that distinction goes to the 1933, followed by the 1920-S), it is rarer than its famous quarter eagle counterpart. Only 30,100 pieces were struck. This is a partly lustrous khaki-gold eagle with visible merging over the highest points. Nevertheless, the two lowest headdress feathers are needle-sharp. NGC ID# 28GU, PCGS# 8869

- 4946 1911-S AU58+ NGC.** A low mintage of 51,000 coins and a small survival rate in Mint State make this San Francisco eagle a challenging hole to fill in the Saint-Gaudens set. Whatever trace of friction noted by NGC is essentially invisible. Partial luster remains over minimally marked, honey-gold surfaces. NGC ID# 28GV, PCGS# 8870
- 4947 1912 MS64 PCGS.** Satiny straw-gold luster and sharp design elements offers pleasing visual appeal on this near-Gem 1912 Indian ten. A few light marks limit the grade. PCGS reports only 53 numerically finer coins (5/17), making this piece attractive to the budget-conscious collector. NGC ID# 28GW, PCGS# 8871
- 4948 1913-S AU53 PCGS.** Only 66,000 ten dollar gold coins were struck in San Francisco in 1913, making this one of the sought-after semikeys in the beloved Indian Head series. Straw-gold surfaces show signs of modest circulation with a couple of marks on the cheek and headdress. NGC ID# 28GZ, PCGS# 8874
- 4949 1914 MS63 NGC.** A pleasing Select Mint State example, this 1914 Indian eagle survives from a moderate mintage of 151,050 coins. This piece has frosty lemon-yellow luster and wisps of bluish overtones. NGC ID# 28H2, PCGS# 8875
- 4950 1914-D MS63 PCGS.** A colorful combination of green and peach-gold hues adorns this satiny 1914-D eagle. The devices exhibit good detail with a touch of high-point softness. Scattered abrasions are of little import. Scarcely seen in higher grades. NGC ID# 28H3, PCGS# 8876

**1914-S Ten Dollar, MS62
Conditionally Scarce S-Mint Issue**

- 4951 1914-S MS62 PCGS.** The surfaces are far smoother than the MS62 assessment conveys. Marks come mainly in the form of tiny, undistracting ticks. The arrow fletchings and eagle's shoulder are lightly impressed, but the lowest headdress feathers show crisp detail. A pleasing, conditionally scarce representative with warm apricot-gold color. NGC ID# 28H4, PCGS# 8877

- 4952 1915 MS63 PCGS.** A collectible Select Mint State example of this often elusive Philadelphia issue, showing a sharp strike from fairly fresh dies with crisp definition of the relief elements. Satiny yellow-gold luster shows no major abrasions. NGC ID# 28H5, PCGS# 8878

- 4953 1915 MS63 NGC.** A few scattered marks are consistent with the grade of this Select Mint State 1915 Indian ten. Both sides are brilliant and lustrous with frosty yellow-gold surfaces. NGC ID# 28H5, PCGS# 8878

- 4954 1915 MS64 PCGS.** The scarcity of Gem examples places added pressure on attractive MS64 representatives of the 1915 ten dollar gold piece. This is such a coin, boasting crisp detail on the devices and a notably clean obverse. Frosty with mixed shades of light orange and yellow-gold. NGC ID# 28H5, PCGS# 8878

- 4955 1926 MS64 PCGS.** The 1926 is a popular type-coin issue, although it is challenging for some collectors to acquire in Gem condition. This affordable near-Gem example shows relatively clean surfaces and frosty yellow-gold mint luster. Slight strike softness is seen on the eagle's shoulder. NGC ID# 28H9, PCGS# 8882

4956 1926 MS64 NGC. An impressive example of a plentiful date that is often the choice of type collectors, this piece exhibits frosty luster and brilliant yellow-gold surfaces. Only a few unobtrusive ticks exist on the appealing, near-Gem fields and motifs. NGC ID# 28H9, PCGS# 8882

4957 1932 MS64+ PCGS. This is a frosty yellow-gold example of this popular type-coin issue, showing all of the eye appeal and blazing luster for which the 1932 Indian eagle is widely known. It is well-struck and shows no major abrasions on Liberty's cheek. The Plus designation adds to the appeal. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

4958 1850 VF30 PCGS. Detail is slightly better than on the typical VF example, heightening the appeal of this first-year Philadelphia type coin. The surfaces are bright and colored yellow-gold. Double eagles of this period were largely struck with California gold, which is distinctive for its yellowish hue on early-date Liberty Head twenties. NGC ID# 268F, PCGS# 8902

1850 Liberty Double Eagle, XF40 First-Year Type Coin

4959 1850 XF40 NGC. From a first-year mintage of 1.1 million pieces, the 1850 Liberty double eagle is an extremely popular type issue. This lightly abraded orange-gold specimen retains a few hints of original mint luster, and exhibits some wear on the rounded prongs of the coronet and hair curls. This coin should find a home in a fine date or type collection. NGC ID# 268F, PCGS# 8902

1850 No Motto Twenty, XF45 Original Reddish-Gold Color

4960 1850 XF45 PCGS. CAC. First-year double eagles are always in high demand, especially when found with original, unadulterated surfaces. This Choice XF, reddish-gold twenty with CAC approval is exactly that. Strong devices display minimal blending. A die crack travels through the tops of UNITED STAT. Marvelous eye appeal. NGC ID# 268F, PCGS# 8902

4961 1851 AU53 NGC. Some luster remains in the fields of this About Uncirculated Type One double eagle. The design elements are well-detailed amid natural, green-gold patina. Scattered abrasions and surface chatter exist, but they are not unusual for the assigned grade. NGC ID# 268H, PCGS# 8904

4962 1851 AU53 PCGS. With the massive influx of California gold, double eagle production in 1851 topped 2 million pieces, but most did not survive, and Mint State examples are elusive. This representative displays rich orange-gold patina, with moderate underlying mint luster and hints of olive showing up when tilted beneath a light. Only slight wear is seen over the design elements, and a single tick in the obverse field near star 6 is the only mark of note. NGC ID# 268H, PCGS# 8904

1851 Double Eagle, AU58 Early No Motto Representative

4963 1851 AU58 NGC. The nearly Uncirculated 1851 double eagle grades seven points higher than the average certified example, and finer Mint State coins are very scarce. Accents of rose in the recesses complement lustrous, green-gold surfaces. A single reeding mark on the upper cheek merits mention, while the reverse is surprisingly clean. NGC ID# 268H, PCGS# 8904

4964 1852 VF35 PCGS. A readily available Philadelphia issue among Type One twenties, this 1852 example saw moderate circulation yet retains solid Choice VF definition. A scattering of small marks are fade into the pale olive-gold surfaces, softened by wear. Relatively few double eagles of any date exist at this collector-friendly grade level. NGC ID# 268K, PCGS# 8906

4965 1852 AU53 PCGS. Myriad handling marks on both sides of this example are typical of these large gold pieces. This double eagle exhibits light yellow surfaces with traces of luster and hints of pinkish overtones. NGC ID# 268K, PCGS# 8906

4966 1852 AU53 NGC. From a large mintage of more than 2 million pieces, the 1852 Liberty double eagle is an available Type One issue. This attractive AU53 specimen shows just a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. NGC ID# 268K, PCGS# 8906

1852/1852 Double Eagle, AU55 FS-301, Bold Overdate Variety

4967 1852/1852 FS-301 AU55 PCGS. CAC. All four date digits are repunched north. Although not listed in the *Guide Book*, this is a bold overdate variety that should command a slight premium. Original luster issues from the design recesses of this well-impressed and beautifully preserved No Motto twenty. Orange and khaki-gold surfaces are remarkably smooth. NGC ID# 268K, PCGS# 145729 Base PCGS# 8906

**1853 Double Eagle, AU55
Traces of Peripheral Luster**

- 4968 1853 AU55 NGC.** Both sides display strong detail for a lightly circulated Type One double eagle. Light yellow-gold surfaces retain traces of peripheral luster and scattered marks. Two rim nicks occur near stars 2 and 3. Twenty dollar gold output at the Philadelphia Mint dropped to 1.2 million coins in 1853, down by nearly 800,000 coins over the previous year. NGC ID# 268M, PCGS# 8908

**1853 Liberty Twenty Dollar, AU55
Partial Glowing Mint Luster**

- 4969 1853 AU55 PCGS Secure.** The stars feature full radials, while Liberty's curls show a touch of softness over the eye. Partial luster glows from the recesses, and rich shades of orange-gold provide color to each side. Small abrasions are peppered throughout, but the only singular mark is a thin depression across Liberty's upper cheek. NGC ID# 268M, PCGS# 8908

- 4970 1853 AU55 NGC.** With a mintage of more than 1.2 million pieces, the 1853 is an available Philadelphia date and a favorite Type One double eagle for both series and type collectors. Scattered moderate marks and field chatter are present, but overall this is a sharply struck and still-lustrous example considering its five points of wear. NGC ID# 268M, PCGS# 8908

**1854 Small Date Twenty, AU55
Bright Surfaces, Partially Lustrous**

- 4971 1854 Small Date AU55 NGC.** The Small Date 1854 double eagle far outnumbers the Large Date variety, but neither type is plentiful in Mint State. This attractive Choice AU specimen offers an alternative, with lightly abraded yellow-gold surfaces and minimal wear on the design elements. NGC ID# 268R, PCGS# 8911

- 4972 1855 XF45 NGC.** Original, green-gold patina retains hints of luster in the protected areas of the fields on this Choice XF 1855 double eagle. The strike is bold, and surface chatter is at a minimum. Eye appeal is pleasing for the grade. An ideal Liberty Head twenty for type. NGC ID# 268V, PCGS# 8914

- 4973 1855-S XF45 NGC. CAC.** Ex: Granite Lady Hoard. The scarce Large S mintmark reverse. An overtly original example, with olive-gold patina and bits of crusty dark build-up in crevices and nooks. Attractive reddish-orange undertones glow beneath the still-lustrous patina. Marks are few while ample evidence remains of a sharp strike and the one-time reflective surfaces. CAC endorsed and rightfully so. NGC ID# 268X, PCGS# 8916

**1855-S No Motto Twenty, AU55
Scarce Large S Mintmark**

- 4974 1855-S AU55 NGC.** Large S Mintmark. The vast majority of 1855-S double eagles have the Medium S mintmark, but a small percentage of the coins have a Large S shown by this About Uncirculated example. Lightly worn surfaces retain a modest amount of mint luster but the fields and motifs are speckled by numerous tiny abrasions from transport and brief circulation. Bright sun-gold color shines from both sides. NGC ID# 268X, PCGS# 8916

- 4975 1856-S XF45 PCGS.** Recoveries were numerous for the 1856-S from S.S. *Central America* as well as other from other shipwrecks. This example does not appear to be a seawater salvage coin, but one cannot be certain. It does display plentiful eye appeal for the Choice XF level, with significant luster that remains and orange accents over canary-yellow surfaces. The left serif of U in UNITED is missing and the crossbar of A in STATES was strengthened at the Mint. Minor machine doubling is visible at the legend. Small abrasions dot the surfaces, while moderate wear determines the assigned grade. NGC ID# 2692, PCGS# 8919

**1857 Double Eagle, Choice AU
Scarce in This Grade**

- 4976 1857 AU55 PCGS.** Doug Winter proposes a survival estimate of 900 to 1,200+ 1857 double eagles, the majority of which are found in VF and XF condition. Choice About Uncirculated examples are exceedingly scarce. Strike softness is usually an issue for the 1857. This piece shows the typical incompleteness at the lower obverse. The reverse is far sharper. Both sides radiate much remaining luster. Lightly abraded with alternating lilac and deep orange-gold tones. NGC ID# 2693, PCGS# 8920

1857-S Double Eagle, AU53
Recovered From the S.S. *Central America*

4977 1857-S AU53 PCGS. Variety 20F. Ex: S.S. *Central America*. SSCA 4662. A charming caramel-gold representative with smooth and partly lustrous surfaces. Variety 20F is the “No Serif, Right S” reverse variety, indicating the mintmark was entered further right than usual, and the U in UNITED lacks a left serif. Variety 20F was apparently struck prior to Variety 20A and Variety 20B, since most examples are lightly circulated, and comparatively few were recovered. Accompanying the lot is a forest-green Blanchard box, a faux *Ship of Gold* book, and a certificate of authenticity signed by Tommy Thompson of the Columbus-America Discovery Group. NGC ID# 2696, PCGS# 8922

4978 1857-S AU55 NGC. This is the year that the famous S.S. *Central America* sank, and large quantities of 1857-S double eagles were recovered as part of the treasure from that shipwreck. However, the present Choice AU example has an entirely different look and likely predated the treasure recovery. This piece has light yellow surfaces with traces of luster and trivial surface marks. NGC ID# 2696, PCGS# 8922

1857-S Liberty Double Eagle, AU58
Lustrous Type One Twenty

4979 1857-S AU58 NGC. Most known high-grade 1857-S twenties are from the salvage of the S.S. *Central America*, but most of those pieces are Uncirculated. Whether this piece came from that famous shipwreck or not, it is an affordable example of this challenging type. Each side retains significant portions of reddish-tinted mint luster, especially surrounding the devices. The obverse is a bit choppy from contact with other coins. NGC ID# 2696, PCGS# 8922

1858 Double Eagle, AU50
Above-Average Strike

4980 1858 AU50 PCGS. The 1858 usually shows an average strike, but this AU50 example displays pinpoint detail for a Type One twenty with full star centers and radials, bold curls, and crisp feathers. Rich, orange and green-gold surfaces show a scattering of abrasions consistent with brief circulation. Double eagle production at the Philadelphia Mint was limited to 211,714 coins in 1858. NGC ID# 2697, PCGS# 8923

4981 1858-S XF45 NGC. Other than 68 examples aboard the S.S. *Republic*, the 1858-S as seen no great influx of shipwreck recoveries to radically change the population of surviving coins, especially in Mint State. Most collections include a circulated example. This Choice XF coin is ideal for such a purpose, with lightly abraded and slightly worn surfaces, but with nice remaining luster beneath orange-gold coloration and plenty of eye appeal for the assigned grade. NGC ID# 2699, PCGS# 8925

4982 1859-S AU50 NGC. CAC. The typical 1859-S double eagle ranges in grade from VF to About Uncirculated, with few coins in full Mint State. This is an especially unabraded example for the AU50 level, with no heavy marks and considerable luster that remains beneath attractive, sun-gold surfaces. High point wear confirms its brief circulation. CAC endorsed for its easily perceptible quality. NGC ID# 269C, PCGS# 8928

1859-S Liberty Double Eagle, AU53
Pleasing Type One Twenty

4983 1859-S AU53 PCGS. The 1859-S is a median rarity in the Type One series, a coin that is neither available on demand nor when available found in high grades. This fields of this piece show the scuffiness expected of a lightly circulated twenty, but a large portion of the original luster still shines through and no serious marks are noticed. A nice-looking Type One double eagle.
Ex: *Long Beach Signature* (Heritage, 6/2002), lot 6897. NGC ID# 269C, PCGS# 8928

4984 1860-S XF45 PCGS. This orange-gold double eagle shows a trace of friction on the curls, bun, stars, and feathers but nothing out of the ordinary for the Choice XF grade. Partial luster remains, and marks are scattered evenly across each side. Higher-graded 1860-S twenties are surprisingly scarce. NGC ID# 269F, PCGS# 8931

4985 1860-S AU50 NGC. The 1860-S twenty is scarce in Mint State but collectible in AU. This About Uncirculated example displays bold detail and bronze-gold surfaces with remnants of luster in the protected areas. Light surface chatter is consistent with the grade. NGC ID# 269F, PCGS# 8931

1860-S Liberty Double Eagle, AU53
Nicely Preserved for the Grade

4986 1860-S AU53 NGC. Glowing golden-orange luster complements well-struck surfaces that show scattered, mostly light abrasions. Both sides are better-preserved than might be expected at this grade level. This piece is in a bit better grade than usually encountered for survivors of this production of slightly more than a half-million coins. NGC ID# 269F, PCGS# 8931

4987 1861 AU50 NGC. Nearly 3 million double eagles were coined in Philadelphia in 1861, the third highest mintage of any Liberty double eagle, and the highest mintage of the Type One design. As such, this is a perfect type coin to represent the design. This piece has scattered grade-consistent marks on its still lustrous light yellow surfaces. NGC ID# 269G, PCGS# 8932

1861 Twenty Dollar, AU55
Collectible No Motto Issue

4988 1861 AU55 PCGS. The 1861 is among the most collectible No Motto twenties, and a popular one because of its Civil War connection. This well-struck, orange-gold double eagle show glints of luster and rose accents within the confines of the design. Minimal abrasions appear in the exposed areas. NGC ID# 269G, PCGS# 8932

4989 1861-S XF45 NGC. Moderate circulation imparted the expected small marks and wear across the surfaces of this medium-gold double eagle, yet there are no heavy contacts on this popular San Francisco No Motto coin. Mint luster remains in protected areas despite 15 points of wear. NGC ID# 269K, PCGS# 8935

4990 1862-S XF40 PCGS. CAC. Ex: Granite Lady Hoard. Wheat-gold and soft green patina cedes to hints of reddish-gold in the protected areas, more prevalent on the reverse. The devices are well-defined and the surfaces minimally abraded for a large gold coin having seen some circulation. NGC ID# 269N, PCGS# 8938

1862-S Twenty Dollar, AU50
Collector-Grade Example

4991 1862-S AU50 NGC. The 1862-S double eagle is the logical selection for date collectors, readily available from a San Francisco mintage of more than 850,000 pieces and far more accessible than its Philadelphia Mint counterpart. This circulated example exceeds the typical VF and XF survivors, with bright yellow-gold surfaces that show many small abrasions but no individually heavy marks. NGC ID# 269N, PCGS# 8938

1863-S Twenty Dollar, XF45
Partly Lustrous, Peach-Gold Surfaces

4992 1863-S XF45 PCGS. Medium S. Shipwreck recoveries have greatly increased the number of 1863-S double eagles available to collectors. Examples can now be obtained with minimal searching despite this being an always in-demand Civil War date. Partly lustrous with attractive peach-gold hues. Typically struck and abraded from brief circulation. NGC ID# 269R, PCGS# 8940

1863-S Type One Twenty, AU53
Remarkably Bold and Lustrous

4993 1863-S AU53 PCGS. Mint luster remains vibrant throughout this straw-gold S-mint twenty, a pleasant surprise considering its stay in circulation, however brief. Strike definition, too, is remarkably strong with little blending. Many high-grade 1863-S survivors are the result of recent shipwreck recoveries, turning this from a scarce to a moderately collectible Type One issue. NGC ID# 269R, PCGS# 8940

1863-S Twenty Dollar, AU55
Remarkably Few Marks for the Grade

4994 1863-S AU55 PCGS. Seemingly the coin was promptly removed from brief circulation, because gleaming, honey-gold surfaces show only occasional minor marks for the About Uncirculated grade. Sharp details remain throughout the smooth, satiny fields and devices. This is a Choice Type One example from the San Francisco Mint, seldom seen with so much eye appeal. Population: 91 in 55, 144 finer (4/17). NGC ID# 269R, PCGS# 8940

4995 1864-S AU50 PCGS. This San Francisco issue is scarce in Uncirculated condition but usually available in AU grades for a price. The current coin displays outstanding olive-gold coloration and bold detail. Hints of original luster appear in the protected regions of the fields when rotated beneath a light. NGC ID# 269T, PCGS# 8942

1864-S Twenty Dollar, Partly Lustrous AU53

4996 1864-S AU53 PCGS. Green-gold surfaces emit partial luster. There are myriad abrasions peppered throughout, as one would expect of a lightly circulated gold coin of this size. The survivorship of the 1864-S was dramatically altered by recent shipwreck recoveries, though the average certified grade remains between XF45 and AU50. NGC ID# 269T, PCGS# 8942

4997 1865 XF45 PCGS. A repunched date shows secondary 186 digits northwest. The borders and peripheral design features are strongly defined. Softness is limited to the central curls and wingtips. This Choice XF No Motto twenty is orange-gold and partly lustrous. Die cracks encircle the reverse. NGC ID# 269U, PCGS# 8943

4998 1865 AU50 NGC. This About Uncirculated 1865 double eagle is much more affordable than Mint State pieces, which frequently come with heavy abrasions. The partially lustrous surfaces display pleasing yellow-gold color and good detail. A small mark on Liberty's jaw is the only mentionable abrasion. NGC ID# 269U, PCGS# 8943

4999 1868-S AU53 NGC. The wheat-gold surfaces of this S-mint twenty dollar retain traces of luster in the recessed areas. Some of the typical softness is noted in the strike of the design elements. Light circulation marks are consistent with those of a large gold coin having seen brief circulation. NGC ID# 26A4, PCGS# 8954

1868-S Twenty Dollar, AU58
A Rarity in Better Condition

5000 1868-S AU58 PCGS. The average certified 1868-S grades a bit higher than AU50, but that probably overstates the typical quality of the issue. Examples are usually seen in VF through lower AU grades and are rarely found in Uncirculated condition despite a healthy mintage of 837,500 coins. This near-Mint Type Two double eagle retains vibrant luster over khaki-gold surfaces. Strike detail is soft on the first four stars, and light blending occurs over the highest points of the design. PCGS lists 36 finer submissions (5/17). NGC ID# 26A4, PCGS# 8954

5001 1871 XF45 NGC. All 1871 double eagles are scarce. Only 80,150 pieces were struck, and the total number of survivors is estimated to be in the hundreds rather than the thousands. This Choice XF twenty displays normal signs of circulation with scattered marks and light friction. Greenish-gold surfaces still show glints of luster. NGC ID# 26AA, PCGS# 8960

1871 Twenty Dollar, AU50
A Better Philadelphia Issue

5002 1871 AU50 NGC. For a Type Two double eagle, the 1871 has a fairly small mintage of 80,120 coins. Uncirculated representatives are rarities in any grade, and AU coins are only marginally available. This piece displays lustrous fields and original honey-gold coloration with olive accents on the worn points. Surface abrasions are light. Housed in a prior generation holder. NGC ID# 26AA, PCGS# 8960

5003 1872-S AU58 PCGS. This near-Mint coin retains much luster in the fields, but high-point wear and a scattering of abrasions prevent a Mint State grade. The coin is yet appealing. The 1872-S double eagle is a challenging acquisition in Uncirculated condition. NGC ID# 26AF, PCGS# 8965

**1872-S Double Eagle, MS60
Challenging in Mint State**

5004 1872-S MS60 PCGS. Micro S mintmark. With the exception of some mid-1870s issues, Uncirculated Type Two Liberty double eagles are elusive. This 1872-S example is unworn and shows original frosty luster with a rich yellow-gold hue. The design elements are well-struck but all show heavy abrasions. A few relatively severe marks are seen on Liberty's jaw and eyebrow, not out of line for the grade. NGC ID# 26AF, PCGS# 8965

5005 1873 Open 3 MS62 PCGS. Frosty wheat-gold luster is original, and the design elements show bold detail. Scattered marks limit the grade but are less obtrusive than usual for the MS62 level. This issue becomes elusive in finer condition. NGC ID# 26AL, PCGS# 8967

**1873 Open 3 Double Eagle, MS62+
CAC-Approved, Very Scarce Any Finer**

5006 1873 Open 3 MS62+ PCGS. CAC. Of the Open and Closed 3 variants struck at the Philadelphia Mint in 1873, this is the more available. The Closed 3 dies were rejected early in the year for having a final digit that appeared too much like an 8. Original peach-gold surfaces are thickly frosted and readily appealing. The reverse is definitely clean for the grade, while the obverse features minor scattered grazes. Exceedingly elusive any finer. NGC ID# 26AL, PCGS# 8967

**1873 Twenty Dollar, MS62+
Open 3, Elusive This Fine**

5007 1873 Open 3 MS62+ PCGS. CAC. Open 3 1873-P double eagles are more collectible overall than their Closed 3 cousins, but they are scarce in their own right when offered in this fantastic state of preservation. Luminous frost cascades across lively apricot-gold surfaces. A few minor marks barely stand in the way of a full Select assessment for this strongly struck Type Two twenty. NGC ID# 26AL, PCGS# 8967

**1873 Liberty Double Eagle, MS62+
Popular Open 3 Variant**

5008 1873 Open 3 MS62+ NGC. CAC. It is difficult to imagine a more visually appealing 1873 Open 3 double eagle within the MS62 grade level. This Plus-graded, CAC-endorsed representative displays frosty mint-fresh luster and sharp design elements. The cartwheel effect is radiant. A scattering of small abrasions on Liberty's cheek and in the adjacent field defines the grade. NGC ID# 26AL, PCGS# 8967

**1873 Open 3 Double Eagle, MS62+
Doubled Die Obverse, FS-101**

5009 1873 Open 3, Doubled Die Obverse, FS-101, MS62+ PCGS. CAC. Boasting frosty, radiant, original mint luster, this sharply struck 1873 Open 3 twenty packs a high degree of eye appeal into a numeric grade that typically comes unsightly. Scattered abrasions are minor and unobtrusive. The obverse is noticeably die doubled on LIBERTY. Rarely seen finer, particularly with CAC endorsement. NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

5010 1873-S Closed 3 MS60 NGC. The Closed 3 is the more often seen variety of the 1873-S twenty dollar. Back on the East Coast, the Closed 3 dies were quickly replaced, but not so in California. Green and rose-gold elements meld with orange-gold color and radiant luster. Well-defined with myriad abrasions that explain the grade. NGC ID# 26AL, PCGS# 8969

5011 1873-S Closed 3 MS60 PCGS. The 1873-S Closed 3 is scarce in any fully Uncirculated condition. This fresh-looking Type Two example is brightly lustrous with many small abrasions, yet it retains excellent, rich-gold color and sharply struck motifs. Pale orange patina covers the rims. NGC ID# 26AL, PCGS# 8969

**1874 Liberty Head Twenty, MS60
Obtainable Type Two Issue**

5012 1874 MS60 PCGS. Mint condition 1874 double eagles are scarce, but they are still among the more obtainable Type Two twenties in high grade. This is a lively, green-gold example with vibrant luster. Numerous abrasions limit the technical assessment, but well-struck devices show no signs of friction. NGC ID# 26AN, PCGS# 8970

5013 1874-CC — Cleaning — PCGS Genuine. XF Details. Variety 2-A. The mintmark is wide and there is a die chip behind the eye near the hair. Yellow-gold surfaces show well-defined devices and distributed circulation marks. Large groups of the 1874-CC have surfaced from European and South American holdings.

5014 1875 MS60 PCGS. This is a nice Uncirculated Type Two double eagle, showing vibrant orange-gold mint luster and thoroughly frosted fields. Heavy abrasions on the obverse determine the grade, while the reverse by itself is arguably two points finer. NGC ID# 2547, PCGS# 8973

5015 1875 MS61 PCGS. Date collectors have an easier time with the 1875 double eagle than any of the other gold denominations, which were struck in extremely small quantities. This MS61 example displays flashy, medium-gold color and a sharp (but not full) strike. Small abrasions dot the frosted surfaces, possibly from repeated counting in European holdings. The eye appeal is strong. NGC ID# 2547, PCGS# 8973

5016 1875 MS61 PCGS. CAC. The double eagle was the only gold denomination produced in readily collectible quantities at the Philadelphia Mint in 1875. This attractive Mint State specimen offers well-detailed design elements and lustrous, orange-gold surfaces with a number of minor contact marks on both sides.
Ex: Philadelphia Signature (Heritage, 8/2012), lot 9350; Long Beach Signature (Heritage, 9/2016), lot 5081. NGC ID# 2547, PCGS# 8973

1875-CC Double Eagle, Unc Details

5017 1875-CC — Cleaning — PCGS Genuine. Unc Details. Variety 1-B. This is a vibrantly lustrous, unworn Carson City double eagle, showing bold design elements and attractive yellow-gold color. The reverse appears mostly untouched and problem-free, although hairlines on the obverse betray an old cleaning. Still, this is a visually pleasing CC-mint twenty for the budget-conscious collector.

5018 1875-S MS61 PCGS. *Ex: Rive d'Or Collection.* A pleasing Mint State example with frosty original mint luster and rich straw-gold and peach coloration. The design elements are well-struck, and scattered abrasions are consistent with the grade. Eye appeal is pleasing for the lower Mint State levels. NGC ID# 26AU, PCGS# 8975

**1876-CC Double Eagle, XF45
Original, Khaki-Gold Color**

5019 1876-CC XF45 PCGS. Variety 3-A. The 1 in the date is centered over a dentil, and the edge of the second C in the mintmark is aligned with the edge of the T. This original Choice XF Carson City twenty has the “dirty gold” look that specialists appreciate. Khaki-gold surfaces retain flashes of luster within the protected regions. A small dig occurs above 87. NGC ID# 26AW, PCGS# 8977

**1876-CC Double Eagle, XF45
Smooth, Attractive Surfaces**

5020 1876-CC XF45 PCGS. Variety 1-A. This lightly circulated Carson City double eagle displays original wheat-gold coloration with attractively smooth surfaces — a small mark behind Liberty's eye is the only singular abrasion. When rotated beneath a light, hints of semiprooflike mirroring are revealed around the peripheral border details. Eye appeal exceeds expectations for the grade. NGC ID# 26AW, PCGS# 8977

**1876-CC Double Eagle, AU Details
Popular Type Two Issue**

5021 1876-CC — Improperly Cleaned — NGC Details. AU. Variety 3-A. The 1876-CC twenty is extremely popular with type collectors as the most plentiful Carson City double eagle of the Type Two design. This example has light hairlines and surface marks on its lovely yellow surfaces. The fields are lightly prooflike. A moderate scrape in the left obverse field crosses over to Liberty's cheek.

1876-S Twenty Dollar, MS62
Lustrous Surfaces

- 5022 1876-S MS62 PCGS.** Radiant, sun-gold color beams from the smooth, minimally marked surfaces of this San Francisco twenty. Challenging any finer, the 1876-S is often heavily bagmarked but this attractive example shows only light field chatter. There are no individually heavy marks and the strike is sharp throughout. The Block S mintmark placement varies widely on the issue, from above the N to far right above the T. NGC ID# 26AX, PCGS# 8978

1876-S Liberty Double Eagle, MS62
Final Type Two Issue

- 5023 1876-S MS62 PCGS.** This final-year Type Two San Francisco issue is elusive above MS62. The present coin is a collectible Mint State example with bold design elements and vibrant, frosty yellow-gold luster. Scattered abrasions contribute to the grade, but the overall eye appeal is pleasing. A suitable final-year Type Two example. NGC ID# 26AX, PCGS# 8978

1877 Double Eagle, Lustrous MS62
Inaugural Type Three Date

- 5024 1877 MS62 NGC.** This is just about the nicest 1877 one can hope to add to his or her collection without spending in excess of five figures. Each lustrous, rose-gold side boasts the eye appeal of a higher-graded representative. Scattered abrasions limit the grade. Hair definition is notably strong. There are 18 finer submissions at PCGS (4/17). NGC ID# 2547, PCGS# 8982

1877-CC Twenty Dollar, XF45
Outstanding for the Grade

- 5025 1877-CC XF45 PCGS. Variety 3-A.** The availability of the 1877-CC double eagle falls far behind that of the previous two Carson City issues in Mint State, heightening the popularity of lightly circulated coins. This Choice XF example is well-detailed and has original olive-gold coloration. The surfaces are uncommonly smooth and have remnants of luster in the fields. NGC ID# 26AZ, PCGS# 8983

- 5026 1878 MS61 PCGS. Minor Variety, Doubled Die Reverse, Variety 2.** Die doubling is evident on UNITED STATES OF AMERICA, the stars, IN GOD WE TRUST, and E PLURIBUS UNUM. The coin as a whole is a lustrous, original orange-gold example of the 1878 double eagle in Uncirculated condition. Heavy abrasions on each side define the grade. NGC ID# 26B3, PCGS# 8985

- 5027 1878 MS61 PCGS. LIBERTY** is lightly die doubled on this unlisted variety. The current MS61 coin displays a sharp strike and frosty yellow-gold mint luster. Scattered light abrasions are expected for the grade. The 1878 is a challenging date in finer Mint State preservations. NGC ID# 26B3, PCGS# 8985

- 5028 1878 MS61 PCGS. CAC.** The Mint struck more than half a million double eagles in 1878. Mint State examples are generally unseen higher than MS62, and any 1878 is rare when found with CAC approval. Mostly yellow-gold surfaces show glints of green and rose, illuminated in radiant frost. Peppered abrasions throughout. NGC ID# 26B3, PCGS# 8985

1878 Double Eagle, MS62+
High-End Example

- 5029 1878 MS62+ PCGS.** A steep decline in population figures takes place between MS62 and MS63, accompanied by a corresponding rise in price. That makes this Plus-designated 1878 twenty the optimal choice between quality and affordability. This early Type Three offering is clearly high-end for the grade with surprisingly few significant abrasions. The cheek and left obverse field are notably clean, and a single reeding mark occurs above the brow. Light, frosty luster washes over pale yellow and rose-gold surfaces. Well-struck. NGC ID# 26B3, PCGS# 8985

**1879 Twenty Dollar, MS61
Challenging in Finer Grades**

- 5030 1879 MS61 PCGS.** Minor strike doubling is apparent on the reverse legends, most visible at the top of UNITED. This is a brightly lustrous 1879 twenty dollar gold piece from a Type Three issue that is seldom located in Uncirculated grades, despite its sizeable 207,630-coin mintage. Accents of rose and green-gold adorn each well-struck and unsurprisingly abraded side. PCGS reports just 69 numerically finer examples (4/17). NGC ID# 26B6, PCGS# 8988

**1879-S Liberty Twenty, MS61
Sharp Strike, Vibrant Luster**

- 5031 1879-S MS61 PCGS. CAC.** The 1879-S is an earlier Type Three issue and one that is easily available as a type representative because of its abundant mintage of 1.2 million pieces. Numerous Uncirculated examples have survived, many residing for decades in European bank vaults. This is a surprisingly lustrous and clean example for the grade. The strike is also complete in all areas. NGC ID# 26B9, PCGS# 8991

**1880 Double Eagle, AU58
Rare Any Finer**

- 5032 1880 AU58 NGC.** With fewer than 100 Mint State representatives believed extant, most collectors must opt instead for a high-end About Uncirculated piece like the one offered here. This near-Mint 1880 double eagle, one of only 51,456 coins struck, presents minimal friction and scattered marks over well-detailed, straw-gold surfaces. Plenty of luster remains. NGC ID# 26BA, PCGS# 8992

**1882-CC Twenty Dollar, XF40
Old-Time Patina**

- 5033 1882-CC XF40 PCGS. Variety 1-B.** The lightly circulated example offers original olive-gold patina with warm orange-gold undertones in the fields. The design elements are well-defined, and no major abrasions are seen in the fields. Ideal for the type collector seeking a nice, old-time look on a Carson City double eagle. NGC ID# 26BF, PCGS# 8997

**1882-CC Double Eagle, Unc Details
Razor-Sharp Strike**

- 5034 1882-CC — Cleaning — PCGS Genuine. Unc Details. Variety 1-B.** The razor-sharp strike alone is an excellent reason for specialists to strongly consider this Uncirculated Carson City double eagle, one of just 39,140 such coins produced in 1882. Yellow-gold surfaces are smooth and seemingly unmarked, though they do show evidence of cleaning. An exceedingly difficult issue to acquire without any trace of circulation.

- 5035 1883-S MS62 PCGS.** An attractive MS62 representative of this popular Type Three issue, with sharply detailed design elements and vibrant mint luster throughout. The vivid orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 26BJ, PCGS# 9000

**1883-S Liberty Double Eagle, MS62+
Lustrous, Lightly Marked Specimen**

- 5036 1883-S MS62+ NGC.** Small Squat S. The pleasing apricot-gold surfaces of this Plus-graded MS62 specimen radiate vibrant mint luster on both sides, and the design elements are well-detailed. The reverse shows surprisingly few abrasions. Obverse marks are distributed but none are individually distracting. A costly issue any finer. NGC ID# 26BJ, PCGS# 9000

5037 1883-S Misplaced Date, FS-501, MS62 PCGS. Small Squat S. The top of a 3 or 8 lurks in the dentils below the right side of the second 8 in the date. The *Cherrypickers'* variety is undesignated on the PCGS holder. The orange-gold surfaces are nicely struck and display only moderate marks. PCGS# 145737 Base PCGS# 9000

5038 1885-S MS62 PCGS. A pleasing Mint State example of the plentiful 1885-S double eagle, the only readily obtainable twenty of the year. The Carson City issue had a mintage under 10,000 coins, and the Philadelphia issue had a coinage of less than 1,000 coins. This piece shows frosty greenish-gold luster and minimal marks for the grade. NGC ID# 26BP, PCGS# 9005

1888 Double Eagle, MS62
Exceedingly Rare in High Grades

5039 1888 MS62 PCGS. Struck to the extent of 226,100 coins, the 1888 is one of the few collectible Philadelphia double eagles from this decade. That said, finer examples are exceedingly rare. Lightly abraded with green-gold hues and glimmering frost. A couple of depressions occur along the right obverse rim. NGC ID# 26BT, PCGS# 9008

1888 Twenty Dollar, MS62
Underappreciated Condition Rarity

5040 1888 MS62 PCGS. This P-mint emission is underappreciated for the rarity that it is in MS63 or better. Comparable MS62 representatives are still collectible, although they, too, are very scarce. This is a blended green and orange-gold Liberty Head double eagle with abundant mint frost. The devices are well-struck with a hint of central softness. NGC ID# 26BT, PCGS# 9008

1888 Liberty Head Twenty, MS62
Upper-End Example for the Date

5041 1888 MS62 PCGS. Bowers (2004) writes: "Grades range from VF to MS-62, but above that, the 1888 is a rarity. I recall that in the 1950s there were a lot of these in shipments from Europe." Coruscating frost blends with green and rose-gold coloration. This upper-end offering is well-struck and typically abraded. NGC ID# 26BT, PCGS# 9008

1888 Double Eagle, MS62
Smooth for the Grade

5042 1888 MS62 PCGS. Although the 1888 (226,100 coins struck) can be found in lower Mint State grades, namely MS61 and MS62, collectors will have an extremely difficult time locating finer examples. This frosty, green-gold double eagle is relatively smooth for the grade and fairly well-struck. PCGS reports 33 finer submissions (5/17). NGC ID# 26BT, PCGS# 9008

1888 Twenty Dollar, MS62
Attractive Coloration

5043 1888 MS62 PCGS. Rose-gold centers turn to luminous wheat-gold colors at the borders, with shimmering frost radiating from each side. The stars are fully raised, and Liberty's curls exhibit crisp delineation. The certified population of 1888 double eagles drops off markedly between MS62 and MS63. NGC ID# 26BT, PCGS# 9008

1888 Twenty Dollar, Frosty MS62

5044 1888 MS62 PCGS. Examples are readily available in circulated condition and moderately collectible in grades as high as MS62. But those looking for a better-graded representative will need patience and considerable resources. The 1888 is often seen with frosty luster and green-to-rose coloration. This lightly abraded twenty is typical in those regards with good strike definition. There are merely 33 finer submissions at PCGS (5/17). NGC ID# 26BT, PCGS# 9008

**1888 Liberty Double Eagle, MS62
Seldom Encountered Finer**

5045 1888 MS62 PCGS. The 1888 is a scarcer date even though more than a quarter million pieces were struck, primarily because so many were shipped to Europe for international payments. It is not particularly rare in abraded MS60 to MS61 grades, but relatively unmarked pieces are infrequently found. Distributed tiny russet alloy flecks do not affect the technical grade. PCGS has graded 33 numerically finer examples (4/17).
Ex: Palm Beach Signature (Heritage, 3/2005), lot 7290. NGC ID# 26BT, PCGS# 9008

5046 1888-S MS62+ PCGS. The 1888-S is more available in MS62 and MS63 than its Philadelphia counterpart. Sun-gold colors the outer areas, while rose-gold remains confined to the interiors. The devices are absolutely fully struck, including Liberty's hair bun. Two pin scratches across the upper part of the eagle's shield limits the grade. NGC ID# 26BU, PCGS# 9009

**1889-CC Double Eagle, XF40
Minimal Mintage**

5047 1889-CC XF40 PCGS. Variety 1-A. The 1889-CC double eagle enjoys some spill-over popularity from the silver dollar of this date and mint, and it is also a scarce issue in Mint State. The light circulated piece offered here has smooth yellow-gold surfaces and excellent detail. Some luster remains in the fields when rotated beneath a light. Only 30,945 pieces were struck. NGC ID# 26BV, PCGS# 9011

5048 1889-S MS62 NGC. Frosty mint luster issues from wheat-gold surfaces. The hair curls and feathers are crisply delineated, and minimal overt abrasions are noted for the grade. The Saddle Ridge Hoard added 422 1889-S double eagles to the certified population, 100 of which were in Mint State. NGC ID# 26BW, PCGS# 9012

**1890 Double Eagle, MS62
Relatively Low Philadelphia Mintage**

5049 1890 MS62 PCGS. The certified population at PCGS falls by more than 78% between MS62 and MS63 or higher, attesting to conditional rarity of the 1890. Rose and honey-gold color paints this minimally abraded, sharply defined double eagle. Frosty luster issues from each side. A couple of small marks occur on the cheek and chin. Only 75,995 coins were struck. NGC ID# 26BX, PCGS# 9013

5050 1890-CC — Cleaning — PCGS Genuine. XF Details. The mintmark is centered between Y and D, and the tailfeathers are lapped. Each side exhibits green and reddish-gold coloration, but wispy marks indicate cleaning at some point in the life of this Carson City double eagle. Partial luster remains.

**1890-CC Double Eagle, XF45
Collectible Carson City Type**

5051 1890-CC XF45 PCGS. Variety 1-A. A centered mintmark and die lapping on the tailfeathers confirm the variety and late die state. Light merging on the top of Liberty's hair, a few stars, and the wingtips fails to obscure or diminish the strong overall impression. This Choice XF Carson City twenty retains glints of luster within the recesses, and exhibits lightly scattered marks that do not detract. NGC ID# 26BY, PCGS# 9014

5052 1891-S MS63 PCGS. The Medium S mintmark is closer to D in DOLLARS than on some examples, nearly aligned with the top-left serif. The fields show only a few light abrasions, approaching an even finer grade. A few light marks on Liberty's cheek are of little concern for the Select Uncirculated level, while the frosty lustrous surfaces emit green and apricot highlights. NGC ID# 26C4, PCGS# 9018

5053 1892-CC — Cleaning — PCGS Genuine. XF Details. Variety 1-A. This XF Details Carson City twenty definitely does not have the typical bright appearance of a cleaned coin. Instead, each side displays mixed reddish and khaki-gold coloration. There are numerous marks throughout with expected rub over the devices.

5054 1892-S MS63 PCGS. The 1892-S is a scarce issue any finer. This Select representative displays radiant straw-gold luster and bold design elements. A few light, scattered abrasions are consistent with the grade. NGC ID# 26C7, PCGS# 9021

**1893 Double Eagle, MS63+
Thick Mint Frost**

5055 1893 MS63+ PCGS. CAC. Less than 2% of the Select Uncirculated 1893 double eagles seen by PCGS have received a Plus designation for quality within the grade. Any CAC-approved example at this grade level is rare, and higher-graded coins are scarcely offered. The impression is exceedingly sharp on the stars and curls. This peach-gold twenty features thick mint frost and a dearth of major abrasions. There is no shortage of eye appeal, however. NGC ID# 26C8, PCGS# 9022

5056 1894-S MS63 PCGS. Faint green accents provide extra eye appeal to the smoothly frosted surfaces of this Select San Francisco twenty. The strike is sharp for the issue, with just nominal blending of a few hair strands above the coronet. The coin is surprisingly unabraded for this often-bagmarked issue. Scarce when finer. NGC ID# 26CC, PCGS# 9026

5057 1894-S MS63 PCGS. A crisply struck Select representative of this San Francisco issue. The yellow-gold fields have a touch of orange, while straw-gold dominates the centers. Housed in a green label holder.
Ex: ANA National Money Show (Heritage, 3/2007), lot 2304. NGC ID# 26CC, PCGS# 9026

**1895 Double Eagle, MS64
Just Five Finer Coins at PCGS**

5058 1895 MS64 PCGS. The Philadelphia Mint coined 1.1 million twenty dollar gold pieces in 1895. Most survivors grade between MS61 and MS63, with an average certified assessment just shy of MS62. This MS64 example is exceptional in that it lacks any significant field marks, though a few luster grazes and scattered ticks are present. Rose-gold at the centers deepens to honey-gold color at the borders. PCGS shows five finer submissions (5/17). NGC ID# 26CD, PCGS# 9027

**1895 Twenty Dollar, Near-Gem
Frosty Peach-Gold Representative**

5059 1895 MS64 PCGS. Gem 1895 double eagles are very rare, making attractive MS64 representatives like this a better choice for collectors looking for a quality example on a budget. Mixed shades of peach and rose-gold combine with thick, frosty mint luster to generate wonderful eye appeal. Each side features bold detail and minimal field marks. PCGS counts five higher-graded submissions (5/17). NGC ID# 26CD, PCGS# 9027

**1895-S Twenty Dollar, MS64
Rare in Better Condition**

5060 1895-S MS64 PCGS. For the 1895-S, the difference between MS64 and MS65 is the difference between collectible and uncollectible for most enthusiasts. Gems are rarely seen. This is a radiant, thickly frosted example with pleasing green and orange-gold surfaces that show thin, superficial grazes. The only major mark is a linear depression across the lower right part of the eagle. PCGS reports 10 finer submissions (5/17). NGC ID# 26CE, PCGS# 9028

**1895-S Double Eagle, MS64
Rich, Frosty Mint Luster**

5061 1895-S MS64 PCGS. As usual, the strike is exceedingly sharp for this Choice Uncirculated S-mint double eagle. Rich, frosty luster cascades over natural rose-gold surfaces. A light scattering of marks is consistent with the grade. The California branch mint struck 1.1 million twenty dollar gold pieces in 1895, but PCGS has only seen 10 finer submissions (5/17). NGC ID# 26CE, PCGS# 9028

**1896 Twenty Dollar, MS64
Beautifully Preserved**

5062 1896 MS64 PCGS. This Philadelphia issue is very scarce in MS64 but still obtainable at that level. Gem condition is where it becomes virtually unobtainable, at least for most collectors. This fully defined near-Gem emits vibrant mint frost from beautifully preserved, honey-gold surfaces that display eye-appealing accents of green and rose color. PCGS has seen merely seven higher submissions (5/17). NGC ID# 26CF, PCGS# 9029

5063 1896 Repunched Date, FS-301, MS63 NGC. All date digits show broad repunching north, attributing *Cherry-pickers'* variety FS-301. Glowing yellow-gold surfaces show accents of rose over the centers. Small marks appear on the cheek. Census: 25 in 63 (1 in 63★), 12 finer (5/17). NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029

5064 1896-S MS63 ★ NGC. The obverse is blatantly semiprooflike with moderately mirrored fields and razor-sharp design elements. Definition is just as sharp on the other side, though contrast is minimal. Both sides are remarkably smooth for the MS63 assessment, and the eye appeal no doubt merits the added Star designation. NGC ID# 26CG, PCGS# 9030

5065 1897-S MS63+ PCGS. Vast quantities of double eagles were produced at the San Francisco Mint during the middle part of the 1890s. The 1897-S, with a mintage of 1.4 million coins, is collectible through MS63 and even MS64. This gorgeous Select twenty features bold design detail with rose-gold centers and deeper shades of gold around the borders. NGC ID# 26CJ, PCGS# 9032

**1897-S Double Eagle, Sharp and Attractive
Well-Preserved Near-Gem Example**

5066 1897-S MS64 PCGS. A blush of blue and rose toning on Liberty's cheek glows in contrast to the frosted greenish-gold fields. Remarkably few abrasions exist on the smooth and attractive Choice surfaces, which display a pinpoint-sharp strike. PCGS reports just 14 numerically finer examples (4/17). NGC ID# 26CJ, PCGS# 9032

5067 1898-S MS63+ PCGS. This is a needle-sharp type coin with softness limited to stars 1 and 2. Delicate shades of rose and lemon-gold color appear throughout, along with luminous, frosty luster typical of the West Coast branch mint. NGC ID# 26CL, PCGS# 9034

5068 1898-S MS64 NGC. An important condition rarity in the Liberty double eagle series with few examples certified finer. This Choice Mint State piece displays rich orange-gold luster, sharp design definition, and minimal scattered marks. NGC ID# 26CL, PCGS# 9034

5069 1899 MS64 PCGS. The final year of the 19th century saw the production of 1.6 million double eagles at the Philadelphia Mint. The 1899 is widely available in MS64 but seldom seen in higher grades. Spindly die cracks travel through the legends on each side. A razor-sharp twenty dollar gold piece with subtle rose and green accents. PCGS shows 30 finer submissions (5/17). NGC ID# 26CM, PCGS# 9035

5070 1899 MS64 NGC. Gem examples of the 1899 twenty are very scarce, making Choice Uncirculated coins an optimal grade for those interested in completing a high-grade set. This sharply struck example is lustrous and fully struck with only light marks across the frosted surfaces. NGC ID# 26CM, PCGS# 9035

**1899 Twenty Dollar, MS64+
Few Available Finer**

5071 1899 MS64+ PCGS. Frosty, shimmering mint luster gives this high-end Choice 1899 double eagle strong eye appeal. The design elements are sharp, and neither side exhibits significant abrasions. Plentiful in MS64, the 1899 Liberty Head twenty is seldom offered finer, with PCGS having so-graded just 30 examples (4/17). NGC ID# 26CM, PCGS# 9035

5072 1900 MS64 PCGS. A splendid Choice Mint State Liberty twenty, this example displays frosty yellow luster and bold design motifs with a few trivial copper toning spots. The 1.8 million coin mintage was significant, yet higher grade pieces are few and far between, with less than 230 numerically finer examples graded at PCGS (4/17). NGC ID# 26CP, PCGS# 9037

**1901 Liberty Twenty, MS65
Very Rare Any Finer**

5073 1901 MS65 PCGS. From a smallish mintage of 111,430 examples, the 1901 Liberty double eagle can be found in MS65 condition with little difficulty, but finer examples are very rare. This sharply detailed Gem exhibits well-preserved orange-gold surfaces, with vibrant mint luster throughout. Housed in a green label holder. PCGS has graded four numerically finer examples (4/17). NGC ID# 26CS, PCGS# 9039

1901-S Liberty Double Eagle, MS63
Excellent Branch Mint Type Coin

- 5074 1901-S MS63 PCGS.** This 20th century type-coin issue is usually available through MS63, but finer pieces are elusive. This Select coin has sharp relief detail and vibrant yellow-gold mint luster. Minor chatter on Liberty's cheek and in the field prevents a finer grade. As the debut S-mint issue of the 20th century, the 1901-S double eagle enjoys strong popularity among type collectors. NGC ID# 26CT, PCGS# 9040

1902 Double Eagle, MS61
Lustrous, Green-Gold Surfaces

- 5075 1902 MS61 PCGS.** Only in lower Uncirculated grades can the 1902 double eagle (31,140 coins struck) be considered collectible. This is a green-gold Mint State representative with abundant frosty luster. Each side shows peppered bagmarks consistent with the MS61 assessment. Well-struck with a hint of softness on the first few stars. NGC ID# 26CU, PCGS# 9041

1902 Double Eagle, MS62
Only 31,140 Pieces Struck

- 5076 1902 MS62 PCGS.** The 1902 used to be a great rarity. Although it is now seen with some regularity in grades as high as MS62, finer examples are extremely elusive to this day. This is a highly lustrous Liberty Head twenty with bold strike detail on the stars, hair, and feathers. Chatter occurs in the fields on each side. NGC ID# 26CU, PCGS# 9041

1902 Double Eagle, MS62
Key 20th Century Issue

- 5077 1902 MS62 PCGS.** This is the key date among 20th century Liberty Head twenties with a tiny mintage of 31,140 pieces. The issue becomes very scarce in MS63. Frosty luster is somewhat subdued over light rose-gold surfaces. Reeding marks near the eye and nose will identify this coin in future sales. NGC ID# 26CU, PCGS# 9041

- 5078 1902-S MS63 NGC.** Each side boasts warm, honey-gold color and luminous luster. A bold strike further contributes to the appeal of this Select 1902-S double eagle. The population differential between MS63 and the next highest grade is considerable. There are 43 finer representatives at NGC (5/17). NGC ID# 26CV, PCGS# 9042

- 5079 1903-S MS64 NGC.** This double eagle issue was exported overseas en masse during the early part of the 20th century. Later repatriations account for today's supply through MS64. Light marks are scattered across surfaces that show swirling luster and well-detailed central motifs. Rare any finer. NGC ID# 26CX, PCGS# 9044

- 5080 1903-S MS64 NGC.** A decline of 96% in the certified population occurs between MS64 and MS65, highlighting the conditional rarity of Gem 1903-S double eagles. This particular example does not deviate from the trend of the issue coming well-struck. Orange and khaki-gold tones color minimally marked surfaces. There are just 22 higher-graded coins at NGC (5/17). NGC ID# 26CX, PCGS# 9044

1903-S Liberty Head Twenty, MS64+
Rare in Finer Condition

- 5081 1903-S MS64+ PCGS. CAC.** Shimmering yellow-gold mint luster gives this high-end Choice 1903-S double eagle splendid visual appeal despite a few small marks that define the sub-Gem grade. The design elements show excellent sharpness. PCGS has seen only 16 finer examples of the date. CAC: 27 in 64, 1 finer (4/17). NGC ID# 26CX, PCGS# 9044

**1903-S Double Eagle, MS64+
A Condition Rarity in Finer Grades**

5082 1903-S MS64+ PCGS. CAC. Although PCGS has certified more than 400 of these 1903-S double eagles as MS64, only 23 of those pieces are graded MS64+, and just 16 finer examples have been graded by that firm (5/17). This lovely near-Gem has bold design definition with brilliant and frosty yellow surfaces and scattered, inconsequential marks consistent with the grade. NGC ID# 26CX, PCGS# 9044

5083 1904 MS64 NGC. Although not so designated, this satiny and fully brilliant orange-gold double eagle exhibits reflective, nearly prooflike surfaces. A few trivial marks on each side prevent an even finer grade. NGC ID# 26CY, PCGS# 9045

5084 1904 MS64+ PCGS. This high-end near-Gem shows sharply struck design elements and highly lustrous surfaces. Just a few light grazes stand in the way of Gem classification. NGC ID# 26CY, PCGS# 9045

5085 1904 MS64+ PCGS. The Plus designation and the accompanying high-quality-for-the-grade give this near-Gem 1904 double eagle its appeal. Frosty surfaces show original green-gold and peach hues, with only a few noticeable grazes. NGC ID# 26CY, PCGS# 9045

**1904 Liberty Twenty, MS65
Ideal Type Representative**

5086 1904 MS65 PCGS. From a huge mintage of 6.2 million pieces, the 1904 Liberty double eagle is an available date in high grade, and a popular choice with type collectors. This delightful Gem exhibits well-detailed design elements and remarkably well-preserved orange-gold surfaces, with vibrant mint luster throughout. Eye appeal is terrific. NGC ID# 26CY, PCGS# 9045

1904 Liberty Double Eagle, Vibrant MS65

5087 1904 MS65 NGC. Frosty, brilliant yellow-gold mint luster illuminates the Gem-quality surfaces of this 1904 Liberty Head type coin. The design elements are sharply defined, and only a few trivial marks are seen on Liberty's cheek. Although plentiful in MS65, this popular type-coin issue becomes elusive any finer. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65+
Boldly Delineated Motifs**

5088 1904 MS65+ PCGS. This orange-gold Gem is aglow in radiant luster that cartwheels over impressively clean surfaces. The curls, stars, and feathers are boldly delineated. A single tick under Liberty's eye is probably all that stands in the way of an even higher grade. Perfect choice for type purposes. NGC ID# 26CY, PCGS# 9045

**1904 Liberty Twenty Dollar, MS65+
Ideal for Type Representation**

5089 1904 MS65+ PCGS. A massive production of more than 6.2 million double eagles accounts for the availability of the 1904. This is the go-to Liberty Head twenty for type representation, accessible through Gem condition but very scarce any finer. Frosty, orange-gold surfaces appear unmarked upon initial glance. Fully struck, and a treat to behold in this impressive grade. NGC ID# 26CY, PCGS# 9045

5090 1904-S MS64 PCGS. The 1904-S is always among the top selections for Liberty Head type. The issue is readily available through Choice Uncirculated condition, and unfailingly attractive with robust, orange-gold coloration and a ringing-sharp strike. This example displays blazing mint luster and much pizzazz. A few nominal abrasions and three tiny orange alloy spots do not inhibit the eye appeal one iota. NGC ID# 26CZ, PCGS# 9046

**1904-S Double Eagle, Luminous MS65
Surprisingly Elusive in High Grades**

- 5091 1904-S MS65 NGC.** This mass-produced issue (5.1 million coins struck) is surprisingly scarce in MS65, and extremely rare in higher grades. The only area of noticeable softness occurs on the date. Otherwise, this Gem San Francisco double eagle is razor-sharp. There are six higher grading events reported at PCGS (5/17). NGC ID# 26CZ, PCGS# 9046

**1904-S Liberty Double Eagle, MS65
Very Rare in Finer Grades**

- 5092 1904-S MS65 NGC.** In stark contrast to its Philadelphia Mint counterpart, the 1904-S double eagle is challenging in MS65, and finer representatives are extremely rare. The present coin shows a sharp strike and softly frosted mint luster. Original green-gold patina cedes to brighter peach-gold in the centers. Faint grazes on Liberty's cheek are the only discernible flaw. NGC has seen just two numerically finer coins (4/17). NGC ID# 26CZ, PCGS# 9046

- 5093 1905 MS60 NGC.** The 1905 is well-known for its paltry mintage of 58,919 coins. This is a lustrous, problem-free example in mint condition. The devices are strongly impressed with minor merging over the middle hair strands. Rich, orange-gold color with myriad marks. NGC ID# 26D2, PCGS# 9047

**1905 Twenty Dollar, MS61
Low-Mintage Issue**

- 5094 1905 MS61 PCGS.** The 1905 double eagle boasts a mintage of only 58,919 coins, and from thus it draws most of its appeal to collectors. This Mint State example displays a bold strike and cartwheeling yellow-gold mint luster over frosty surfaces. Scattered light abrasions account for the grade. NGC ID# 26D2, PCGS# 9047

**1905-S Liberty Twenty, MS63
Lustrous, Colorful Example**

- 5095 1905-S MS63 PCGS.** Despite a mintage of more than 1.8 million coins, the 1905-S Liberty double eagle is challenging above MS63. This collectible Select example displays well-struck design elements illuminated by frosty yellow-gold luster. Light, scattered abrasions define the grade, but none are individually noteworthy. NGC ID# 26D3, PCGS# 9048

**1905-S Twenty Dollar, MS63+
Swirling Luster, Clean for the Grade**

- 5096 1905-S MS63+ PCGS.** Collectors working on the daunting task of completing a date set should consider the 1905-S over its Philadelphia cousin, which is considerably scarce in high grades. Swirling luster and eye-catching sun-gold coloration deliver tremendous aesthetic appeal. This Select coin is inarguably clean for the assigned grade. NGC ID# 26D3, PCGS# 9048

**1906 Liberty Double Eagle, MS62
Lustrous and Fully Struck**

- 5097 1906 MS62 PCGS.** The 1906 is a lower-mintage, post-1900 issue that is still relatively affordable for the collector. Only 69,500 pieces were struck. This is a sparkling, lustrous example that is fully detailed throughout. As expected for the grade, there are a number of small abrasions scattered across each side and several medium-sized ones. Attractive reddish-gold color is present. NGC ID# 26D4, PCGS# 9049

**1906-D Liberty Double Eagle, MS63
First-Year, Branch Mint Type Coin**

- 5098 1906-D MS63 PCGS.** A substantial mintage of 620,250 Liberty double eagles was accomplished at the Denver Mint in 1906, the first year of coinage operations at that facility. Sharply detailed in most areas, this impressive Select specimen shows just a trace of softness on LIBERTY and the coronet. The lightly marked orange-gold surfaces radiate vibrant mint luster. NGC ID# 26D5, PCGS# 9050

**1906-D Double Eagle, MS63
First Denver Mint Issue**

- 5099 1906-D MS63 NGC.** The 1906-D is always in-demand as the first gold product from the Denver Mint, which struck 620,250 double eagles that year. A few scattered grazes explain the MS63 grade for this strongly struck twenty dollar gold piece. Satiny luster covers each side, illuminating light peach-gold surfaces. NGC ID# 26D5, PCGS# 9050

**1906-S Twenty Dollar, MS64
Amazing Eye Appeal**

- 5100 1906-S MS64 PCGS.** Hallmarks of this eye-catching near-Gem include razor-sharp definition on the stars, hair, and feathers, thickly frosted luster, and luminous orange-gold borders with rose-colored interiors. The surfaces are clearly high-end for the assigned technical grade without any overt abrasions. PCGS lists five finer representatives (5/17). NGC ID# 26F6, PCGS# 9051
- 5101 1907 MS64 PCGS.** The 1907 Liberty double eagle was produced in large numbers, but few survivors grade better than MS64. This attractive Choice specimen is sharply detailed throughout, with vibrant mint luster and well-preserved orange-gold surfaces. PCGS has graded 21 numerically finer examples (5/17). NGC ID# 26D7, PCGS# 9052

SAINT-GAUDENS DOUBLE EAGLES

- 5102 1907 Arabic Numerals MS63+ PCGS.** Ex: Rough Rider Hoard. Reportedly certified from a European accumulation of Arabic Numerals 1907 Saint-Gaudens double eagles, this coin displays a crisp strike and bold luster. Light abrasions dot the surfaces, a common trait seen on coins counted and recounted in foreign banks. Attractive greenish-gold and rose accents add eye appeal. Housed in a special PCGS Rough Rider Hoard holder. NGC ID# 26F5, PCGS# 9141

- 5103 1908 No Motto MS65 NGC.** Frosty, glowing cartwheel luster engulfs each side of this Gem No Motto 1908 Saint. The design elements are sharply rendered, and the fields are particularly well-preserved. A small coppery alloy spot near the right obverse rim attests to the originality of the surfaces. NGC ID# 26F6, PCGS# 9142

- 5104 1908 No Motto MS65+ PCGS.** A Plus-graded Gem representative of the short-lived No Motto design, with well-detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. Overall eye appeal is outstanding. NGC ID# 26F6, PCGS# 9142

- 5105 1908-D Motto MS64 PCGS.** This Choice 1908-D double eagle is among the finer examples that are available to the budget-concerned collector. The strike is sharp, and each side yields warm golden-orange luster. A few minor marks are not out of line for the grade. NGC ID# 26F9, PCGS# 9148

**1908-D Motto Twenty, MS64+
Great First-Year Type Coin**

- 5106 1908-D Motto MS64+ PCGS.** Collectors should have minimal trouble finding a pleasing 1908-D Motto twenty in MS64 condition, but anything finer is scarce. This is a well-preserved example for the grade with the eye appeal of a Gem representative. Luminous luster and straw-gold color grace each strongly impressed side. Great first-year Motto type coin. NGC ID# 26F9, PCGS# 9148

**1908-D Saint-Gaudens Double Eagle, MS65
First Year With Motto**

- 5107 1908-D Motto MS65 PCGS.** The design of the double eagle was modified in 1908 to include the motto IN GOD WE TRUST on the reverse, an important consideration for type purposes. This sharply detailed Gem exhibits well-preserved orange-gold surfaces with especially vibrant mint luster on both sides. Housed in a green label holder. PCGS has graded 35 numerically finer examples (4/17). NGC ID# 26F9, PCGS# 9148

- 5108 1909/8 FS-301 AU58 NGC.** This overdate representative is remarkably lustrous for a near-Mint coin. Pale yellow-gold colors surfaces that show well-detailed devices with a trace of friction. Scattered marks throughout. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

**1909/8 Double Eagle, FS-301, MS63
Sole Overdate in the Series**

- 5109 1909/8 FS-301 MS63 PCGS.** It is little wonder the 1909/8 Saint-Gaudens double eagle is so popular, holding status as the only overdate in the entire series. Examples can be found through MS63 but become scarce in higher grades. Soft, shimmering luster radiates from orange and green-gold surfaces. Minor grazes are inconsequential. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

- 5110 1909-S MS64 PCGS.** An attractive Choice representative of this popular early series issue, with well-detailed design elements and vivid orange-gold surfaces that show few signs of contact. Vibrant mint luster adds to the outstanding visual appeal. NGC ID# 26FE, PCGS# 9153

**1909-S Twenty Dollar, MS64+
Bright Mint Luster**

- 5111 1909-S MS64+ PCGS.** The San Francisco Mint struck a staggering number of double eagles in 1909 — more than 2.7 million. Yet, Gem-quality survivors evade many collectors. This Plus-graded Choice example displays a bold strike and noteworthy surface preservation. Original peach-gold luster adorns each side. NGC ID# 26FE, PCGS# 9153

**1909-S Saint-Gaudens Twenty, MS65
Conditionally Rare in Finer Grades**

- 5112 1909-S MS65 PCGS.** An available issue in lower grades, the 1909-S Saint-Gaudens double eagle becomes scarce at the MS65 level, and finer coins are rare. This spectacular Gem exhibits sharply detailed design elements throughout, and the well-preserved orange-gold surfaces radiate vibrant mint luster. PCGS has graded 19 numerically finer examples (4/17). NGC ID# 26FE, PCGS# 9153

**1909-S Twenty Dollar, MS65
Rarely Located Finer**

- 5113 1909-S MS65 PCGS.** An attractive, frosty sheen flashes from the radiant cartwheel luster of this vibrant, yellow-gold Gem twenty. More than 2.7 million pieces were struck at the San Francisco Mint in 1909, yet Gem or finer examples are scarce-to-rare. The present example displays a hint of rose-red in the centers and a sharp, Mint-fresh look that is sure to delight the advanced collector or gold specialist. PCGS shows a mere 19 numerically finer coins (4/17). NGC ID# 26FE, PCGS# 9153

**1909-S Saint-Gaudens Twenty, MS65
Well-Preserved and Lustrous**

- 5114 1909-S MS65 NGC.** Although the 1909-S Saint-Gaudens double eagle can be found in MS65 condition with a little patience, the population drops off precipitously in finer grades. This attractive Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. NGC has graded 11 numerically finer examples (4/17). NGC ID# 26FE, PCGS# 9153

- 5115 1910-D MS64+ PCGS.** A Plus-graded Choice specimen of this early series branch mint issue, with well-detailed design elements and vibrant mint luster on both sides. The pleasing orange-gold surfaces are lightly marked and appealing. NGC ID# 26FG, PCGS# 9155

**1910-S Saint-Gaudens Double Eagle, MS64
Nice Luster and Color**

- 5116 1910-S MS64 PCGS.** CAC. From a mintage of more than 2.1 million pieces, this attractive CAC-endorsed Choice example shows bold motifs and satiny yellow-gold luster, with only minor signs of contact. The 1910-S is available in this grade, but the present coin stands out among its peers with regards to eye appeal. CAC: 80 in 64, 6 finer (4/17). NGC ID# 26FH, PCGS# 9156

**1910-S Twenty Dollar, MS64+
Frosty Original Luster**

- 5117 1910-S MS64+ PCGS. CAC.** A better date at the Gem level, the 1910-S Saint-Gaudens double eagle is still collectible in Choice condition. This Plus-graded CAC coin offers a bold strike and frosty green-gold mint luster. Faint grazes here and there limit the grade, but none are noticed by the naked eye. CAC: 80 in 64, 6 finer (4/17). NGC ID# 26FH, PCGS# 9156

**1911 Double Eagle, MS64
Widely Exported**

- 5118 1911 MS64 NGC.** The 1911 was widely exported, mainly to Europe and South America. Repatriated coins account for examples collectors typically encounter is MS62 to MS64 condition. Green-gold dominates each side with radiant luster throughout. Occasional rose accents are seen. This near-Gem shows good detail, and marks are generally confined to the design elements, where they are somewhat hidden. NGC ID# 26FK, PCGS# 9157

- 5119 1911-D/D FS-501 MS64 PCGS.** A secondary D east of the primary D attributes this *Cherrypickers' Guide* variety. Peach-gold luster exudes from both sides of this near-Gem twenty, each of which exhibits well-struck design elements, especially Liberty's facial features and fingers. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

**1911-S Saint-Gaudens Twenty, MS65
Seldom Seen Any Finer**

- 5120 1911-S MS65 NGC.** The 1911-S Saint-Gaudens double eagle boasts a substantial mintage of 775,750 pieces and a number of coins have been repatriated from European and Central American holdings in recent times. Still, the 1911-S is a very scarce issue in grades above the MS65 level. This well-detailed Gem displays well-preserved orange-gold surfaces with vibrant mint luster throughout. NGC has graded 31 numerically finer examples (4/17). NGC ID# 26FL, PCGS# 9159

- 5121 1912 MS62 PCGS.** From a modest Philadelphia mintage of 149,700 pieces, this impressive MS62 example displays well-detailed design elements and lustrous orange-gold surfaces with some scattered minor contact marks on both sides. NGC ID# 26FM, PCGS# 9160

**1913-S Saint-Gaudens Twenty, MS63
Low-Mintage, Early Series Issue**

- 5122 1913-S MS63 PCGS.** Excluding High Reliefs, three Saint-Gaudens issues have a mintage below 100,000 coins, and the 1913-S ranks second among them (34,000 pieces). All examples were struck in the final days of December 1913, and most Uncirculated 1913-S twenties show signs of rough handling. This copper and green-gold Select double eagle displays a typically incomplete strike on the Capitol and torch hand. Frosty luster rolls over each side. NGC ID# 26FR, PCGS# 9163

- 5123 1914-D MS65 NGC.** An available date in MS65, the 1914-D Saint-Gaudens double eagle becomes conditionally scarce just one grade point finer. The current coin offers a bold strike and vibrant yellow-gold mint luster. A few light marks are not out of line for the grade. NGC ID# 26FT, PCGS# 9165

- 5124 1914-S MS65 NGC.** From a substantial mintage of nearly 1.5 million pieces, the 1914-S Saint-Gaudens double eagle is not too difficult to locate in MS65 condition, but finer coins are scarce. This sharply detailed specimen is well-preserved and lustrous, with outstanding eye appeal. NGC ID# 82KA, PCGS# 9166

- 5125 1915-S MS65 NGC.** Sharp detail and original orange-gold luster give this Gem 1915-S double eagle attractive visual merit, while a lack of abrasions gives it technical importance. Finer examples of the date are elusive compared to MS65 coins. NGC ID# 26FW, PCGS# 9168

- 5126 1915-S MS65 PCGS.** This sharply struck Gem displays yellow-gold luster imbued with blushes of rose. A few minute marks are within the confines of the grade designation. NGC ID# 26FW, PCGS# 9168

- 5127 1915-S MS65 NGC.** This impressive Gem exhibits sharply detailed design elements throughout, and the well-preserved yellow and rose-gold surfaces radiate vibrant mint luster on both sides. Overall visual appeal is outstanding. NGC ID# 26FW, PCGS# 9168

- 5128 1916-S MS65 PCGS.** An attractive Gem representative of the final U.S. double eagle issued before the country entered World War I, this well-detailed specimen offers well-preserved orange-gold surfaces, with vivid color and vibrant mint luster throughout. NGC ID# 34NJ, PCGS# 9169

- 5129 1922 MS64+ PCGS. CAC.** A Plus-graded Choice example of this popular Philadelphia issue, with well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster from both sides. Overall eye appeal is quite strong. NGC ID# 26G3, PCGS# 9173

1922 Twenty Dollar, MS65
A Major Rarity One Grade Point Finer

- 5130 1922 MS65 NGC.** Although plentiful in MS65, the 1922 Saint-Gaudens double eagle is highly sought-after in this grade due to the remarkable rarity of finer coins — NGC has seen only nine Premium Gems and PCGS reports eight, both services with none in higher grades (4/17). This radiant Gem displays a bold strike and cartwheeling yellow-gold mint luster. Only a few small marks are seen under a glass. NGC ID# 26G3, PCGS# 9173

1922 Double Eagle, MS65
Rarely Seen Finer

- 5131 1922 MS65 PCGS.** Mint officials manufactured 1.3 million double eagles in 1922. Exportation resulted in a moderately high survival rate through MS65. Finer examples, however, are major condition rarities, with PCGS reporting merely eight higher grading events (5/17). This is a minimally abraded, wheat and rose-gold Gem Saint-Gaudens twenty with a touch of softness on the highest points. Die cracks appear on both sides. NGC ID# 26G3, PCGS# 9173

1922 Saint-Gaudens Double Eagle, MS65
Elusive Issue in Finer Grades

- 5132 1922 MS65 PCGS.** Although the 1922 Saint-Gaudens double eagle is a plentiful issue at the MS65 grade level, finer coins are decidedly rare. This attractive Gem offers well-detailed design elements, with just a touch of softness on the torch and Capitol building. The well-preserved orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. PCGS has graded eight numerically finer examples (4/17). NGC ID# 26G3, PCGS# 9173

1922 Twenty Dollar, MS65
Very Rare in Higher Grades

- 5133 1922 MS65 PCGS.** Sun-gold hues near the borders cede to lighter peach-gold coloration at the centers. Vibrant mint frost washes over this Gem double eagle without encumbrance. Liberty's face, the torch, and the Capitol dome display a touch of strike incompleteness, but the eye appeal more than makes up for it. Very rare in higher grades, with just eight finer coins at PCGS (4/17). NGC ID# 26G3, PCGS# 9173

1923 Twenty Dollar, MS65
Extremely Rare Any Finer

- 5134 1923 MS65 PCGS.** Frosty original luster displays rich rose-gold and peach-orange hues throughout the thick "skin" of this Gem 1923 Saint. The strike is bold, and Liberty's figure shows only a few high-point marks. An unobtrusive coppery alloy spot appears near the obverse rim at 9 o'clock, and a few other tiny ones are seen in the eagle's feathers. PCGS reports just four numerically finer representatives (4/17). NGC ID# 26G5, PCGS# 9175

1923 Twenty Dollar, MS65
Only Four Finer Examples

- 5135 1923 MS65 PCGS.** This Gem appears even finer than the grade suggests. The light orange-gold surfaces are remarkably smooth and thickly frosted, with small ticks only apparent upon close examination. A few coppery alloy spots occur on each side. The Capitol building and torch hand show bold detail, as do the eagle's feathers and talons. An amazing example surpassed merely four submissions at PCGS (5/17). NGC ID# 26G5, PCGS# 9175

**1923 Saint-Gaudens Twenty, MS65
Condition Rarity in Finer Grades**

5136 1923 MS65 PCGS. From an adequate mintage of 566,000 pieces, the 1923 Saint-Gaudens double eagle is not too difficult to locate in MS65 condition, but finer coins are almost unobtainable. This well-detailed Gem exhibits vivid orange-gold surfaces, with vibrant mint luster and remarkably few signs of contact. PCGS has graded four numerically finer examples (4/17). NGC ID# 26G5, PCGS# 9175

5137 1923-D MS65 PCGS. Yellow-gold luster imbued with hints of apricot reach out to the observer, enhanced by the sharply struck design elements. Liberty's facial features and fingers and the panes and pillars of the Capitol building are virtually fully impressed. NGC ID# 26G6, PCGS# 9176

5138 1923-D MS65 PCGS. Generally regarded as the best-produced and most attractive Saint-Gaudens issue, the 1923-D is often found with rich reddish-lilac hues. This piece has a different appearance, displaying remarkably bright, almost semiprooflike fields and even light, reddish patina. NGC ID# 26G6, PCGS# 9176

5139 1924 MS65 PCGS. Attractive orange accents embellish the frosted surfaces of this Gem 1924 double eagle. Only a few tiny, inconsequential marks exist on the softly lustrous, sharply struck yellow-gold fields and devices. Pleasingly original coloration and a strong peripheral strike deserve extra attention. NGC ID# 26G7, PCGS# 9177

5140 1924 MS65 PCGS. Along with the 1927 and 1928 issues, the 1924 is a favorite for gold accumulators and type collectors. This blaze-yellow example is a sharply struck and minimally marked Gem, ideal for either purpose. NGC ID# 26G7, PCGS# 9177

5141 1924 MS65 PCGS. The 1924 Saint-Gaudens double eagle is a plentiful issue in high grade and a favorite choice of type collectors. This well-detailed Gem offers well-preserved orange-gold surfaces with vivid color and vibrant mint luster on both sides. NGC ID# 26G7, PCGS# 9177

5142 1924 MS66 PCGS. The design elements of this spectacular Premium Gem are sharply defined throughout, and the impeccably preserved orange-gold surfaces radiate vibrant mint luster from both sides. Overall eye appeal is terrific. NGC ID# 26G7, PCGS# 9177

5143 1924 MS66 NGC. Lustrous yellow-gold surfaces exhibit well-struck design features. A few alloy spots are noted on the obverse. NGC ID# 26G7, PCGS# 9177

5144 1924 MS66 PCGS. Original straw-gold fields show no major abrasions, and even Liberty's figure has limited evidence of high-point contact. Satiny luster is pleasing on the eyes. The 1924 in this grade is highly popular as a Saint-Gaudens type coin. NGC ID# 26G7, PCGS# 9177

5145 1924 MS66 NGC. A common date but highly popular in the current high grade as a type coin. This Premium Gem 1924 Saint-Gaudens double eagle offers a sharp strike and particularly well-preserved, frosty surfaces with original yellow-gold coloration. The 1924 is infrequently available finer. NGC ID# 26G7, PCGS# 9177

5146 1925 MS65 PCGS. Frosty original luster gives this Gem 1925 double eagle excellent visual appeal, while the design elements are sharp and there are no major abrasions. A loupe reveals a few tiny copper spots on the obverse, which are virtually invisible to the unaided eye. NGC ID# 26GA, PCGS# 9180

5147 1925 MS65 PCGS. From a mintage of 2.8 million pieces, the 1925 Saint-Gaudens double eagle is an available date in high grade and a popular choice of type collectors. This sharply detailed Gem exhibits well-preserved orange-gold surfaces with vibrant mint luster throughout. NGC ID# 26GA, PCGS# 9180

5148 1925 MS66 PCGS. A delightful Premium Gem representative of this popular Philadelphia issue, with sharply detailed design elements and vibrant mint luster throughout. The impeccably preserved orange-gold surfaces show a few dark alloy spots on both sides. PCGS has graded seven numerically finer examples (4/17). NGC ID# 26GA, PCGS# 9180

5149 1926 MS65 PCGS. A delightful Gem specimen of this popular Philadelphia issue, with vibrant mint luster and vivid orange-gold surfaces that show no mentionable distractions. The design elements are sharply detailed and eye appeal is terrific. NGC ID# 26GD, PCGS# 9183

5150 1927 MS65 PCGS. Potent, frosty rose-gold luster cascades down each side of this Gem 1927 Saint-Gaudens double eagle. The strike is bold, and the only grade-limiting marks are mostly restricted to the high points of the devices, as usual. The coin appears mint-fresh and is thoroughly pleasing. NGC ID# 26GG, PCGS# 9186

5151 1927 MS65 PCGS. Olive-green dominates though peach-red fills recesses portions of the motifs. This highly lustrous Gem has a bold strike and good eye appeal. Visible marks are confined to the sun. Housed in a first generation "old rattler" holder.
Ex: ANA Signature (Heritage, 2/2014), lot 5631; Long Beach Signature (Heritage, 9/2016), lot 5192. NGC ID# 26GG, PCGS# 9186

5152 1927 MS65 PCGS. An affordable issue at the Gem level, the 1927 ranks high on the list of attractive double eagles from the Saint-Gaudens series. This minimally abraded MS65 coin flashes gold and green highlights over pleasing sun-gold surfaces. A sharp strike adds to the appeal. NGC ID# 26GG, PCGS# 9186

5153 1927 MS66 PCGS. The 1927 Saint-Gaudens double eagle is very scarce in grades above the MS66 level. This sharply detailed Premium Gem offers well-preserved orange-gold surfaces with vibrant mint luster and outstanding eye appeal. PCGS has graded 22 numerically finer examples (5/17). NGC ID# 26GG, PCGS# 9186

**1927 Double Eagle, MS66+
Few Available Finer**

5154 1927 MS66+ PCGS. The 1927 twenty is famous for being plentiful in Mint State, although it is conditionally rare in Superb Gem condition, where PCGS has seen only 22 coins (4/17). This Plus-graded MS66 example offers a more affordable option for the average collector without sacrificing much in the way of quality. Particularly vibrant orange-gold mint luster shows no distracting abrasions, and the design elements are boldly brought up. The coin looks equally fine under a loupe or at arm's length. NGC ID# 26GG, PCGS# 9186

- 5155 1928 MS65 PCGS.** An attractive Gem example of this extremely popular type coin, with sharply detailed design elements and vibrant mint luster on both sides. The orange-gold surfaces are well-preserved and eye appeal is outstanding. NGC ID# 34VK, PCGS# 9189
- 5156 1928 MS65 PCGS.** The well-preserved orange-gold surfaces of this delightful Gem display vibrant mint luster and vivid color throughout. The design elements are sharply detailed and overall eye appeal is terrific for this exceptional Saint-Gaudens type issue. NGC ID# 34VK, PCGS# 9189
- 5157 1928 MS65+ PCGS.** This Philadelphia issue is perfectly suited for type representation. Nearly 9 million coins were struck, and thousands survive in high grades. Here is a glowing, strongly defined Gem that displays upper-end quality for the grade. Deep orange-gold borders blend with light rose-gold centers. NGC ID# 34VK, PCGS# 9189

TERRITORIAL GOLD

- 5158 (1837-1842) C. Bechtler Five Dollar, RUTHERF., 128 G. K-23, R.5 — Repaired, Plugged, Whizzed — ANACS. XF40 Details.** Despite multiple problems, this bright, greenish-gold representative of early Georgia pioneer gold is an acceptable example of Christopher Bechtler's well-received private mint issues struck in Rutherford, North Carolina. Georgia gold was slightly finer than its nearby North Carolina bullion, a fact that did not escape Bechtler's penchant for accuracy and fair dealing. Listed on page 393 of the 2018 *Guide Book*.

CALIFORNIA FRACTIONAL GOLD

1868 Liberty Octagonal 25 Cents, MS66 BG-710, Rarely Offered in Any Grade

- 5159 1868 Liberty Octagonal 25 Cents, BG-710, R.6, MS66 NGC.** Diagnostic markers for this "Muscle Head" variety include the first star left of the chin rather than below, and the letters in DOLLAR successively lower. This impeccable Premium Gem boasts shimmering luster over pristine, green-gold surfaces. Sharply struck despite the somewhat crude design. Opportunities to acquire an example in any grade are very rare. Census: 3 in 66, 3 finer (4/17). NGC ID# 2BML, PCGS# 10537

- 5160 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Musante GW-818, Low R.4, MS62 PCGS.** A collectible Washington Head octagonal quarter dollar. This Mint State example offers sharp detail on the stars and wreath with a hint of reflectivity in the fields, mostly of the reverse. Bright yellow-gold color reveals shades of peach and silvery lavender upon close inspection. NGC ID# 2BN4, PCGS# 10549

- 5161 1870 Liberty Round 25 Cents, BG-808, R.3, MS67 PCGS.** A fairly plentiful Period Two round quarter dollar by Frontier & Co., although seldom offered in this fine level of condition. This Superb Gem displays satiny luster rather than prooflike fields, and the yellow-gold surfaces are devoid of abrasions. Minor strike softness is seen in the centers, as usual. NGC ID# 2BSW, PCGS# 10669

- 5162 1874 Liberty Round 50 Cents, BG-1033, R.5, MS65 Prooflike NGC.** Die State II, cracked on the obverse from star 6 through the portrait. A scarce Period Two round half dollar variety made by Herman J. Brand of San Francisco. This example is the sole finest at NGC and is tied with one other Gem at PCGS as the finest known (4/17). The strike is soft at the centers as usual, while each side exhibits cameo contrast. No edge clip is seen on this example, although it may be hidden by a holder tab. NGC ID# 2BZE, PCGS# 710862

- 5163 1868 Indian Round 50 Cents, BG-1073, High R.7 — Improperly Cleaned — NGC Details. Unc.** The 1868 Indian round half dollar is a "backdated" issue struck by Christopher Mohrig. This impressive specimen shows no actual wear, but the strike shows the usual softness in the centers, especially on the reverse. The prooflike surfaces show a number of minor contact marks and signs of a light cleaning.

1870 Robert Gray Round Liberty Dollar, MS62 BG-1203

- 5164 1870 Liberty Round 1 Dollar, BG-1203, Low R.5, MS62 NGC.** State I. Early die state examples, such as this one are considered very rare. The Robert Gray design uses an undated stock reverse. Unlike many California fractionals, the fields on this piece are only moderately reflective, not deeply so as often seen. Medium density golden-orange color shows the occasional dash of lilac intermixed. A few shallow abrasions explain the grade. NGC ID# 2C42, PCGS# 10948

- 8503** 2015 One-Ounce Gold Buffalo — Struck Thru — MS69 NGC.
- 8504** 2017 Silver Eagle — Partial Collar Strike — MS69 PCGS.

CERTIFIED MODERN PROOF SETS

- 8505** Five-Piece 1940 Proof Set PR63 to PR65 PCGS. The lot includes: cent PR63 Red; Reverse of 1940 nickel PR65; dime PR65; quarter PR65; half dollar PR64.
- 8506** Five-Piece 1940 Proof Set PR65 to PR67 PCGS. The lot includes: cent PR65 Red; Reverse of 1940 nickel PR67; dime PR66; quarter PR67; half dollar PR66. (Total: 5 coins)
- 8507** Six-Piece 1942 Proof Set PR64 to PR65 PCGS. The lot includes: cent PR65 Red and Brown; Type One nickel PR64; Type Two nickel PR64; dime PR65; quarter PR64; half dollar PR64.

PROOF SETS

- 8508** Unopened 1952 and 1954 Proof Sets. The two proof sets remain sealed within their Treasury-issued pale green-gray square boxes.

MINT SETS

- 8509** Unopened 1956, 1957, and 1958 Double Mint Sets. The sets remain sealed within the mailing envelopes, respectively postmarked Feb. 2, 1957; May 9, 1958; and Feb. 5, 1959.

BETTS MEDAL

- 8510** 1670 British Colonization Medal AU58 NGC. Betts-44, ML-446-203. Silver, 42mm.

WASHINGTONIA

- 8511** 1883 Washington Statue in Wall Street MS64 Uncertified. Baker S-319, Musante GW-981. Bronze, 58mm. Plain edge. The original printed A.N.S. cardboard holder accompanies the lot.
- 8512** 1883 Evacuation Day Centennial, City of New York, Uncertified. Baker-458A, Musante GW-1012. White metal, 33mm. Plain edge. Uncirculated but holed as issued, with eagle and cannons bronze hanger attached.

LINCOLN

- 8513** 1865 Broken Column MS62 NGC. King-247, Cunningham-9-460W. White metal, 51mm.
- 8514** 1909 Abraham Lincoln, With Malice Toward None, MS63 Brown NGC, King-314, Cunningham-11-490C, copper, 51mm; 1909 Abraham Lincoln, With Malice Toward None, MS64 NGC, King-314, Cunningham-11-490W, white metal, 51mm. (Total: 2 medals)
- 8515** 1909 Abraham Lincoln Memorial Building MS62 NGC. King-315, Cunningham-11-500Ls. Silvered lead, 51mm.
- 8516** A Pair of Undated Uniface Lincoln Counterstamps. A 29mm copper disc and a 29mm silver (?) disc each exhibit a well-centered counterstamp of a naked head-and-shoulders bust right of Lincoln on a plain field. Lincoln has a ponytail more suitable for a founding father such as Washington or Jefferson. (Total: 2 tokens)

U.S. PRESIDENTS & STATESMEN

- 8517** (1856) John C. Fremont Campaign Medal AU50 NGC. DeWitt-JF-1856-8. Brass, 28mm. Reeded edge.

U.S. MINT MEDAL

- 8518** 1847 Washington Allston Medal MS63 Uncertified. Julian-PE-3. Bronze, 63mm. Plain edge. Included is the leather holder of issue with red velvet interior.

- 8519** 1865 Abraham Lincoln Presidential Medal MS64 NGC. King-518, Julian-PR-12, Cunningham-22-240CBz. Bronzed copper, 77mm.

SO-CALLED DOLLARS

- 8520** 1878 Valley Forge Centennial MS63 Brown NGC. Baker-449A, HK-137, Julian-CM-48c, Musante GW-959. Bronze, 41mm. Plain edge.

- 8521** 1914 Panama Canal Completion Medal, Serial #1762, MS64 NGC. HK-398. Bronze, plain edge. Included with the lot is the original plain cardboard holder for the medal.

- 8522** 1889 Troy, NY, Centennial MS64 Uncertified. HK-Unlisted. Bronze, 51mm. Plain edge. Hanger attached, as issued. Original leather holder, with velvet-lined interior, included with lot.

EXPOSITIONS AND FAIRS

- 8523** 1893 World's Columbian Exposition, 1892 Liberty Head, High Relief, MS63 NGC. Eglit-101. Aluminum, 90mm.

CIVIL WAR TOKEN

- 8524** 1861 Adam J. Slemmer, Fort Pickens Defended Medal MS63 Uncertified. Copper electrotpe, 64mm. Dies by Müller. Housed in the holder of issue.

U.S. TRADE TOKENS (1866-1889)

- 8525** 1867 New Masonic Temple, Boston, MA, XF45 NGC. Rulau-Ma-Bo-60. White metal, 31mm.

WESTERN SOUVENIR GOLD

- 8526** 1902 Alaska Gold 1/4 Pinch, Head Left, Octagonal, MS67 NGC. AIOQ-3, R.7. Hart's Coins of the West. Die varieties listed at MEHartGold.com.

- 8527** 1909 Alaska Gold 1/2 DWT MS66 NGC. AMRH-1, R.6. Hart's Coins of the West. Medal turn. Die varieties listed at MEHartGold.com.

- 8528** 1860 California Gold 1/4, Indian, Bear, Round, MS65 NGC. CIRQ-4, R.7. Hart's Coins of the West. Die varieties listed at MEHartGold.com.

MISCELLANEOUS MEDALS AND TOKENS

- 8529** 1881 "Cleopatra's Needle" Egyptian Obelisk Erected in New York MS64 Uncertified. White metal, 42mm. Plain edge. The printed cardboard holder of issue is included.

- 8530** 1886 David Carnegie Medal MS60 Uncertified. Silver, 48mm. Plain edge. Dies by Lea Ahlborn. Accompanied by the leather holder of issue, with paper affixed to bottom with notation "to Miss Hammond with kindest regards of Lea Ahlborn at the honored visit in my studio in the Royal Mint, Stockholm."

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

- All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots (the Buyer's Premium is 19.5% for auctions in Hong Kong), and except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty percent (20%) on Sports Collectibles lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$250,000, plus twenty percent (20%) of any amount between \$250,000 and \$2,500,000, plus twelve percent (12%) of any amount over \$2,500,000.
- Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

- Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
- All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
- If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

- In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

- Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.xz#biddingTutorial>.
- Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
- Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
- Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see [HA.com/c/ref/web-tips.xz#guidelines-increments](http://www.ha.com/c/ref/web-tips.xz#guidelines-increments)).

Current Bid	Bid Increment
< \$10.....	\$1
\$10 - \$49.....	\$2
\$50 - \$99.....	\$5
\$100 - \$199.....	\$10
\$200 - \$499.....	\$20
\$500 - \$999.....	\$50
\$1,000 - \$1,999.....	\$100
\$2,000 - \$4,999.....	\$200
\$5,000 - \$9,999.....	\$500

Current Bid	Bid Increment
\$10,000 - \$19,999.....	\$1,000
\$20,000 - \$49,999.....	\$2,000
\$50,000 - \$99,999.....	\$5,000
\$100,000 - \$199,999.....	\$10,000
\$200,000 - \$499,999.....	\$20,000
\$500,000 - \$999,999.....	\$50,000
\$1,000,000 - \$4,999,999.....	\$100,000
\$5,000,000 - \$9,999,999.....	\$250,000
>= \$10,000,000.....	\$500,000

- If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

- Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE

HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

- The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any
- Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
- Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
- Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
- All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
- Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
- Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
- The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
- The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

- All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
- Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer..
- Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
- In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
- If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
- In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
- Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
- Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its

Terms and Conditions of Auction

affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery; Shipping; and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping-zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature). Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:

- Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
- Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
- Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and /or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, pursue the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This is a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Terms and Conditions of Auction

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reclassified to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

Notice as to an Auction in New York City

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 6-8-2016

WHY CHOOSE HERITAGE AUCTIONS?

LEADERS The world's largest collectibles auctioneer and the 3rd largest auction house in the world.

LOCATIONS Dallas, New York, Beverly Hills, San Francisco, Chicago, Palm Beach, Paris, Geneva, Amsterdam and Hong Kong.

TECHNOLOGY On an average day, more than 37,000 unique collectors visit our website. HA.com receives significantly more traffic than Christies.com and Sothebys.com combined! (Source: SimilarWeb.com)

RESULTS 1+ million online bidder-members from 186 countries and \$850 million in 2016 sales.

TRUST Knowing that your treasures are being researched and valued by leading experts using current market reports.

INTEGRITY From your first phone call to our last handshake, your collection is handled with the utmost care and priority.

TRANSPARENCY No hidden reserves. No hidden fees.

QUALITY A commitment to exceptional customer service, attention to detail and first-class marketing efforts to bring a worldwide audience to your treasures.

TIMELY PAYMENT Each of our 45,000+ consignors have received their settlement checks in full and on time, without exception.

EXPERTISE Our success depends on providing clients with the best possible advice.

EFFICIENCY We focus on helping clients save valuable time and resources.

INNOVATION We continually make our services more accessible and useful.

LONG-TERM PERSPECTIVE We strive to carefully construct only sustainable, win-win agreements with clients and partners.
